Page 258 1 you weren't participating from 2021 to 2024 you were 2 receiving a grade? 3 MR. MARCUS: Object to form. 4 A. I'm aware. 5 BY MS. BLAIR: 6 Q. And, in fact, we -- and you weren't 7 participating in the survey during that time, correct? 8 A. We were not. 9 Q. And we just saw several Exhibits where 10 Good Sam was monitoring its hospital safety grade, 11 correct? 12 MR. MARCUS: Object to form. 13 A. I would say that we know when the grades are 14 coming out and communication about the grades is 15 obviously in those emails. 16 BY MS. BLAIR: 17 Q. Okay. And you were looking for ways to 18 improve your Leapfrog score, correct? 19 MR. MARCUS: Object to form. 20 BY MS. BLAIR: 21 Q. You saw those emails earlier? 22 A. Right. 23 Q. And at no time did anybody from 24 Good Samaritan reach out to Leapfrog and say, "We 25 should not be graded because we're not participating in	Page 260 1 A. Yes. 2 Q. And would the medical staff be the medical 3 staff of Good Samaritan? 4 A. Yeah, I believe it went to the medical 5 staff. 6 Q. And attached to this email is a document 7 that says, "Palm Beach Health Network filed legal 8 Complaint against Leapfrog," correct? 9 A. Correct. 10 Q. And that message, if we turn to 8190... 11 THE VIDEOGRAPHER: Can I change the tape 12 while you do that? 13 MS. BLAIR: Yeah, sure. 14 THE VIDEOGRAPHER: This ends the media unit 15 three. We're going off the record 4:31 p.m. 16 (A recess was taken from 4:31 p.m. to 4:31 p.m.) 17 THE VIDEOGRAPHER: We are back on the 18 record. The time is 4:31 p.m. 19 BY MS. BLAIR: 20 Q. Okay. Ms. Montgomery, I was just asking you 21 about this attachment to your email, which is -- 22 appears to be authored by Maggie Gill, group president. 23 Do you see that? 24 A. Yes. 25 Q. Did you have any hand in drafting this
Page 259 1 your hospital survey," correct? 2 A. Not to my awareness. 3 Q. And I want to provide you with what we're 4 now going to mark as Exhibit 18. 5 THE STENOGRAPHER: 17. 6 MS. BLAIR: 17, yes, you're correct. 7 (Defendant's Exhibit Number 17 for i.d.) 8 BY MS. BLAIR: 9 Q. There is an email from you, Ms. Montgomery, 10 to Colleen Thielk dated May 1st, 2025. Do you see 11 that? 12 A. Yes. 13 Q. It is Bates labeled PBHN 1188 through 1191, 14 correct? 15 A. Yes. 16 Q. Your email says, "This went to GB and 17 medical staff," dot, dot. 18 Do you see that? 19 A. I do. 20 Q. And "GB" would be the governing board, 21 correct? 22 A. Correct. 23 Q. And as we discussed earlier today, the 24 governing board is Good Sam's board of directors, 25 correct?	Page 261 1 before you sent it to the governing board and the 2 medical staff? 3 A. I don't recall doing that, no. 4 Q. But you did, in fact, send it to the 5 governing board and medical staff per your cover email, 6 correct? 7 A. Yes. 8 Q. And if we look at the third full paragraph, 9 this document says, "Beginning last year, Leapfrog" -- 10 "Leapfrog began actively punishing hospitals that did 11 not pay to participate in its flawed survey." 12 Do you see that? 13 A. I do. 14 Q. That's not true, is it? 15 MR. MARCUS: Object to form. 16 A. Well, depends on how you want to look at it. 17 You're thinking money to directly to Leapfrog. Our 18 payment is the participation, and there's payment to 19 all of our staff that have to complete the survey. So 20 there is a form of payment. It's just not to Leapfrog. 21 BY MS. BLAIR: 22 Q. Okay. But you say here, "Punishing 23 hospitals that did not" -- you don't say "that did not 24 participate." You say "that did not pay to 25 participate," correct?

Page 262 1 MR. MARCUS: Object to form. 2 A. Correct. 3 BY MS. BLAIR: 4 Q. And you expect the reader to understand that 5 that means you didn't pay in terms of resources to 6 complete the survey, and they should not take that to 7 mean monetary payment? 8 MR. MARCUS: Same objection. 9 A. I didn't expect the readers to -- I wasn't 10 trying to do anything here. 11 BY MS. BLAIR: 12 Q. What do you think your governing board 13 thought when they read that you did not pay to 14 participate in the flawed survey? 15 A. My governing board knows exactly what it's 16 about, and they now how it works, and they know it's a 17 voluntary survey. 18 Q. So the word "pay," the rider is supposed to 19 believe that that is referring to the resources and 20 time to fill out the survey, correct? 21 MR. MARCUS: Object to form. 22 BY MS. BLAIR: 23 Q. That's your testimony? 24 A. That is the payment that I consider a 25 payment.	Page 264 1 Q. Would you agree with me, though, as we sit 2 here today that there is no money exchanged between 3 hospitals that participate in the survey and Leapfrog 4 for the hospitals' participation in the survey? 5 MR. MARCUS: Object to form. 6 A. A payment to Leapfrog -- 7 BY MS. BLAIR: 8 Q. Correct. 9 A. -- just to complete the survey? 10 Q. Correct. 11 A. I would agree with that statement. 12 Q. And we went over this earlier, but have you 13 ever seen a single document in this litigation that 14 Leapfrog pressures hospitals to pay for consulting 15 services in exchange for better grades? 16 A. I think the pressure really is to complete 17 the survey. 18 MS. BLAIR: I'm going to mark this one as 19 18. 20 (Defendant's Exhibit Number 18 for i.d.) 21 BY MS. BLAIR: 22 Q. Ms. Montgomery, I'm handing you now what 23 we've marked Exhibit 18, which is PBHN 8116. It's an 24 email from Shelly Weiss to several people, including 25 yourself, and the subject line is "CBS 12 Leapfrog
Page 263 1 Q. And if we start the sentence that starts on 2 the -- at the end of 8189, "In essence, Leapfrog, 3 issues a zero score." 4 Do you see that, where it says "zero score" 5 on the top of 8109? 6 A. Yes. 7 Q. "...for any survey fields left blank." 8 Is that true? 9 A. Actually, if you look at it, I guess three 10 of the areas are zero, which are -- well, they're N/A, 11 and the other four are, I would not say they were zero. 12 Q. Okay. And you understand that the Complaint 13 that was filed in this action also claims that there 14 are -- there was payment by hospitals to participate in 15 this survey. Do you understand that allegation is made 16 in this Complaint? 17 MR. MARCUS: Object to form. 18 A. I'd have to re-review the document. 19 BY MS. BLAIR: 20 Q. As you sit here right now, do you know 21 whether or not that allegation is made in the 22 Complaint? 23 MR. MARCUS: Same objection. 24 A. I don't recall. I'd have to see the form. 25 BY MS. BLAIR:	Page 265 1 Story." 2 And if we go down to the second to last full 3 paragraph at the end of the page, it starts, "The 4 hospital has accused Leapfrog," do you see that? 5 A. Okay. Yes. 6 Q. And the second sentence in that paragraph 7 says, "They allege Leapfrog pressures hospitals to pay 8 for consulting services in exchange for better grades." 9 It says, "...consulting services and 10 promotional licenses in exchange for better grades," 11 but I want to focus on consulting services. 12 Have you seen any documents in this 13 litigation to substantiate the allegation by these 14 hospitals, these plaintiff hospitals that Leapfrog 15 pressures hospitals to pay for consulting services? 16 MR. MARCUS: Object to form. 17 A. I have not. 18 BY MS. BLAIR: 19 Q. And have you ever seen any evidence that 20 payment for consulting services would be in exchange 21 for better grades? 22 MR. MARCUS: Same objection. 23 A. Say that again. 24 BY MS. BLAIR: 25 Q. Have you ever seen any evidence in this --

Page 266 1 produced in this litigation or anywhere else that 2 Leapfrog pressures hospitals to pay for consulting 3 services in exchange for better grades? 4 MR. MARCUS: Same objection. 5 A. Like I said before, I'd say the pressure is 6 completing the survey. 7 BY MS. BLAIR: 8 Q. That's not what this says. This says, 9 "pressures hospitals to pay for consulting services." 10 This isn't even related to the survey, is it? 11 MR. MARCUS: Object to form. 12 A. From what I'm reading. 13 BY MS. BLAIR: 14 Q. Okay. But have you ever seen any evidence 15 that hospitals pay Leapfrog for consulting services in 16 exchange for better grades? 17 A. I have not. 18 Q. And we talked a little bit about the 19 methodology prior to fall of 2024, and you would agree 20 with me that the seven measures that you keep 21 discussing consists of three measures for which a 22 nonparticipating hospital gets an N/A and four measures 23 for which there is an imputed score, correct? 24 A. Correct. 25 Q. And I asked you this before, but do you have	Page 268 1 fall of 2024 was based on how participating hospitals 2 were doing in those four measures on the Leapfrog 3 Hospital Survey? 4 MR. MARCUS: Object to form. 5 A. No. 6 BY MS. BLAIR: 7 Q. You don't understand that's how your scores 8 were being -- 9 A. No, I did not. 10 Q. Okay. Do you think that's a fair way of 11 doing the methodology to give nonparticipating 12 hospitals a score based on how participating hospitals 13 were performing on those four measures? 14 A. No. 15 Q. And we saw several emails -- or, sorry, 16 several Exhibits which were emails, which I believe 17 were probably Exhibits 11, 12, 13, 14, about how 18 Taylor Pool was advising you regarding Leapfrog 19 measures in which Good Samaritan was lagging behind its 20 competitors. 21 Do you recall seeing those Exhibits? 22 MR. MARCUS: Object to form. 23 A. I recall seeing where she was saying where 24 the opportunities were, yes. 25 BY MS. BLAIR:
Page 267 1 an understanding as to how the imputed score for those 2 four measures was decided prior to fall of 2024? 3 A. No. 4 Q. Okay. Do you believe that under the prefall 5 of 2024 grading system it was deceptive of Leapfrog not 6 to tell consumers that Good Samaritan was actually 7 earning 100 points for those four measures without 8 providing any data? 9 MR. MARCUS: Object to form. 10 A. Do I think it was deceptive of Leapfrog? 11 BY MS. BLAIR: 12 Q. Correct. 13 A. My thoughts is we should -- as long as we 14 weren't participating, we shouldn't have had a grading 15 period. 16 Q. Right. And so my question is, you did have 17 a grade, correct? 18 A. We did have a grade. 19 Q. And for those four measures that we call the 20 imputed measures, Good Samaritan was getting a perfect 21 score for those four measures prior to the fall of 22 2024, correct? 23 A. Correct. 24 Q. And do you have an understanding that the 25 grade that Good Samaritan was receiving prior to the	Page 269 1 Q. And none of those measures were the four 2 imputed measures, correct? 3 MR. MARCUS: Same objection. 4 A. I don't recall. I don't think so. 5 BY MS. BLAIR: 6 Q. Okay. Do you believe that Good Samaritan 7 was gaming the system by riding the coattails of other 8 hospitals in their cohort to get 100 percent on the 9 four imputed measures prior to the fall of 2024? 10 A. We didn't give ourselves those grades so we 11 weren't gaming anything. 12 Q. But, in fact, you were getting the same 13 grades as other hospitals in your geographic area that 14 were participating in the survey, were you not? 15 A. That's what you're telling me. 16 Q. Do you believe the scores that 17 Good Samaritan was receiving on the four imputed 18 measures, BCNA, CPOE, hand hygiene and ICU physician 19 staffing, prior to the fall of 2024 accurately 20 reflected Good Samaritan's performance on those 21 measures? 22 MR. MARCUS: Object to form. 23 A. Well, from what you showed me on that report 24 card, if it's 100 percent on every measure, I don't 25 know. I'd have to look and see what everything is now.

Page 270 1 I mean, I would think most hospitals aren't perfect, 2 but depends on everything that the survey asks. I'd 3 have to go through it. 4 BY MS. BLAIR: 5 Q. Do you have any understanding as to why 6 Leapfrog implemented the scoring change in fall of 2024 7 with respect to those four measures? 8 A. No. 9 Q. Have you ever looked at the members of the 10 Leapfrog safety grade expert panel? 11 A. I don't believe so. 12 Q. So as you sit here today, you have no 13 understanding of whether or not the members of the 14 Leapfrog safety grade expert panel are qualified to 15 provide expert opinions about imputation modeling for 16 those four measures? 17 MR. MARCUS: Object to form. 18 A. I don't recall. I mean, I only remember 19 talking about their advisory board once, but I don't 20 think that, obviously, is the same people. 21 BY MS. BLAIR: 22 Q. Okay. Do you have an understanding that 23 there is an expert panel that volunteers for Leapfrog 24 that puts together the 22 measures, the weights, the 25 Z scores and the imputation model for its hospital	Page 272 1 improvement plans in place for Good Samaritan? 2 MR. MARCUS: Object to form. 3 A. Like in general? 4 BY MS. BLAIR: 5 Q. Yeah, in general. 6 A. I mean, we have quality improvement plans 7 all the time, on patient falls, you know, on HCAHPS, 8 pressure ulcers, all of those things. 9 Q. Did you understand that the improvement 10 plan -- I think it's Exhibit 16, but I could be wrong, 11 the improvement plan that was being discussed, yes, in 12 Exhibit 16, with Press Ganey was specific to CMS 13 measures? 14 MR. MARCUS: Object to form. 15 A. Would I say that that's what they were 16 referring to? 17 BY MS. BLAIR: 18 Q. Well, yes, I'm just trying to understand. I 19 understand you're a hospital so you have improvement 20 plans all the time. So why did you need a specific 21 Tenet Palm Beach group improvement strategy with 22 Press Ganey as opposed to the quality improvement plans 23 you already had in place? 24 MR. MARCUS: Same objection. 25 A. Colleen, from my understanding on this,
Page 271 1 safety grade methodology? 2 MR. MARCUS: Object to form. 3 A. I mean, I do now. 4 BY MS. BLAIR: 5 Q. Did you before? 6 A. I don't know who they employ. 7 Q. Well, they don't employ anybody. 8 A. Who they volunteer, who they have helping 9 them with their survey. 10 Q. So you don't know today who those people 11 are, correct? 12 A. I don't. 13 Q. And so you don't have an opinion one way or 14 the other whether they're qualified to provide opinions 15 about grading hospitals on patient safety, correct? 16 A. I cannot comment on that. 17 Q. Have there ever been any discussions at the 18 Med Exec level about the fact that Good Samaritan has a 19 one-star CMS rating? 20 A. Not that I recall. 21 Q. Prior to January 2025, and we saw that email 22 where the hospitals in the Palm Beach Health Network 23 engaged Press Ganey to do an improvement plan. And 24 that was January 2025. 25 Prior to that were there any quality	Page 273 1 Colleen reached out to Press Ganey to have them come 2 and visit because we were looking at patient 3 satisfaction and wanting to improve it. 4 This headline that this person from 5 Press Ganey is saying, she's like, you know that we can 6 go visit your other hospitals. 7 BY MS. BLAIR: 8 Q. Um-hum. 9 A. I recommend conducting similar baseline 10 observations at Palm Beach Gardens, Delray Medical 11 Center, et cetera, et cetera. 12 So to me, this Tenet Palm Beach group 13 improvement strategy is something that Press Ganey, in 14 my thoughts, are, you know, saying, Well, we should go 15 out to all the other hospitals as well. 16 Q. Well, if I read last page of this Exhibit, 17 5829, Maika Joiner said to Kate Bergez "Good morning, 18 Kate. Colleen Thielk and Mellissa Heath, clinical ops 19 director from Good Sam, reached out last month to 20 improve HCAHPS performance." 21 Do you see that? 22 A. Correct. 23 Q. And HCAHPS, as I understand it, is a CMS 24 measures, correct? 25 A. Correct.

Page 274 1 Q. And those are, in fact, patient experience 2 measures, correct? 3 A. That's correct. 4 Q. So my question is, do you know whether or 5 not this improvement strategy was specifically related 6 to HCAHPS? 7 MR. MARCUS: Object to form. 8 A. This was, yes. 9 BY MS. BLAIR: 10 Q. Okay. Prior to this discussion in January 11 of 2025, had Good Samaritan had any specific quality 12 improvement strategies with respect to patient 13 experience/HCAHPS? 14 A. Yes. We talked about them earlier. 15 Q. Okay. 16 A. Leadership rounding. 17 Q. Yes, we did. Thank you. It's been a long 18 day. I forgot. 19 Prior to June of 2024 as the CEO of 20 Good Samaritan, what did you consider to be the areas 21 in most need of improvement for patient safety for 22 Good Samaritan? 23 A. Prior to June? 24 Q. Of 2024. 25 A. June 2024. It was back to the balanced	Page 276 1 A. I don't. 2 (Defendant's Exhibit Number 19 for i.d.) 3 BY MS. BLAIR: 4 Q. If we look at, we'll mark this as 5 Exhibit 19. If you look at Exhibit 19, this is an 6 email string PBHN 5132 through PBHN 5137. 7 And if we go all the way to the back of this 8 document, you'll see there's an email on page 5136 from 9 Anna Gunod to DLDCQI only. 10 "Good morning quality leaders. I'm doing an 11 annual check-in on Leapfrog participation." 12 Do you see that? 13 A. Um-hum. 14 Q. Did you have any understanding that there 15 was an annual check-in on the Leapfrog participation? 16 MR. MARCUS: Object to form. 17 A. No. 18 BY MS. BLAIR: 19 Q. And Regina West responds, "PBHN are not 20 participating," correct? 21 A. Correct. 22 Q. And then if we go to PBHN 5134, and it 23 starts, Regina West email to Ann Gunod starts at the 24 bottom of that page and goes on to 5135, she says, "We 25 would like to participate in the next survey. Are we
Page 275 1 scorecard that really encompasses so much about patient 2 safety would be, you know, we would always try and 3 improve on our HCAHPS, anything related to patient 4 safety that we track, you know, fall, HAIs. To me if 5 you have more than one infection, that's one too many. 6 We want to have zero. So to me, it's a continuous, you 7 know, monitoring of all of those indicators in trying 8 to get to zero ultimately. So we're always going to 9 continue to make all of those things priorities and 10 continue to improve. 11 Q. Was there any measure that you thought was 12 way lower than the others that really needed some? 13 A. Well, if you look where you're not meeting 14 national averages, you obviously would focus on those 15 areas, too, but all mortalities are important to me; 16 all HCAHPS are important to me, whether we're meeting 17 the national average or not. 18 Q. Okay. Were you aware that in June of 2024, 19 Leapfrog put out a statement or a request for public 20 comment about the methodology change that was going to 21 occur in fall of 2024? 22 A. I don't recall. 23 Q. Do you know when the first time it was 24 brought to your attention that this methodology change 25 was going to occur?	Page 277 1 able? We have done this in the past so it would not be 2 new participation. Because we aren't participating, we 3 default to imputing" -- "imputed scoring. This takes 4 SMMC from 100 points in each of the categories below to 5 limited achievement scores." 6 Do you see that? 7 A. I do. 8 Q. Does this comport with your understanding 9 that the first time this was brought to your attention 10 would have been in or around September of 2024? 11 A. I don't remember the date, but I'm sure at 12 some point it leveled up. 13 Q. And, to your knowledge, no one at 14 Good Samaritan or any of the PBHN hospitals provided 15 comment, public comment to Leapfrog's request for 16 public comment regarding the change in the scoring 17 methodology, correct? 18 A. I'm not aware of anything, no. 19 Q. And if you look at that same page, 5134, 20 Anna Gunod says to Regina West, and Taylor Pool is on 21 this email too. "Hi, Gina, Leapfrog participation is 22 not supported unless it was directly tied to a 23 payment/contract or a local regulatory requirement." 24 Do you see that? 25 A. Which one was that on?

Page 278 1 Q. Oh, I'm sorry. 5134. 2 A. I got it. 3 Q. Do you see that? 4 A. Yes. 5 Q. What is your understanding of what Anna 6 means by that comment? 7 A. I don't know. 8 Q. Did you have any understanding that your 9 hospital was not allowed to participate in this type of 10 event unless it was directly tied to payment contract 11 or local regulatory requirement? 12 A. No, that was not my understanding at all, 13 no. 14 Q. Okay. And then Regina says on 5133 to 15 Anna Gunod, and, again, Anna Gunod is at home office, 16 correct? 17 A. National director of infection prevention. 18 Looks that way, yes, I would say. 19 Q. And at the bottom of 5133 she responds, Gina 20 responds, "Although not supported, is it left up to the 21 local markets to decide or a strict no from HO?" 22 Do you see that? 23 A. Yes. 24 Q. Do you understand HO to mean home office? 25 A. Yes.	Page 280 1 Q. When do you recall it being? 2 A. I recall when a grade actually came out most 3 of the discussions, I mean, but I could be wrong. 4 Q. And do you know when the fall grade came out 5 for -- the fall of 2024 grades came out? 6 A. I think it was November. 7 Q. Right. And do you understand that Leapfrog 8 tells hospitals what their grades are going to be 9 before they come out? 10 A. Yes, I think there's like a short period of 11 time for some -- for what reason, I don't know, but... 12 Q. Do you understand that you can dispute your 13 grade with Leapfrog during that time period in which 14 the grades were under review? 15 MR. MARCUS: Object to form. 16 A. No. 17 BY MS. BLAIR: 18 Q. Okay. And for the fall 2024 grade, did 19 anyone at Good Samaritan reach out to Leapfrog to 20 object to the grade that they were going to receive? 21 MR. MARCUS: Object to form. 22 A. Not to my knowledge. 23 MS. BLAIR: Can you mark this as Exhibit 20? 24 (Defendant's Exhibit Number 20 for i.d.) 25 BY MS. BLAIR:
Page 279 1 Q. Okay. And then Anna writes at the top of 2 this page, "It is a no from home office. Facilities 3 who need an exception due to Leapfrog participation 4 being tied to a local requirement contract or 5 compliance or reimbursement needs to submit their case 6 for review by Dr. Franklin." 7 Do you see that? 8 A. I do. 9 Q. Do you know whether or not Good Samaritan or 10 any of the PBH hospitals submitted a request to 11 Dr. Franklin for participation? 12 A. I'm not aware. 13 Q. Okay. And at the bottom of 5132 Taylor Pool 14 writes to Colleen Thielk, "Sharing home office response 15 below about Leapfrog participation. The scoring system 16 now penalizes hospitals for not participating. We can 17 expect to be an F for the next reporting period due to 18 change." 19 And then Colleen sends that to you with an 20 FYI, correct? 21 A. Yes. 22 Q. What is your memory about any discussions 23 that were occurring in or around September of 2024 24 about the change in the Leapfrog methodology? 25 A. I don't recall it really being in September.	Page 281 1 Q. Ms. Montgomery, I'm sharing with you now an 2 email from Taylor Pool dated 11-4-24 to you CCing 3 Colleen Thielk. On the first page of this, PBHN 5120, 4 Taylor writes, "A hospital onset C. diff case was 5 identified. This brings us 15 infections year to date. 6 We cannot have another C. diff infection through the 7 end of November in order to remain green on BSC." 8 Do you see that? 9 A. I do. 10 Q. What does "remain green on BSC" mean? 11 A. Meet your target. 12 Q. Okay. And then if we look down at the 13 bottom paragraph of this page, it says, "Home office 14 has identified issues with the data collection and 15 pulled the DCQIs across the enterprise together last 16 week." 17 Do you see that? 18 A. Yes. 19 Q. Is that referring specifically to PROMs, or 20 is that referring generally to issues with data 21 collection? 22 MR. MARCUS: Object to the form. 23 A. I don't know. 24 BY MS. BLAIR: 25 Q. Okay. And if we look at the last page or

Page 282 1 the next page, I'm sorry, 5121, number three says, 2 "Leapfrog," correct? 3 A. Yes. 4 Q. And he says here, "Basically we were 5 used" -- "we used to receive 100 percent credit and we 6 now receive a negative score." I said "he." Her. 7 Do you see where it starts basically in the 8 middle of that paragraph? 9 A. Yes. 10 Q. Is it your understanding you received a 11 negative score for these four measures? 12 A. I think the negative means, you know, a 13 penalty. I'm not sure what the weighting of it says on 14 the right-hand side of the scorecard, but it's a 15 punitive negative. 16 Q. And Taylor goes on to say, "Additionally, we 17 received negative scores for all five patient 18 experience measures." 19 Do you see that? 20 A. Yes. 21 Q. And those patient experience measures would 22 have come from CMS data, correct? 23 A. Yes. 24 Q. And then Taylor goes on to say, "The top 25 five most negative scores are for PE discharge, PE	Page 284 1 December of 2024 around the Leapfrog safety grade that 2 had been published? 3 A. Yes. 4 Q. And, to the best of your memory, why was 5 there a lot of discussion about that? 6 A. The failing grades. That's why. 7 Q. Okay. How did it first come to your 8 attention that there were -- well, strike that. 9 Who complained to you about the failing 10 grades, if anyone? 11 A. Who complained to me? 12 Q. Um-hum. 13 A. I mean, many people complained to me. 14 Q. And who are the "many people"? 15 A. Do you have a couple hours? Probably mostly 16 governing board, physicians, you know, people in the 17 community, people that I know personally, just, I mean, 18 it was -- it was a big deal to have a failing grade. 19 Q. And you went from a C to a D, correct? 20 A. First we went from a C to an F and then from 21 an F to a D. 22 Q. Oh, okay. So your grade went up in spring 23 of 2025, correct? 24 A. Yes. 25 Q. Do you recall asking Andrew Lofholm in
Page 283 1 communications about medication, PE nurse 2 communication, PE staff response and CPOE." 3 Do you see that? 4 A. I do. 5 Q. And so while CPOE is one of the most 6 negative scores that Taylor puts out there, she 7 certainly is informing you that there are other very 8 negative scores on the Leapfrog survey that come from 9 CMS data, correct? 10 MR. MARCUS: Object to form. 11 A. Yes. 12 BY MS. BLAIR: 13 Q. Do you have any reason to believe that 14 Taylor Pool's discussion in that regard with respect to 15 the top five most negative scores was wrong in any way? 16 A. I don't. 17 Q. And, in fact, in the fall of 2024 18 Good Samaritan received a D, correct? 19 A. In the fall, yes. 20 Q. What do you recall about discussions, if 21 any, that occurred around the fact that Good Samaritan 22 received a D in the fall of 2024 on the Leapfrog 23 hospital safety grade? 24 A. I don't really recall any discussions. 25 Q. Do you recall there was a lot of activity in	Page 285 1 December of 2024 to do research on articles critical of 2 Leapfrog? 3 MR. MARCUS: Object to form. 4 A. I don't recall exactly what -- I'm sure we 5 talked about a lot of things regarding Leapfrog. 6 BY MS. BLAIR: 7 Q. Once you were told by home office that it 8 was a no and the Palm Beach Health Network hospitals 9 could not participate in the Leapfrog survey, did you 10 as the president of Good Samaritan come up with another 11 strategy to combat the Leapfrog hospital safety grade? 12 MR. MARCUS: Object to form. 13 A. No, other than doing what we do every day 14 and provide great care, we continue to provide great 15 care and have our processes in place to show that we 16 are a quality hospital. 17 BY MS. BLAIR: 18 Q. In December of 2024, were you as the CEO of 19 Good Samaritan contemplating a lawsuit against 20 Leapfrog? 21 A. In December? 22 Q. Yes, in December of 2024. 23 A. So it was even brought up at my Med Exec 24 committee talking about that we should sue Leapfrog 25 after they understood how things worked, so there was

Page 286 1 discussions around that time that, you know, that some 2 action should be taken. 3 Q. And when you say -- when you say the 4 Med Exec committee talking about what -- talking about 5 that we should sue Leapfrog after they understood "how 6 things worked," how did they understand things worked? 7 What are you referring to there? 8 A. When they realized that it was a voluntary 9 survey and that there are measures in there that 10 Leapfrog takes or imputes us and penalizes us for not 11 responding, so, in essence, the survey is not accurate. 12 Q. Was the Med Exec under the impression, as 13 we've seen in the press coverage and different emails 14 in this lawsuit, that other hospitals that participated 15 in the survey were paying Leapfrog for better grades? 16 MR. MARCUS: Object to form. 17 A. I don't know if that was their impression. 18 BY MS. BLAIR: 19 Q. Did you tell them that? 20 A. I did not. 21 Q. Do you know if anybody told the Med Exec 22 that the reason other hospitals were getting better 23 grades is because they were paying Leapfrog for those 24 grades? 25 A. I have no idea whether people said those	Page 288 1 hospitals on site. That's the only way you can verify 2 the information is accurate. 3 Q. But you don't -- but you don't participate 4 in the survey, correct? 5 A. Correct. 6 Q. So why would they come? 7 A. But we did. 8 Q. Why would they come to a hospital that 9 doesn't participate in a survey to verify something? 10 A. So hospitals that participate and when we 11 did participate, Leapfrog never came to the hospitals. 12 Q. Do you understand Leapfrog does, in fact, 13 remember verify survey data? 14 MR. MARCUS: Object to form. 15 A. I mean, there's data that's from Medicare 16 that's verified, but I don't -- no, no. 17 BY MS. BLAIR: 18 Q. I'm talking about survey data. 19 A. Right, but on the survey there is Medicare 20 data as well. 21 Q. Well, there's Medicare data on the safety 22 grade, correct? 23 A. Right, well, on the -- right. 24 Q. Right. So the survey is separate and 25 distinct from the grade, right?
Page 287 1 things. I have no idea. 2 Q. Do you know if anybody told the Med Exec 3 that hospitals were paying consulting fees to Leapfrog 4 in exchange for better grades? 5 A. No. No, not while I was present. 6 Q. So when you say "how things worked, when the 7 Med Exec figured how things work," you're referring 8 specifically to the imputation model? 9 A. Yes, the survey that, one, it's voluntary, 10 so there's measures that anybody could put whatever 11 they wanted; two, Leapfrog doesn't come and verify any 12 of those measures because they don't come into our 13 institution like Joint Commission does when you're 14 getting accredited; and, three, that we weren't 15 participating. Then they understood. 16 Q. You also understand that there's allegations 17 in this case that Leapfrog does nothing to verify the 18 survey responses of participating hospitals, correct? 19 MR. MARCUS: Object to form. 20 A. Correct. 21 BY MS. BLAIR: 22 Q. Do you believe that's true? 23 A. I've never seen Leapfrog in our hospitals. 24 I don't know how you would ever verify it unless you're 25 actually surveying hospitals and going live to their	Page 289 1 A. Yes. 2 Q. Have you done any research to inform 3 yourself about whether or not Leapfrog goes on site to 4 hospitals to verify data that hospitals report on their 5 survey? 6 A. Everyone that I have talked in the 7 organization and healthcare says no. 8 Q. Okay. 9 A. So I've not called the president of Leapfrog 10 and asked her, I guess. 11 Q. Are you aware that Leapfrog sends out 12 document requests for verification of survey results to 13 participating hospitals? 14 MR. MARCUS: Object to form. 15 A. Documents saying "send us documents," is 16 that what you're saying? 17 BY MS. BLAIR: 18 Q. Correct, correct. 19 A. I mean, that's part of the survey process? 20 Q. No, as part of the verification of the 21 survey process. 22 MR. MARCUS: Same objection. 23 A. I don't know. 24 BY MS. BLAIR: 25 Q. You've done nothing to figure out whether

Page 290 1 that's true or not? 2 MR. MARCUS: Same objection. 3 A. If Leapfrog sends a verification form to a 4 hospital? 5 BY MS. BLAIR: 6 Q. Oh, no, no, no, no. I'm sorry. My question 7 might have been bad. 8 Are you aware that as part of the 9 verification process -- well, strike that. 10 Are you aware that hospitals must submit 11 their survey by June 30th, and a verification process 12 takes place between June 30th and when the survey 13 closes on August 31st -- 14 MR. MARCUS: Object to form. 15 BY MS. BLAIR: 16 Q. -- every year? 17 A. I don't know the process no. 18 Q. Okay. And you're unaware of any of the 19 verification process that takes place in those 60 days, 20 correct? 21 MR. MARCUS: Same objection. 22 A. Yes. 23 BY MS. BLAIR: 24 Q. And, yet, you're confident that the 25 allegations in this lawsuit that Leapfrog does nothing	Page 292 1 record. The time is 5:10 p.m. 2 (A recess was taken from 5:10 p.m. to 5:21 p.m.) 3 THE VIDEOGRAPHER: We are back on the 4 record. The time is 5:21 p.m. 5 BY MS. BLAIR: 6 Q. Ms. Montgomery, I want to move on to 7 Good Samaritan's claim in this litigation that it has 8 been harmed by the Leapfrog hospital safety grades. 9 By way of just orienting you to timeline, 10 the Complaint in this case was filed April 30th of 11 2025. Does that comport with your memory? 12 A. Yes. 13 Q. And as of April 30th, 2025, Good Samaritan, 14 for which you are the CEO, had suffered harm at that 15 point in time, correct? 16 A. Correct. 17 Q. And would you agree with me that on 18 April 30th, did they -- the day -- the day the 19 complaint was filed, the five plaintiff hospitals 20 undertook a media campaign to publicize their safety 21 grades that Leapfrog had provided them both in the fall 22 of 2024 and the spring of 2025? 23 MR. MARCUS: Object to form. 24 A. In April, is that what you said? 25 BY MS. BLAIR:
Page 291 1 to verify survey results is true and accurate, correct? 2 MR. MARCUS: Same objection. 3 A. I would say they don't go into hospitals and 4 verify hand washing, for example. 5 BY MS. BLAIR: 6 Q. You don't know whether or not Leapfrog does 7 random audits of hospitals, onsite audits of hospitals, 8 do you? 9 A. I am not aware of that. 10 Q. And you've done nothing to inform yourself 11 as to whether or not that's true, do you, have you? 12 MR. MARCUS: Object to form. 13 A. Yeah, speaking to people in the industry 14 that say otherwise. 15 BY MS. BLAIR: 16 Q. Okay. 17 MR. MARCUS: Good time for a break? 18 MS. BLAIR: Sure. We've got to be almost 19 done. I'm almost done. 20 MR. MARCUS: You said that an hour and a 21 half ago. 22 MS. BLAIR: Again, if I didn't have to ask 23 about all the documents, we'd be done. 24 Off the record. 25 THE VIDEOGRAPHER: We're going off the	Page 293 1 Q. Correct. 2 A. I thought we had gathered really that type 3 of information prior to then, but... 4 Q. Oh, yeah. I guess my question was more 5 specific. The Complaint is filed on April 30th, 2025, 6 correct? 7 A. Um-hum. 8 Q. And there are that same day press releases 9 going out from the five plaintiffs to media outlets 10 discussing the D's and F's that the five plaintiffs 11 hospitals had received from Leapfrog, correct? 12 MR. MARCUS: Object to form. 13 A. Okay. 14 BY MS. BLAIR: 15 Q. Do you recall that? 16 A. I don't recall at all. 17 Q. Okay. Do you recall any interviews you gave 18 to the media in or around late -- or April 30th to, 19 let's just say, the first week in May regarding these 20 five hospitals filing suit against Leapfrog? 21 A. I do recall questions coming up and Andrew 22 asking me questions, things of that nature for media 23 outlets. 24 Q. Did you ever sit down with a media outlet 25 and give an interview?

Page 294 1 A. I did not. 2 Q. Did you ever watch the interviews that were 3 done by your attorney, Mary Beth -- Mary Beth Maloney, 4 related to the filing of the lawsuit? 5 A. I do believe I saw them, one of -- yes, it 6 was on the news, I believe. 7 Q. Did you as the CEO of Good Samaritan have to 8 sign off on the talking points that Mary Beth Maloney 9 gave to the press -- 10 MR. MARCUS: Object to form. 11 BY MS. BLAIR: 12 Q. -- and third parties? 13 MR. MARCUS: Same objection. 14 A. I signed off on -- I believe so. Normally 15 it comes through Andrew. Anything that goes out as a 16 press release, we review. 17 BY MS. BLAIR: 18 Q. And so all of statements that Mary Beth 19 Maloney gave regarding the brazen pay to play process 20 of the Leapfrog hospital safety grades, you would have 21 signed off on that? 22 MR. MARCUS: Object to form. 23 A. Not her. Not her specifically, no, but like 24 anything that is going to come through like 25 Good Samaritan.	Page 296 1 A. All the things that occurred from December 2 until then, most certainly. 3 Q. And I've seen documents that have been 4 produced in this litigation about doctors telling -- 5 telling Good Samaritan that patients didn't want to 6 come to Good Samaritan hospital because of the Leapfrog 7 safety grade, correct? 8 A. Correct. 9 Q. Did you ever have any conversations -- did 10 you, Sheri Montgomery, ever have any direct 11 conversations with patients who told you they would not 12 go to Good Samaritan because of the Leapfrog hospital 13 safety grade? 14 A. No, the physicians did. 15 Q. Did the physicians ever provide you with the 16 names of the patients that they spoke to who allegedly 17 would not come to Good Samaritan because of 18 Good Samaritan's Leapfrog hospital safety grade? 19 A. No. 20 Q. Do you know how many patients refused to 21 come to Good Samaritan as a result of the Leapfrog 22 hospital safety grade? 23 A. I don't know how many. 24 Q. Are you contending that the Leapfrog 25 hospital safety grade had any impact on physician
Page 295 1 BY MS. BLAIR: 2 Q. Okay. Talking about -- have you done any 3 studies, Palm Beach Health Network, has Palm Beach 4 Health Network done any studies to determine whether or 5 not the impact of the plaintiffs' PR campaign after the 6 filing of the lawsuit in any way increased patient 7 knowledge of those five hospitals' Leapfrog hospital 8 safety grades? 9 MR. MARCUS: Object to form. 10 A. Was there an analysis done of the impact of 11 the media campaign, is that what you mean? 12 BY MS. BLAIR: 13 Q. Sure. Did anybody say, Well, X number of 14 people knew about our Leapfrog hospital safety grades 15 before we went to the press and did this media blitz, 16 and we've just publicized these grades to a much 17 farther reach after you engaged in the PR campaign? 18 MR. MARCUS: Object to form. 19 A. No, I'm not aware of one. 20 BY MS. BLAIR: 21 Q. Is there any way that you know of to make 22 the determination as to what the impact was to 23 Good Samaritan's reputation before the April 30th media 24 campaign that the plaintiffs engaged in regarding the 25 lawsuit and before?	Page 297 1 retention at Good Samaritan? 2 A. I would say that it is in the fact that 3 other contracts we may have, like for hospital for 4 special surgery, for example, is, in my opinion, that 5 the Leapfrog rating has prompted those physicians to 6 get on staff at Jupiter Medical Center because their 7 patients are complaining to them that we are an F. 8 They are only on staff at Good Samaritan Medical 9 Center. The physicians have told me that they are 10 getting on staff at Jupiter and that their patients 11 have complained about us being an F hospital. 12 Q. How many doctors are getting on staff at 13 Jupiter Medical? 14 A. So our top surgeons, so there's three or 15 four of them, the orthopedic surgeons. 16 Q. Are they revoking their privileges at 17 Good Samaritan? 18 A. No. 19 Q. Okay. So they're just adding Jupiter as a 20 hospital, correct? 21 A. Correct. 22 Q. Have they said to you how many patients they 23 have to treat at Jupiter as a result of the Leapfrog 24 hospital safety grade as opposed to treating at 25 Good Samaritan?

Page 298 1 A. No. 2 Q. So you don't have any number? 3 A. I don't have a number. 4 Q. And how many of those doctors are -- I'm 5 sorry if I already asked you this. 6 How many doctors have told you that they 7 have to go seek privileges at Jupiter due to the 8 hospital safety grade? 9 A. So that's just HSS surgeons. We have other 10 surgeons that are called splitters, meaning they're 11 already on staff at Jupiter, like Dr. Goodman, who had 12 to reschedule a surgery and go to Jupiter Medical 13 because a patient refused to come to our hospital 14 because we were an F. 15 Q. One patient? 16 A. That I could know about and could provide 17 names. 18 Q. So one patient you know about and could 19 provide a name, correct? 20 A. Oh, I could provide more names for sure. 21 Q. Oh, you could? 22 A. For the HSS. 23 Q. Okay. So let's break that down. How many 24 patients of HSS -- they're surgeons, correct? 25 A. Yeah.	Page 300 1 safety grade and I will not work with Good Samaritan? 2 A. Not that I'm aware of for Good Sam. 3 Q. Okay. And then let's talk about doctors 4 that are already on staff with you, have any of them 5 left Good Samaritan as a result of the Leapfrog 6 hospital safety grade? 7 A. No. 8 Q. And then there are those doctors that we 9 just discussed that sought privileges at Jupiter in 10 addition to Good Samaritan based on the Good Samaritan 11 hospital safety grade, correct? 12 A. Correct. 13 Q. In those discussions with the doctors that 14 are seeking privileges at Jupiter Medical Center, did 15 any of them express in any way dissatisfaction with 16 Good Samaritan's CMS star rating? 17 A. No. 18 Q. Only the Leapfrog hospital safety grade? 19 A. Yes, and the discussion was that this 20 physician wants to stay at Good Sam, loves Good Sam, 21 knows the quality of Good Sam, but HSS, they're not 22 sure if they're going to force them to do -- mostly go 23 to Jupiter or Jupiter completely. 24 Q. If home office will only allow you to 25 participate in the Leapfrog Hospital Survey if it's
Page 299 1 Q. How many patients of HSS surgeons have 2 specifically refused to come to Good Samaritan for a 3 surgery because of the Leapfrog safety grade? 4 A. I do not have a number. I do not know. 5 Q. How many names can you think of? 6 A. No, I'm saying I can obtain the names. 7 Q. You can obtain the names? 8 A. Right. 9 Q. But you don't have them as you sit here 10 today? 11 A. No. I don't have any patient names. 12 Q. And you don't have any numbers of patients, 13 right? 14 A. No. 15 Q. And so my original question was, have any 16 doctors refused to become associated with 17 Good Samaritan as a result of the Leapfrog hospital 18 safety grades? 19 MR. MARCUS: Object to form. 20 A. The physicians that are already with us on 21 staff, is that what you're referring to? 22 BY MS. BLAIR: 23 Q. Well, I guess we could break it down. Let's 24 start with, are there any doctors that you were trying 25 to recruit that said, No, I looked at your Leapfrog	Page 301 1 connected to a contract or payment, and as we saw in an 2 Exhibit earlier today, you don't have to hire anybody 3 to comply, anybody additional to comply with the 4 hospital survey, why isn't the fact that HSS cares 5 about the Leapfrog Hospital Survey enough to get a 6 dispensation from home office to participate? 7 A. Because this all happened after our F, 8 right. So all of this horrible mass destruction 9 happened after the F. So asking to be part of Leapfrog 10 prior to that was before this occurred. 11 I'm confident that we're probably not going 12 to now that there is so much -- now that there's a 13 general understanding of how it works and what occurred 14 with the F, we're certainly not going to want to be a 15 part of it. 16 Q. Well, because you filed suit, correct? 17 MR. MARCUS: Object to form. 18 A. (No response). 19 BY MS. BLAIR: 20 Q. So you could participate in Leapfrog and 21 under your allegations of this Complaint increase your 22 Leapfrog safety grade and avoid the harm, but you're 23 choosing not to, correct? 24 MR. MARCUS: Object to form. 25 A. The harm is already done.

Page 302 1 BY MS. BLAIR: 2 Q. So there's no continuing harm? 3 A. Yeah, it's going to continue. So you think 4 if all of a sudden we're going to participate and, Oh, 5 we're now a B that that's going to like -- it's just 6 not going to -- a lot of harm has already been done. 7 It's going to take a while to recover, but I wouldn't 8 want to really participate in the survey in the first 9 place because I really don't believe it does add the 10 value that the Joint Commission does, that the 11 accrediting bodies do that come and share best practice 12 with us, that meet with our leaders and go over things, 13 just like the Joint Commission when they were just in 14 our building, and we had the best emergency management 15 plan, but then they'll give us something another 16 hospital has that they think, Oh, you should -- maybe 17 you should look at this policy or doing it this way. 18 That's where we want to do a more of a collaboration 19 with than filling out the survey. 20 Q. Am I correct you're voluntarily choosing not 21 to perform in the Leapfrog Hospital Survey? 22 A. Well, it's a voluntary survey so we didn't 23 fulfill out the survey. 24 Q. And you have no intention of doing that 25 going forward, correct?	Page 304 1 Q. Well, you read the Complaint, right? 2 A. Yeah. 3 Q. Do you have any understanding of how much 4 has been incurred in attorney's fees to date? 5 MR. MARCUS: Object to form. 6 A. Do I know? 7 BY MS. BLAIR: 8 Q. Um-hum. 9 A. I mean, I've seen some allocations, but I 10 don't know how much has been spent on attorney's fees. 11 Q. What are the allocations that you've seen? 12 A. There are allocations from the home office. 13 I think it's our financial statement. 14 Q. Okay. But I'm just asking about the 15 attorney's fees. What are the allocations of 16 attorney's fees for this action that you'll be seeking? 17 MR. MARCUS: Object to form. 18 A. The amount? 19 BY MS. BLAIR: 20 Q. Um-hum. 21 A. For Good Sam, a million, a million and a 22 half maybe. 23 Q. And is that then multiplied by five since 24 there are five plaintiffs? Are you splitting it 25 equally?
Page 303 1 A. At the end of the day, I wouldn't make that 2 decision. 3 Q. And we just discussed, even if it turns out 4 that your assumptions regarding the Leapfrog Hospital 5 Survey are wrong, you still don't want to participate 6 in that survey? 7 MR. MARCUS: Object to form. 8 A. Even if the assumptions of what? 9 BY MS. BLAIR: 10 Q. Even if the assumptions that you've made, 11 it's pay to play, you pay for consulting services to 12 get your grade, there's no science behind the 13 imputation methodology, even if all those things turn 14 out to be wrong, you still have no intention of 15 engaging in the hospital survey, correct? 16 MR. MARCUS: Object to form. 17 A. I don't make those decisions. 18 BY MS. BLAIR: 19 Q. Who does? 20 A. Tenet corporate. 21 Q. You're also requesting your attorney's fees 22 in this matter, correct? Do you understand that? 23 MR. MARCUS: Object to form. 24 A. Okay. 25 BY MS. BLAIR:	Page 305 1 A. I don't know. 2 Q. What about costs, do you have any 3 understanding of what the costs are? 4 A. What do you mean? 5 Q. Well, there's expert fees, for example. Do 6 you know what those are in addition to the attorney's 7 fees? 8 A. No. 9 MR. MARCUS: Object to form. 10 BY MS. BLAIR: 11 Q. Is Good Sam currently paying the attorney's 12 fees associated with this case? 13 A. I don't -- I don't think so. I mean, we 14 are. It's in our financial statement, but, honestly, I 15 don't know what happens in accounts payable and who's 16 handling all of that information. 17 Q. Okay. But you believe the projections are 18 that Good Sam's share of the attorney's fees in this 19 case will be 1.5 million, correct? 20 MR. MARCUS: Object to form. 21 A. That is my understanding. 22 BY MS. BLAIR: 23 Q. How much time have you and your staff 24 devoted to this lawsuit since it was filed on 25 April 30th, 2025?

Page 306 1 A. I have no idea. 2 Q. More than 100 hours? 3 A. I would not be able to tell you. 4 Q. Well, I know you've spent at least seven 5 hours because we've been here almost seven, correct? 6 A. Right. 7 Q. Have you ever been told by Tenet home office 8 that the goal of this lawsuit is to stop Leapfrog from 9 grading hospitals? 10 A. No. 11 Q. Do you have any understanding as to whether 12 the goal of this lawsuit is for Tenet to have none of 13 its hospitals across the country graded by Leapfrog? 14 MR. MARCUS: Object to form. 15 A. I don't know if that's the goal or it's a 16 just that we're, you know, we don't -- if we don't 17 participate, we're just not given a grade is my 18 understanding. 19 BY MS. BLAIR: 20 Q. Have you ever had discussions with other 21 nonparticipating hospitals outside of the Tenet Health 22 network about joining your lawsuit? 23 A. No. 24 Q. Have you had any internal discussions about 25 the consequence of this lawsuit being that your	Page 308 1 with all of the documents, whether I have them or not, 2 you've provided them to your attorneys for production 3 in this matter? 4 A. Anything that I was asked, I produced. 5 MS. BLAIR: Excellent. I have no further 6 questions. 7 MR. MARCUS: Okay. 8 MS. BLAIR: Thank you. 9 THE VIDEOGRAPHER: Before we go off the 10 record, does anyone want to order the transcript 11 or the video? 12 MS. BLAIR: I will take a rough of the 13 transcript and then regular delivery of the 14 final in an eTtran. I do not want the video at 15 this time. 16 MR. SIMMONS: We do want the video. 17 MR. MARCUS: And the witness will read. 18 THE VIDEOGRAPHER: This concludes today's 19 deposition. We're going off the record. The 20 time is 5:41 p.m. 21 THE STENOGRAPHER: And, Counsel, do you need 22 to order the transcript? 23 MR. SIMMONS: Yes, please. 24 THE STENOGRAPHER: Do you need a rough draft 25 also?
Page 307 1 competitors, like Jupiter, would look bad in the public 2 by promoting their safety grade previously? 3 A. No. 4 Q. Is the goal of this lawsuit to affect 5 competition for Good Samaritan in any way? 6 A. No. 7 Q. What is your understanding of the goal of 8 this lawsuit? 9 A. To if we don't participate that we're not 10 given a grade. 11 Q. My last question is, do you have any plans 12 of producing any additional documents -- well, strike 13 that. 14 To your knowledge, have you given your 15 attorneys all of the documents that you plan on 16 producing in this litigation? 17 MR. MARCUS: Are you asking her personally 18 or are you asking her as a corporate rep? 19 BY MS. BLAIR: 20 Q. As a corporate rep, are you done providing 21 document -- I don't have all the documents yet, and I 22 understand your attorneys are reviewing them, and I'm 23 not faulting them for that. But I'm asking you, as the 24 corporate representative of Good Samaritan, is it your 25 understanding that you now have provided your attorneys	Page 309 1 MR. SIMMONS: Yes, please. 2 THE STENOGRAPHER: Regular delivery? 3 MR. SIMMONS: Yes. 4 (A discussion was held off the record.) 5 MR. MARCUS: We're designating the 6 transcript as confidential per the 7 confidentiality order that's in place. 8 MS. BLAIR: And we reserve our rights to 9 object to the confidential nature of certain 10 portions of the transcript. 11 MR. SIMMONS: Could we get a rush delivery 12 for the transcript? 13 THE STENOGRAPHER: Of course. When do you 14 need it? 15 MR. SIMMONS: Could we get it end of day 16 Wednesday? 17 THE STENOGRAPHER: Of course. 18 (Thereupon, the proceedings concluded at 19 5:45 p.m.) 20 (The witness did not waive signature.) 21 22 23 24 25

ZIBAS: 13 Q. Good morning, Mr. Cazares. As I indicated, 14 my name is Jura Zibas. I represent the defendants, 15 and we're here today to take your deposition as it 16 relates to the lawsuit filed in the Southern District 17 of Florida, U.S. District Court. 18 Have you been deposed before in the past? 19 A. Yes. 20 Q. How many times? 21 A. Twice. 22 Q. And what were the cases, if you recall? 23 A. One was an employment and the other one a 24 union matter. 25 Q. And were the lawsuits related to your work,

Page 6 1 meaning under your former employer or your current 2 employer? 3 A. Yes. 4 Q. All right. And the reason I ask is just in 5 terms of having to explain to you the process. So 6 you understand that we're going to be videotaping you 7 answering questions. Please wait until I finish 8 asking the question. If your attorney has an 9 objection, let your attorney object. Unless he 10 directs you not to answer, you answer the question 11 after the objection is on the record. If there's a 12 question that you don't understand, just let me know. 13 And we will do every -- I'll make every effort to 14 then rephrase it or explain the question. 15 If you need to take a break, please let us know. 16 You can take a break. This isn't an endurance test. 17 Just have to do it in between questions. 18 Does that all make sense to you? 19 A. Yes. 20 Q. All right. When did you first learn about 21 -- let's set up the foundation. You are aware that 22 there is a lawsuit filed by Palm Beach Community 23 Hospital against the Leapfrog Group; is that correct? 24 A. Yes. 25 Q. When did you first learn that a lawsuit	Page 8 1 Hospital. Is that your understanding of the purpose 2 of today? 3 A. Yes. 4 Q. What is your current job title? 5 A. I'm the CEO of Palm Beach Gardens Medical 6 Center. 7 Q. And when did you start in that role? 8 A. July of 2024. 9 Q. And before we go into your education or 10 employment background, going back to the two times 11 you were previously deposed. Were those in state or 12 Federal Court cases, do you know? 13 A. I don't recall. No, I don't recall. Long 14 time ago. 15 Q. Okay. So we want to go through some of 16 your back -- your history and background first. So 17 why don't you tell me your -- where did you earn your 18 college degree or nursing degree? 19 A. Sure. I graduated from the University of 20 Texas El Paso with a Bachelor of Science in nursing 21 in 2000. That was the first degree that I earned. 22 And I started practicing as a registered nurse in 23 January of 2001. Received a Master's in science and 24 nursing administration from Texas Tech University and 25 that was in 2013.
Page 7 1 would be filed against the Leapfrog Group by Palm 2 Beach Gardens Community Hospital? 3 MR. CHUNG: I'm going to object based on 4 privilege. If your answer involves any 5 communications with lawyers, either in-house 6 lawyers or outside lawyers, avoid those 7 conversations. 8 MS. ZIBAS: Yes. I'm not interested in 9 your conversation. Just if you -- when you 10 learned about it. 11 A. It was earlier this year. I don't have the 12 exact date. 13 (Exhibit 1 was marked.) 14 BY MS. ZIBAS: 15 Q. Okay. I have marked what is Cazares Number 16 1. It's an exhibit I want you to take a look at that 17 we're just going to identify and flip the pages. 18 A. Okay. 19 Q. Have you seen this document that is Cazares 20 Number 1 before? 21 A. This specific document, I have not. 22 Q. This is a deposition notice, and on the 23 front, it indicates that we are here for your 24 deposition as an individual and also as a 25 representative of Palm Beach Gardens Community	Page 9 1 Q. So while you were earning your Master's in 2 nursing administration, were -- did -- were you 3 employed? 4 A. Yes. 5 Q. And where was your -- what was your first 6 job after you graduated from nursing school? 7 A. It was in a hospital called Sierra Medical 8 Center. 9 Q. And how long did you work at Sierra Medical 10 Center? 11 A. I worked there until 2008. 12 Q. And after Sierra Medical Center, did you 13 work somewhere else? 14 A. Yes. I went to Sierra Providence East 15 Medical Center. 16 Q. And what was your title there? 17 A. Well, I had different titles. My initial 18 title was director of the telemetry floor, and then I 19 took over several other departments and eventually 20 became the assistant chief nurse officer for that 21 particular hospital. 22 Q. That was Sierra Providence East? 23 A. Correct. 24 Q. How long did you work at Sierra Providence 25 East in your various roles?

Erik Cazares
September 24, 2025

Page 10 1 A. Until 2015. 2 Q. And then where did you go in 2015? 3 A. Then I went back to Sierra Medical Center 4 as the chief nursing officer. 5 Q. And when you're a chief nursing officer, 6 what are your duties, in general? 7 A. Oversight of all of nursing operations, 8 staffing, safety, quality, patient experience. 9 Q. And how long were you the chief nursing 10 officer at Sierra Medical Center? 11 A. I was there for approximately three years. 12 Q. And that's around 2018; is that correct? 13 A. Correct. 14 Q. And then where did you go? 15 A. Then I went back to Sierra Providence East. 16 By that time, it was called the Hospitals of 17 Providence East Campus and as a role of a chief 18 operating officer. 19 Q. So you went back to Sierra Providence East, 20 but it was then the Hospitals of Providence East 21 Campus? 22 A. The Hospitals of Providence East Campus. 23 Q. And you were the COO? 24 A. Correct. 25 Q. And then how long were you the COO?	Page 12 1 A. They built that hospital in 2008. 2 Q. Okay. So when you were at Hospitals of 3 Providence Sierra, were you considered a Tenet 4 employee or a hospital employee? 5 A. I was under the Tenet payroll. 6 Q. Did you ever -- when you were at Hospitals 7 of Providence Sierra, did you ever interact with 8 people at Tenet headquarters office regarding 9 quality, safety, or any of those -- any of those 10 principles? 11 A. Yes. 12 Q. And who did you interact with at Tenet 13 headquarters about quality and safety? 14 A. Different individuals depending on what we 15 were addressing, but they have leads. They have a 16 safety lead. They have a quality lead and so forth. 17 Q. And do you still interact with the safety 18 and quality lead today at your current role? 19 A. Yes. 20 Q. Who is the safety lead? 21 A. Well, we interact with like the chief 22 medical officer for the company, Ernest Franklin. 23 Dr. Franklin. And the chief nursing officer. That's 24 who I now interact with the most. Judy Chabot. 25 Q. Did you eventually start working at Palm
Page 11 1 A. I was there until 2022 as the COO. 2 Q. Okay. And then what did you do in 2022? 3 A. And then I transitioned back to the -- what 4 used to be Sierra Medical Center. Now, it's called 5 the Hospitals of Providence Sierra Campus as the 6 chief executive officer. 7 Q. And when you were the chief executive 8 officer of Hospitals of Providence Sierra Campus, 9 what would you call -- how would you describe your 10 overall duties? 11 A. I was responsible for oversight of all 12 hospital operations, financial, quality, safety, 13 contracts, physician relations. 14 Q. Did you report to a board of directors or 15 governing board? 16 A. There was a -- yes. There was a local 17 hospital governing board. 18 Q. And who owns The Hospitals of Providence 19 Sierra? 20 A. Tenet. 21 Q. When did Tenet buy The Hospitals of 22 Providence Sierra Campus? 23 A. I don't know. 24 Q. Did Tenet buy The Hospital of Providence 25 East Campus at some point, as well?	Page 13 1 Beach Gardens Community Hospital? 2 A. I'm sorry. Repeat the question. 3 Q. I said at some point, did you begin your 4 role as a chief executive officer at Palm Beach 5 Gardens Community Hospital? 6 A. Yes. In July of 2024. 7 Q. So what made you go from -- decide to go 8 from Texas, the Hospitals of Providence Sierra 9 campus, to Palm Beach Gardens? 10 A. Sure. I was approached with the 11 opportunity for the position at Gardens, and I was 12 open to relocate, so then that brought me here to 13 Florida. Explored the opportunity and it was 14 something that grabbed my attention, and I thought it 15 would be a good fit. 16 Q. Who approached you? 17 A. This was Maggie. 18 Q. Is that Maggie Gill? 19 A. Maggie Gill. 20 Q. And do you know what Maggie Gill's role is? 21 A. She is the regional leader for our 22 hospitals. 23 Q. And is she a Tenet employee? 24 A. I believe so. 25 Q. And what region does she lead?

Erik Cazares
September 24, 2025

Page 14 1 A. Well, she's got multiple regions, but she's 2 over the Florida region, and I believe she has a few 3 more areas. 4 Q. So when you came to the Palm Beach Gardens 5 Community Hospital, did you have a transition period 6 where the prior CEO worked with you or you just 7 started sort of on your own? 8 A. I was -- on day one, I was by myself. 9 Q. And how many people report to you directly? 10 A. Oh, I have about six direct reports. 11 Q. And what are their titles? And if you 12 don't remember, that's fine. 13 A. Sure. I've got my executive assistant, 14 chief nursing officer, chief operating officer, chief 15 financial officer, chief human resource officer, and 16 there's one more. Who else? That's it because the 17 other ones -- so it's five. 18 Q. Is there a chief strategy officer at Palm 19 Beach Gardens? 20 A. There is. 21 Q. And does that person -- who does that 22 person report to? 23 A. To the market chief strategy lead. 24 Q. And who does the market chief -- is the 25 market chief strategy lead at Palm Beach Gardens or	Page 16 1 lines. 2 Q. And where is Palm Beach Gardens Community 3 Hospital physically located? 4 A. In Palm Beach Gardens. 5 Q. And what's the address there? 6 A. I don't know the exact address. It's on 7 Birds Road. 8 Q. Is it in a part of Palm Beach with a 9 population that is a little -- that is older? 10 A. Yes. 11 Q. So what is the -- what -- and this is 12 sometimes hard to figure out. What's the median age 13 of your patient population? 14 A. Yeah. When we last looked at it, it was 62 15 and a half years old. 16 Q. And when did you last look at it? 17 A. Several months ago. 18 Q. And why did you look at the median age of 19 the population? Were you doing a market study or -- 20 A. We do that from time to time, look at the 21 age of the population that we're serving. 22 Q. And is there a certain time of year that 23 Palm Beach Gardens Community Hospital is busier than 24 others, such as snowbird season? 25 A. Yes.
Page 15 1 is that a Tenet person? 2 A. No. He's a sister facility. 3 Q. What facility is that? 4 A. I believe he's Hospital Delray. 5 Q. And when you talk about a sister property, 6 is this part of the Palm Beach Health Network? 7 A. Correct. 8 Q. And you refer to them at sister properties? 9 A. Yeah. 10 Q. Do you have any direct or specific role at 11 Palm Beach Network yourself? 12 A. No, just my hospital. 13 Q. And how many beds do you have at Palm Beach 14 Gardens? 15 A. 199 licensed beds. 16 Q. And what do you mean by licensed beds? 17 A. That those are the amount of beds that 18 we're licensed through the State of Florida. 19 Q. And do you have a trauma center? 20 A. No. 21 Q. What services are offered at Palm Beach 22 Gardens? 23 A. The main service line is cardiac. We also 24 do orthopedics, neurology, general surgery, emergency 25 services. I would consider those the main service	Page 17 1 Q. And what is the Palm Beach snowbird season, 2 what months? 3 A. Well, I'm just beginning to learn it 4 because I've only been here one year. So last year 5 we were, I'd say, it was December through April. 6 Q. And do you see a large drop-off in 7 admissions and visits to the hospital after April? 8 A. There's a drop. 9 Q. Historically, and based on the information 10 that you've reviewed to date, has there always been a 11 drop after April? 12 A. Yes. 13 Q. Now, as CEO of Palm Beach Gardens, how much 14 oversight is there by Tenet Healthcare of your 15 everyday daily role? How much do they oversee you? 16 MR. CHUNG: Objection to form. 17 A. I mean, it's hard to quantify the amount of 18 oversight, but we get direction on different 19 initiatives, projects. 20 BY MS. ZIBAS: 21 Q. When you get direction from Tenet, does it 22 come through Maggie? 23 A. Not always. Sometimes through Maggie, 24 sometimes directly from corporate leaders. 25 Q. And in comparison to when you were the CEO

Erik Cazares
September 24, 2025

Page 18 1 at Hospitals of Providence Sierra Campus, is it about 2 the same direction from corporate Tenet there as what 3 you see now at Palm Beach Gardens? 4 MR. CHUNG: Objection to form. 5 A. Yes. Yes, it's fairly similar. 6 BY MS. ZIBAS: 7 Q. The Leapfrog Group is the defendant in this 8 case filed by Palm Beach Gardens. Can you just give 9 me both in your personal capacity, what do you know 10 about The Leapfrog Group, in terms of what they do, 11 who they are, et cetera? 12 MR. CHUNG: Objection to form. 13 A. Well, the Leapfrog Group assigns hospitals 14 a patient safety letter grading using a methodology 15 that they've used for some time. But that 16 methodology recently changed. So my most recent 17 experience is that that methodology is now negatively 18 affecting hospitals that do not participate in 19 leapfrog, that they don't submit data. 20 A perfect example is Palm Beach Gardens Medical 21 Center. Palm Beach Gardens Medical Center hadn't 22 submitted data or participated in Leapfrog since 2022 23 and recently received a letter F grade for patient 24 safety. And that was based on incomplete data since 25 we didn't participate, deceptive, what we consider	Page 20 1 Q. And when you were at Hospitals of 2 Providence Sierra, did Hospitals of Providence Sierra 3 participate in taking Leapfrog survey? 4 A. Not while I was the CEO. 5 Q. And what was their grade when they did not 6 participate? 7 A. I believe it was a C. 8 Q. And did it continue to be a C through 2023 9 and 2024? 10 A. I believe so. 11 Q. And do you know if in 2025 that it was a C? 12 A. I don't know. I don't know. 13 MS. ZIBAS: I'm handing you a document that 14 is labeled Cazares 2. 15 (Exhibit 2 was marked.) 16 BY MS. ZIBAS: 17 Q. And it says Leapfrog hospital safety grade. 18 And if you look at the URL, it was taken off the 19 hospitalsafetygrade.org site. For the Hospital of 20 Providence Sierra Campus and in spring 2025, do you 21 see the hospital grade says C? 22 A. Yes. 23 Q. And as far as you know, was -- are they 24 participating in taking a survey? 25 A. I don't know. I cannot speak to what
Page 19 1 deceptive grading methodology, and it has had a 2 significant impact on the reputation of the hospital, 3 the way that the hospital is viewed by physicians, 4 patients, community stakeholders, employees. 5 BY MS. ZIBAS: 6 Q. When you say we, when you refer to we, the 7 deceptive grading methodology, who is the we you're 8 referring to when you just testified? 9 A. Repeat that. What did I say? 10 Q. You referred to we. So when you say we, 11 are you referring to Palm Beach Gardens as a we or 12 Tenet and Palm Beach Gardens? 13 A. Correct. Palm Beach Gardens. 14 Q. Now, how did you find out about the 15 background of not submitting data from Palm Beach 16 Gardens since 2022? Who provided you that background 17 information? 18 A. That was my quality director. 19 Q. And who is your quality director? 20 A. Kathleen McDonald. 21 Q. And how long has Kathleen McDonald worked 22 at Palm Beach Gardens? 23 A. I don't know off the top of my head. 24 Q. Has she been there more than five years? 25 A. I don't know for a fact.	Page 21 1 Sierra is doing now. 2 MS. ZIBAS: I'll give you Cazares 3. 3 (Exhibit 3 was marked.) 4 BY MS. ZIBAS: 5 Q. And this is another page from that same 6 Leapfrog hospital safety grade, but as you can see at 7 the bottom, it has infections, problems with surgery, 8 different tabs that you would click on. 9 A. Uh-huh. 10 Q. And if you go to the second page, under 11 notes and definitions, it said declined to report. 12 The hospital was asked to provide this information to 13 the public but did not. Does this help you determine 14 if they are participating in the survey? 15 MR. CHUNG: Objection to form. 16 A. Yeah. I cannot tell if they're 17 participating, and I can't speak to what -- what data 18 they're submitting or not submitting. 19 BY MS. ZIBAS: 20 Q. And why -- so if Palm Beach Gardens is not 21 submitting data and the Hospital of Providence Sierra 22 Campus is not submitting data, why do you think one 23 receives an F and one receives a C? 24 MR. CHUNG: Objection to form, 25 mischaracterizes prior testimony.

Erik Cazares
September 24, 2025

Page 22 1 A. As I mentioned earlier, I cannot speak to 2 whether Sierra is participating or not participating 3 at this moment. 4 BY MS. ZIBAS: 5 Q. Do you know if any Tenet Healthcare 6 hospitals participate in the Leapfrog survey? 7 MR. CHUNG: Objection to form. 8 A. I'm not aware of that information. 9 BY MS. ZIBAS: 10 Q. Who would know that? 11 MR. CHUNG: Objection to form. 12 MS. ZIBAS: At Tenet, based on your 13 experience of working under Tenet. 14 A. I don't know. 15 BY MS. ZIBAS: 16 Q. Would the chief medical officer know? 17 MR. CHUNG: Objection to form. 18 A. I don't know if he would know, has 19 participated or not. 20 BY MS. ZIBAS: 21 Q. Does Palm Beach Gardens have a safety plan? 22 A. Yes. 23 Q. And do they have a safety plan in 2023? 24 A. My understanding is they did. 25 Q. What about 2024?	Page 24 1 Q. And do you know when Tenet purchased them? 2 A. I don't. 3 Q. Did you read any expert reports in 4 preparation for your deposition today? 5 A. No. 6 Q. Do you have anybody at Palm Beach Gardens 7 who manages marketing? 8 A. We have a marketing manager. 9 Q. Just one person? 10 A. Yes. 11 Q. And who is that? 12 A. Her name is Amanda Blanchard. 13 Q. And does Amanda Blanchard have a staff? 14 A. No. 15 Q. And is there anybody that does social media 16 management? 17 A. She handles some of it. 18 Q. Does she have an outside vendor or does she 19 handle it all herself? 20 A. I'm not quite sure how she handles it. 21 Q. Do you have a marketing budget at Palm 22 Beach Gardens? 23 A. We do. 24 Q. And is it based on revenue share, or is it 25 just a certain sum of money that's allocated?
Page 23 1 A. Yes. 2 Q. What about 2025? 3 A. Yes. 4 Q. What did you do to prepare for your 5 deposition today, outside of speaking with your 6 lawyers? I'm not interested in the sum and substance 7 of the conversation. Just in general, what did you 8 do to prepare? 9 A. Reviewed my declaration, reviewed the 10 complaint. 11 Q. During the course of this litigation, have 12 you gathered documents to respond to discovery 13 requests? 14 A. Yes. 15 Q. And did you -- anybody else, as far as you 16 know, at Palm Beach Gardens gather documents? 17 A. Yes. 18 Q. And were all documents you gathered 19 provided to your counsel? 20 A. Yes. 21 Q. Do you know when Palm Beach Gardens 22 Hospital -- Community Hospital was formed? 23 A. 1968. 24 Q. And do you -- are they owned by Tenet now? 25 A. Yes.	Page 25 1 A. It's an allocation. 2 Q. And who determines the annual budget for 3 the hospital? 4 A. It's the hospital leadership, myself, with 5 my chief financial officer, with approval from our 6 corporate office. 7 Q. Does your corporate -- and when you say 8 corporate office, I assume you mean Tenet; correct? 9 A. Correct. 10 Q. Have you found that Tenet reduces the 11 budget after you submit it, or is it pretty much a 12 rubber stamp? 13 MR. CHUNG: Objection to form. 14 A. It's neither. 15 BY MS. ZIBAS: 16 Q. Describe to me what you mean by neither. 17 A. They don't rubber stamp it, and they don't 18 necessarily reduce it. 19 Q. Do they move funds from one allocation to 20 another? 21 MR. CHUNG: Objection to form. 22 A. No. 23 BY MS. ZIBAS: 24 Q. So how do they -- how do they change the 25 budget, if they don't accept the budget that you

Page 26 1 submit? 2 MR. CHUNG: Objection to form, 3 mischaracterizes testimony. 4 A. When we submit the budget, it's a 5 conversation regarding whether the dollars are needed 6 and what they're needed for, and then we come to an 7 agreement. 8 BY MS. ZIBAS: 9 Q. Has the budget for 2026 been completed? 10 A. For 2026? 11 Q. Yes. 12 A. No. 13 Q. What are the role -- what's the role or the 14 tasks that are accomplished by Amanda Blanchard as 15 the marketing manager? 16 A. What are the -- can you repeat the 17 question? 18 Q. Yes. What are the tasks or the job duties 19 of Amanda Blanchard? 20 A. Basically everything that involves 21 marketing, whether it's social media, coordinating 22 community events, coordinating statements out to the 23 media or the organization. She works with 24 communications to do that, as well. 25 Q. And is that the Palm Beach Gardens	Page 28 1 Q. Did you ever review any statements prepared 2 by the Palm Beach Health Network about The Leapfrog 3 Group? 4 A. No. I got copied on communications after 5 it went out. 6 Q. Do you know why the Palm Beach Gardens 7 Community Hospital stopped participating in The 8 Leapfrog Group survey? 9 A. I don't. I don't know why. 10 Q. Do you know what year that was? 11 A. I believe it was back in 2022 they stopped 12 participating. 13 Q. You referenced earlier that you described 14 the -- that The Leapfrog Group has a methodology, had 15 a methodology and then it changed. Can you describe 16 to me your understanding of The Leapfrog Group 17 methodology before the change? 18 A. Sure. So the way that I understand it is 19 that before the change, nonparticipating hospitals, 20 when they didn't submit data in certain metrics, they 21 were awarded a score or given a score based on the 22 average of similar hospitals' performance, and that 23 changed to where the fall of 2024, on four particular 24 metrics, Leapfrog automatically scores them at the 25 lowest level for those four particular metrics:
Page 27 1 communications? 2 A. Correct. 3 Q. And is that a separate department? 4 A. I don't know if they're completely separate 5 or if they're linked. 6 Q. And are they -- would the communications 7 potentially be linked to a marketing manager, as far 8 as -- is that who reports to? 9 MR. CHUNG: Objection to form. 10 A. No. 11 BY MS. ZIBAS: 12 Q. Who does the communications person report 13 to? 14 A. There is a -- there's a communications 15 director and marketing. 16 Q. And do you meet with the communications 17 director? 18 A. No. 19 Q. Have you ever discussed The Leapfrog Group 20 with the communications director? 21 A. No. 22 Q. Have you ever given any -- you personally 23 given any statements to the press about The Leapfrog 24 Group? 25 A. No.	Page 29 1 handwashing, computerized physician order entry, bar 2 code medication scanning, and ICU staffing. And by 3 doing that, the score -- they got the lowest score 4 possible in those metrics, and the letter grade is 5 then affected. Drops either to a D or F. In the 6 case of Gardens, it dropped to an F. Before that, it 7 had been a C, even when the hospital was not 8 participating. 9 Q. So when it -- when they received a C 10 because of the scoring that you described by the 11 nonparticipating hospitals, did you think that was, 12 in your personal opinion, was that fair for not 13 participating that they received a high score and 14 then now it's a lower score? 15 MR. CHUNG: Objection to form. 16 A. I don't -- I'm not ready to comment whether 17 it was fair or not. What I do know is the letter 18 grade F is detrimental to the organization. And when 19 the hospital had a letter score of C, we did not 20 experience the negative reputation that we're 21 experiencing now that we have in awarding an F, from 22 physicians, from patients, community members, 23 governing board members. As soon as that F came out, 24 we started getting complaints and concerns from all 25 these individuals, which didn't exist when the

Page 30 1 hospital was rated a C. 2 BY MS. ZIBAS: 3 Q. How did the information get out, you said, 4 about the F? Was a press release put out by Palm 5 Beach Health Network? Who put the press release out? 6 MR. CHUNG: Objection to form. 7 A. I don't recall where the initial release 8 came out. But the grades came out and then it was 9 brought to our attention that patients were 10 significantly concerned about going to Gardens 11 because of the F grade. We even know our competitor 12 was publishing their letter grade of an A and ours of 13 an F, so they also had input into getting some of 14 that in the community, as well. 15 BY MS. ZIBAS: 16 Q. Who is your competitor that was publishing? 17 A. Jupiter. 18 Q. So did Jupiter Medical Center publish their 19 grade versus your grade into the -- I guess the news 20 media? 21 A. I don't know if they published it into the 22 news media, but they definitely public -- made it 23 public to their physician group, which is also the 24 same physicians in our organization. 25 Q. Do you know if Jupiter Medical Center	Page 32 1 especially after a Tik Tok video was created and was 2 out there broadcasting Gardens as the worst hospital 3 in Florida, specifically referencing handwashing. 4 After that Tik Tok video, I started receiving more 5 and more complaints from physicians, that they were 6 talking to patients in their offices, and especially 7 patients that needed to have procedures done. They 8 didn't want to go to Gardens because of the F letter 9 grade that had been awarded by Leapfrog for patient 10 safety. 11 One particular patient is a cardiac patient that 12 needed to have a cardiac procedure and did not want 13 to go to Palm Beach Gardens. I received a phone call 14 from the surgeon. This particular patient, when I 15 talked to him, said that the main reason was because 16 of Leapfrog. So he was looking at other facilities 17 to have his cardiac procedure. 18 Our hospital is well known for our cardiac care 19 and infrastructure experience, so these patients are 20 making decisions to go to other facilities where the 21 care may not be to the quality or caliber and have 22 the outcomes that we have, specifically for cardiac 23 care in this instance. 24 Q. Do you have a CCU unit at Palm Beach 25 Gardens?
Page 31 1 received an A? 2 A. Yes. 3 Q. Have you talked to anyone at Jupiter 4 Medical Center about their A grade? 5 A. No. 6 Q. Do you know the CEO of Jupiter Medical 7 Center? 8 A. I know who he is, but I don't talk to him. 9 Q. So as you sit here today, you still do not 10 know who initially published the score, The Leapfrog 11 Group score about Palm Beach Gardens hospital; is 12 that correct? 13 MR. CHUNG: Objection to form. 14 A. That's correct. 15 BY MS. ZIBAS: 16 Q. Did you ever investigate further as to who 17 initially published the grades? 18 A. No. 19 Q. Did Tenet ever publish the grades? 20 A. I don't know. 21 Q. Now, you talked about physician -- it was 22 detrimental because physicians talked about it. How 23 many physicians talked to you about it? 24 A. I can't recall the amount of physicians. 25 It's -- they continue to talk to me about it,	Page 33 1 A. We have a CVICU. 2 Q. And how many beds? 3 A. 12 bids. 4 Q. Do you have ICU? 5 A. We do. 6 Q. And how many beds? 7 A. 16. 8 Q. How many operatories? 9 A. How many what? 10 Q. Operatories? 11 A. What is that? 12 Q. An operating room? 13 A. Operating rooms? 14 Q. Operating rooms for cardiac. 15 A. We have two. 16 Q. And how many -- is that total operating 17 rooms or just for cardiac? 18 A. No, that's just for cardiac. 19 Q. And how many total? 20 A. 12. 21 Q. So you can do maximum -- you can schedule 22 maximum of two a day in the cardiac or just one? 23 A. No, you can do multiple. 24 Q. What's the maximum number you can do in a 25 day?

Erik Cazares
September 24, 2025

Page 34 1 A. Depends how long the physician is willing 2 to work. Sometimes they can do up to three, four, 3 surgeries a day. 4 Q. So when you say this patient needed cardiac 5 procedure and the surgeon called you, when was that? 6 A. This was approximately three to four weeks 7 ago. 8 Q. And who was the surgeon? 9 A. Dr. Patel. 10 Q. Did Dr. Patel tell you there was only one 11 patient concerned about the handwashing? 12 A. No. He's told me about multiple patients, 13 and I asked them that if those patients, whenever he 14 gets those patients, if he could give me their 15 information so I can talk to them and reassure them 16 of the care that we deliver at Palm Beach Gardens 17 Medical Center. So this is a particular patient that 18 I talked to, and he expressed his concerns about our 19 Leapfrog score and that being the driving decision 20 for not wanting to have surgery at Gardens. 21 But he's -- Dr. Patel said he's had multiple 22 patients, and I can give you a list of other 23 physicians who have also received similar concerns. 24 Q. Okay. Give me a list of those physicians. 25 A. Sure. There's Dr. Mostel; he's another	Page 36 1 citing the F grade. 2 Q. And who put up the -- who created the Tik 3 Tok video? 4 A. I don't know. 5 Q. And who posted it? 6 A. I don't know. 7 Q. Did you view it on Tik Tok? 8 A. I viewed it on -- I don't have Tik Tok, but 9 I viewed it online. 10 Q. On what? 11 A. Online. I mean, click on the link and it 12 pops up. 13 Q. And now you said the governing board also 14 complained to you. Who on the governing board? 15 A. There's a physician on the governing board 16 whose name is Dr. Suarez. We also have a community 17 member, Michael Mitrone. Those are two that come to 18 mind. 19 Q. And what did Dr. Suarez say to you? 20 A. He immediately complained about why Gardens 21 received an F on patient safety and Jupiter has an A, 22 when he considers -- he practices at both hospitals, 23 and he considers the quality at Gardens to be 24 superior in many aspects to Jupiter. So he was very 25 concerned, to which I responded to him that we did
Page 35 1 cardiologist. I believe there's a few more that I 2 had shared with my legal team, with the legal team. 3 Q. You provided that information to your legal 4 team? 5 A. Yes. 6 Q. Did you put it in your responses to your 7 interrogatories? 8 A. No. I don't think so. 9 Q. Is there a reason you didn't put it in the 10 interrogatories? 11 A. It was just too many to list. 12 Q. But based on your understanding of this 13 lawsuit, there's a claim of reputational harm; 14 correct? 15 A. Correct. That's correct. 16 Q. But yet you didn't want to list -- 17 A. Well, no, because -- 18 Q. -- harm? 19 A. -- up until this day, I continue to get 20 calls from physicians. And as a matter of fact, 21 after the video, the viral video, it's only been 22 escalating, and it's three to four times a week I'm 23 getting either calls from physicians or patients 24 voicing their concerns about patients not wanting to 25 go to Palm Beach Gardens Medical Center, specifically	Page 37 1 not participate in Leapfrog at that time, and that 2 had -- we had been granted a low rating because of 3 those four metrics that I mentioned earlier. We 4 received the lowest possible score for not submitting 5 the data. So that was my explanation to him. 6 Q. And what about Michael Mitrone? What did 7 he say? 8 A. Same thing. He wanted -- he didn't think 9 it was fair, and he wanted to know what we were going 10 to do about the bad reputation that the letter, that 11 the F grade had created for the organization. 12 Q. And what did you tell him that Palm Beach 13 Gardens is going to do about the reputation that you 14 believe it's created? 15 A. I told him we were looking into that and to 16 see what is it we could potentially do about it. I 17 didn't give him any specific details. 18 Q. Did you ever tell the board that one of the 19 solutions was filing this lawsuit? 20 A. No. What I did tell Mike Mitrone and the 21 rest of the governing board is that part of our goal 22 to minimize or mitigate the negative reputation is 23 for us to go out there and promote the quality of 24 Gardens, which is what I've been doing. I've been 25 out in the community. I've been talking to people.

Page 38 1 I've been highlighting our different awards and 2 accolades that highlight our outcomes for the 3 organization. 4 Q. Does Palm Beach Gardens participate in 5 Healthgrades? 6 A. We do. 7 Q. And how are Healthgrades determined? 8 A. Healthgrades is based on patient outcomes, 9 and where the hospital excels compared to the rest of 10 the nation, then Healthgrades will award in that 11 specific area a recognition for the hospital. 12 Q. How do they get their data at Healthgrades? 13 A. I believe they pull the data. 14 Q. And does Palm Beach Gardens -- 15 A. Publicly-reported data. 16 Q. Does Palm Beach Gardens purchase the 17 license for using the logo to promote the accolade? 18 A. I'm not sure exactly what Gardens pays. I 19 know that we do buy like the trophy or plaque from 20 them there's a -- when there's an area that we excel 21 in. 22 Q. In the advertising, do you use the 23 Healthgrades logo? 24 A. Yes. 25 Q. So do you pay a license for that?	Page 40 1 A. I don't know if it's considered consulting 2 services because that is a regulatory and mandatory 3 survey that we need to have in order to continue 4 receiving payment from Centers for Medicare and 5 Medicaid services, but there is a fee associated. 6 BY MS. ZIBAS: 7 Q. But do you pay -- there is an additional 8 option to pay for consulting services to provide 9 guidance -- 10 A. Oh, not that I'm aware of. Not that I'm 11 aware of. 12 Q. Do you know what CMS star ratings are? 13 A. We're a one star. 14 Q. And what does that mean? 15 A. It's a one star on a scale of five. That's 16 what I understand. 17 Q. And what does -- is one the worst? 18 A. Yes. 19 Q. And are you aware that the CMS data is 20 public? 21 A. Yes. 22 Q. And are you aware that the CMS data is used 23 as part of the Leapfrog hospital grade? 24 A. Some of it, yeah, is used. 25 Q. And what is -- what is Palm Beach Gardens
Page 39 1 A. I don't know. 2 Q. Is that something -- who handles the 3 advertising for Palm Beach Gardens? 4 A. Amanda. 5 Q. And what about Joint Commission? Does Palm 6 Beach Gardens go through The Joint Commission 7 process? 8 A. Absolutely. Joint Commission is our main 9 credentialing body. They're one of the approved CMS 10 vendors to go in into our facility and basically look 11 at everything. So we -- we are Joint Commission 12 accredited. They were in our hospital last year at a 13 group surveyors that went in and did an intense, 14 rigorous survey of our organizations. They spent 15 three days looking at our processes, talking to 16 patients, talking to family members, employees, 17 physicians, observing procedures in the operating 18 room, looking at our facility infrastructure, looking 19 at handwashing, infection control practices. They 20 followed a very rigorous process, and we had 21 successful accreditation. No conditional findings 22 for the organization. 23 Q. Does Palm Beach Gardens pay for consulting 24 services with Joint Commission? 25 MR. CHUNG: Objection to form.	Page 41 1 Community Hospital doing, if anything, to try to 2 improve its CMS star rating? 3 A. Yeah. Well, we're not specifically 4 addressing CMS star rating. In general, the very 5 nature of what we do in hospitals is to take care of 6 patients. We continuously are looking at our 7 practices to improve patient safety and improve 8 quality, improve the patient experience, and that's 9 whether -- we're not doing it with a specific effort 10 of improving CMS star ratings or any particular 11 agency's rating or -- that's just what we do. As a 12 clinician, as a nurse, that's my priority, as well, 13 regardless of the ratings. 14 Q. So when people -- when you -- you mentioned 15 briefly about the detrimental reputation because The 16 Leapfrog grade. How would the fact that there's a 17 CMS one-star rating not impact Palm Beach Gardens 18 Community Hospital? 19 MR. CHUNG: Objection to form. 20 A. The CMS star rating is not being publicly 21 promoted in the community. It is not something that 22 has been brought to my attention by any physicians, 23 family members, community members, and even when -- 24 even before this, it was never something that 25 negatively affected the reputation of the hospital

Erik Cazares
September 24, 2025

Page 42 1 the way that the Leapfrog F score has affected the 2 reputation of the facility. 3 BY MS. ZIBAS: 4 Q. Are you aware if Palm Beach Health Network 5 has been out promoting the low grades as part of this 6 lawsuit? 7 MR. CHUNG: Objection to form. 8 A. I'm not aware of that. 9 BY MS. ZIBAS: 10 Q. Do you regularly read the media in the 11 local Palm Beach papers related to the hospital and 12 the Palm Beach Health Network? 13 MR. CHUNG: Objection to form. 14 A. I've not -- I don't regularly read 15 newspapers. I'm aware there's been articles. 16 BY MS. ZIBAS: 17 Q. Have you read any of the articles? 18 A. No. 19 Q. So do you -- at Palm Beach Gardens 20 Community Hospital, do you consider hand hygiene to 21 be important for patient care? 22 A. Absolutely. 23 Q. And is there a plan or a metric that is 24 used to track the hand hygiene of the employees? 25 A. Yes.	Page 44 1 A. Well, there are many. Hospital patient 2 safety involves many components. For example, 3 there's prevention of wounds, prevention of 4 infections with central lines, catheters, follies, 5 what we call follies, other infections, such as have 6 Clostridium difficile, MRSA, that's one thing. 7 There's fall prevention protocols, as well. That 8 goes into a patient safety, quality. Medication 9 errors. 10 Q. And when -- what is done with the patient 11 safety data that's gathered regarding all of these 12 points? Is it given to a committee or reviewed by 13 you? 14 MR. CHUNG: Objection to form. 15 A. Sure. The findings are discussed in the -- 16 in the quality and safety committee. Where there's 17 opportunities for improvement, the hospital follows a 18 climb to steady act cycle for improvement where we 19 target those specific areas that need improvement and 20 we reevaluate and assess. That information is -- 21 does go up to the medical executive committee and the 22 governing. 23 BY MS. ZIBAS: 24 Q. And does any of it go further up to Tenet 25 corporate?
Page 43 1 Q. And what is that metric or system? 2 A. It's a surveillance methodology that the 3 hospital uses where they have trained staff to go out 4 there and observe employees, physicians, interacting 5 with patients to make sure they're following proper 6 protocol for handwashing, and then they report that 7 back to the infection control committee. 8 Q. And who is on the infection control 9 committee? 10 A. There are -- it's our infection control 11 nurse. There's an infectious disease doctor. There 12 are nursing leaders, chief nursing officer. 13 Q. Is there also a medical executive 14 committee? 15 A. Yes. 16 Q. And does the medical exec -- is the medical 17 executive committee informed about the outcomes of 18 the hand hygiene surveillance method? 19 A. Yes. 20 Q. What about safety, safety plan, is that 21 important to patient care? 22 A. Absolutely. 23 Q. And what metric, if any, is used at Palm 24 Beach Gardens hospital to monitor the safety plan and 25 adherence to the safety plan?	Page 45 1 A. Tenet has the ability to assemble that 2 data, as well. 3 Q. And what about ICU staffing? Obviously, if 4 it's staffing, you probably monitor it. Is this 5 something that also is a metric that is shared with 6 the quality safety committee or is it shared with 7 medical executive committee or both? 8 MR. CHUNG: Objection to form. 9 A. Are you referring to ICU staffing from the 10 physician side -- 11 MS. ZIBAS: Physician side. 12 A. -- or the nursing side. 13 Okay. So from the physician side, we contract 14 with a group that staffs our ICU with intensivists, 15 physicians, and midlevel providers, and they staff 16 the ICU around the clock, 24/7, with providers. And 17 that plan is shared with the medical executive 18 committee and the governing board. 19 BY MS. ZIBAS: 20 Q. Do you also contract services for the 21 emergency room for staffing physicians? 22 A. Yes. 23 Q. And what about your generalist, your 24 internists, do you also staff those with contract 25 physicians?

Erik Cazares
September 24, 2025

Page 46 1 A. No. We have independent hospitalists. 2 Q. What about the computerized physician order 3 entry system, do you regularly track that with a 4 metric and report? 5 A. We do. 6 Q. And where is that data reported? 7 A. Similar committees, through the quality and 8 safety committees. 9 Q. Are you on the quality and safety 10 committee? 11 A. I attend. I don't attend all of them, but 12 I do attend from time to time. 13 Q. How many people are on that committee? 14 A. I can't tell you off the top of my head, 15 but it's -- it's well attended by different 16 specialties in the organization, including 17 physicians. 18 Q. And what about bar code medication 19 administration, is that tracked, as well? 20 A. Yes. 21 Q. And does that go to the same committees, 22 the quality safety committee? 23 A. I believe it does. 24 Q. Do you have a pharmacy on site? 25 A. Yes.	Page 48 1 trying to make sure. 2 THE VIDEOGRAPHER: We're off the record at 3 11:33 a.m. 4 (Brief recess was taken at 11:33 a.m.) 5 (Back on the record at 11:46 a.m.) 6 THE VIDEOGRAPHER: Back on the record at 7 11:46 a.m. 8 BY MS. ZIBAS: 9 Q. All right. Mr. Cazares, in our last 10 question, you explained or you testified that there 11 are 22 measures that you're aware of that Leapfrog 12 evaluates as part of their safety grade. Is that 13 Leapfrog evaluates or CMS? As far as you know, is it 14 22 for CMS or Leapfrog? 15 A. Leapfrog as far as I'm aware. 16 Q. Now, do you believe that through patient -- 17 do you -- let me cross that off. 18 Do you, at Palm Beach Gardens, conduct patient 19 experience surveys? 20 A. Yes. 21 Q. And who oversees the patient experience 22 surveys? 23 A. The chief nursing officer. 24 Q. And does someone assemble the data? 25 A. Yes.
Page 47 1 Q. And are the pharmacists staffed through 2 contract or are they hospital employees? 3 A. They're hospital employees. 4 Q. So do you agree that the measures that we 5 just walked through, the safety, the CPOE, the 6 medication administration, the ICU staffing, and hand 7 hygiene are all important factors for patient care? 8 A. Repeat that again. 9 Q. I said just going through the factors that 10 we just went through, the ICU staffing, the hand 11 hygiene, the safety plan, the CPOE, and the BCMA, are 12 these all factors that you think are important for 13 patient care at Palm Beach Gardens? 14 MR. CHUNG: Objection. 15 A. They are part of a -- they are part of 16 factors that do affect quality and safety, I would 17 agree with that, but they're not the only ones. 18 BY MS. ZIBAS: 19 Q. When we were discussing the Leapfrog 20 methodology before, do you know how many total 21 measures are evaluated to come to the grade? 22 MR. CHUNG: Objection to form. 23 A. I believe it's 22. 24 MS. ZIBAS: Excuse me. Off the record. My 25 mom is in the hospital with a clot, so just	Page 49 1 Q. And is that shared with you or with anybody 2 else? 3 A. Yes. 4 Q. And did you produce that data as part of 5 the discovery in this case? 6 A. Not me personally. 7 Q. Do you know if somebody else did? 8 A. I don't know. 9 Q. And is the patient experience data 10 assembled monthly, quarterly, annually? 11 A. I believe it's reported quarterly, but we 12 have the ability to pull it at any time. 13 Q. And what do you do with that data once you 14 review it? Do you create a plan to address people, 15 their negative experiences? What do you do? 16 A. Sure. The information that we gather from 17 the surveys, we use it to align our operations to 18 better meet the needs of our patients. 19 Q. Do you believe that -- do you agree that 20 patients should have transparency regarding the 21 patient care at Palm Beach Gardens? 22 MR. CHUNG: Objection to form. 23 A. Could you repeat the question? 24 BY MS. ZIBAS: 25 Q. Yes. Do you believe that patients are

Page 50 1 entitled to transparency into their patient care at 2 Palm Beach Gardens? 3 MR. CHUNG: Objection to form. 4 A. I believe in transparency, yes. 5 BY MS. ZIBAS: 6 Q. And are there any systems in place at Palm 7 Beach Gardens to give a patient transparency into 8 their medical care? 9 MR. CHUNG: Objection to form. 10 A. Yes. I don't understand the question. 11 BY MS. ZIBAS: 12 Q. Well, for instance, do you have medical 13 records and information about the hospital ratings 14 available for patients to review when they become 15 inpatients or outpatients? 16 MR. CHUNG: Objection to form. 17 A. We don't have ratings. We don't share 18 ratings with our patients. 19 BY MS. ZIBAS: 20 Q. What about their medical records, are they 21 entitled to review their medical records? 22 A. They are. 23 Q. While a patient? 24 A. Well, while a patient, there's a process 25 that has to be followed for them to be able to access	Page 52 1 A. That is tracked, as well. 2 Q. And do you know what the compliance rate 3 was in 2025 for that? 4 A. The last time I looked at that compliance 5 rate was approximately 80 percent. 6 Q. Do you know if as part of the CMS star 7 ratings, that if CMS looks at hand hygiene or the 8 CPOE? 9 A. I can't think -- I can't recall exactly all 10 the things that CMS looks at. 11 Q. Do you recall anything that CMS looks at? 12 A. Yes. They look at patient safety 13 indicators, infection rates. 14 Q. And -- 15 A. Patient experience. 16 Q. And what did you find in the CMS star 17 ratings in terms of the outcomes of infection rates 18 at Palm Beach Gardens? 19 MR. CHUNG: Objection to form. 20 A. That's -- repeat the question, again. 21 BY MS. ZIBAS: 22 Q. What did you find in CMS star ratings in 23 terms of the outcomes and infection rates at Palm 24 Beach Gardens? 25 MR. CHUNG: Objection to form.
Page 51 1 the records. 2 Q. Did you ever calculate the BCMA error rate 3 in 2024 at Palm Beach Gardens? You or somebody else 4 on your behalf ever calculate the error rate? 5 A. I didn't. I don't know if someone else 6 did. 7 Q. And do you know what the error rate was? 8 A. No. What do you mean by error rate? 9 Q. Well, any -- if they found that people did 10 not follow the policies or procedures for bar code 11 medication administration? 12 A. You're talking about the compliance? 13 Q. Correct. 14 A. Compliance rate or error rate? 15 Q. Both. Separately error rate and compliance 16 rate. 17 A. Yeah. For what year? 18 Q. 2024. 19 A. Oh, I'm not familiar for 2024. I don't 20 remember what that was. 21 Q. What about for 2025? 22 A. For 2025, I know the last time I looked at 23 the compliance rate was 95, close to 95 percent. 24 Q. And do you also track the compliance rate 25 of the computerized physician ordering entry?	Page 53 1 A. Last time that I looked at the CMS ratings, 2 on most metrics, our hospital, when it comes to 3 infection and outcomes on most metrics, we are in par 4 with the national average. 5 BY MS. ZIBAS: 6 Q. And what does that mean, being on par with 7 the national average? 8 A. That means that we are in the same range as 9 similar hospitals across the nation. 10 Q. Have you ever asked Maggie Gill or anyone 11 at Tenet if Palm Beach Gardens could participate in 12 the Leapfrog survey? 13 A. I have not. 14 Q. Have you ever reviewed the Leapfrog survey? 15 A. In its entirety? 16 Q. Yes. 17 A. No. 18 Q. Have you -- since you've been a CEO or COO 19 of any hospital, have any of the hospitals where 20 you've worked participated in the Leapfrog survey? 21 A. Repeat, since when? 22 Q. Since you were a COO or CEO? 23 A. When I was a COO, I believe our hospital 24 did participate. 25 Q. And when you were C -- and was that a

Page 54 1 decision made by whom to participate when you were 2 COO? 3 A. I don't remember. 4 Q. Are you permitted as the CEO of Palm Beach 5 Gardens for your hospital to participate? 6 A. Right now, we've -- we have a directive, 7 and directed not to participate in Leapfrog. 8 Q. And what about in 2024, was there a 9 directive when you first started not to participate 10 in Leapfrog? 11 A. Wasn't questioned in 2024. I didn't 12 question it. It wasn't an issue. 13 Q. And who was the directive from that you not 14 participate in the Leapfrog survey? 15 A. My immediate boss, Maggie. 16 Q. As part of Amanda's duties as marketing 17 manager or another person at Palm Beach Gardens, does 18 anybody participate or hire anyone to do market share 19 studies against your competitor, Jupiter Medical 20 Center? 21 A. No, I'm not aware. 22 Q. Is that something that's been considered? 23 A. Not that I'm aware of. 24 Q. Now, of your patient population, would you 25 say that over 50 percent of them obtain information	Page 56 1 A. Amongst other things, yes. 2 Q. And has the revenue increased or decreased 3 since 2024? 4 A. It's increased slightly. 5 Q. And going back to the reputational harm you 6 described, why don't you explain to me outside of the 7 complaints from some of the physicians and patients, 8 can you tell me how many patients you or somebody 9 else at the hospital have talked to about the 10 Leapfrog grades that were complained about? 11 MR. CHUNG: Objection to form. 12 A. I can't quantify the amount of patients. 13 Like I mentioned earlier, the amount of complaints 14 has been increasing, especially after the Tik Tok 15 video. That seemed to have really gotten out there 16 in the community, and more and more patients have 17 been complaining to the physicians, who then complain 18 to me, and I've also received direct complaints from 19 patients. They've left Google reviews referencing 20 the Tik Tok video. There's been different complaints 21 voiced, and we're seeing more and more of them as 22 time goes by. 23 BY MS. ZIBAS: 24 Q. And when you say more and more, how many do 25 you receive in a week?
Page 55 1 about what hospital to go to on the Internet? 2 A. I don't know. 3 MR. CHUNG: Objection to form. 4 BY MS. ZIBAS: 5 Q. Has there ever been a study done or survey 6 done at Palm Beach Gardens as to what patients rely 7 on for their source of selecting the hospital to go 8 to? 9 A. None that I'm aware of. 10 Q. Is it something that's been discussed to 11 survey? 12 A. Not that I'm aware of. 13 Q. Do you think it would be helpful to know 14 what the sources of information are for your patient 15 population? 16 MR. CHUNG: Objection to form. 17 MS. ZIBAS: To select a hospital. 18 MR. CHUNG: Objection to form. 19 A. I don't know if it would be helpful or not. 20 BY MS. ZIBAS: 21 Q. Is your compensation tied to the revenue 22 outcomes at Palm Beach Gardens? 23 A. To the revenue? 24 Q. Yes. Is there any compensation tied to the 25 revenues of the hospital?	Page 57 1 A. Between patients and physicians, between 2 four and five. 3 Q. And do you track those in a log or do you 4 have a journal or somewhere in the computer? 5 A. I do not. 6 Q. Does anybody track these complaints? 7 A. Some complaints are tracked. We have a 8 general grievance log, but it's not specifically for 9 Leapfrog letter grades or complaints. 10 Q. So what is the general grievance log? 11 A. That's -- it's a log that is maintained by 12 our patient safety officer and it's -- that's one of 13 the regulatory mandates by CMS. And this is mostly 14 for patients that have received services in our 15 facility. 16 Q. Why is there no log of the complaints 17 related to Leapfrog being maintained? 18 MR. CHUNG: Objection to form. 19 A. Yeah. I'm -- the hospital has -- that 20 would require additional resources, more time, you 21 know, dedicated to keeping track of all these 22 patients and complaints, and that is not something 23 that we can afford to do right now. Our staff is 24 committed to improving patient safety in the 25 hospital, and that's where we're redirecting our

Erik Cazares
September 24, 2025

Page 58 1 resources. 2 BY MS. ZIBAS: 3 Q. Has the complaints about this Tik Tok 4 video, did they come from patients or from 5 physicians? 6 A. Patients, physicians, staff, governing 7 board members. 8 Q. And have you had any physicians resign 9 because of the Leapfrog grades? 10 A. No. 11 Q. How is the nursing recruiting and 12 retention? Is it difficult? 13 MR. CHUNG: Objection to form. 14 A. What do you mean by difficult? 15 BY MS. ZIBAS: 16 Q. I mean, in general, is it difficult for 17 Palm Beach Gardens to attract nurses, and I'd say if 18 you compared 2025 to 2024? 19 MR. CHUNG: Objection to form. 20 A. I would not say that it's any different 21 than most hospitals. 22 BY MS. ZIBAS: 23 Q. Would you say that most hospitals have 24 difficulty attracting nurses or there's as nursing 25 shortage essentially?	Page 60 1 I mentioned earlier, the patient safety plan involves 2 many different things, but particularly, in patient 3 experience, which is an area that the hospital has 4 struggled for some time, we have directed our teams 5 to increase compliance with our patient experience 6 initiatives. 7 Q. Is patient experience one of the measures 8 that CMS looks at in their star rating? 9 A. Yes. 10 Q. Are there any other rating systems that you 11 haven't talked about yet today that Palm Beach 12 Gardens participates in? We talked about 13 Healthgrades, basically. Are there any others that 14 the hospital participates in? 15 A. That rate the hospital? 16 Q. Yes. Or grade the hospital. One of the 17 two. 18 A. Grade the hospital. Well, we said Joint 19 Commission, Healthgrades. There may be a couple 20 others that are listed on awards. American Heart 21 Association, we have a designation for stroke. And 22 then we have one for cardiac rehab, American 23 Association of Cardio and Pulmonary Rehab. We also 24 have a certification, and that's based on actual 25 audits of the facility in person.
Page 59 1 A. I think, in general, there's a nursing 2 shortage. 3 Q. Have there been any contracts signed with 4 any outside vendors to provide services related to 5 patient safety, to provide any services or consulting 6 related to patient safety? 7 A. Not that I'm aware of. 8 Q. Do you have any contract signed with 9 outside vendors that would provide advice or 10 consulting for quality improvement? 11 A. None that I'm aware of. 12 Q. Have -- since you've taken on your role as 13 CEO, have you made any changes, you yourself, to the 14 quality improvement plan? 15 A. The actual written plan, no. 16 Q. Okay. Have you provided guidance or 17 suggestions to make changes to the quality 18 improvement plan? 19 A. I have. I've directed my teams to enforce 20 the patient safety plan and to make sure that we 21 increase compliance with the patient safety plan 22 across the organization. 23 Q. What was the compliance prior to you 24 providing the guidance to increase the compliance? 25 A. Well, that's a broad question because like	Page 61 1 Q. And does Palm Beach Gardens pay for using 2 the -- pay a license fee or pay any fee to be able to 3 use the logos from like American Heart? 4 A. I'm not sure if we're paying. I really 5 don't know if we're actually paying to use their 6 logo. 7 Q. Do you know if Palm Beach Gardens and the 8 Palm Beach Health Network have been monitoring the 9 Leapfrog grades every grading period? 10 MR. CHUNG: Objection to form. 11 A. My understanding is that our quality 12 director keeps track of the Leapfrog grades. 13 BY MS. ZIBAS: 14 Q. And why does the quality director track the 15 Leapfrog grades? 16 A. I believe she's the one that has access to 17 the website. So that's how it's been set up. 18 Q. And is that a directive from the Tenet 19 Healthcare home office, or is this just something of 20 interest of the quality director? 21 A. I don't -- I don't know if it's -- there's 22 guidance from home office that it should be the 23 quality director or not. That's the way it's been, 24 and the quality director is the one that pulls those 25 scores or tracks them.

Erik Cazares
September 24, 2025

Page 62 1 Q. Has the quality director ever discussed 2 with you that they -- that Palm Beach Gardens would 3 like to participate in the Leapfrog survey? 4 MR. CHUNG: Objection to form. 5 A. No. She has not. 6 BY MS. ZIBAS: 7 Q. Do you have any -- do you have any evidence 8 or do you have any documents that would prove that 9 Leapfrog takes any money from hospitals to give them 10 better grades? 11 A. It is my understanding that when a 12 hospitals participates in Leapfrog, they submit data, 13 valuable data from their organization, and that 14 Leapfrog owns the rights to that data, which they can 15 then use for commercial purposes. Commercial gains 16 is what they actually have on their application when 17 the data is submitted, so we're technically having to 18 sign this form saying that Leapfrog now owns this 19 data and they can do with it as they please for 20 commercial gains. So we consider that a form of 21 compensation. 22 Once the hospital participates in Leapfrog, they 23 also have to pay Leapfrog to be able to market the 24 letter grade that they receive, so that's another 25 form of compensation. The opposite of that is if a	Page 64 1 A. They require -- from what I know, is that 2 you have to buy the trophy from them or the award, if 3 you want the award. You don't have to buy it. But 4 the big difference is that Healthgrades is not 5 penalizing us for not participating. If we don't 6 participate in Healthgrades or if we don't get an 7 award in Healthgrades, there is no public damage. 8 They don't go out there and automatically fail a 9 hospital in a particular area, as Leapfrog is doing. 10 Q. So these documents you talk about that you 11 have to sign, have you seen the documents that you 12 have to sign that Leapfrog requires you to sign? 13 A. Yes. 14 Q. When did you see them? 15 A. It's -- there's a document included in our 16 complaint that shows an example. 17 Q. Okay. And is that the first time you saw 18 the document in the complaint? 19 A. Yes, because I've never -- I've never 20 signed one before. 21 Q. And where is the information coming from 22 that indicates that you turned in the data and you -- 23 and the rights belong to Leapfrog? Where is that 24 information coming from? 25 A. From that document.
Page 63 1 hospital does not participate, they are then 2 penalized with a lower score in those four metrics 3 that we talked about earlier, which results in a 4 lower letter grade, as was the case in Palm Beach 5 Gardens Medical Center, and it ultimately resulted 6 with the public perception and reputation being 7 damaged, as I mentioned earlier, with physicians and 8 patients and community members complaining about 9 patients not wanting to go to Gardens because of the 10 low safety rating. 11 Q. So is it free -- is there a fee for the 12 hospital to complete the Leapfrog survey? 13 A. Not that I'm aware of. What I consider the 14 payment is what I mentioned earlier, which is we're 15 turning in the data, and we're handing it off, the 16 rights to that data, for Leapfrog to use and 17 monetize. And the CEO actually has to sign a 18 document that allows them to do that before 19 participating on that, as well as once the hospital 20 participates and they receive a letter grade, then 21 they're expected -- then they're expected to pay if 22 they want to market their letter grade, which is 23 another form of compensation there. 24 Q. But doesn't Healthgrades require you to pay 25 to market with their letter grade?	Page 65 1 Q. Is that also from the complaint? 2 A. From -- yes. 3 Q. Okay. So the first time that you saw this 4 information is in the complaint that's filed in the 5 lawsuit; correct? 6 A. Yes. I had already heard of it from my 7 colleagues. 8 Q. And who told you about it? 9 A. Other colleagues. 10 Q. Who, which colleagues? 11 A. Other CEOs. 12 Q. And which CEOs talked about it? 13 A. This is years, years ago. 14 Q. How many years ago? 15 A. Four, five, six years ago. Throughout my 16 long tenure, I've known about that. 17 Q. And were they all Tenet hospital CEOs, 18 Tenet-owned hospital CEOs? 19 A. Not necessarily. 20 Q. How many CEOs talked about Leapfrog that 21 you recall that were not Tenet owned? 22 A. I don't -- I don't remember. 23 Q. Do you have any meetings with CEOs of 24 hospitals, say, quarterly or even annually that are 25 not Tenet-owned hospital CEOs?

Erik Cazares
September 24, 2025

Page 66 1 A. No, I don't have any formal meetings. 2 Q. Do you ever participate in any conferences 3 or any educational sessions with other CEOs of 4 hospitals that aren't Tenet owned? 5 A. I used to. 6 Q. And when did you stop? 7 A. I don't recall exactly. 8 Q. And why did you stop participating in 9 conferences? 10 A. Mostly time. 11 Q. So going back to this public perception. 12 Why don't you describe to me, quantify to me, what is 13 this public perception you keep describing in a very 14 negative way? How many people are impacted, et 15 cetera? Why don't you give me an idea, quantify 16 it -- 17 A. I cannot -- 18 MR. CHUNG: Objection to form. Asked and 19 answered, argumentative. 20 A. I cannot give you a specific number. Like 21 I mentioned, I'm currently receiving anywhere from 22 four to five complaints a week, combination of 23 physicians, patients, community stakeholders, and 24 those complaints have been increasing ever since that 25 Tik Tok video was released.	Page 68 1 A. I have not. 2 Q. Have you discussed this lawsuit with any of 3 the other CEOs of the five plaintiff hospitals? 4 A. No. 5 Q. Would you know why some of the sentences in 6 the declarations of yours and Jared Hanlon are 7 exactly the same? 8 MR. CHUNG: Objection to form. 9 A. I don't know why. 10 BY MS. ZIBAS: 11 Q. All right. So in looking at -- starting 12 with page 2. 13 A. Okay. 14 Q. So starting -- actually, go to page 6. And 15 looking at paragraphs 13 and 14, where did you obtain 16 this background information if you were not CEO at 17 the time for -- to draft these two paragraphs? 18 A. Once again, we don't participate in 19 Leapfrog, is that what you're -- 20 Q. No. I asked you where did you get this 21 information in 13 and 14 because you weren't CEO? So 22 I'm trying to understand where you got this 23 information. 24 A. Let me read it. I mean, this information 25 mimics the same sentiment I had at our previous
Page 67 1 BY MS. ZIBAS: 2 Q. Do you plan on tracking some of the 3 complaints now going forward, or are you still going 4 to continue to just not track -- 5 A. I don't have any plans to track. Like I 6 mentioned, we have many things that we're doing in 7 the organization to run a hospital 24/7, to drive 8 quality. It's just another activity that it's not -- 9 it's not a priority for us to be tracking all the 10 complaints that are coming in. 11 MS. ZIBAS: I'll mark this next Exhibit 4. 12 (Exhibit 4 was marked.) 13 BY MS. ZIBAS: 14 Q. I've put in front of you what we marked as 15 Exhibit 4, and it's a declaration that appears that 16 you drafted; is that correct? 17 A. Correct. 18 Q. And did you independently draft this? 19 A. This was drafted with the assistance of 20 lawyers. 21 Q. Did you ever discuss your declaration in 22 Exhibit 4 with Jared Hanlon? 23 A. No. 24 Q. Have you ever seen the declarations of the 25 other CEOs who are plaintiffs in this lawsuit?	Page 69 1 facilities, as well, on why we don't participate in 2 Leapfrog. 3 Q. Okay. But the previous facility still gets 4 Cs; correct? 5 MR. CHUNG: Objection to form. 6 A. I don't know. I don't know what the 7 previous facility is doing right now. 8 BY MS. ZIBAS: 9 Q. Based on the exhibits I gave you, and I 10 guess you can always check the website, that they are 11 getting Cs now. 12 A. This is only two pages. I'm pretty sure 13 there's more to the assessment. So I can't tell by 14 this if they participated or not. 15 MS. ZIBAS: All right. There's a -- so if 16 you look at the -- and we'll mark this as 17 Exhibit 5, so you can compare. 18 (Exhibit 5 was marked.) 19 BY MS. ZIBAS: 20 Q. If you look at Exhibit 5 that's been put in 21 front of you, the Leapfrog hospital safety grade for 22 Palm Beach Gardens Medical Center, and it says F on 23 it; correct? And if you go to the second page in 24 red, it says declined to report. The hospital was 25 asked to provide this information to the public but

Page 70 1 did not, under notes and definitions. Is that an 2 accurate statement? 3 A. This is showing specifically -- I just 4 don't know what this is referring to specifically. 5 Q. Have you ever looked at the Leapfrog 6 hospital grade website? 7 A. I've gone in there. 8 Q. And was there anywhere on the website, did 9 you notice on the website that there is that language 10 that says the hospital did not participate or was 11 asked to provide information but did not? Have you 12 ever seen that on the website? 13 A. There are some metrics where it states 14 that, but then we're still graded on some of them and 15 on some we're not, which is part of the confusion 16 here, why we're not okay with that methodology. 17 Q. Who is we? 18 A. We, the hospital, myself. 19 Q. Now, looking at -- so paragraphs 13 and 14, 20 did you draft these, at all, these two paragraphs? 21 Did you draft any of this language yourself? 22 A. This was drafted with the assistance of 23 lawyers. 24 Q. And are you aware it's identical to their 25 language used by the other CEOs?	Page 72 1 Q. How did you learn about -- you have a 2 statement in paragraph 18, in fall of 2024, TLG 3 adjusted it's grading methodology as noted below and 4 continued to grade community hospital. How did you 5 learn about the adjusted grading methodology that you 6 reference in this sentence? 7 A. I learned about it after we received an F, 8 and I learned of it from our quality director. 9 Q. Now, in paragraph 19, you state in your 10 declaration, it shows that if you participate in its 11 pay-to-play, time consuming hospital survey, TLG 12 assigns you a better grade. What do you mean by 13 pay-to-play? 14 A. Well, as I mentioned earlier, if the 15 hospital participates, part of the participation is 16 that they have to submit the data, hand over the data 17 to Leapfrog. Leapfrog then can use that data as they 18 wish, including for commercial gains, and that's part 19 of the earlier comment that I made. And then once 20 the hospital receives a letter grade, they have to 21 pay Leapfrog to be able to promote that score or 22 publish that score or use their logo. So that's one. 23 The other one is the hospital is pressured to do 24 so, almost coercion, if you -- could be a word to 25 describe that because if you don't participate, if
Page 71 1 A. That I did not know. I have not seen their 2 declarations. 3 Q. In paragraph 17 on the next page, it 4 references spring 2022 hospital safety grades and we 5 were surprised. Since you were not the CEO and you 6 were still working in Texas, where did the 7 information come from to draft paragraph 17? 8 A. This was -- this is on behalf of the 9 organization. 10 Q. And who provided you the information at the 11 organization to draft that paragraph? 12 A. This was in consultation with our lawyers. 13 Q. And paragraph 18 says in fall of 2024, TLG 14 adjusting it's grading methodology as noted below and 15 continued to grade the community hospital. How were 16 you notified about the adjustment to the grading 17 methodology? 18 MR. CHUNG: Objection to form. 19 In this line, continuing objection based on 20 privilege and just asking you based on privilege 21 not to -- if your responses involves 22 communications with counsel, not to -- not to go 23 into those communications. 24 A. Okay. Repeat the question. 25 BY MS. ZIBAS:	Page 73 1 the hospital does not participate, the hospital gets 2 scored at the lowest possible score on those four 3 metrics that we discussed earlier, which the 4 hospital, Palm Beach Gardens Medical Center, is 5 performing well; yet, they scored at the very lowest 6 level. 7 So there is pressure for the hospital to 8 participate, pressure for the hospital to submit the 9 data, to hand it over to Leapfrog, and that's 10 basically where this pay for play comes from. 11 Q. What are the commercial gains that Leapfrog 12 gets that you described? Where are you getting your 13 information about the commercial gains? 14 A. That's not my information. 15 Q. Where is it? 16 A. That's what Leapfrog puts in their 17 statement. In their statement, Leapfrog says that 18 the data can be used for commercial gains. 19 Q. Okay. And again, that is -- you first read 20 that based on the complaint filed in this case; 21 correct? That's where you first read that 22 information? 23 A. That's where I first read it, but I've 24 already had -- like I mentioned earlier, I had 25 already known about it.

Page 74 1 Q. Why doesn't Palm Beach Gardens merely 2 participate in the survey, rather than spend the time 3 having to address all of the reputational damage? 4 MR. CHUNG: Objection to form. 5 A. Gardens does not participate because it is 6 a very time consuming activity that the hospital does 7 not feel participating in the survey is improving 8 patient safety or quality, and that time and 9 resources could be better spent addressing real 10 initiatives in the organization to improve safety and 11 quality. 12 BY MS. ZIBAS: 13 Q. How much time would be spent filling out 14 the Leapfrog survey based on your estimate that it's 15 time consuming? 16 A. I wouldn't be able to give you a time 17 estimate. But the individuals that put this work 18 together, they have many other things to do in the 19 hospital, and this is not an additional burden that 20 we would want to provide them with. 21 Q. And since the hospital is already 22 completing the CMS data, isn't most of the data 23 that's submitted to Leapfrog similar? 24 MR. CHUNG: Objection to form. 25 A. Some of the data is similar, but there's	Page 76 1 physicians and other patients. Why did you not list 2 them in this paragraph? 3 MR. CHUNG: Objection to form. 4 A. I think I answered that earlier. We 5 continue to get complaints. Like I said, every week, 6 we get more and more complaints in there, as well. 7 And here it's broadly stated that we've been 8 receiving complaints from physicians and patients in 9 the community, and we continue to do so to this day. 10 BY MS. ZIBAS: 11 Q. How many complaints has medical executive 12 committee told you that they received? 13 A. I can't quantify that. 14 Q. Why can't you quantify it? 15 A. Because I'm not keeping track of how many 16 complaints are being brought to my attention from 17 every individual. I can tell you, in general, four 18 to five complaints a week is what I can tell you at 19 this point. 20 Q. Do you consider any of the complaints from 21 patients or the governing board legitimate complaints 22 about the patient care at Palm Beach Gardens? 23 MR. CHUNG: Objection to form. 24 A. I don't understand your question. 25 BY MS. ZIBAS:
Page 75 1 still a lot of work and additional work that is 2 required to submit the Leapfrog survey, and that is 3 not time or resources that the hospital is going to 4 commit when those could be better spent elsewhere in 5 the organization. 6 BY MS. ZIBAS: 7 Q. And you referenced that the organization 8 would rather spend it on improvements. What 9 improvements is the Palm Beach Gardens working on in 10 lieu of spending time and resources on the survey? 11 MR. CHUNG: Objection to form. 12 Mischaracterizes prior testimony. 13 A. Going back to my earlier comments about the 14 hospital's overall goals, our goal is to continuously 15 improve patient safety, quality, patient experience 16 in the organization, and we have many initiatives 17 that are geared towards that. And that's where our 18 resources will continue to be funneled to. 19 BY MS. ZIBAS: 20 Q. So going to page 13 of your declaration, 21 you have as the top line, TLG safety grades harm the 22 community, hospital, its patients, and its community. 23 You drafted this paragraph or with the guidance of 24 counsel drafted the paragraph, and today you came in 25 here and you're testifying about a number of	Page 77 1 Q. So you said that everyone that you're 2 receiving complaints, is that correct, complaints 3 about the Leapfrog grades? 4 A. Complaints about patients not wanting to go 5 to Gardens because of the letter F grade. 6 Q. And do you think that some of the concerns 7 of the patients are legitimate -- 8 MR. CHUNG: Objection to form. 9 MS. ZIBAS: -- regarding the patient care 10 at Palm Beach Gardens? 11 MR. CHUNG: Objection to form. 12 Mischaracterizes witness' testimony. 13 A. The concerns that the patients have are 14 that the hospital has received an F grade for patient 15 safety, and therefore, choosing not to come to the 16 hospital. That's the reputational harm that we're 17 referring to. 18 BY MS. ZIBAS: 19 Q. But you haven't been able to quantify, at 20 this point, that reputational harm? 21 MR. CHUNG: Objection to form. 22 Mischaracterizes the witness's testimony. 23 BY MS. ZIBAS: 24 Q. Because you state in your declaration, 25 there's reputational harm.

Page 78 1 A. There's reputational harm. 2 Q. Have you not been able to quantify it? 3 A. There's reputational harm, patient 4 complaints, patients are leaving to our sister 5 facility -- to our competing facility, which is 6 Jupiter Medical Center. They've communicated that to 7 our physicians. And these are the complaints that I 8 receive on a weekly basis. 9 Q. How -- What's your percentage of decrease 10 in admissions between 2024 and 2025? 11 A. I don't have it in front of me. There's a 12 document that, I believe, we address that, but I 13 can't think of it right off the top of my head. 14 Q. Is there a decrease in inpatient 15 admissions? 16 A. There's a slight increase. 17 Q. And is there a decrease in ER visits? 18 A. There is. 19 Q. What's the percentage? 20 A. Roughly, 5, 6 percent. Somewhere around 21 that range. 22 Q. And is there a decrease in the outpatient 23 services? 24 A. Yes. 25 Q. What's the percentage decrease?	Page 80 1 of the recipients of this e-mail. Do you see that in 2 the top of this e-mail? 3 A. I do. 4 Q. And the body of the e-mail and the subject 5 says FYI, and at the bottom, it says, please send me 6 request reintroduce Leapfrog reporting, include 7 rationale, imputed score, and clippings of negative 8 press/community and MD feedback. I will request an 9 exception for PBHN and PMC to start next reporting 10 period. Thanks, Maggie. 11 Do you recall that e-mail, receiving that 12 e-mail? 13 A. I do. 14 Q. And was this topic discussed with Maggie or 15 among the CEOs, at all, about reintroducing Leapfrog 16 reporting? 17 A. I don't recall having a conversation with 18 them. I do recall this e-mail. 19 Q. And was a request made to reintroduce 20 Leapfrog reporting? 21 A. No, not that I'm aware of. 22 Q. Did you hear anything further about this 23 e-mail? 24 A. No. 25 Q. Do you know why Maggie made that request?
Page 79 1 A. I believe it's similar, maybe a little 2 over. 3 Q. And have any -- has the hospital taken on 4 any survey or research as to what is causing the 5 decrease in the ER visits and the outpatient 6 services? 7 A. No. 8 Q. So in paragraph 25 of your declaration, you 9 indicate in the last sentence that resources that 10 could have otherwise been spent continuing to improve 11 patient care. So why don't you describe to me what 12 the resources -- what the patient care improvements 13 have been where you're spending the resources? 14 A. I mentioned that earlier. There's 15 different activities that the hospital targets when 16 it comes to patient experience, decreasing patient 17 falls, making sure we have compliance with different 18 quality metrics across the organization. For 19 example, handwashing, fall prevention, that's where 20 the resources are going. 21 MS. ZIBAS: I'll give you Exhibit 6. 22 (Exhibit 6 was marked.) 23 BY MS. ZIBAS: 24 Q. This is an e-mail from Maggie Gill dated 25 December 11, 2024. It's Exhibit 6. And you were one	Page 81 1 A. I can't speak for Maggie so -- but I'm -- 2 no. I can't speak for why Maggie made that request. 3 As far as my hospital is concerned, I had voiced to 4 Maggie that we were starting to get complaints from 5 physicians about our F grading in Leapfrog. 6 Q. Do you agree with the -- with Maggie's 7 e-mail to re -- to request to reintroduce Leapfrog 8 reporting? 9 MR. CHUNG: Objection to form. 10 A. I don't agree or disagree. I mean, that's 11 her statement. 12 BY MS. ZIBAS: 13 Q. Do you want -- did -- did Palm Beach 14 Gardens want to start participating in Leapfrog, 15 again, in the survey? 16 A. You mean, did I want to? 17 Q. Yes. 18 A. No. 19 MS. ZIBAS: Here's Number 7. 20 (Exhibit 7 was marked.) 21 BY MS. ZIBAS: 22 Q. I'm handing you an e-mail from Naomi 23 Seymour to you dated December 11, 2024. Do you see 24 that? 25 A. Yes.

Page 82 1 Q. Do you recall receiving this e-mail? 2 A. Yes. 3 Q. It says, Ricky shared that we will probably 4 start submitting to Leapfrog, again. So their tactic 5 worked. What does that mean, in your opinion, when 6 you received that e-mail? Did you understand that to 7 mean? 8 A. Which specific part? 9 Q. The whole sentence or two sentences. 10 A. The one that Naomi sent? 11 Q. Yes. First, who is Naomi? 12 A. She is my chief nursing officer. 13 Q. Okay. 14 A. Basically, she's saying that Ricky, who is 15 the group chief nursing officer, alluded to that we 16 may start submitting to Leapfrog, again, is what it 17 says there. And then she makes a reference so that 18 their tactic worked. She's referring to Leapfrog's 19 pressure on the hospitals to participate by handing 20 out F grades is what -- that's the way I interpret 21 the e-mail. 22 Q. Are you aware there are nonparticipating 23 hospitals that earn As and Bs? 24 MR. CHUNG: Objection, form. 25 A. No. I'm not aware of what other hospitals.	Page 84 1 A. Because my hospital is being -- is the one 2 receiving reputational harm as a result of the F 3 grade. 4 BY MS. ZIBAS: 5 Q. And how has that impacted the hospital? 6 MR. CHUNG: Objection to form, asked and 7 answered. 8 BY MS. ZIBAS: 9 Q. You don't have to repeat what you already 10 answered. If there's anything you want to add about 11 the reputational harm or goodwill damage that you've 12 put in your declaration. 13 A. As I mentioned earlier, we've lost patients 14 to other hospitals as a direct result of the F grade 15 that was handed to Palm Beach Gardens Medical Center, 16 and it continues to be a problem as physicians 17 continue to voice concerns about patients not wanting 18 to go to Palm Beach Gardens Medical Center to receive 19 care, and we're getting four to five complaints a 20 week on this. 21 Q. How many actual patients have you lost to 22 Jupiter Medical Center? Because you've only 23 mentioned two, specifically, during this deposition. 24 MR. CHUNG: Objection to form. 25 Mischaracterizes prior testimony.
Page 83 1 BY MS. ZIBAS: 2 Q. Have you ever looked at that factor, that 3 there are hospitals who do not participate that 4 receive high letter grades? 5 MR. CHUNG: Objection, form. 6 A. I have not looked into that. 7 BY MS. ZIBAS: 8 Q. Would it surprise you to learn that because 9 they had these other nonparticipating Leapfrog 10 hospitals that had high CMS scores ended up with high 11 letter grades? 12 MR. CHUNG: Objection. 13 A. What was your question? 14 BY MS. ZIBAS: 15 Q. I said would it surprise you to learn the 16 nonparticipating Leapfrog hospitals had high CMS 17 scores and, thus, they had high letter grades? 18 MR. CHUNG: Objection to form. 19 A. Yeah. I'm not concerned about other 20 hospitals. I'm concerned about my hospital. 21 BY MS. ZIBAS: 22 Q. If you're not concerned about other 23 hospitals, why does the reputational harm, why is 24 that an issue? 25 MR. CHUNG: Objection to form.	Page 85 1 BY MS. ZIBAS: 2 Q. How many are there that you can name? 3 A. I've mentioned that we -- that I receive 4 four to five complaints a week. 5 BY MS. ZIBAS: 6 Q. But of those complaints, how many of those 7 patients actually did come to Palm Beach Gardens? 8 A. That is not a question that I can directly 9 answer for you. 10 Q. Now, was the fact that there was -- would 11 be a lawsuit filed on behalf of Palm Beach Gardens 12 ever discussed with the governing board? 13 MR. CHUNG: Objection. 14 Based on privilege, I'm instructing the 15 witness not to answer that question. 16 MS. ZIBAS: These are governing board 17 minutes. There's nothing to do with lawyers. 18 This has to do with the governing board minutes 19 of a board that's public under Sunshine. 20 MR. CHUNG: You're referencing minutes that 21 we have not seen and have not been put in front 22 of the witness. 23 MS. ZIBAS: Well, I'm asking if he 24 discussed it with the board, which I'm allowed 25 to do.

Page 86 1 BY MS. ZIBAS: 2 Q. Did you discuss with the board, unrelated 3 to lawyers, the filing of this lawsuit? 4 MR. CHUNG: I'm objecting based on 5 privilege, if any of those discussions with the 6 governing board involved consultation with 7 counsel, either inside counsel or outside 8 counsel -- 9 MS. ZIBAS: And I'm not asking about that. 10 Just any discussions -- 11 MR. CHUNG: Let me finish the objection. 12 I'm asking you not to get into those 13 discussions, those communications. 14 BY MS. ZIBAS: 15 Q. So did you have any discussions with the 16 board members outside of the presence of counsel 17 about filing this lawsuit? 18 A. I don't recall. 19 Q. And who is paying the legal fees? Because 20 there's a request for attorney's fees made in this 21 lawsuit. Who is paying the legal fees on behalf of 22 Palm Beach Gardens? 23 A. I'm not sure. 24 Q. So you're not aware if the hospital is 25 paying? If the hospital is not paying, who is	Page 88 1 is Exhibit 8, are the governing board minutes dated 2 December 17, 2024. Do you see those? 3 A. Uh-huh. 4 Q. And if you review these minutes, is there 5 any reference to Leapfrog in the minutes? 6 A. There's a reference on here. 7 Q. Is that Bates number 17883 on the bottom 8 right-hand corner. 9 A. Yes. 10 Q. Okay. In that reference, was that reported 11 by you during the meeting or somebody else? Was it 12 reported by Kathleen McDonald, it looks like, under 13 quality report? 14 A. Well, it's got my name on there. 15 Q. And do you recall making the statement, it 16 says, Mr. Cazares noted that the hospital will likely 17 begin participation with Leapfrog moving forward in 18 efforts to mitigate the potential for disparaging 19 publications. Do you see that? 20 A. I do see that. 21 Q. And do you recall why you made that 22 statement in December 17, 2024? 23 A. Well, that must have been around the time 24 that the market was alluding to potentially begin 25 participating again.
Page 87 1 paying? 2 MR. CHUNG: Objection to form. 3 A. I said I'm not sure. That would be a 4 question for my CFO. 5 BY MS. ZIBAS: 6 Q. Have you ever discussed with your CFO the 7 legal fees for this lawsuit? 8 A. No. 9 Q. Have -- do you ever review the financials 10 on a monthly basis of expenditures? 11 A. High level. 12 Q. Do you ever look at the legal spent for the 13 hospital? 14 A. It's a line item. 15 Q. Have you looked at it in the last three 16 months? 17 A. I'm pretty sure I've looked at it, but I 18 don't recall what it was. 19 Q. You don't recall any numbers in the last 20 three months? 21 A. No. 22 MS. ZIBAS: This is Number 8. 23 (Exhibit 8 was marked.) 24 BY MS. ZIBAS: 25 Q. And if you take a look, what I'm giving you	Page 89 1 Q. And did you agree with your statement in 2 moving forward in efforts to mitigate the potential 3 for disparaging publications? 4 MR. CHUNG: Objection to form. 5 A. Repeat the question. 6 BY MS. ZIBAS: 7 Q. I mean, did you agree with your statement 8 about participating with Leapfrog moving forward in 9 efforts to mitigate the potential for disparaging 10 publications? 11 A. Yeah. It was a notification that the 12 market might move forward with participating in 13 Leapfrog again. 14 Q. In litigation, there's a statement that the 15 goodwill of Palm Beach Gardens Community Hospital has 16 been harmed. How has the goodwill been harmed? 17 MR. CHUNG: Objection to form. 18 A. Well, this goes back to my earlier 19 statements about patients, community members, 20 governing board members voicing complaints about the 21 hospital's low safety score. 22 BY MS. ZIBAS: 23 Q. What's your understanding of the term 24 goodwill, as used in the complaint and your 25 declaration?

Page 90 1 A. Well, the hospital's ability to do right by 2 their patients, by the community. 3 MS. ZIBAS: I'm going to take, like, maybe 4 five or ten minutes and see what other things I 5 want to ask, if anything. 6 THE VIDEOGRAPHER: We're off the record at 7 12:43 p.m. 8 (Brief recess was taken at 12:43 p.m.) 9 (Back on the record at 12:51 p.m.) 10 THE VIDEOGRAPHER: We're back on the 11 record. Time is 12:51 p.m. 12 BY MS. ZIBAS: 13 Q. Are there any plans currently at Palm Beach 14 Gardens on how to improve the CMS star rating? 15 A. As I mentioned earlier, our goals are 16 ongoing to improving patient safety quality and 17 patient experience for the hospital, for our 18 patients, that's a part of our goal, not necessarily 19 to improve the specific grading of any organization. 20 Q. Do you have any documents that you 21 submitted in this case or that you know that your 22 staff may have submitted that directly links the 23 decrease in the ER visits and outpatient visits to 24 the Leapfrog grade? 25 MR. CHUNG: Objection to form.	Page 92 1 know. I don't know who made the final decision. 2 BY MS. ZIBAS: 3 Q. And is the governing board kept up-to-date 4 on the cost of the legal fees for the litigation? 5 A. No. The cost of the litigation are not 6 clear to us right now, so they haven't been updated 7 on what the cost of that. 8 Q. Will the governing board be updated? 9 A. I don't know. 10 Q. How -- when will you know if you need to 11 update them? 12 MR. CHUNG: Objection to form. 13 A. I think the decision will be made if -- 14 depending on where the funds come from, come from. 15 BY MS. ZIBAS: 16 Q. Where would the funds come from, if not 17 from the hospital? 18 A. I don't know. 19 Q. Does Palm Beach Gardens use a company 20 called Trulliant [sic.]? 21 A. Trulliant? 22 Q. Yes. 23 A. Or Trilliant? 24 Q. Trilliant. You may not. It's for data 25 gathering, not all hospitals use it.
Page 91 1 A. I don't. I'm not aware of any. 2 BY MS. ZIBAS: 3 Q. What about linking the admission, number of 4 admissions to the Leapfrog grading? Are there any 5 documentation to support such a statement? 6 MR. CHUNG: Objection to form. 7 A. I don't have any. I'm not aware of any 8 document that was submitted specific for that. 9 BY MS. ZIBAS: 10 Q. And was the governing board involved in 11 deciding whether to file this lawsuit creating more 12 publicity in litigating this case about the Leapfrog 13 grade? 14 MR. CHUNG: Objection to form. 15 A. The governing board was not involved in the 16 decision. 17 BY MS. ZIBAS: 18 Q. Who was involved in the decision? 19 MR. CHUNG: Objection to form. 20 MS. ZIBAS: To file the lawsuit and 21 increase the publicity about the Leapfrog grade. 22 MR. CHUNG: Objection to form. 23 A. The decision was made to file the lawsuit. 24 That's -- that was above my pay grade. From Maggie, 25 Maggie Gill. I don't know if above her, I don't	Page 93 1 A. Trilliant. 2 Q. Maybe I'm mispronouncing -- 3 A. I'm familiar with Trilliant. I do believe 4 some people in the market may use that for data 5 gathering. 6 Q. Does Palm Beach Gardens use it, as far as 7 you know? 8 A. Specifically, I don't -- I don't have 9 access to Trilliant, but I don't know if some of the 10 other employees have access to it. 11 Q. Does Palm Beach Gardens have a contract 12 with Vizient as a consulting firm? 13 A. I'm not aware of that? 14 MS. ZIBAS: I don't believe I have any 15 other questions at this time. Obviously, if new 16 documents are produced later on in this 17 litigation that involve this witness, we would 18 reserve the right to submit questions for that 19 purpose only. Not saying that's going to 20 happen, but if it does. 21 MR. CHUNG: I will have very brief 22 redirect. Let me ask you, Counsel, if you are 23 -- have a copy of the amended complaint? Do you 24 have a copy of the amended complaint that we can 25 use?

Erik Cazares
September 24, 2025

Page 94 1 MS. ZIBAS: No. Mine is marked up. Can't 2 use mine. 3 MR. CHUNG: That's fine. I think what we 4 will do is just a couple of questions coming off 5 the amended complaint. We have it on laptop and 6 I think what we can do is get approved visually 7 and designate the complaint as I think 8 Exhibit 9, and we can deal with the logistics 9 later of getting it formally marked. 10 I'm going to ask Mr. Fischer to put an 11 electronic version of the amended complaint, 12 which we'll designate and later mark as 13 Exhibit 9. 14 (Exhibit 9 was marked.) 15 CROSS-EXAMINATION 16 BY MR. CHUNG: 17 Q. Mr. Cazares, do you recognize the document 18 that's in front of you as the amended complaint in 19 this action? 20 A. Yes. 21 Q. And are you familiar with the amended 22 complaint? 23 A. Yes. 24 Q. And I'm going to direct your attention to 25 page 17 and paragraph 42 of the amended complaint, if	Page 96 1 exactly? What is it an excerpt of? 2 A. It's part of the patient rights and ethics 3 section, basically an attestation by the CEO that is 4 being made here. 5 Q. All right. And what does that attestation 6 cover? 7 A. Basically that the information has been 8 reviewed. It's accurate. Reflects the most 9 up-to-date information. And then it talks about the 10 Leapfrog Group will retain exclusive ownership of the 11 data, intellectual property rights, and that the 12 hospital acknowledges that the group, that the 13 Leapfrog Group may use the information in a 14 commercial manner for profit. 15 Q. This is the document you were referring to 16 earlier? 17 A. Yes. 18 Q. When you were referencing -- 19 A. Commercial gains. 20 Q. -- the commercial gains that Leapfrog is 21 asking the hospital, the reporting hospital to sign 22 over as a condition of participating in the survey; 23 correct? 24 A. That's correct. That's the document that I 25 was referring to.
Page 95 1 you can just toggle down to it. And just let us know 2 when you're there. 3 A. 17? 4 Q. Yes. Page 17. It's paragraph 42. 5 A. Yes. 6 Q. Do you see that? 7 A. Yes. 8 Q. Earlier in the day, you were asked 9 questions by counsel about a document, a Leapfrog 10 document in the complaint that referenced commercial 11 purpose or commercial -- commercial gains in the 12 context of questions you were asked about the 13 pay-to-play allegation. 14 A. Correct. 15 Q. Do you remember those questions? 16 A. Yes, I do. 17 Q. Okay. Is the document that's kind of blown 18 up in paragraph 2, the document that you were 19 referencing? 20 A. Yes. 21 Q. And are you aware that that is -- or are 22 you familiar with the -- are you aware that document 23 is an excerpt from Leapfrog's hospital survey? 24 A. Correct. 25 Q. And can you just read the -- and what is it	Page 97 1 MR. CHUNG: Okay. No further questions. 2 Thank you. 3 MS. ZIBAS: Looks like we're done. 4 THE STENOGRAPHER: Would you like to read 5 of waive? 6 MR. CHUNG: I'm sorry? 7 THE STENOGRAPHER: Would you like to read 8 or waive? 9 MR. CHUNG: We can -- we'll read. 10 MS. ZIBAS: And you're going to gather all 11 of the exhibits, right, and take them with you 12 and attach them. Thank you. Appreciate it. 13 THE VIDEOGRAPHER: Off the record at 1:01 14 p.m. 15 (Thereupon, the proceedings concluded at 16 1:01 p.m.) 17 18 19 20 21 22 23 24 25

What is the Hospital Safety Grade?

Leapfrog Hospital Safety Grades are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade uses up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources, to produce a single letter grade representing a hospital’s overall performance in keeping patients safe from preventable harm and medical errors. The Safety Grade methodology has been peer reviewed and published in the Journal of Patient Safety (https://www.hospitalafetygrade.org/media/file/JournalofPatientSafety_HospitalSafetyScore.pdf)

With the Safety Grade, The Leapfrog Group aims to educate and encourage consumers to consider safety when selecting a hospital for themselves or their families. In addition, we believe the Safety Grade will foster strong market incentives for hospitals to make safety a priority. Safety Grades are publicly reported at www.HospitalSafetyGrade.org.

Hospital Safety Grade Report for Hospitals

Spring 2025, Fall 2024, Spring 2024, Fall 2023, Spring 2023

The information contained in this report may be used for internal analysis and evaluation only. The owner of this document may not redistribute or sell the Data, in whole or in part, to any third party or use the Data on behalf of or for the benefit of any third party without the express written consent of The Leapfrog Group.

*This hospital does not have this measure available or included for this round of the Hospital Safety Grade.

#This hospital did not receive a Hospital Safety Grade for this round.

Spring 2025, Fall 2024, Spring 2024, Fall 2023, Spring 2023

What is the Hospital Safety Grade?

Leapfrog Hospital Safety Grades are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade uses up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources, to produce a single letter grade representing a hospital’s overall performance in keeping patients safe from preventable harm and medical errors. The Safety Grade methodology has been peer reviewed and published in the Journal of Patient Safety (https://www.hospitalafetygrade.org/media/file/JournalofPatientSafety_HospitalSafetyScore.pdf)

With the Safety Grade, The Leapfrog Group aims to educate and encourage consumers to consider safety when selecting a hospital for themselves or their families. In addition, we believe the Safety Grade will foster strong market incentives for hospitals to make safety a priority. Safety Grades are publicly reported at www.HospitalSafetyGrade.org.

Spring 2025, Fall 2024, Spring 2024, Fall 2023, Spring 2023

What is the Hospital Safety Grade?

Leapfrog Hospital Safety Grades are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade uses up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources, to produce a single letter grade representing a hospital's overall performance in keeping patients safe from preventable harm and medical errors. The Safety Grade methodology has been peer reviewed and published in the Journal of Patient Safety (https://www.hospitalafetygrade.org/media/file/JournalofPatientSafety_HospitalSafetyScore.pdf)

With the Safety Grade, The Leapfrog Group aims to educate and encourage consumers to consider safety when selecting a hospital for themselves or their families. In addition, we believe the Safety Grade will foster strong market incentives for hospitals to make safety a priority. Safety Grades are publicly reported at www.HospitalSafetyGrade.org.

Hospital Safety Grade Report for Hospitals

Spring 2025, Fall 2024, Spring 2024, Fall 2023, Spring 2023

The information contained in this report may be used for internal analysis and evaluation only. The owner of this document may not redistribute or sell the Data, in whole or in part, to any third party or use the Data on behalf of or for the benefit of any third party without the express written consent of The Leapfrog Group.

*This hospital does not have this measure available or included for this round of the Hospital Safety Grade.

#This hospital did not receive a Hospital Safety Grade for this round.

What is the Hospital Safety Grade?

Leapfrog Hospital Safety Grades are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade uses up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources, to produce a single letter grade representing a hospital’s overall performance in keeping patients safe from preventable harm and medical errors. The Safety Grade methodology has been peer reviewed and published in the Journal of Patient Safety (https://www.hospitalafetygrade.org/media/file/JournalofPatientSafety_HospitalSafetyScore.pdf)

With the Safety Grade, The Leapfrog Group aims to educate and encourage consumers to consider safety when selecting a hospital for themselves or their families. In addition, we believe the Safety Grade will foster strong market incentives for hospitals to make safety a priority. Safety Grades are publicly reported at www.HospitalSafetyGrade.org.

#This hospital did not receive a Hospital Safety Grade for this round.

EXHIBIT 28

About the Grade

Leapfrog Hospital Safety Grades (formerly known as Hospital Safety Scores) are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade is the gold standard measure of patient safety, cited in [MSNBC](#), [The New York Times](#), and [AARP The Magazine](#).

The Leapfrog Hospital Safety Grade uses up to 30 national performance measures from the Centers for Medicare & Medicaid Services (CMS), the Leapfrog Hospital Survey and information from other supplemental data sources. Taken together, those performance measures produce a single letter grade representing a hospital's overall performance in keeping patients safe from preventable harm and medical errors. The Leapfrog Hospital Safety Grade methodology has

been peer reviewed and published in the Journal of Patient Safety.

Leapfrog works under the guidance of an Expert Panel to select appropriate measures and develop a scoring methodology. The Expert Panel is made up of patient safety experts from across the country:

- David Bates, M.D., M.Sc.,
Harvard University
- Kathy McDonald, PhD, Johns
Hopkins University School of
Nursing
- Matthew D McHugh, Ph.D.,
J.D., M.P.H., R.N., C.R.N.P.,
F.A.A.N., University of
Pennsylvania School of
Nursing
- Arnold Milstein, M.D., M.P.H.,
Stanford University
- Doris Peter, PhD, Consultant
- Peter Pronovost, M.D., Ph.D.,
F.C.C.M., University
Hospitals
- Patrick Romano, M.D.,
M.P.H., University of
California, Davis
- Sara Singer, Ph.D., Stanford
University
- Arjun Srinivasan, M.D., CAPT
U.S. Public Health Service,

Centers for Disease Control
and Prevention

- Tim Vogus, Ph.D., Vanderbilt University

How the Leapfrog Hospital Safety Grade is produced

The Expert Panel selected 22 evidence-based measures of patient safety, including CMS Medicare PSI 90 Patient Safety and Adverse Events composite (which includes 10 component measures of patient safety), analyzed the data, and determined the weight of each measure based on **evidence**, **opportunity for improvement** and **impact**. In some cases where a hospital's information is not available for a certain measure, Leapfrog uses a supplemental data source. In cases where a hospital's information is not available from any data source, Leapfrog has outlined a methodology for dealing with the missing data.

The Leapfrog Hospital Safety Grade places each measure into one of two domains: (1)

Quick Links

- [Scoring Methodology Used in the Spring 2025 Release of the Hospital Safety Grades](#) [May 2025]
- [Explanation of Safety Grades](#) [May 2025]

Process/Structural Measures or
(2) **Outcome Measures**, each
accounting for 50 percent of the
overall score.

- **Process Measures** represent how often a hospital gives patients recommended treatment for a given medical condition or procedure. For example, “Responsiveness of hospital staff” looks at patients’ feedback on how long it takes for a staff member to respond when they request help. **Structural Measures** represent the environment in which patients receive care. For example, “Doctors order medications through a computer” represents whether a hospital uses a special computerized system to prevent errors when prescribing medications.
- **Outcome Measures** represent what happens to a patient while receiving care. For example, “Dangerous object left in patient’s body” measures how many times a patient undergoing surgery had a dangerous foreign

object, like a sponge or tool,
left in his or her body.

A hospital must have enough safety data available for our experts to issue them a letter grade. Hospitals missing more than **six** process measures, more than **five** outcome measures, or **PSI90** are not graded. All hospitals are encouraged to voluntarily report additional safety data through the [Leapfrog Hospital Survey](#), but they are not required to do so to receive a Safety Grade.

The Leapfrog Group's goal is to publicly report patient safety and quality information for the benefit of consumers, purchasers, and referring physicians as they make decisions about where to seek care and where to direct patients. Identifying differences among facilities is critical to inform patients and their family's decision-making. That's why Leapfrog reports results by facility for all programs.

However, some hospitals belong to health systems that report data to the Centers for Medicare & Medicaid Services (CMS) as a single entity with a shared "CMS Certification Number (CCN)." This

means that individual hospitals within these systems will be graded using some of the same aggregate data. Leapfrog encourages these types of hospitals to report additional safety data through the [Leapfrog Hospital Survey](#) so that patients can see how each hospital is doing individually for select measures included in the grade.

At this time, we are unable to assign a grade to VA hospitals, critical access hospitals, specialty hospitals, children's hospitals, outpatient surgery centers, etc. Our experts are studying ways to rate them in the future.

The Leapfrog Hospital Safety Grade

The Leapfrog Hospital Safety Grade is a public service provided by The Leapfrog Group, an

independent nonprofit organization committed to driving quality, safety, and transparency in the U.S. health system.

By viewing this website you are agreeing to our [TERMS OF USE](#). The information viewed on this site is not intended to be the only or primary means for evaluating hospital quality nor is it intended to be relied upon as advice or a recommendation or an endorsement about which hospitals to use or the quality of the medical treatment that you

receive from a hospital or other health care provider. You are solely responsible for any and all decisions with respect to your medical treatment. Neither Leapfrog nor its affiliates are responsible for any damages or costs you might incur with respect to your use of this site. Never disregard, avoid or delay in obtaining medical advice from your doctor or other health care professional because of something that you have read on this site as the site is not intended to be a substitute for professional medical advice.

HOSPITAL

SAFETY GRADE

WHAT IS THE HOSPITAL SAFETY GRADE?

Leapfrog Hospital Safety Grades are assigned to nearly 3,000 general acute-care hospitals across the nation twice annually. The Safety Grade uses up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources, to produce a single letter grade representing a hospital's overall performance in keeping patients safe from preventable harm and medical errors. The Safety Grade methodology has been peer reviewed and published in the Journal of Patient Safety.¹

With the Safety Grade, The Leapfrog Group aims to educate and encourage consumers to consider safety when selecting a hospital for themselves or their families. In addition, we believe the Safety Grade will foster strong market incentives for hospitals to make safety a priority. Safety Grades are publicly reported at www.HospitalSafetyGrade.org.

ELIGIBLE HOSPITALS

Due to the limited availability of public data, Leapfrog is not able to calculate a Safety Grade for every hospital in the U.S., including the following types of hospitals:

- Critical access hospitals (CAH)
- Long-term care and rehabilitation facilities
- Mental health facilities
- Federal hospitals (e.g., Veterans Affairs, Indian Health Services, etc.)
- Some specialty hospitals, such as surgery centers and cancer hospitals
- Free-standing pediatric hospitals
- Hospitals in U.S. territories
- Hospitals that are missing scores for **more than six (6)** process/structural measures, or **more than five (5)** outcome measures, or **missing PSI 90**

¹ The Leapfrog Hospital Safety Grade uses the below-described data and reflects expert opinion as to the relative importance of each category.

HOSPITAL

SAFETY GRADE

MEASURES

The Safety Grade utilizes up to 22 national patient safety measures from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources.

The measure set is divided into two domains: (1) Process/Structural Measures and (2) Outcome Measures. Each domain represents 50% of the Safety Grade. The following table lists the 22 measures included in the Safety Grade, as well as the data source and reporting period for each measure. In some cases where a hospital's information is not available for a certain measure, Leapfrog uses a secondary data source (as indicated in the table). In cases where a hospital's information is not available from any data source, Leapfrog has outlined a methodology for dealing with the missing data.

PROCESS/STRUCTURAL MEASURES (12)				
Measure Name	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
Computerized Physician Order Entry (CPOE)	2023 Leapfrog Hospital Survey	2023	Imputation Model Applied*	N/A

C. Diff.	2023 Leapfrog Hospital Survey	07/01/2022 - 06/30/2023	CMS	04/01/2022 - 03/31/2023
PSI 4: Death rate among surgical inpatients with serious treatable complications	CMS	07/01/2020 - 06/30/2022	N/A	N/A
CMS Medicare PSI 90: Patient safety and adverse events composite*	CMS	07/01/2020 - 06/30/2022	N/A	N/A

* CMS calculates PSI 90 using the ten (10) component PSIs. While scores for each of the 10 component PSIs are not used to calculate spring 2024 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#).

***COMPONENT PSIs (SCORES NOT USED TO CALCULATE THE HOSPITAL SAFETY GRADE)

Component PSI	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
PSI 3: Pressure ulcer rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 6: Iatrogenic pneumothorax rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 8: In-hospital fall with hip fracture rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 9: Perioperative hemorrhage or hematoma rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 10: Postoperative acute kidney injury requiring dialysis rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 11: Postoperative respiratory failure rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 12: Perioperative pulmonary embolism or deep vein thrombosis rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 13: Postoperative sepsis rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 14: Postoperative wound dehiscence rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A
PSI 15: Abdominopelvic accidental puncture or laceration rate	CMS	07/01/2020 - 06/30/2022	N/A	N/A

Note: CMS calculates PSI 90 using the ten (10) component PSIs listed above. While scores for each of the 10 component PSIs are not used to calculate spring 2024 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#).

MEASURE & SCORING DESCRIPTIONS**PROCESS/STRUCTURAL MEASURES**

For Process/Structural Measures, a higher score is always better because these are measures of compliance with best practices in patient care.

COMPUTERIZED PHYSICIAN ORDER ENTRY (CPOE)

The CPOE measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's progress toward implementing a CPOE system to reduce medication ordering errors. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Unable to Calculate Score." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15
Unable to Calculate Score	Not Available (See Scoring Terms)

For hospitals that did not submit a 2023 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for more information on Leapfrog's imputation methodology.

BAR CODE MEDICATION ADMINISTRATION (BCMA)

The BCMA measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's progress toward 1) implementation of BCMA throughout the hospital, 2) compliance with patient and medication scans during administration, 3) use of decision support, and 4) structures to monitor and reduce workarounds. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Does Not Apply." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	75
Some Achievement	50
Limited Achievement	25
Does Not Apply	Not Available (See Scoring Terms)

For hospitals that did not submit a 2023 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for more information on Leapfrog's imputation methodology.

ICU PHYSICIAN STAFFING (IPS)

The IPS measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures a hospital's use of intensivists in ICUs. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Does Not Apply." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	50
Some Achievement	15
Limited Achievement	5
Does Not Apply	Not Available (See Scoring Terms)

For hospitals that did not submit a 2023 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for detailed information on Leapfrog's imputation methodology.

NATIONAL QUALITY FORUM (NQF) SAFE PRACTICES

Two (2) NQF Safe Practice measures are collected by The Leapfrog Group on the Leapfrog Hospital Survey. They measure a hospital's progress toward implementing endorsed processes and protocols to reduce and prevent adverse events. Through participation in the Leapfrog Hospital Survey, hospitals can earn up to 120 points for each NQF Safe Practice. For the purposes of calculating the Safety Grade, individual scores for each NQF Safe Practice are used:

NQF Safe Practice	Possible Measure Score
Safe Practice 1: Culture of Safety Leadership Structures and Systems	0 - 120
Safe Practice 2: Culture Measurement, Feedback and Intervention	0 - 120

There is no secondary data source for the NQF Safe Practices. Therefore, hospitals that did not submit a 2023 Leapfrog Hospital Survey by November 30 will not have these measures included in their Safety Grade and the measure will be reported as "Declined to Report." See [Dealing with Missing Data](#) for more information.

TOTAL NURSING CARE HOURS PER PATIENT DAY

The Total Nursing Care Hours per Patient Day measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures the hospital's total number of productive hours worked by employee or contract nursing staff (i.e., RNs, LPNs, and UAPs) with direct patient care responsibilities per patient day across three unit types: medical, surgical, and med/surg. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement," or "Does Not Apply." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15
Does Not Apply	Not Available (See Scoring Terms)

There is no secondary data source for the Total Nursing Care Hours per Patient Day measure. Therefore, hospitals that did not submit a 2023 Leapfrog Hospital Survey by November 30 will not have these measures included in their Safety Grade and the measure will be reported as "Declined to Report." See [Dealing with Missing Data](#) for more information.

HAND HYGIENE

The Hand Hygiene measure is collected by The Leapfrog Group on the Leapfrog Hospital Survey. It measures processes and protocols that hospitals have in place regarding monitoring hand hygiene practices, fostering a culture of good hand hygiene, offering training and education, and providing equipment. Through participation in the Leapfrog Hospital Survey, hospitals are placed in one of several performance categories: "Achieved the Standard," "Considerable Achievement," "Some Achievement," "Limited Achievement." For the purposes of calculating the Safety Grade, a numerical score is assigned to each performance category:

Leapfrog Performance Category	Measure Score
Achieved the Standard	100
Considerable Achievement	70
Some Achievement	40
Limited Achievement	15

For hospitals that did not submit a 2023 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for detailed information on Leapfrog's imputation methodology.

HOSPITAL CONSUMER ASSESSMENT OF HEALTHCARE PROVIDERS AND SYSTEMS (HCAHPS) COMPOSITES

The Hospital HCAHPS survey responses are collected by CMS via the Inpatient Quality Reporting Program. Linear mean scores [calculated by CMS](#) incorporate the full range of survey response categories into a single metric for each HCAHPS composite. Five of the six composites are used in the Safety Grade. For the purposes of calculating the Safety Grade, a hospital's linear mean score for each of the five composites is used:

HCAHP Composite	Possible Measure Score
H-COMP-1: Nurse Communication	0 - 100
H-COMP-2: Doctor Communication	0 - 100
H-COMP-3: Staff Responsiveness	0 - 100
H-COMP-5: Communication about Medicines	0 - 100
H-COMP-6: Discharge Information	0 - 100

OUTCOME MEASURES

For Outcome Measures, a lower score is always better because these are measures of harm experienced by patients (e.g., central line-associated blood stream infections).

HOSPITAL-ACQUIRED CONDITIONS

Three hospital-acquired condition measures are calculated by CMS through the [DRA HAC Reporting Program](#): Foreign Object Retained after Surgery, Air Embolism, and Falls and Trauma. Hospital-acquired condition rates are calculated by CMS based on Part A Medicare Fee-for-service (FFS) claims and publicly reported as a rate per 1,000 Part A Medicare FFS discharges. No age restrictions are applied. For the purposes of calculating the Safety Grade, the rate is used. More information is available in the [DRA HAC methodology](#).

HEALTHCARE-ASSOCIATED INFECTIONS

Five healthcare-associated infection measures are collected by The Leapfrog Group on the Leapfrog Hospital Survey: Central line-associated bloodstream infections (CLABSI) in ICUs and select wards, Catheter-associated urinary tract infections (CAUTI) in ICUs and select wards, Surgical site infections from colon surgery (SSI: Colon), Facility-wide inpatient MRSA Blood Laboratory-identified Events, and Facility-wide inpatient C.diff. Laboratory-identified Events. Through participation in the Leapfrog Hospital Survey, hospitals were required to 1) join Leapfrog's NHSN group, 2) provide an accurate NHSN ID in the Profile section of the Online Survey Tool, and 3) submit a Survey by November 30. For the purposes of calculating the Safety Grade, the [standardized infection ratio \(SIR\)](#) is used:

As Reported by Leapfrog	Measure Score	Notes
Standardized Infection Ratio (SIR)	SIR	Measure is included in calculating the Safety Grade
Does Not Apply	Not Available (See Scoring Terms)	Measure is not included in calculating the Safety Grade. No use of Secondary Data.
Unable to Calculate Score	Not Available (See Scoring Terms)	Measure is not included in calculating the Safety Grade. No use of Secondary Data.
Declined to Respond	See Using Secondary Data	Secondary Data source is used.

For hospitals that did not join Leapfrog's NHSN group, provide an accurate NHSN ID, or submit a 2023 Leapfrog Hospital Survey by November 30, see [Using Secondary Data Sources](#) for more information on Leapfrog's use of CMS data.

LEAPFROG
HOSPITAL
SAFETY GRADE

AHRQ PATIENT SAFETY INDICATORS (PSI)

Two AHRQ Patient Safety Indicators are calculated by CMS through the Inpatient Quality Reporting Program and the [HAC Reduction Program](#): PSI 4 Death Rate among Surgical Inpatients with Serious Treatable Conditions and PSI 90 Patient Safety and Adverse Events Composite. PSI rates are calculated by CMS based on Medicare Fee-for-Service claims and publicly reported as a rate per 1,000 inpatient discharges. CMS only includes claims from patients 18 years or older. For the purpose of calculating the Safety Grade, the smoothed rate is used for both measures. More information on calculating PSIs is available on the [Patient Safety Indicators \(PSI\) 2024 Resources website](#).

Note: CMS calculates PSI 90 using the ten (10) component PSIs that are listed in the PSI 90 Components table [above](#). While scores for each of the 10 component PSIs are NOT used to calculate spring 2024 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#). Additional information about the PSI 90 measure and how it is calculated by CMS can be found [here](#).

SAFETY GRADE

USING SECONDARY DATA SOURCES

Twelve (12) of the 22 measures included in the Safety Grade are derived from the Leapfrog Hospital Survey. The Leapfrog Hospital Survey is voluntary, and as such, hospitals may choose not to submit a Survey. To address this gap in available data, the Safety Grade methodology utilizes secondary data when available. For information on how to complete a free Leapfrog Hospital Survey, visit www.leapfroggroup.org/survey.

IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

Leapfrog has worked closely with statisticians at Mathematica, Leapfrog's National [Expert Panel](#), and our scientific partners at Johns Hopkins Medicine to develop a new two-step imputation approach for determining scores for CPOE, BCMA, IPS, and Hand Hygiene if they are missing from our [publicly reported](#) Survey Results.

STEP 1: USE A HOSPITAL'S MOST RECENT SCORE ON THE MEASURE

If the hospital had a score assigned by Leapfrog in the previous four rounds of grades (i.e., fall 2023, spring 2023, fall 2022, spring 2022), excluding imputed scores, the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., spring 2024).

STEP 2: USE THE MEAN OF THE SCORES ASSIGNED TO OTHER SIMILAR HOSPITALS IN THE U.S. (APPLIES TO CPOE, BCMA, AND HAND HYGIENE ONLY)

The hospital is assigned to a cohort of other similar hospitals using three or four hospital characteristics obtained from the most recent CMS Impact File and the 2023 Leapfrog Hospital Survey: urban/rural status, safety net status, number of beds, and teaching status (urban cohorts only). The CMS Impact File is the data source for urban/rural status, safety net status, and number of beds. The [2023 Leapfrog Hospital Survey Results](#) are the primary data source for teaching status and the CMS impact file is the secondary data source.

The hospital is then assigned the **lower** of two possible mean scores for CPOE, BCMA, and Hand Hygiene based on their cohort's performance:

LEAPFROG
HOSPITAL
SAFETY GRADE

- **Mean of current and recent scores:** The mean score of the cohort is calculated based on the hospital scores in the current round (i.e., spring 2024) from either Leapfrog's publicly reported Survey Results or Step 1 of the imputation model.
- **Mean of scores obtained in each hospital's first year of reporting on Leapfrog's CPOE, BCMA, or Hand Hygiene standards via the Leapfrog Hospital Survey:** The mean score of the cohort is calculated based on the score (i.e., performance category from the Leapfrog Hospital Survey) each hospital in the cohort obtained the first year they reported on Leapfrog's CPOE, BCMA, or Hand Hygiene standards, starting with the 2018 Leapfrog Hospital Survey (the year the CPOE and BCMA standards were last significantly updated) or the 2020 Leapfrog Hospital Survey (the year the Hand Hygiene standard was first scored). CPOE Scores from the 2020 Leapfrog Hospital Survey are excluded as the CPOE Evaluation Tool was not included on the Leapfrog Hospital Survey due to COVID-19.

To determine a hospital's cohort and mean score:

1. Download the latest IMPACT Zip file [here](#).
 - a. Open the Microsoft Excel Worksheet in that Zip file named "FY 2024 IPPS Final Rule Impact File"
 - b. Select the "FY 2024 Final" tab
 - c. Filter for the hospital's CMS Certification Number (CCN) under the "Provider Number" column
 - d. Refer to criteria in Table 1: Cohort Criteria
2. View 2023 Leapfrog Hospital Survey Results [here](#).
 - a. Search for the hospital by name or location
 - b. If the hospital submitted a 2023 Leapfrog Hospital Survey, select "More Information" at the bottom of the webpage to view teaching status
 - c. Refer to the criteria in Table 1: Cohort Criteria
3. Find the cohort's scores for CPOE, BCMA, and Hand Hygiene in Table 2: Cohort Scores

LEAPFROG
HOSPITAL
SAFETY GRADE

Table 1: Cohort Criteria

Characteristic	2023 Leapfrog Hospital Survey Results	Column in CMS Impact File	Criteria
Urban/rural status	N/A	URGEO (Column I)	CMS Impact File: Urban: LURBAN or OURBAN Rural: RURAL
Safety net status	N/A	DSHPCT (Column Y)	CMS Impact File: Safety net: DSHPCT is greater than or equal to 0.3993* * 0.3993 is the 80 th percentile of the IMPACT file
Number of Beds	N/A	Beds (Column U)	CMS Impact File Fewer than 100 beds 100 or more beds
Teaching status	Teaching Status	Resident to Bed Ratio (Column S)	2023 Leapfrog Hospital Survey Results (primary source): Non-teaching Teaching CMS Impact File (secondary source): Non-teaching: Resident to bed Ratio equals 0 Teaching: Resident to bed ratio is greater than 0

LEAPFROG
HOSPITAL
 SAFETY GRADE

Table 2: Cohort Scores

Cohort #	Urban/Rural Status	Safety Net Status	Number of Beds	Teaching Status	Step 2 CPOE Score (Mean of Cohort)	Step 2 BCMA Score (Mean of Cohort)	Step 2 Hand Hygiene Score (Mean of Cohort)
Cohort 1	Rural	Non-Safety Net	Fewer than 100 beds	N/A	75	79	50
Cohort 2	Rural	Non-Safety Net	100 or more beds	N/A	79	82	52
Cohort 3	Rural	Safety Net	Fewer than 100 beds	N/A	85	81	45
Cohort 4	Rural	Safety Net	100 or more beds	N/A	72	80	62
Cohort 5	Urban	Non-Safety Net	Fewer than 100 beds	Non-Teaching	84	85	58
Cohort 6	Urban	Non-Safety Net	100 or more beds	Non-Teaching	86	84	59
Cohort 7	Urban	Non-Safety Net	Fewer than 100 beds	Teaching	79	86	61
Cohort 8	Urban	Non-Safety Net	100 or more beds	Teaching	88	85	56
Cohort 9	Urban	Safety Net	Fewer than 100 beds	Non-Teaching	76	82	63
Cohort 10	Urban	Safety Net	100 or more beds	Non-Teaching	76	81	59
Cohort 11	Urban	Safety Net	Fewer than 100 beds	Teaching	82	81	50
Cohort 12	Urban	Safety Net	100 or more beds	Teaching	89	81	56

STEP 2: USE THE CMS COST REPORT (APPLIES TO IPS ONLY)

A hospital's ICU designation (i.e., operating a medical ICU, surgical ICU, or pediatric ICU) is based on the number of medical, surgical and/or pediatric ICU beds reported in Worksheet S-3 Part 1 of the hospital's most recent CMS Cost Report. Hospitals that reported one or more medical, surgical, and/or pediatric ICU beds are assigned 5 points, which is equivalent to those hospitals that earned Limited Achievement on Leapfrog's IPS Standard, meaning that they operate an adult or pediatric medical and/or surgical ICU or neuro ICU but do not meet other aspects of Leapfrog's national standard for ICU staffing.

LEAPFROG
HOSPITAL
SAFETY GRADE

CMS DATA FOR HAIS

CMS is the **secondary data** source for healthcare-associated infections. For the purposes of calculating the Safety Grade, the standardized infection ratio (SIR) published by CMS is used:

Hospitals That Did Not Join Leapfrog's NHSN Group and Submit Section 7: Managing Serious Errors of the 2023 Leapfrog Hospital Survey by November 30, 2023

As Reported by CMS	Measure Score	Notes
Not Available (no locations or low volume)	Not Available (See Scoring Terms)	Measure is not included in calculating the Leapfrog Hospital Safety Grade.
Standard Infection Ratio (SIR)	SIR	Measure is included in calculating the Leapfrog Hospital Safety Grade.

If a hospital does not have available data from the Leapfrog Hospital Survey or CMS (e.g., no locations or low volume), the hospital is reported as Not Available "Not Available." See [Dealing with Missing Data](#) for more information.

LEAPFROG
HOSPITAL
SAFETY GRADE

SCORING METHODOLOGY

WEIGHTING INDIVIDUAL MEASURES

Each measure included in the Leapfrog Hospital Safety Grade is assigned a standard weight. The methodology to assign standard weights includes four criteria: (1) Impact, (2) Evidence, (3) Opportunity, and (4) Number of Component Measures. These four criteria are then combined using the equation below, which results in a standard weight for each measure that represents the measure's relative importance within the Hospital Safety Grade.

$$[\text{Evidence} + (\text{Impact} \times \text{Opportunity} \times \text{Number of Component Measures})]$$

EVIDENCE

The Evidence Score for each individual measure is assigned a value of one (1) or two (2) using the following criteria:

- 1 = Supported by either suggestive clinical or epidemiological studies or theoretical rationale
- 2 = Supported by experimental, clinical, or epidemiological studies and strong theoretical rationale

OPPORTUNITY

The Opportunity Score for each individual measure is based on the Coefficient of Variation (Standard Deviation/Mean) of that measure, using the following formula: **[1 + (Standard Deviation/Mean)]**. The Opportunity Score is on a continuous scale that is capped at three (3). Any measure with an Opportunity Score above three (3) is assigned a three (3).

IMPACT

The Impact Score for each individual measure is comprised of two (2) parts, each of which is assigned a value from one (1) to three (3):

1. Number of patients affected
2. Severity of harm

LEAPFROG
HOSPITAL
SAFETY GRADE

The *number of patients affected* score is determined by the following:

- 0 = Extremely rare event (e.g., Air Embolism)
- 1 = Rare event (e.g., Foreign Object Retained After Surgery)
- 2 = Some patients in hospital affected (e.g., ICU Physician Staffing)
- 3 = All patients in hospital affected (e.g., Hand Hygiene)

The *severity of harm* score is determined by the following:

- 1 = No direct evidence of harm or harm reduction (e.g., Patient Experience)
- 2 = Clear documentation of harm or harm reduction; adverse events (e.g., Foreign Object Retained After Surgery)
- 3 = Significant mortality reduction (more than 1,000 deaths or a 10% reduction in hospital wide mortality) (e.g., ICU Physician Staffing)

The values from each part are then added together to arrive at the overall Impact Score using the following criteria:

- 1 = Score of 2 (Low Impact) (e.g., Air Embolism)
- 2 = Score of 3-4 (Medium Impact) (e.g., Patient Experience)
- 3 = Score of 5-6 (High Impact) (e.g., ICU Physician Staffing)

NUMBER OF COMPONENT MEASURES

The number of component measures refers to how many measures are included within the measure. For PSI 90, the number of component measures is 10 (PSI 3, PSI 6, PSI 8, PSI 9, PSI 10, PSI 11, PSI 12, PSI 13, PSI 14, and PSI 15). For all other measures included in the Hospital Safety Grade, the number of component measures within the measure is one (1).

LEAPFROG
HOSPITAL
 SAFETY GRADE

STANDARD MEASURE WEIGHTS

Measure	Evidence Score	Opportunity Score	Impact Score	Number of Component Measures	Standard Measure Weight
Process/Structural Measure Domain (50%)					
CPOE	2	1.16	3	1	5.6%
BCMA	2	1.11	3	1	5.4%
IPS	2	1.70	3	1	7.2%
SP 1	1	1.05	2	1	3.2%
SP 2	1	1.10	2	1	3.3%
Total Nursing Care Hours per Patient Day	2	1.41	2	1	4.9%
Hand Hygiene	2	1.33	2	1	4.7%
H-COMP-1	1	1.03	2	1	3.1%
H-COMP-2	1	1.03	2	1	3.1%
H-COMP-3	1	1.05	2	1	3.2%
H-COMP-5	1	1.06	2	1	3.2%
H-COMP-6	1	1.04	2	1	3.1%
Outcome Measure Domain (50%)					
Foreign Object Retained	1	3.00	2	1	4.3%
Air Embolism	1	3.00	1	1	2.4%
Falls and Trauma	2	2.00	3	1	4.9%
CLABSI	2	1.81	3	1	4.5%
CAUTI	2	1.85	3	1	4.6%
SSI: Colon	2	1.80	2	1	3.4%
MRSA	2	1.77	3	1	4.4%
C. Diff.	2	1.77	3	1	4.5%
PSI 4	1	1.13	2	1	2.0%
PSI 90	1	1.19	2	10	15.0%

LEAPFROG
HOSPITAL
 SAFETY GRADE

CALCULATING Z-SCORES

Z-Scores are used to standardize data from measures with different performance scales and allow for comparisons (e.g., a linear mean score of 90 on H-COMP-1: Nurse Communication and a CLABSI SIR of 0.870). In addition, Z-Scores can indicate to a hospital whether their measure score is above, below, or equal to the average hospital.

In the Scoring Methodology, a Z-Score is calculated for each available measure score. A Z-Score is calculated using a hospital's actual measure score, the national mean for that measure, and the standard deviation for that measure. The Z-Score for each measure is calculated using the following formulas:

- **For Process/Structural Measures:** $[\text{Hospital Score} - \text{Mean}] / \text{Standard Deviation}$
- **For Outcome Measures:** $[(\text{Mean} - \text{Hospital Score}) / \text{Standard Deviation}]$

The following table includes the national mean and standard deviation for each measure used to calculate a hospital's Z-Score. For display, means and standard deviations are displayed rounded to two or three decimal places. For scoring, these values are not rounded.

Process and Structural Measures	Mean	Standard Deviation
CPOE	91.81	14.36
BMCA	93.42	10.47
IPS	63.29	44.05
SP 1	117.59	6.43
SP 2	117.08	11.32
Total Nursing Care Hours per Patient Day	74.69	30.66
Hand Hygiene	78.65	26.10
H-COMP-1	89.67	2.59
H-COMP-2	89.52	2.51
H-COMP-3	81.14	4.46
H-COMP-5	74.09	4.15
H-COMP-6	84.90	3.78

Outcome Measures	Mean	Standard Deviation
Foreign Object Retained	0.014	0.05
Air Embolism	0.001	0.01
Falls and Trauma	0.428	0.43
CLABSI	0.730	0.59
CAUTI	0.627	0.53
SSI: Colon	0.845	0.68
MRSA	0.793	0.61
C. Diff.	0.455	0.35
PSI 4	168.38	21.92
PSI 90	1.01	0.19

LEAPFROG
HOSPITAL
 SAFETY GRADE

A NOTE ABOUT EXTREME VALUES

For hospitals that have an “extreme” value for a particular measure (i.e., a value that exceeds the 99th percentile) Leapfrog “trims” the reported value to the 99th percentile. For example, a rate of 0.500 per 1,000 patient discharges for Foreign Object Retained after Surgery is “trimmed” to 0.336 (e.g., the 99th percentile). Only “trimmed” rates are displayed on the Leapfrog Hospital Safety Grade [website](#). The table below includes the “trim” values for the spring 2024 Leapfrog Hospital Safety Grade. The PSI 90 measure score represents an observed to expected ratio that has already been risk adjusted at both the component PSI level and at the composite level; therefore, the measure is not “trimmed” by Leapfrog.

Measure	99 th Percentile
Foreign Object Retained	0.336
Air Embolism	0.308
Falls and Trauma	2.006
CLABSI	2.944
CAUTI	2.482
SSI: Colon	3.207
MRSA	2.908
C. Diff.	1.791
PSI 4	222.70

Note: Percentiles are rounded to reflect the precision of the raw data.

DEALING WITH MISSING DATA

Due to a variety of reasons, a hospital may not have a measure score for all 22 measures. If a hospital is missing a measure score for any measure (except PSI 90; hospitals missing PSI 90 are not graded), the standard weight of that measure is redistributed to the other measures in the same measure domain. The new weight for each measure within the domain is calculated by re-apportioning the standard weight assigned to the measure with the missing score to other measures within the same domain.

For example, if a hospital is missing a measure score for ICU Physician Staffing because the hospital does not operate an adult or pediatric medical and/or surgical ICU, the standard weight of 7.2% will be re-apportioned to the remaining 11 measures within the process/structural measure domain.

LEAPFROG
HOSPITAL
SAFETY GRADE

To calculate the new weight of each of the remaining 11 measures in the process/structural measure domain, hospitals can use the formula below or use the Leapfrog Hospital Safety Grade Calculator[®], which can be found on the [Safety Grade Review Website](#). Note that each domain contributes to 50% of the overall letter grade.

*[Standard measure weight / (sum of standard weights for the remaining 11 measures in the process/structural measure domain)]*50% = updated measure weight*

For more information about how the measure weight redistribution is calculated and affects the overall score, please see the Leapfrog Hospital Safety Grade Calculator, which can be found on the last page of the [Safety Grade Review Website](#).

CALCULATING WEIGHTED MEASURE SCORES

To calculate a hospital's numerical safety score, multiply the Z-Score of each process/structural measure by the standard weight assigned to that measure to get the weighted process/structural measure score. If a hospital is missing any process/structural measure scores, see [Dealing with Missing Data](#) to determine the updated measure weight. Then, sum all weighted process/structural measure scores. This is the hospital's overall weighted process/structural measures score.

Multiply the Z-Score of each outcome measure by the standard weight assigned to that measure to get the weighted outcome measure score. If a hospital is missing any outcome measure scores, see [Dealing with Missing Data](#) to determine the updated measure weight. Then, sum all weighted outcome measure scores. This is the hospital's overall weighted outcome measures score.

To calculate the overall Safety Grade for a hospital, add the overall weighted process/structural measure score and the overall weighted outcome measures score. Add 3.0 to your score; this is done to normalize scores to a positive distribution. This final numerical score (typically between 1.0 and 4.0) is then assigned to a letter grade. To assist hospitals in calculating their numerical score, a calculator is available on the [Safety Grade Review Website](#). Letter grade cut-points are published during the [Letter Grade Embargo Period](#).

LEAPFROG
HOSPITAL
SAFETY GRADE

ADDITIONAL SCORING INFORMATION

TERMS USED IN SCORING AND PUBLIC REPORTING

“Not Available” means that the hospital does not have a score for this measure. This could be because the measure is related to a service the hospital does not provide or because the hospital had too few patients or cases to report data for a condition or procedure. A “Not Available” result does not mean that the hospital withheld information from the public.

In the case of healthcare-associated infections, a SIR is reported as “Not Available” if one of the following applies:

- The number of predicted infections is less than 1.
- The number of observed infections present on admission (community-onset prevalence) was above a pre-determined cut-point.

For more information about NHSN's SIR models, please visit <https://www.cdc.gov/nhsn/pdfs/ps-analysis-resources/nhsn-sir-guide.pdf>.

“Declined to Report” means that a hospital did not voluntarily provide information to the Leapfrog Hospital Survey. Measures scored as “Declined to Report” will not be used in calculating the overall score (see [Dealing with Missing Data](#)).

SHARED CMS CERTIFICATION NUMBERS

All hospitals that share a CMS Certification Number (CCN) will be assigned the same source data as reported by CMS. Affected measures include the HCAHPS, Hospital-Acquired Conditions, Healthcare-Associated Infections (if secondary data source is used), and Patient Safety Indicators.

LEAPFROG
HOSPITAL
SAFETY GRADE

UPDATES TO DATA USED IN THE LEAPFROG HOSPITAL SAFETY GRADE

The Leapfrog Hospital Safety Grade relies on publicly available data that hospitals have had the opportunity to review for accuracy. Therefore, Leapfrog does not allow hospitals to make updates to their data following the Data Snapshot Date. In January of each year, Leapfrog publishes the Data Snapshot Dates for each of the two Leapfrog Hospital Safety Grade public releases at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>. Leapfrog publishes these dates to give hospitals and other stakeholders advance notice so they can be prepared to submit a Leapfrog Hospital Survey and monitor their performance on CMS measures used in the Safety Grade.

In addition, Leapfrog holds a Courtesy Review Period to give hospitals an additional opportunity to review the data that will be used to calculate their hospital's Safety Grade. The Review Period is an opportunity for hospitals to review the data for accuracy (i.e., identify recording errors, hospital name and address changes, etc.) on a secure website and review changes to the scoring algorithm.

DATA FROM THE LEAPFROG HOSPITAL SURVEY

During the Safety Grade Review Period (February 26 – March 15), Leapfrog will only make corrections to a hospital's data from the 2023 Leapfrog Hospital Survey if a recording error is identified (i.e., we have recorded a different measure score than what is posted on our Survey Results website) or a scoring error is identified (i.e., Leapfrog has calculated an incorrect measure score based on the submitted responses and Leapfrog's published scoring algorithms). Updates to Leapfrog Hospital Survey data that are submitted after the Data Snapshot Date will **not** be included in the current Leapfrog Hospital Safety Grade. Hospitals submitting a Leapfrog Hospital Survey are urged to take advantage of the opportunity to review their Survey Results for accuracy and completeness prior to each of the two published Data Snapshot Dates.

HOW HOSPITALS CAN REVIEW LEAPFROG HOSPITAL SURVEY RESULTS PRIOR TO THE DATA SNAPSHOT DATE

The Leapfrog Hospital Survey is open from April 1 to November 30 of each year. Following the Submission Deadline (June 30), Survey Results are published monthly on a secure 'Hospital Details' page and a public website (ratings.leapfroggroup.org). Hospitals are urged to review their Survey Results immediately. Hospitals that identify any reporting errors are instructed to log back into the Survey to submit a correction. Hospitals can correct and re-submit a previously submitted Survey until the Survey closes for the year. Note that corrections submitted after the Data Snapshot Date are not included in the current Leapfrog Hospital Safety Grade. Leapfrog has several automated processes in place to prevent hospitals from making data entry errors in the Online Survey Tool and to enhance the overall accuracy of the Survey Results. Learn more at <http://www.leapfroggroup.org/survey-materials/data-accuracy>.

LEAPFROG
HOSPITAL
SAFETY GRADE

DATA FROM THE CENTERS FOR MEDICARE & MEDICAID SERVICES (CMS)

During the Safety Grade Review Period (February 26 – March 15), Leapfrog will only make corrections to a hospital's data from CMS if the correction is issued by CMS and posted on either the Data.Medicare.Gov website or the Data.CMS.Gov website. If a hospital has identified an error with a measure score published by CMS, and CMS cannot post a correction within the review period, the measure score will not be used in calculating the hospital's Safety Grade, provided that the hospital can document that CMS has agreed to publicly issue a correction or remove the measure score from public reporting. Hospitals participating with CMS are urged to take advantage of the opportunity to participate in the CMS 30-day review periods.

CMS FOOTNOTE 23 POLICY

Leapfrog will notify hospitals that have CMS footnote 23 present for one or more claims-based measure scores (e.g., DRA HAC Rate, PSI 4 rate, or PSI 90 rate) at the start of the Courtesy Review Period. Footnote 23 indicates that "The data are based on claims that the hospital or facility submitted to CMS. The hospital or facility has reported discrepancies in their claims data." Hospital CEOs can request that Leapfrog use the measure score that is accompanied by the footnote. Written requests must be received prior to the close of the Safety Grade Review Period. If written requests are not received by the close of the Review Period, the measure will not be used to calculate the Hospital Safety Grade.

For hospitals that submit a Leapfrog Hospital Survey by the Data Snapshot Date, the CEO, Primary Survey Contact, and Secondary Survey Contact will be notified at the email addresses included in the Hospital's Survey Profile. For hospitals that do not submit a Leapfrog Hospital Survey by the Data Snapshot Date, the CEO will be contacted by certified letter.

HOW HOSPITALS CAN REVIEW CMS DATA PRIOR TO THE DATA SNAPSHOT DATE

CMS administers several hospital-based reporting and payment programs including the Inpatient Quality Reporting Program, HAC Reduction Program, and Value-based Purchasing Program. Several measures collected and calculated by CMS via its various hospital-based programs are used in the Leapfrog Hospital Safety Grade. CMS provides hospitals with a 30-day preview period before publishing measure scores on the Data.Medicare.Gov website and the Data.CMS.Gov website. More information is available at <https://qualitynet.org>.

LEAPFROG
HOSPITAL
SAFETY GRADE

HOW TO PARTICIPATE IN THE LEAPFROG HOSPITAL SURVEY

If a hospital did **not** complete a 2023 Leapfrog Hospital Survey by November 30, Survey Results were not used to calculate the spring 2024 Leapfrog Hospital Safety Grade. Hospitals that would like Survey Results included in the fall 2024 Hospital Safety Grade must submit a 2024 Leapfrog Hospital Survey (including the CPOE Evaluation) by June 30, 2024. Hospitals will be able to review their publicly reported Survey Results in July and respond to any issues identified by Leapfrog's Extensive Monthly Data Verification before the Data Snapshot Date for the fall 2024 Safety Grade of August 31. More information is available at <https://leapfroggroup.org/survey>.

LEAPFROG'S HELP DESK

If you have any questions regarding the scoring methodology, please contact the Help Desk at <https://leapfroghelpdesk.zendesk.com>.

EXHIBIT 30

*Exhibit 30 – Leapfrog Statement of Facts/K. Blair Declaration***Spring 2024 Imputation Process:****USING SECONDARY DATA SOURCES**

Twelve (12) of the 22 measures included in the Safety Grade are derived from the Leapfrog Hospital Survey. The Leapfrog Hospital Survey is voluntary, and as such, hospitals may choose not to submit a Survey. To address this gap in available data, the Safety Grade methodology utilizes secondary data when available. For information on how to complete a free Leapfrog Hospital Survey, visit www.leapfroggroup.org/survey.

IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

Leapfrog has worked closely with statisticians at Mathematica, Leapfrog's National [Expert Panel](#), and our scientific partners at Johns Hopkins Medicine to develop a new two-step imputation approach for determining scores for CPOE, BCMA, IPS, and Hand Hygiene if they are missing from our [publicly reported Survey Results](#).

STEP 1: USE A HOSPITAL'S MOST RECENT SCORE ON THE MEASURE

If the hospital had a score assigned by Leapfrog in the previous four rounds of grades (i.e., fall 2023, spring 2023, fall 2022, spring 2022), excluding imputed scores, the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., spring 2024).

STEP 2: USE THE MEAN OF THE SCORES ASSIGNED TO OTHER SIMILAR HOSPITALS IN THE U.S. (APPLIES TO CPOE, BCMA, AND HAND HYGIENE ONLY)

The hospital is assigned to a cohort of other similar hospitals using three or four hospital characteristics obtained from the most recent CMS Impact File and the 2023 Leapfrog Hospital Survey: urban/rural status, safety net status, number of beds, and teaching status (urban cohorts only). The CMS Impact File is the data source for urban/rural status, safety net status, and number of beds. The [2023 Leapfrog Hospital Survey Results](#) are the primary data source for teaching status and the CMS impact file is the secondary data source.

The hospital is then assigned the **lower** of two possible mean scores for CPOE, BCMA, and Hand Hygiene based on their cohort's performance:

[Scoring Methodology](#)

Last updated 4/22/2024

LEAPFROG00039287

Exhibit 30 – Leapfrog Statement of Facts/K. Blair Declaration

Fall 2024 Imputation Process:

USING SECONDARY DATA SOURCES

Twelve (12) of the 22 measures included in the Safety Grade are derived from the Leapfrog Hospital Survey. The Leapfrog Hospital Survey is voluntary, and as such, hospitals may choose not to submit a Survey. To address this gap in available data, the Safety Grade methodology utilizes secondary data when available. For information on how to complete a free Leapfrog Hospital Survey, visit www.leapfroggroup.org/survey.

IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

Leapfrog has worked closely with statisticians at Mathematica, Leapfrog's National [Expert Panel](#), and our scientific partners at Johns Hopkins Armstrong Institute for Patient Safety and Quality to develop a new two-step imputation approach for determining scores for CPOE, BCMA, IPS, and Hand Hygiene if they are missing from our [publicly reported](#) Survey Results.

STEP 1: USE A HOSPITAL'S MOST RECENT SCORE ON THE MEASURE (APPLIES TO CPOE, IPS, AND HAND HYGIENE ONLY)

If the hospital had a score assigned by Leapfrog in the previous two rounds of grades (i.e., spring 2024, fall 2023), excluding imputed scores, the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., fall 2024).

STEP 2: USE IMPUTATION POINT ASSIGNMENT (APPLIES TO CPOE, BCMA, IPS AND HAND HYGIENE)

If the hospital does not have historical data from the last two rounds (i.e., spring 2024, fall 2023) of the Safety Grade, the hospital is assigned a point value that is equivalent to receiving "Limited Achievement" for this measure on the Leapfrog Hospital Survey:

Measure	Leapfrog Hospital Survey Performance Category	Corresponding Safety Grade Measure Score
CPOE	Limited Achievement	15
BCMA	Limited Achievement	25
IPS	Limited Achievement	5
Hand Hygiene	Limited Achievement	15

Note about IPS: Only hospitals that operate an adult or pediatric medical and/or surgical ICU or neuro ICU are eligible for Step 2 Imputation of the IPS measure. A hospital's ICU designation (i.e., operating a medical ICU, surgical ICU, or pediatric ICU) is determined from the number of medical, surgical and/or pediatric ICU beds reported in Worksheet S-3 Part 1 of the hospital's most recent CMS Cost Report. If your hospital does not operate an ICU, but shares a CMS Certification Number with a hospital that does, please [contact the Help Desk](#) immediately if an IPS score was imputed.

Fall 2024 Hospital Safety Grade

Review Planned Changes & Submit a Public Comment by June 7

Starting in fall 2024, Leapfrog will update the Imputation Methodology for CPOE, BCMA, IPS, and Hand Hygiene measures for hospitals that do not submit a 2024 Leapfrog Hospital Survey by August 31, 2024. The changes come under the guidance of Leapfrog's national expert panel, the research team at Johns Hopkins Medicine, and in response to stakeholder feedback.

Leapfrog is accepting public comments for these planned updates until **June 7, 2024**. Leapfrog will publish final methodology updates and responses to public comments by June 30, 2024.

[Review Planned Changes and Submit a Comment](#)

Educational Opportunities

MONTHLY SUPPORT AND GUIDANCE FOR HOSPITAL SURVEY PARTICIPATION

The [2024 Leapfrog Hospital Survey Webinar Series](#), which is held monthly from March to December, is designed for hospitals that would benefit from more regular support and an interactive presentation of Survey materials and information.

Hospitals that join the Webinar Series will have access to:

- **Monthly office hours with Leapfrog's subject matter experts:** 30-minute sessions to get real-time technical assistance, answers to your questions and help staying on top of upcoming deadlines. Staffed by Leapfrog's subject matter experts.
- **Monthly webinars:** Timely and focused presentations on Survey measures and specifications, scoring information, frequently asked questions and public reporting. Each webinar focuses on a specific topic (e.g., nurse staffing and workforce, barcode medication administration, preparing for data verification, etc.) and concludes with a 20-minute open Q&A session.
- **Archive library:** Slides and recordings from each webinar are archived in an online portal that participants can access from March to January.

[Review the 2024 Webinar Series schedule and register now.](#)

In addition to the Webinar Series, Leapfrog offers **free** technical and content-related support to all participating facilities via our electronic [Help Desk](#), which is staffed by dedicated subject matter experts.

Important Dates

JUNE 30 SUBMISSION DEADLINE

The 2024 Leapfrog Hospital Survey Submission Deadline is June 30. Hospitals submitting by June 30 will be able to preview their results on their Hospital Details Page starting July 12 and will have results [publicly reported](#) on July 25. Hospitals will also receive a free [Competitive Benchmarking Summary Report](#).

[Review key deadlines.](#)

HELP DESK HOLIDAY SCHEDULE

The Leapfrog Help Desk is staffed from 9:00 a.m. to 5:00 p.m. ET on all regular business days. The Help Desk is not staffed on federal holidays. Please take note of the following upcoming closures.

Staff Training

May 22 - closed

Memorial Day

May 24 - closing at 2 pm ET

May 27 - closed

Juneteenth

June 19 - closed

Independence Day

July 4 - closed

Other Announcements

SURVEY SUPPORT FOR HEALTH SYSTEMS

Are you responsible for coordinating the Leapfrog Hospital Survey submission for all the hospitals in your health system? Want to make it easier to track submission status, review responses and scored results, and track performance from year to year?

Subscribe to Health System Support and receive all your hospital's 16-digit security codes, Survey responses, and scored Survey Results in an Excel file three times a year: following the June 30 deadline, following August 31 (the deadline for Top Hospital and the Snapshot Date for the fall 2024 Hospital Safety Grade), and following the January 31 year-end deadline.

Subscribers also receive a free registration for Leapfrog's [monthly webinar series](#).

RECOGNIZED LEADER APPLICATION OPENS JULY 1

Look out for the next round of applications for the [Recognized Leader in Caring for People Living with Diabetes](#) program! The application to be a 2025 Recognized Leader opens July 1, 2024, to all hospitals who have submitted a 2024 Leapfrog Hospital Survey. Details on updates to the program will be available in late June. Applications will be open until November 30, 2024, with Recognized Leaders announced in Spring 2025.

A joint effort from The Leapfrog Group and the American Diabetes Association, this first-ever national inpatient diabetes recognition program honors hospitals providing safe and high-quality health care for people living with diabetes, taking steps such as:

- Making it a policy to work with patients to safely self-manage their diabetes medications
- Implementing blood glucose testing and hypoglycemia protocols as well as additional testing and monitoring before and during inpatient surgeries
- Supporting patients with education they need to manage their care, and connecting them with health care providers after they leave the hospital

EXHIBIT 32

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**PLAINTIFF WEST BOCA MEDICAL CENTER, INC.’S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP’S FIRST SET OF
INTERROGATORIES TO WEST BOCA MEDICAL CENTER, INC.**

Pursuant to Federal Rules of Civil Procedure 26 and 33 and the *Pretrial Scheduling Order and Order Referring Case to Mediation* (ECF No. 36) (the “Pretrial Scheduling Order”), Plaintiff West Boca Medical Center, Inc. (“Plaintiff” or “West Boca Medical Center”), by and through its undersigned counsel, hereby submit its amended and supplemented responses and objections (“Responses”), to Defendant The Leapfrog Group’s (“TLG”) First Set of Interrogatories, dated July 11, 2025 (the “Interrogatories” and each numbered interrogatory, an “Interrogatory”) in the above-captioned action (the “Action”).

Plaintiff’s Responses to the Interrogatories are made solely for purposes of this Action and to the best of Plaintiff’s present knowledge, information, and belief regarding the matters about which inquiry have been made. Discovery is ongoing, and Plaintiff reserves the right to amend, supplement, clarify, or further explain its Responses at any time prior to the trial in

this Action. Plaintiff further reserves the right to raise any additional objections deemed necessary or appropriate in light of any further review.

OBJECTIONS TO INSTRUCTIONS AND DEFINITIONS

1. Plaintiff objects to the definition of terms “Plaintiffs” and “Plaintiff Hospitals” as overbroad, unduly burdensome, and not proportional to the needs of the case to the extent it seeks to require Plaintiffs to respond on behalf of entities or individuals other than themselves.

2. Plaintiff objects to the definition of the terms “West Boca,” “West Boca Medical Center,” “Plaintiff,” “You,” and “Your” to the extent each term seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

3. Plaintiff objects to the definition of the terms “Tenet Healthcare” and “Tenet” to the extent it seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of Tenet, Tenet’s agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

4. Plaintiff objects to the definition of “identify, when referring to a person,” as overbroad and unduly burdensome to the extent it calls for the “address” and “present or last-known employer” of identified individuals. Such information is overbroad and beyond the scope of permissible discovery.

5. Plaintiff objects to the instruction that the relevant time period for the Interrogatories begins on January 1, 2020. Plaintiff will apply to each Interrogatory the time period

of November 1, 2023 to present (the “Relevant Time Period”). Any response to an Interrogatory that provides information that falls outside of the Relevant Time Period should not be construed as an admission that the Relevant Time Period begins prior to November 1, 2023.

SPECIFIC RESPONSES TO INTERROGATORIES

Interrogatory No. 1: State the full name, address, job title or position, and hospital or employer affiliation of all individuals that assisted with responding to these interrogatories.

Answer: The following individuals assisted with responding to these Interrogatories.

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Jerad Hanlon	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Chief Executive Officer	West Boca Medical Center
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

Interrogatory No. 2: Identify every individual not identified in Your Rule 26(a) initial disclosures with knowledge of facts pertaining to the allegations in Your Complaint in this Lawsuit (and any subsequent amendments) and/or whom You believe may have discoverable knowledge, information or data regarding this matter, including those who You expect to call as a fact or opinion witness at any hearing in this proceeding or whose testimony (by affidavit, deposition or testimony) You intended to submit in connection with this proceeding, and the substance of his/her testimony or affidavit, and, with respect to each person identified, provide:

- A. full name,
- B. address,
- C. telephone number,
- D. job title or position,
- E. hospital or employer affiliation,
- F. and describe in detail the facts possessed by each such person.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of “every individual...with knowledge” or who “may have discoverable knowledge, information or data regarding this matter.” Plaintiff will not provide more than the identity of individuals most likely to have knowledge regarding this matter. Plaintiff further objects to this Interrogatory as premature because it requests disclosure of Plaintiff’s witnesses for hearings and the substance of witness testimony before such disclosure is required under applicable law or the Pretrial Scheduling Order. Plaintiff will submit its trial witness list on October 2, 2025, per the Pretrial Scheduling Order, and disclose any other witnesses and witness testimony as further ordered by the Court or otherwise required by applicable law. Plaintiff also objects to this Interrogatory’s request for the identity of “opinion witness[es]” as vague, since witnesses are either “fact” or “expert” witnesses. Plaintiff will interpret “opinion witness” to mean “expert witness.” Plaintiff submitted expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Answer: Subject to the foregoing objection, Plaintiff will amend its Rule 26(a)(1) Initial Disclosures to identify additional individuals who may have knowledge of facts pertaining to the allegations in the Complaint.

Amended Answer: In addition to those disclosed in Plaintiff’s supplemental disclosures, the following individuals may have relevant factual knowledge:

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Andrea Nunes	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Quality Director	West Boca Medical Center

In addition to the individuals identified above, persons identified in documents produced in this dispute have knowledge of facts pertaining to the allegations in the Amended Complaint. *See* Fed. R. Civ. P. 33(d). Discovery is ongoing, and Plaintiff reserves the right to supplement, amend, correct, clarify, or modify this Response as further information becomes available.

Interrogatory No. 3: Describe in detail all factual bases for Your contention that Leapfrog’s published Safety Grade for Your hospital was false, inaccurate, misleading, deceptive, or unfair. In so answering, identify with particularity each measure, data point, or metric that You contend was inaccurately reported, calculated, or misrepresented by Leapfrog in calculating the Safety Grade for Your hospital.

Answer: Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all factual bases” for Plaintiff’s contention. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’ facts or witnesses that support an opposing party’s case” to be “unduly broad”) (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory as premature to the extent it requests that Plaintiff “[d]escribe in detail all factual bases” to support its contention. *In re Reliance Fin. & Inv. Grp., Inc.*, 2006 WL 8435541, at *4 (S.D. Fla. Feb. 14, 2006) (Contention interrogatories “are more appropriately used after a substantial amount of discovery has been conducted--typically, at the end of the discovery period.”). Plaintiff also objects to this Interrogatory to the extent it attempts to limit or mischaracterize Plaintiff’s claim as just

challenging the false, inaccurate, misleading, deceptive, or unfair nature of TLG's Safety Grade. As the Court explained in its order denying TLG's motion to dismiss, the core of the Complaint is "a challenge to Defendant's representations about its methodology, which they claim mislead consumers by failing to distinguish between absent data and damning data, and professing that grades are not influenced by a hospital's lack of survey participation." *Order on Motion to Dismiss* 6 (ECF No. 41). Plaintiff also challenges the provably false facts and deceptive scoring system underlying these grades, which TLG admits it relies on to arrive at its deceptive Safety Grades.

Subject to the foregoing objections and as more fully stated in the *Amended Complaint* (ECF No. 74) ("Complaint"), TLG has engaged in deceptive and unfair business practices and misrepresentations when issuing the Safety Grade for Plaintiff's hospital as part of TLG's annual "Hospital Survey." TLG posts these Safety Grades online at hospitalsafetygrade.org.

To arrive at these Safety Grades, TLG uses CMS data, survey responses from participating hospitals, and other supplemental data sources. For participating hospitals, TLG uses the hospitals' self-reported responses to the Hospital Survey for 12 of the 22 measures. For non-participating hospitals, TLG uses other sources for those 12 measures. For the remaining four measures—Computerized Physician Order Entry, Bar Code Medication Administration, ICU Physician Staffing, and Hand Hygiene Score (the "Deceptive Score Categories")—TLG devised and uses a so-called "imputation model." Prior to Fall 2024, TLG's imputation model assigned non-participating hospitals a score based on the average score applicable to a similarly situated hospital. Beginning in Fall 2024, TLG modified its imputation model. TLG now assigns the lowest possible score to non-participating hospitals, which has the effect of punishing non-participating hospitals and artificially deflating their Safety Grades. TLG has even admitted the changes in Fall 2024 were designed to penalize non-participating hospitals. TLG also misleads consumers about how

it grades hospitals, stating “[t]he Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the [TLG] Hospital Survey.” *Declaration of Lee Crain* (ECF No. 21) (“Crain Decl.”), Ex. 1 at 4 (“Frequently Asked Questions About the Leapfrog Hospital Safety Grade”).

As TLG explains, “not all hospitals have enough data publicly available to be eligible for a grade.” Crain Decl. Ex. 1 at 5. “As per the National Expert Panel guidance, [TLG] has requirements for the minimum amount of data [it] need[s] to issue an accurate grade.” Crain Decl. Ex. 1 at 5. According to TLG, “[h]ospitals missing more than six process measures” are “not graded.” Crain Decl. Ex. 2 at 6. Non-participating hospitals should fall easily into that “not graded” bucket, because their decision not to participate in TLG’s survey necessarily means TLG is missing seven process measures that rely on voluntary submission of hospital data.¹

TLG then deceptively conceals how it makes up grades for the four “imputation” measures and even suggests on its website that TLG *does* have data sufficient to score TLG on those four measures. By way of example, TLG acknowledges that Plaintiff “Declined to Report” information in response to questions about “Staff work[ing] together,” but then tells consumers—as if it were a fact—that Plaintiff is “Worse Than Average” on “Handwashing,” “Communication,” “medication administration,” and the like—even though TLG has no basis whatsoever to adopt those conclusions. Crain Decl. Ex. 32 at 2. TLG itself says handwashing is among the “most important” measures in its survey, Crain Decl. Ex. 15 at 4, yet it deceptively conceals that it has no data with which to grade the Plaintiff hospital on that measure. *Defendant The Leapfrog Group’s Responses to Plaintiffs’ Requests for Production* at 7 (“Leapfrog is not itself in possession

¹ Those seven include CPOE, BCMA, IPS, Safe Practice 1: Culture of Leadership Structures and Systems; Safe Practice 2: Culture Measurement, Feedback & Intervention; Total Nursing Care Hours per Patient Day; and Hand Hygiene.

of data showing Plaintiffs' performance on the 'imputed metrics' considered by the methodology."'). Of course, Plaintiff in fact has a comprehensive and thorough handwashing policy. And had Plaintiff merely filled out TLG's survey, it would have received a full two letter grades higher on TLG's score. *Expert Report of Professor Sean Nicholson* (Aug. 7, 2025), Ex. 6.

Based on the foregoing, and as more fully set forth in the Complaint, TLG engages in deceptive trade practices by, among other things, deceiving consumers about its grading methods by implying that Plaintiff has failed on certain measures that, in truth, TLG has no data or other basis to evaluate; deceiving consumers by telling them the Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the Hospital Survey; deceiving consumers when it represents that it does not grade hospitals if it lacks sufficient data, when, in truth, it does grade hospitals by "imputing" or making up a grade for the Deceptive Score Categories; hiding the truth about its "imputation model" from consumers by burying it in fine print on a separate website; punishing non-participating hospitals by "imputing" scores, which artificially deflate a hospital's Safety Grade; and favoring participating hospitals. Additional factual bases for the Plaintiff's claims are presented in the Complaint.

Interrogatory No. 4: Describe the scoring or grading methodology You believe Leapfrog should have used to assess Your hospital's patient safety performance and explain why that method would yield a different result.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's provision of an alternative scoring or grading methodology has nothing to do with the claims and defenses in this case related to TLG's

decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it calls for speculation.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff responds that TLG should use a scoring system that is not unfair or deceptive. By way of example only, TLG could decline to grade hospitals that do not participate in TLG's survey, because their decision not to participate means TLG is missing seven process measures that rely on voluntary submission of hospital data. This would yield a different result, because the hospitals would not receive a grade at all. TLG's methodology certainly should not affirmatively assign an arbitrary low score to a particular metric just because a hospital does not provide data for that metric.

Interrogatory No. 5: State whether You submitted any data, corrections, or appeals to Leapfrog regarding the Safety Grade Your hospital received, and for each such submission, identify the date of the submission, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the submission, and the content of the submission.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted "any data, corrections, or appeals to Leapfrog regarding the Safety Grade" Plaintiff hospital received has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG's possession, custody and control, or equally available to TLG.

Answer: Subject to the foregoing objections, Plaintiff engaged in correspondence prior to the commencement of this case demanding that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, but at every turn TLG refused.

Amended Answer: Subject to the foregoing objections, Plaintiff did not submit any data, corrections or appeals to Leapfrog regarding the Safety Grades it has received.

Interrogatory No. 6: State whether You provided any comment or input in any form during Leapfrog's requests for public comments for planned updates to the Leapfrog Hospital Safety Grade methodology that was proposed for the calculation of Hospital Safety Grades (including but not limited to for the Fall 2024 methodology update). If yes, please identify the date of the comment, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the comment and the content of the comment. If no, please state the reason why You chose not to comment.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted "any comment or input" in response to TLG's request for public comments has nothing to do with claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG's possession, custody and control, or equally available to TLG.

Subject to the foregoing objections, Plaintiff did not provide comments in response to Leapfrog's requests for public comments for planned updates to the Leapfrog Hospital Safety Grade scoring system because Plaintiff generally does not respond to requests for public comment from private entities like TLG.

Interrogatory No. 7: Describe all actions Your hospital took in response to (or in deciding not to respond to) its Safety Grade or the Hospital Survey, including internal meetings, media statements, or public relations efforts. In so answering, state the date of the action, the individuals involved in the action and the content of the action.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all actions” Plaintiffs may have taken in response to TLG’s Safety Grades. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, No. 14-81476-CIV, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’ facts or witnesses that support an opposing party’s case” to be “unduly broad”) (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG’s deceptive and unfair Safety Grade. Plaintiff’s response included meeting internally with Plaintiff’s leadership team, medical executive committee, and governing board, corresponding with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action.

Amended Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG’s deceptive and unfair Safety Grades. Plaintiff’s response included meeting internally with Plaintiff’s leadership team, medical executive

committee, and governing board, corresponding through Plaintiff's corporate parent with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action. Plaintiff has also held many phone calls and meetings with physicians and other stakeholders about the TLG grades, explaining how the grades were deceptive and did not accurately reflect the hospital quality and patient safety at Plaintiff.

Interrogatory No. 8: Identify any and all persons, whether internal or external (e.g., patients, vendors, affiliates, parents, agents, partners, media) with whom You communicated in any way with respect to the Safety Grade or the Hospital Survey. In so answering, state the date of the communication, the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.) and the content of the communication.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of "any and all persons, whether internal or external." Plaintiff will disclose the categories of individuals with whom Plaintiff communicated about the Safety Grade or Hospital Survey during the Relevant Time Period. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that Health Insurance Portability and Accountability Act ("HIPAA"), among other statutes and regulations, bars Plaintiff from disclosing. Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff's governing board, its medical executive committee, department directors, and physicians and nurses when

asked about the Safety Grade or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grade for Plaintiff's hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG's release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and since then, has engaged in various social networking and other marketing campaigns to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of the network.

Amended Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff's governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff's hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG's release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of

the network. Plaintiff also engaged in email discussions about TLG's misleading grades, either as sender or recipient, which TLG has through Plaintiff's production of documents.

Interrogatory No. 9: Describe all instances in which a third party declined to contract with, refer patients to, or work with Your hospital, where Leapfrog's grade was cited or discussed. In so identifying list the name of the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.), the date of the communication and the content of the communication.

Answer: Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it requires Plaintiff to "[d]escribe all instances" in which a third party took an action in response to TLG's deceptive grade.

Subject to the foregoing objection, Plaintiff is not aware of any responsive instances.

Interrogatory No. 10: Describe with specificity the basis for each and every category of damage You claim You incurred as a result of the Leapfrog Safety Grade. In so identifying, list each category of damages and the dollar value of each category of damage You claim.

Plaintiff objects to this Interrogatory to the extent it seeks information that is the subject of expert testimony.

Answer: Plaintiff will submit expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Amended Answer: Plaintiff has served the expert report of Thomas Chakurda, which addresses the issue of reputational harm and harm to Plaintiff's goodwill. Plaintiff further objects to this Interrogatory as overbroad and unduly burdensome to the extent it seeks "each and every" category of claimed damages.

Subject to the foregoing objections and as agreed during the parties' September 3, 2025 meet and confer, Plaintiff will limit its response to the live non-monetary claims, including

injunctive and declaratory relief, to remedy harm to Plaintiff's reputation and goodwill. Plaintiff's reputation and goodwill has been damaged by TLG's false and misleading methodology and resulting Safety Grades. Plaintiff's claim for reputational harm is based on, among other things, concerns raised by patients, doctors, staff, and community members, as well as false and misleading statements based on TLG's false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

By way of example, our Medical Executive Committee has received direct inquiries from patients regarding their concerns with TLG's grades and related public reports. An emergency-department patient, who needed surgery, said that he was leaving because of the Leapfrog grade. The harm caused by TLG's false and misleading Safety Grade is ongoing.

Interrogatory No. 11: Identify all adverse patient events which occurred at Your hospital, including any citations received from regulatory agencies, accrediting agencies, and third party payors such as The Joint Commission, CMS, state health departments, etc. during the period covered by each Leapfrog Safety Grade publication of which You complain (i.e., Fall 2024, Fall 2025, etc.), as well as any complaints received from patients regarding the same.

Plaintiff objects to this Interrogatory because it is overly broad, unduly burdensome, seeks discovery of information that is irrelevant to the claims and defenses in this Action, seeks information that is beyond the scope of Leapfrog's Hospital Survey, and is not reasonably calculated to lead to the discovery of admissible evidence. TLG does not include "all adverse patient events," "citations received from" agencies or payors, or "complaints received from patients" in TLG's determination of its Hospital Safety Grades or request such information in the Hospital Survey, so any such information is irrelevant to whether TLG's actions constitute unfair or deceptive trade practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that HIPAA, among other statutes and regulations, bars Plaintiff from disclosing.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Defendant has agreed to withdraw this Interrogatory.

Interrogatory No. 12: Describe in detail how Your hospital compares nationally on on [sic] any other ranking of patient safety performance, including but not limited to Vizient, Inc., Premier, Inc., HealthTrust Purchasing Group, The Joint Commission, HealthGrades, US News, Newsweek, Statista, Definitive Healthcare, or any other quality benchmarking entity including benchmarking on patient safety including on adverse events and on healthcare-acquired infections.

Plaintiff objects to this Interrogatory's request that Plaintiff "[d]escribe in detail how Your hospital compares nationally" based on undisclosed "benchmarking" as vague and confusing. To the extent this Interrogatory seeks the top-line rankings of the identified organizations, Plaintiff objects to this Interrogatory because such information is publicly and equally available to TLG. To the extent this Interrogatory asks Plaintiff to compare itself to the named and unnamed entities, that request is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Other organizations' rankings have nothing to do with the claims and defenses in this case related to the Deceptive Score Categories or TLG's decision to use deceptive business practices.

Answer: Subject to the foregoing objections, Plaintiff has received numerous awards and accolades, including many that are directly relevant to patient care for children and women that we serve. For example, Plaintiff is the only Level III NICU facility in southern Palm Beach County. Level III NICUs provide lifesaving care for babies born before 32 weeks' gestation or babies with specific medical conditions that require surgery or specialized pediatric care. The American College of Radiology accredited Plaintiff for Imaging Modalities including Nuclear

Medicine, Ultrasound, MRI, CT—which provides us the ability to care for the Level III NICU children and at-risk pregnancy mothers that we treat and ensures we are using best practices. Relatedly, Plaintiff has an accredited education program in radiology through Joint Review Committee on Education and Radiologic Technology, which is the only agency recognized by the United States Department of Education and the Council for Higher Education Accreditation for the accreditation of traditional and distance delivery educational programs in radiography, radiation therapy, magnetic resonance, and medical dosimetry. This program provides our clinical staff with educational opportunities to ensure our patients receive quality care.

Plaintiff is accredited by the Joint Commission, the nation’s largest hospital accreditor that evaluates hospitals’ quality performance standards through an objective evaluation process. Plaintiff has also been accredited by Joint Commission for specialization certifications for Joint-Replacement – Hip, Joint Replacement – Shoulder, and Joint Replacement – Knee—a certification designed for hospitals providing the critical elements to achieve long-term success in improving critical medical outcomes—which signifies our services have delivered evidence-based proof of clinical quality sought by patients and payers alike. The entities that award and assign these accreditations visit the healthcare facility and perform regular periodic in-person reviews, audits, surveys, and assessments of the facility.

Plaintiff has also received numerous awards that exemplify its quality such as Get with the Guidelines Silver Plus Stroke Recognition Award and Diabetes Honor Roll. In addition, as a facility that primarily treats mothers and children, it is important to us that we implement the American Academy of Pediatrics best practices and have been recognized for doing so by receiving the Silver designation from the Cribs for Kids’ National Safe Sleep Hospital Certification program, which signifies our facility’s commitment to infant safe sleep to reduce the risk of Sudden

Unexpected Infant Death, Accidental Suffocation and Strangulation in Bed, SIDS, and unsafe sleep injuries.

Healthgrades has awarded Plaintiff numerous Healthgrades accolades. To assess and evaluate hospitals, Healthgrades relies on data from Medicare medical claims records and states' data on Medicare and commercially insured patient outcomes to determine patients' actual clinical outcomes when visiting a given hospital. Plaintiff also received several awards from Healthgrades for various specialties, including:

a. Critical Care

- i. Five-Star Recipient for Treatment of Sepsis for four years in a row (2022-2025)

b. Gastrointestinal

- i. Recipient of the Healthgrades Gastrointestinal Care Excellence Award (2022-2025)
- ii. Recipient of the Healthgrades Gastrointestinal Surgery Excellence Award (2025)
- iii. Top 10% in the Nation for overall Gastrointestinal Services (2025)
- iv. Top 10% in the Nation for Gastrointestinal Surgery (2025)
- v. Five-Star Recipient for Colorectal Surgeries for three years in a row (2023-2025)
- vi. Five-Star Recipient for Treatment of Bowel Obstruction (2025)

c. Labor and Delivery

- i. Five-Star Recipient for C-Section Delivery for 11 years in a row (2015-2025)

- ii. Five-Star Recipient for Vaginal Delivery for 11 years in a row (2015-2025)

d. Pulmonary Care

- i. Five-Star Recipient for Treatment of Respiratory Failure for three years in a row (2023-2025)

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Amended Answer: Subject to the foregoing objections, Plaintiff has received numerous awards and accolades. For example, the American College of Radiology accredited Plaintiff for Imaging Modalities including Nuclear Medicine, Ultrasound, MRI, and CT. Relatedly, Plaintiff has an accredited education program in radiology through Joint Review Committee on Education and Radiologic Technology.

Plaintiff is accredited by the Joint Commission for specialization certifications for Joint-Replacement – Hip, Joint Replacement – Shoulder, and Joint Replacement – Knee.

Plaintiff has also received Get with the Guidelines Silver Plus Stroke Recognition Award and Diabetes Honor Roll. In addition, Plaintiff has received the Silver designation from the Cribs for Kids' National Safe Sleep Hospital Certification program.

Healthgrades has awarded Plaintiff numerous Healthgrades accolades, including:

a. Critical Care

- i. Five-Star Recipient for Treatment of Sepsis for four years in a row (2022-2025)

b. Gastrointestinal

- i. Recipient of the Healthgrades Gastrointestinal Care Excellence Award (2022-2025)
- ii. Recipient of the Healthgrades Gastrointestinal Surgery Excellence Award (2025)
- iii. Top 10% in the Nation for overall Gastrointestinal Services (2025)
- iv. Top 10% in the Nation for Gastrointestinal Surgery (2025)
- v. Five-Star Recipient for Colorectal Surgeries for three years in a row (2023-2025)
- vi. Five-Star Recipient for Treatment of Bowel Obstruction (2025)

c. Labor and Delivery

- i. Five-Star Recipient for C-Section Delivery for 11 years in a row (2015-2025)
- ii. Five-Star Recipient for Vaginal Delivery for 11 years in a row (2015-2025)

d. Pulmonary Care

- i. Five-Star Recipient for Treatment of Respiratory Failure for three years in a row (2023-2025)

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Also, Plaintiff does not participate in Vizient and has not done so during the Relevant Time Period.

Interrogatory No. 13: Describe any steps taken by Your hospital to improve any and all of the patient safety measures considered by Leapfrog's Hospital Safety Grade (as set forth on Leapfrog's

published scoring methodology documents; see ECF No. 21-3 at 6-10; ECF No. 21-43 at 6-9), before and after each Safety Grade publication of which You complain.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of Plaintiff's improvements to "any and all" patient safety measures considered by Leapfrog's Hospital Safety Grade. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks information on metrics other than TLG's Deceptive Score Categories and to the extent it seeks information that is beyond the scope of Leapfrog's Hospital Survey.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff is committed to continual improvement of patient safety measures, motivated by our commitment to ensuring the best possible patient safety—not chasing the best possible Leapfrog grade. To achieve this core objective, Plaintiff devotes significant time and resources to improving its delivery of the highest possible quality of care for those in the community it serves, including efforts to improve its performance in areas related to the four metrics Plaintiff has chosen to impute in its survey.

Plaintiff tracks three of these metrics through its patient safety plan or as part of its quality improvement patient safety committee. For example, Plaintiff does random hand washing audits every month on every unit and addresses any negative trends. Plaintiff already has 24/7 ICU coverage for its intensivist unit and has had that coverage for several years, so it does not need to track this metric.

Interrogatory No. 14: State whether You are aware of specific patients who have relied on the Leapfrog Safety Grade in declining to receive healthcare services at Your hospital. In so answering, identify the individual patient that declined to receive services, the date of such declination, the type of service the patient declined to receive, the medium for the communication from the patient (i.e. telephone, video conference, email, letter, etc.), the content of the communication, and the reason given for the stated decision.

Plaintiff objects to this Interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to a Qualified Protective Order entered by this Court.

Answer: Subject to the foregoing objection, Plaintiff has received reports that patients considered or decided not to use Plaintiff's facility because of TLG's misleading grades.

Amended Answer: Subject to the foregoing objection, since the release of TLG's false and misleading grades, Plaintiff has received numerous reports from doctors that patients considered or decided not to use Plaintiff's facility due to concerns related to TLG's misleading grades.

Interrogatory No. 15: Describe any effort Your hospital has made to influence public perception of Your hospital's performance on patient safety following the publication of the Leapfrog Safety Grade.

Plaintiff objects to this Interrogatory as vague and ambiguous because it does not specify which Leapfrog Safety Grade is at issue. Plaintiff will construe this Interrogatory to reference TLG's deceptive Safety Grades beginning in Fall 2024. Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks "any effort" Plaintiff "has made to influence public perception" after the release of TLG's deceptive and unfair Safety Grades because there have been many such "efforts" and those

“efforts” are ongoing given the significant harm caused by TLG’s deceptive and unfair business practices.

Answer: Subject to the foregoing objections, Plaintiff continues to influence public perception by, among other things, delivering the highest quality care to the community it serves, which, as discussed in response to Interrogatory 12, has led to numerous awards, accreditations, and accolades. In addition, several public statements disputing the misleading nature of the Safety Grade have been made on Plaintiff’s behalf.

Supplemental Answer: In addition to the above, members of hospital leadership have communicated with patients, doctors, or community members on a regular basis to dispel the misleading nature of the Leapfrog Safety Grades. For instance, Plaintiff communicated its governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff’s hospital. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG’s deceptive scores on behalf of Plaintiff and other affected members of the network. Plaintiff also engaged in email discussions about TLG’s misleading grades, either as sender or recipient, which TLG has through Plaintiff’s production of documents.

Interrogatory No. 16: Describe the due diligence Your hospital undertakes to ensure the accuracy of its own publicly reported safety data (including but not limited to data submitted to CMS, the CDC, and third party organizations).

Plaintiff objects to this Interrogatory as vague and ambiguous due to its use of the undefined term “due diligence.” Plaintiff further objects to this Interrogatory because it seeks

discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Any “due diligence” Plaintiff performs when reporting to *third parties* has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices, especially when TLG does nothing to ensure the accuracy of information that hospitals that participate in its survey self-report.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff makes reasonable efforts to ensure the accuracy of the data it reports to third-party organizations. For instance, Plaintiff employs data abstractors, quality coordinators and a Quality Director, who are all responsible for abstracting, validating, and submitting safety data.

Interrogatory No. 17: Describe in detail how You communicate to the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System the outcome of any and all healthcare safety ratings, evaluative publications, studies, or performance analyses that Your Hospital receives.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff’s communication, if any, with the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System, all non-parties to this litigation, has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff communicates with Tenet stakeholders, including employees who work to support the Palm Beach Health Network, on a range of matters, including issues related to patient safety and outcomes and in particular related to TLG and the Safety Grades by email and oral communication. Those communications included discussions about the reasons for particular grades, the method used to calculate Safety Grades, the value of Safety Grades, and responses to the Safety Grades. In addition, identified below are documents Plaintiff produced evidencing communications between the Plaintiff Hospitals and Tenet related to TLG, the Leapfrog survey, and Safety Grades.

PBHN000006414	PBHN000006419
PBHN000006465	PBHN000006466

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 18: State whether the compensation of Your Chief Executive Officer or any other executive-level leadership officers is tied to or related in any way to Your hospital's performance on patient safety, union worker contracts or Your hospital's ratings by third party ratings organizations' ratings publications (including but not limited to the Leapfrog Hospital Safety Grade).

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's method of compensating its Chief Executive Officer and other executive-level leadership **has nothing to do with the** claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff's performance on patient safety, union worker contracts, or ratings by third party ratings organizations' ratings publications is related in some way to the compensation of Plaintiff's Chief Executive Officer or other executive-level leadership officer(s).

Interrogatory No. 19: Identify all hospitals, medical centers, or healthcare systems that you consider to be your direct competitors within the relevant geographic market during the time period covered by the Complaint and describe in detail the criteria you use to determine whether another hospital or healthcare provider is a competitor.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. The identity of Plaintiff's competitors and "the criteria" used to determine whether a hospital or provide is a competitor has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff also objects to this Interrogatory to the extent it seeks confidential, proprietary information, and

commercially sensitive information related to Plaintiff's scoring system and "criteria" used to determine whether a hospital or provide is a competitor.

Answer: Subject to the foregoing objections and on condition that this response is considered "Confidential" under the forthcoming agreed confidentiality order, Baptist Health South Florida, Bethesda Hospital East, Bethesda Hospital West, Boca Raton Regional Hospital, Broward Health Hospital in Coral Springs, and HCA Florida Northwest Hospital are Plaintiff's competitors. Plaintiff considers these hospitals competitors because of their proximity to Plaintiff, their competing services lines, and that patients within Plaintiff's service area go to these hospitals for medical care.

Interrogatory No. 20: State and describe the results of any market analysis, competitive analysis, or consumer perception surveys you have conducted or commissioned regarding your competitors from 2020 to present, and identify the individuals or entities that prepared or participated in such analyses.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not is not proportional to the needs of this Action. The results of any market analysis, competitive analysis, or consumer perception surveys and the identity of those who prepared or participated in such analyses has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Plaintiff further objects to this Interrogatory to the extent it requests information from outside of the relevant time period of January 1, 2023, to present. Plaintiff also

objects to this Interrogatory as unduly burdensome to the extent it asks Plaintiff to “state and describe” various market analysis.

As agreed during the parties’ meet and confer on September 3, 2025, Plaintiff will produce documents showing the results of studies or surveys Plaintiff has conducted or commissioned related to internal market analysis, competitive analysis, or consumer perception. Plaintiff will identify the documents responsive to this Interrogatory by Bates number in Plaintiffs’ production cover letter.

Interrogatory No. 21: Identify with specificity any comments or concerns raised by any third party payor, bank or lender, or investor related to Your hospital’s reputation and/or public perception on issues in any way involving patient safety or satisfaction.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this case to the extent it seeks “comments and concerns” from third parties related generally to Plaintiff’s reputation that has nothing to do with the specific and significant reputational harm caused by TLG’s misleading grades.

Answer: Subject to the foregoing objections, Plaintiff will produce and identify documents related to the significant reputational harm caused by TLG’s deceptive and unfair Safety Grades that provide sufficient detail to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff is unaware of any documents related to this Interrogatory.

Interrogatory No. 22: Identify and describe any complaints, concerns, or comments from patients, community members, or referring physicians that relate to the hospital’s reputation or comparisons to other hospitals in the region.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this Action to the extent it seeks “comments and concerns” from patients, community members, or referring physicians that have nothing to do with the significant reputational harm caused by TLG’s misleading grades. Plaintiff also objects to this interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff’s facility because of TLG’s misleading grades.

Amended Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff’s facility because of TLG’s misleading grades. In addition, concerns have been raised by patients, doctors, staff, and community members, and Plaintiff is aware of false and misleading statements based on TLG’s false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

Our Medical Executive Committee has received direct inquiries from patients regarding their concerns with TLG’s grades and related public reports. An emergency-department patient, who needed surgery, said that he was leaving because of the Leapfrog grade. The harm caused by TLG’s false and misleading Safety Grade is ongoing.

In addition, the following produced documents evidence such harm.

Start Page	End Page
PBHN000006771	PBHN000006773
PBHN000002082	PBHN000002085
PBHN000002066	PBHN000002070
PBHN000002615	PBHN000002617
PBHN000006397	PBHN000006401
PBHN000002090	PBHN000002094
PBHN000002103	PBHN000002103

PBHN000004484	PBHN000004484
PBHN000004564	PBHN000004564
PBHN000004574	PBHN000004580
PBHN000004557	PBHN000004557
PBHN000008718	PBHN000008718
PBHN000006461	PBHN000006462
PBHN000008914	PBHN000008914
PBHN000008915	PBHN000008915

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 23: List with specific detail each and every concern, complaint or comment made by any union, collective bargaining unit or employee association in any way related to patient safety at Your hospital.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “each and every concern, complaint or comment ” from third parties that have nothing to do with the significant reputational harm caused by TLG’s misleading grades. Plaintiff also objects to this Interrogatory to the extent it seeks health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Answer: Subject to the foregoing objections, Plaintiff is unaware of any concern, complaint or comment regarding TLG deceptive scores made by the union at Plaintiff’s hospital.

Amended Answer: Subject to the foregoing objections, Plaintiff is unaware of any concern, complaint, or comment regarding TLG's deceptive scores or regarding patient safety made by the union at Plaintiff's hospital.

Interrogatory No. 24: Identify any and all criticism You have received since 2020 from Tenet Healthcare Corporation and/or from any individual executive of Tenet Healthcare Corporation regarding Your hospital's performance in any way.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. Any so-called "criticism" has nothing to do with the claims and defenses related to TLG's decision to use deceptive business practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: As discussed during the parties' meet and confer on September 3, 2025, TLG agreed to narrow this Interrogatory to concern only "criticism...regarding Your hospital's patient safety." After a reasonable and diligent search, Plaintiff is unaware of having received "criticism" from Tenet Health Corporation regarding patient safety. Plaintiff is always working to improve its performance, quality, and safety in a constructive way and engages with Tenet Health Corporation as needed to ensure Plaintiff provides the best patient care possible.

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**AFFIDAVIT OF JERAD HANLON IN SUPPORT OF
PLAINTIFF WEST BOCA MEDICAL CENTER, INC.'S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP'S FIRST SET OF
INTERROGATORIES TO WEST BOCA MEDICAL CENTER**

I, Jerad Hanlon, declare as follows:

1. I am over 21 years of age and competent to give this testimony.
2. I am the Chief Executive Officer of West Boca Medical Center, Inc. ("Plaintiff"). I am the corporate representative of Plaintiff for the purpose of answering Defendant The Leapfrog Group's First Set of Interrogatories to West Boca Medical Center. I have read the foregoing interrogatories and the answers to those interrogatories, which are true according to the best of my knowledge, information, and belief.
3. I declare under penalty of perjury that the foregoing is true and correct.

Executed on September 8, 2025.

Jerad Hanlon

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**PLAINTIFF DELRAY MEDICAL CENTER, INC.’S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP’S FIRST SET OF
INTERROGATORIES TO DELRAY MEDICAL CENTER, INC.**

Pursuant to Federal Rules of Civil Procedure 26 and 33 and the *Pretrial Scheduling Order and Order Referring Case to Mediation* (ECF No. 36) (the “Pretrial Scheduling Order”), Plaintiff Delray Medical Center, Inc. (“Plaintiff” or “Delray”), by and through its undersigned counsel, hereby submit its amended and supplemented responses and objections (“Responses”), to Defendant The Leapfrog Group’s (“TLG”) First Set of Interrogatories, dated July 11, 2025 (the “Interrogatories” and each numbered interrogatory, an “Interrogatory”) in the above-captioned action (the “Action”).

Plaintiff’s Responses to the Interrogatories are made solely for purposes of this Action and to the best of Plaintiff’s present knowledge, information, and belief regarding the matters about which inquiry have been made. Discovery is ongoing, and Plaintiff reserves the right to amend, supplement, clarify, or further explain its Responses at any time prior to the trial in

this Action. Plaintiff further reserves the right to raise any additional objections deemed necessary or appropriate in light of any further review.

OBJECTIONS TO INSTRUCTIONS AND DEFINITIONS

1. Plaintiff objects to the definition of terms “Plaintiffs” and “Plaintiff Hospitals” as overbroad, unduly burdensome, and not proportional to the needs of the case to the extent it seeks to require Plaintiffs to respond on behalf of entities or individuals other than themselves.

2. Plaintiff objects to the definition of the terms “Delray,” “Delray Medical Center,” “Plaintiff,” “You,” and “Your” to the extent each term seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

3. Plaintiff objects to the definition of the terms “Tenet Healthcare” and “Tenet” to the extent it seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of Tenet, Tenet’s agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

4. Plaintiff objects to the definition of “identify, when referring to a person,” as overbroad and unduly burdensome to the extent it calls for the “address” and “present or last-known employer” of identified individuals. Such information is overbroad and beyond the scope of permissible discovery.

5. Plaintiff objects to the instruction that the relevant time period for the Interrogatories begins on January 1, 2020. Plaintiff will apply to each Interrogatory the time period

of November 1, 2023 to present (the “Relevant Time Period”). Any response to an Interrogatory that provides information that falls outside of the Relevant Time Period should not be construed as an admission that the Relevant Time Period begins prior to November 1, 2023.

SPECIFIC RESPONSES TO INTERROGATORIES

Interrogatory No. 1: State the full name, address, job title or position, and hospital or employer affiliation of all individuals that assisted with responding to these interrogatories.

Answer: The following individuals assisted with responding to these Interrogatories.

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Heather Havericak	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Chief Executive Officer	Delray Medical Center
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

Interrogatory No. 2: Identify every individual not identified in Your Rule 26(a) initial disclosures with knowledge of facts pertaining to the allegations in Your Complaint in this Lawsuit (and any subsequent amendments) and/or whom You believe may have discoverable knowledge, information or data regarding this matter, including those who You expect to call as a fact or opinion witness at any hearing in this proceeding or whose testimony (by affidavit, deposition or testimony) You intended to submit in connection with this proceeding, and the substance of his/her testimony or affidavit, and, with respect to each person identified, provide:

- A. full name,
- B. address,
- C. telephone number,
- D. job title or position,
- E. hospital or employer affiliation,
- F. and describe in detail the facts possessed by each such person.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of “every individual...with knowledge” or who “may have discoverable knowledge, information or data regarding this matter.” Plaintiff will not provide more than the identity of individuals most likely to have knowledge regarding this matter. Plaintiff further objects to this Interrogatory as premature because it requests disclosure of Plaintiff’s witnesses for hearings and the substance of witness testimony before such disclosure is required under applicable law or the Pretrial Scheduling Order. Plaintiff will submit its trial witness list on October 2, 2025, per the Pretrial Scheduling Order, and disclose any other witnesses and witness testimony as further ordered by the Court or otherwise required by applicable law. Plaintiff also objects to this Interrogatory’s request for the identity of “opinion witness[es]” as vague, since witnesses are either “fact” or “expert” witnesses. Plaintiff will interpret “opinion witness” to mean “expert witness.” Plaintiff submitted expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Answer: Subject to the foregoing objection, Plaintiff will amend its Rule 26(a)(1) Initial Disclosures to identify additional individuals who may have knowledge of facts pertaining to the allegations in the Complaint.

Amended Answer: In addition to those disclosed in Plaintiff’s supplemental disclosures, the following individuals may have relevant factual knowledge:

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Stephany Johnson	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Quality Director	Delray Medical Center

In addition to the individuals identified above, persons identified in documents produced in this dispute have knowledge of facts pertaining to the allegations in the Amended Complaint. *See* Fed. R. Civ. P. 33(d). Discovery is ongoing, and Plaintiff reserves the right to supplement, amend, correct, clarify, or modify this Response as further information becomes available.

Interrogatory No. 3: Describe in detail all factual bases for Your contention that Leapfrog’s published Safety Grade for Your hospital was false, inaccurate, misleading, deceptive, or unfair. In so answering, identify with particularity each measure, data point, or metric that You contend was inaccurately reported, calculated, or misrepresented by Leapfrog in calculating the Safety Grade for Your hospital.

Answer: Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all factual bases” for Plaintiff’s contention. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’ facts or witnesses that support an opposing party’s case” to be “unduly broad”) (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory as premature to the extent it requests that Plaintiff “[d]escribe in detail all factual bases” to support its contention. *In re Reliance Fin. & Inv. Grp., Inc.*, 2006 WL 8435541, at *4 (S.D. Fla. Feb. 14, 2006) (Contention interrogatories “are more appropriately used after a substantial amount of discovery has been conducted--typically, at the end of the discovery period.”). Plaintiff also objects to this

Interrogatory to the extent it attempts to limit or mischaracterize Plaintiff's claim as just challenging the false, inaccurate, misleading, deceptive, or unfair nature of TLG's Safety Grade. As the Court explained in its order denying TLG's motion to dismiss, the core of the Complaint is "a challenge to Defendant's representations about its methodology, which they claim mislead consumers by failing to distinguish between absent data and damning data, and professing that grades are not influenced by a hospital's lack of survey participation." *Order on Motion to Dismiss* 6 (ECF No. 41). Plaintiff also challenges the provably false facts and deceptive scoring system underlying these grades, which TLG admits it relies on to arrive at its deceptive Safety Grades.

Subject to the foregoing objections and as more fully stated in the *Amended Complaint* (ECF No. 74) ("Complaint"), TLG has engaged in deceptive and unfair business practices and misrepresentations when issuing the Safety Grade for Plaintiff's hospital as part of TLG's annual "Hospital Survey." TLG posts these Safety Grades online at hospitalsafetygrade.org.

To arrive at these Safety Grades, TLG uses CMS data, survey responses from participating hospitals, and other supplemental data sources. For participating hospitals, TLG uses the hospitals' self-reported responses to the Hospital Survey for 12 of the 22 measures. For non-participating hospitals, TLG uses other sources for those 12 measures. For the remaining four measures—Computerized Physician Order Entry, Bar Code Medication Administration, ICU Physician Staffing, and Hand Hygiene Score (the "Deceptive Score Categories")—TLG devised and uses a so-called "imputation model." Prior to Fall 2024, TLG's imputation model assigned non-participating hospitals a score based on the average score applicable to a similarly situated hospital. Beginning in Fall 2024, TLG modified its imputation model. TLG now assigns the lowest possible score to non-participating hospitals, which has the effect of punishing non-participating hospitals and artificially deflating their Safety Grades. TLG has even admitted the changes in Fall 2024

were designed to penalize non-participating hospitals. TLG also misleads consumers about how it grades hospitals, stating “[t]he Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the [TLG] Hospital Survey.” *Declaration of Lee Crain* (ECF No. 21) (“Crain Decl.”), Ex. 1 at 4 (“Frequently Asked Questions About the Leapfrog Hospital Safety Grade”).

As TLG explains, “not all hospitals have enough data publicly available to be eligible for a grade.” Crain Decl. Ex. 1 at 5. “As per the National Expert Panel guidance, [TLG] has requirements for the minimum amount of data [it] need[s] to issue an accurate grade.” Crain Decl. Ex. 1 at 5. According to TLG, “[h]ospitals missing more than six process measures” are “not graded.” Crain Decl. Ex. 2 at 6. Non-participating hospitals should fall easily into that “not graded” bucket, because their decision not to participate in TLG’s survey necessarily means TLG is missing seven process measures that rely on voluntary submission of hospital data.¹

TLG then deceptively conceals how it makes up grades for the four “imputation” measures and even suggests on its website that TLG *does* have data sufficient to score TLG on those four measures. By way of example, TLG acknowledges that Plaintiff “Declined to Report” information in response to questions about “Staff work[ing] together,” but then tells consumers—as if it were a fact—that Plaintiff is “Worse Than Average” on “Handwashing,” “Communication,” “medication administration,” and the like—even though TLG has no basis whatsoever to adopt those conclusions. Crain Decl. Ex. 32 at 2. TLG itself says handwashing is among the “most important” measures in its survey, Crain Decl. Ex. 15 at 4, yet it deceptively conceals that it has no data with which to grade the Plaintiff hospital on that measure. *Defendant The Leapfrog*

¹ Those seven include CPOE, BCMA, IPS, Safe Practice 1: Culture of Leadership Structures and Systems; Safe Practice 2: Culture Measurement, Feedback & Intervention; Total Nursing Care Hours per Patient Day; and Hand Hygiene.

Group's Responses to Plaintiffs' Requests for Production at 7 ("Leapfrog is not itself in possession of data showing Plaintiffs' performance on the 'imputed metrics' considered by the methodology."). Of course, Plaintiff in fact has a comprehensive and thorough handwashing policy. And had Plaintiff merely filled out TLG's survey, it would have received a full two letter grades higher on TLG's score. *Expert Report of Professor Sean Nicholson* (Aug. 7, 2025), Ex. 6.

Based on the foregoing, and as more fully set forth in the Complaint, TLG engages in deceptive trade practices by, among other things, deceiving consumers about its grading methods by implying that Plaintiff has failed on certain measures that, in truth, TLG has no data or other basis to evaluate; deceiving consumers by telling them the Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the Hospital Survey; deceiving consumers when it represents that it does not grade hospitals if it lacks sufficient data, when, in truth, it does grade hospitals by "imputing" or making up a grade for the Deceptive Score Categories; hiding the truth about its "imputation model" from consumers by burying it in fine print on a separate website; punishing non-participating hospitals by "imputing" scores, which artificially deflate a hospital's Safety Grade; and favoring participating hospitals. Additional factual bases for the Plaintiff's claims are presented in the Complaint.

Interrogatory No. 4: Describe the scoring or grading methodology You believe Leapfrog should have used to assess Your hospital's patient safety performance and explain why that method would yield a different result.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's provision of an alternative scoring or grading methodology has nothing to do with the claims and defenses in this case related to TLG's

decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it calls for speculation.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff responds that TLG should use a scoring system that is not unfair or deceptive. By way of example only, TLG could decline to grade hospitals that do not participate in TLG's survey, because their decision not to participate means TLG is missing seven process measures that rely on voluntary submission of hospital data. This would yield a different result, because the hospitals would not receive a grade at all. TLG's methodology certainly should not affirmatively assign an arbitrary low score to a particular metric just because a hospital does not provide data for that metric.

Interrogatory No. 5: State whether You submitted any data, corrections, or appeals to Leapfrog regarding the Safety Grade Your hospital received, and for each such submission, identify the date of the submission, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the submission, and the content of the submission.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted "any data, corrections, or appeals to Leapfrog regarding the Safety Grade" Plaintiff hospital received has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG's possession, custody and control, or equally available to TLG.

Answer: Subject to the foregoing objections, Plaintiff engaged in correspondence prior to the commencement of this case demanding that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, but at every turn TLG refused.

Amended Answer: Subject to the foregoing objections, Plaintiff did not submit any data, corrections or appeals to Leapfrog regarding the Safety Grades it has received.

Interrogatory No. 6: State whether You provided any comment or input in any form during Leapfrog's requests for public comments for planned updates to the Leapfrog Hospital Safety Grade methodology that was proposed for the calculation of Hospital Safety Grades (including but not limited to for the Fall 2024 methodology update). If yes, please identify the date of the comment, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the comment and the content of the comment. If no, please state the reason why You chose not to comment.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted "any comment or input" in response to TLG's request for public comments has nothing to do with claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG's possession, custody and control, or equally available to TLG.

Subject to the foregoing objections, Plaintiff did not provide comments in response to Leapfrog's requests for public comments for planned updates to the Leapfrog Hospital Safety Grade scoring system because Plaintiff generally does not respond to requests for public comment from private entities like TLG.

Interrogatory No. 7: Describe all actions Your hospital took in response to (or in deciding not to respond to) its Safety Grade or the Hospital Survey, including internal meetings, media statements, or public relations efforts. In so answering, state the date of the action, the individuals involved in the action and the content of the action.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all actions” Plaintiffs may have taken in response to TLG’s Safety Grades. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, No. 14-81476-CIV, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’ facts or witnesses that support an opposing party’s case” to be “unduly broad”) (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG’s deceptive and unfair Safety Grade. Plaintiff’s response included meeting internally with Plaintiff’s leadership team, medical executive committee, and governing board, corresponding with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action.

Amended Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG’s deceptive and unfair Safety Grades. Plaintiff’s response included meeting internally with Plaintiff’s leadership team, medical executive

committee, and governing board, corresponding through Plaintiff's corporate parent with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action. Plaintiff has also held many phone calls and meetings with physicians and other stakeholders about the TLG grades, explaining how the grades were deceptive and did not accurately reflect the hospital quality and patient safety at Plaintiff.

Interrogatory No. 8: Identify any and all persons, whether internal or external (e.g., patients, vendors, affiliates, parents, agents, partners, media) with whom You communicated in any way with respect to the Safety Grade or the Hospital Survey. In so answering, state the date of the communication, the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.) and the content of the communication.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of "any and all persons, whether internal or external." Plaintiff will disclose the categories of individuals with whom Plaintiff communicated about the Safety Grade or Hospital Survey during the Relevant Time Period. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that Health Insurance Portability and Accountability Act ("HIPAA"), among other statutes and regulations, bars Plaintiff from disclosing. Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff's governing board, its medical executive committee, department directors, and physicians and nurses when

asked about the Safety Grade or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grade for Plaintiff's hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG's release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and since then, has engaged in various social networking and other marketing campaigns to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of the network.

Amended Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff's governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff's hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG's release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of

the network. Plaintiff also engaged in email discussions about TLG's misleading grades, either as sender or recipient, which TLG has through Plaintiff's production of documents.

Interrogatory No. 9: Describe all instances in which a third party declined to contract with, refer patients to, or work with Your hospital, where Leapfrog's grade was cited or discussed. In so identifying list the name of the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.), the date of the communication and the content of the communication.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it requires Plaintiff to "[d]escribe all instances" in which a third party took an action in response to TLG's deceptive grade.

Answer: Subject to the foregoing objection, Plaintiff is not aware of any responsive instances.

Amended Answer:

Subject to the forgoing objection, by way of example, medical professionals have expressed concern about working with the Medical Center due to the grade TLG assigned it.

Interrogatory No. 10: Describe with specificity the basis for each and every category of damage You claim You incurred as a result of the Leapfrog Safety Grade. In so identifying, list each category of damages and the dollar value of each category of damage You claim.

Plaintiff objects to this Interrogatory to the extent it seeks information that is the subject of expert testimony.

Answer: Plaintiff will submit expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Amended Answer: Plaintiff has served the expert report of Thomas Chakurda, which addresses the issue of reputational harm and harm to Plaintiff's goodwill. Plaintiff further objects

to this Interrogatory as overbroad and unduly burdensome to the extent it seeks “each and every” category of claimed damages.

Subject to the foregoing objections and as agreed during the parties’ September 3, 2025 meet and confer, Plaintiff will limit its response to the live non-monetary claims, including injunctive and declaratory relief, to remedy harm to Plaintiff’s reputation and goodwill. Plaintiff’s reputation and goodwill has been damaged by TLG’s false and misleading methodology and resulting Safety Grades. Plaintiff’s claim for reputational harm is based on, among other things, concerns raised by patients, doctors, staff, and community members, as well as false and misleading statements based on TLG’s false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

By way of example, our Medical Executive Committee has received direct inquiries from patients regarding their concerns as to TLG’s grades and related public reports. Patients have told physicians that they do not want to go to the Medical Center for surgeries after seeing TLG’s grade and associated press reports. Medical professionals have expressed concern about working with the Medical Center due to the grade TLG assigned it. Further, we have received reports from patients and doctors that patients have planned to drive past the Medical Center to a farther away medical facility due to the grade assigned by TLG to the Medical Center. Community members have given negative feedback related to the rating. The harm caused by TLG’s false and misleading Safety Grade is ongoing.

Interrogatory No. 11: Identify all adverse patient events which occurred at Your hospital, including any citations received from regulatory agencies, accrediting agencies, and third party payors such as The Joint Commission, CMS, state health departments, etc. during the period covered by each Leapfrog Safety Grade publication of which You complain (i.e., Fall 2024, Fall 2025, etc.), as well as any complaints received from patients regarding the same.

Plaintiff objects to this Interrogatory because it is overly broad, unduly burdensome, seeks discovery of information that is irrelevant to the claims and defenses in this Action, seeks information that is beyond the scope of Leapfrog's Hospital Survey, and is not reasonably calculated to lead to the discovery of admissible evidence. TLG does not include "all adverse patient events," "citations received from" agencies or payors, or "complaints received from patients" in TLG's determination of its Hospital Safety Grades or request such information in the Hospital Survey, so any such information is irrelevant to whether TLG's actions constitute unfair or deceptive trade practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that HIPAA, among other statutes and regulations, bars Plaintiff from disclosing.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Defendant has agreed to withdraw this Interrogatory.

Interrogatory No. 12: Describe in detail how Your hospital compares nationally on on [sic] any other ranking of patient safety performance, including but not limited to Vizient, Inc., Premier, Inc., HealthTrust Purchasing Group, The Joint Commission, HealthGrades, US News, Newsweek, Statista, Definitive Healthcare, or any other quality benchmarking entity including benchmarking on patient safety including on adverse events and on healthcare-acquired infections.

Plaintiff objects to this Interrogatory's request that Plaintiff "[d]escribe in detail how Your hospital compares nationally" based on undisclosed "benchmarking" as vague and confusing. To the extent this Interrogatory seeks the top-line rankings of the identified organizations, Plaintiff objects to this Interrogatory because such information is publicly and equally available to TLG. To the extent this Interrogatory asks Plaintiff to compare itself to the named and unnamed entities, that request is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is

irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Other organizations' rankings have nothing to do with the claims and defenses in this case related to the Deceptive Score Categories or TLG's decision to use deceptive business practices.

Answer: Subject to the foregoing objections, Plaintiff has received numerous awards and accolades. For example, Plaintiff was awarded the Resuscitation Center of Excellence award for 2025, becoming the first hospital in Palm Beach County to be named a Florida Resuscitation Center of Excellence. To do so, Plaintiff met approximately 15 criteria for patient care that were established by the Florida Resuscitation Center Committee, including intensive neurological monitoring, strong collaboration with Emergency Medical Services partners, and community outreach programs to promote health and lifestyle modifications to decrease the prevalence of cardiac disease. Additionally, the American College of Surgeons awarded Plaintiff the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program ("MBSAQIP") Surgery Center of Excellence award, which is dedicated to enhancing the safety and quality of care for bariatric patients in the United States and Canada. MBSAQIP accreditation promotes uniform standards and continuous quality improvement.

Plaintiff also earned DNV GL Comprehensive Stroke certification, which means Plaintiff gives the highest quality of care to most complete patient cases and offers evidence-based treatments with cutting-edge research protocols. Additionally, Plaintiff earned the VQI (Vascular Quality Initiative) Carotid Care Champion this year, which honors participants that are dedicated to improving the safety and effectiveness of vascular care. Plaintiff is also accredited by the Joint Commission, the nation's largest hospital accreditor that evaluates hospitals' quality performance standards through an objective evaluation process. Plaintiff also earned a Certification for the

American Association of Cardiovascular and Pulmonary Rehabilitation Program. This accreditation is peer-reviewed and designed to review individual facilities.

The American Heart Association honored Plaintiff with “Get with the Guidelines” Gold Plus awards in three specializations. First, Plaintiff earned the Target Stroke Honor Roll Elite, meaning Plaintiff is able to achieve door-to-needle times of within 60 minutes for at least 85% of applicable patients. Second, Plaintiff earned the Target Stroke Honor Roll Advanced Therapy, meaning that 50% of applicable patients are able to achieve door-to-device times of 90 minutes or less in the case of directly arriving patients, and 60 minutes or less for transfer patients. Third, Plaintiff earned the Target Type II Diabetes Honor Roll, meaning that Plaintiff met numerous requirements, including qualifying for a Silver level or higher Achievement Award in the “Get with the Guidelines-Heart Failure, Stroke, and/or Coronary Artery Disease” modules. The entities that award and assign these accreditations and certifications visit the healthcare facility and perform regular periodic in-person reviews, audits, surveys, and assessments of the facility.

In 2025, the medical ranking organization Healthgrades named Plaintiff one of the top 250 hospitals in the country. To assess and evaluate hospitals, Healthgrades relies on data from Medicare medical claims records and states’ data on Medicare and commercially insured patient outcomes to determine patients’ actual clinical outcomes when visiting a given hospital. Healthgrades also assigned Plaintiff the following awards:

a. Cardiac Care

- i. Five-Star Recipient for Valve Surgery (2024-2025, two years in a row)
- ii. Five-Star Recipient for Treatment of Heart Attack (2024-2025, two years in a row)

- iii. Five-Star Recipient for Treatment of Heart Failure (2003-2025, 23 years in a row)
- iv. Five-Star Recipient for Defibrillator Procedures (2024-2025, two years in a row)
- v. Five-Star Recipient for Treatment of Stroke (2008-2025, 18 years in a row)
- vi. Five-Star Recipient for Coronary Interventional Procedures (2024)

b. Pulmonary Care

- i. One of Healthgrades America's 100 Best Hospitals for Pulmonary Care in 2025
- ii. Recipient of the Healthgrades 2025 Pulmonary Care Excellence Award
- iii. Top 5% in the Nation for Overall Pulmonary Services (2025)
- iv. Top 10% in the Nation for Overall Pulmonary Services (2025)
- v. Five-Star Recipient for Treatment of Pneumonia (2024-2025, two years in a row)

c. Critical Care

- i. Recipient of the Healthgrades 2025 Critical Care Excellence Award
- ii. Top 5% in the Nation for Critical Care (2025)
- iii. Top 10% in the Nation for Critical Care (2025)
- iv. Five-Star Recipient for Treatment of Sepsis (2004-2025, 22 years in a row)
- v. Five-Star Recipient for Treatment of Respiratory Failure (2023-2025, three years in a row)

d. Gastrointestinal

- i. Five-Star Recipient for Upper Gastrointestinal Surgery (2022-2024, three years in a row)
- ii. Five-Star Recipient for Small Intestine Surgeries (2017-2021 (five years in a row), 2024)

e. Neurosurgery

- i. Five-Star Recipient for Cranial Neurosurgery (2024)

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Amended Answer: Subject to the foregoing objections, Plaintiff has received numerous awards and accolades. For example, Plaintiff was awarded the Resuscitation Center of Excellence award for 2025, becoming the first hospital in Palm Beach County to be named a Florida Resuscitation Center of Excellence. Additionally, the American College of Surgeons awarded Plaintiff the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program ("MBSAQIP") Surgery Center of Excellence award, which is dedicated to enhancing the safety and quality of care for bariatric patients in the United States and Canada.

Plaintiff also earned DNV GL Comprehensive Stroke certification. Additionally, Plaintiff earned the VQI (Vascular Quality Initiative) Carotid Care Champion this year, which honors participants that are dedicated to improving the safety and effectiveness of vascular care. Plaintiff is also accredited by the Joint Commission, the nation's largest hospital accreditor that evaluates hospitals' quality performance standards through an objective evaluation process. Plaintiff also earned a Certification for the American Association of Cardiovascular and Pulmonary Rehabilitation Program.

The American Heart Association honored Plaintiff with “Get with the Guidelines” Gold Plus awards in three specializations: Target Stroke Honor Roll Elite, Target Stroke Honor Roll Advanced Therapy, and Target Type II Diabetes Honor Roll.

In 2025, the medical ranking organization Healthgrades named Plaintiff one of the top 250 hospitals in the country. Healthgrades also assigned Plaintiff the following awards:

a. Cardiac Care

- i. Five-Star Recipient for Valve Surgery (2024-2025, two years in a row)
- ii. Five-Star Recipient for Treatment of Heart Attack (2024-2025, two years in a row)
- iii. Five-Star Recipient for Treatment of Heart Failure (2003-2025, 23 years in a row)
- iv. Five-Star Recipient for Defibrillator Procedures (2024-2025, two years in a row)
- v. Five-Star Recipient for Treatment of Stroke (2008-2025, 18 years in a row)
- vi. Five-Star Recipient for Coronary Interventional Procedures (2024)

b. Pulmonary Care

- i. One of Healthgrades America’s 100 Best Hospitals for Pulmonary Care in 2025
- ii. Recipient of the Healthgrades 2025 Pulmonary Care Excellence Award
- iii. Top 5% in the Nation for Overall Pulmonary Services (2025)
- iv. Top 10% in the Nation for Overall Pulmonary Services (2025)

- v. Five-Star Recipient for Treatment of Pneumonia (2024-2025, two years in a row)

c. Critical Care

- i. Recipient of the Healthgrades 2025 Critical Care Excellence Award
- ii. Top 5% in the Nation for Critical Care (2025)
- iii. Top 10% in the Nation for Critical Care (2025)
- iv. Five-Star Recipient for Treatment of Sepsis (2004-2025, 22 years in a row)
- v. Five-Star Recipient for Treatment of Respiratory Failure (2023-2025, three years in a row)

d. Gastrointestinal

- i. Five-Star Recipient for Upper Gastrointestinal Surgery (2022-2024, three years in a row)
- ii. Five-Star Recipient for Small Intestine Surgeries (2017-2021 (five years in a row), 2024)

e. Neurosurgery

- i. Five-Star Recipient for Cranial Neurosurgery (2024)

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Also, Plaintiff does not participate in Vizient and has not done so during the Relevant Time Period.

Interrogatory No. 13: Describe any steps taken by Your hospital to improve any and all of the patient safety measures considered by Leapfrog's Hospital Safety Grade (as set forth on Leapfrog's

published scoring methodology documents; see ECF No. 21-3 at 6-10; ECF No. 21-43 at 6-9), before and after each Safety Grade publication of which You complain.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of Plaintiff's improvements to "any and all" patient safety measures considered by Leapfrog's Hospital Safety Grade. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks information on metrics other than TLG's Deceptive Score Categories and to the extent it seeks information that is beyond the scope of Leapfrog's Hospital Survey.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff is committed to continual improvement of patient safety measures, motivated by our commitment to ensuring the best possible patient safety—not chasing the best possible Leapfrog grade. To achieve this core objective, Plaintiff devotes significant time and resources to improving its delivery of the highest possible quality of care for those in the community it serves, including efforts to improve its performance in areas related to the four metrics Plaintiff has chosen to impute in its survey.

Hand hygiene is reviewed at Plaintiff's monthly quality meeting by unit and by discipline. BCMA by unit is reviewed monthly by Plaintiffs' Chief Nursing Officer, and CPOE compliance is reviewed monthly through its hospitalists meetings, ensuring that providers are meeting metric.

ICU staffing is not something that needs to be monitored ongoing because Plaintiff has ICU coverage onsite 24/7 for regular critical care patients and trauma critical care patients.

Interrogatory No. 14: State whether You are aware of specific patients who have relied on the Leapfrog Safety Grade in declining to receive healthcare services at Your hospital. In so answering, identify the individual patient that declined to receive services, the date of such declination, the type of service the patient declined to receive, the medium for the communication from the patient (i.e. telephone, video conference, email, letter, etc.), the content of the communication, and the reason given for the stated decision.

Plaintiff objects to this Interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to a Qualified Protective Order entered by this Court.

Answer: Subject to the foregoing objection, Plaintiff has received reports that patients considered or decided not to use Plaintiff's facility because of TLG's misleading grades.

Amended Answer: Subject to the foregoing objection, since the release of TLG's false and misleading grades, Plaintiff has received numerous reports from doctors that patients considered or decided not to use Plaintiff's facility due to concerns related to TLG's misleading grades.

Interrogatory No. 15: Describe any effort Your hospital has made to influence public perception of Your hospital's performance on patient safety following the publication of the Leapfrog Safety Grade.

Plaintiff objects to this Interrogatory as vague and ambiguous because it does not specify which Leapfrog Safety Grade is at issue. Plaintiff will construe this Interrogatory to reference TLG's deceptive Safety Grades beginning in Fall 2024. Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks "any effort" Plaintiff "has made to influence public perception" after the release of TLG's deceptive and unfair Safety Grades because there have been many such "efforts" and those

“efforts” are ongoing given the significant harm caused by TLG’s deceptive and unfair business practices.

Answer: Subject to the foregoing objections, Plaintiff continues to influence public perception by, among other things, delivering the highest quality care to the community it serves, which, as discussed in response to Interrogatory 12, has led to numerous awards, accreditations, and accolades. In addition, several public statements disputing the misleading nature of the Safety Grade have been made on Plaintiff’s behalf.

Supplemental Answer: In addition to the above, members of hospital leadership have communicated with patients, doctors, or community members on a regular basis to dispel the misleading nature of the Leapfrog Safety Grades. For instance, Plaintiff communicated its governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff’s hospital. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG’s deceptive scores on behalf of Plaintiff and other affected members of the network. Plaintiff also engaged in email discussions about TLG’s misleading grades, either as sender or recipient, which TLG has through Plaintiff’s production of documents.

Interrogatory No. 16: Describe the due diligence Your hospital undertakes to ensure the accuracy of its own publicly reported safety data (including but not limited to data submitted to CMS, the CDC, and third party organizations).

Plaintiff objects to this Interrogatory as vague and ambiguous due to its use of the undefined term “due diligence.” Plaintiff further objects to this Interrogatory because it seeks

discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Any “due diligence” Plaintiff performs when reporting to *third parties* has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices, especially when TLG does nothing to ensure the accuracy of information that hospitals that participate in its survey self-report.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff makes reasonable efforts to ensure the accuracy of the data it reports to third-party organizations. For instance, Plaintiff employs data abstractors, quality coordinators and a Quality Director, who are all responsible for abstracting, validating, and submitting safety data.

Interrogatory No. 17: Describe in detail how You communicate to the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System the outcome of any and all healthcare safety ratings, evaluative publications, studies, or performance analyses that Your Hospital receives.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff’s communication, if any, with the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System, all non-parties to this litigation, has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff communicates with Tenet stakeholders, including employees who work to support the Palm Beach Health Network, on a range of matters, including issues related to patient safety and outcomes and in particular related to TLG and the Safety Grades by email and oral communication. Those communications included discussions about the reasons for particular grades, the method used to calculate Safety Grades, the value of Safety Grades, and responses to the Safety Grades. In addition, identified below are documents Plaintiff produced evidencing communications between the Plaintiff and Tenet related to TLG, the Leapfrog survey, and Safety Grades.

PBHN000006465	PBHN000006466

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 18: State whether the compensation of Your Chief Executive Officer or any other executive-level leadership officers is tied to or related in any way to Your hospital's

performance on patient safety, union worker contracts or Your hospital's ratings by third party ratings organizations' ratings publications (including but not limited to the Leapfrog Hospital Safety Grade).

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's method of compensating its Chief Executive Officer and other executive-level leadership **has nothing to do with the** claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff's performance on patient safety, union worker contracts, or ratings by third party ratings organizations' ratings publications is related in some way to the compensation of Plaintiff's Chief Executive Officer or other executive-level leadership officer(s).

Interrogatory No. 19: Identify all hospitals, medical centers, or healthcare systems that you consider to be your direct competitors within the relevant geographic market during the time period covered by the Complaint and describe in detail the criteria you use to determine whether another hospital or healthcare provider is a competitor.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. The identity of Plaintiff's competitors and "the criteria" used to determine whether a hospital or provide is a competitor has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff

also objects to this Interrogatory to the extent it seeks confidential, proprietary information, and commercially sensitive information related to Plaintiff's scoring system and "criteria" used to determine whether a hospital or provide is a competitor.

Subject to the foregoing objections and on condition that this response is considered "Confidential" under the forthcoming agreed confidentiality order, Bethesda Hospital East, Bethesda Hospital West, Boca Raton Regional Hospital, and HCA Florida JFK Hospital are Plaintiff's competitors. Plaintiff considers these hospitals competitors because of their proximity to Plaintiff, their competing services lines, and that patients within Plaintiff's service area go to these hospitals for medical care.

Interrogatory No. 20: State and describe the results of any market analysis, competitive analysis, or consumer perception surveys you have conducted or commissioned regarding your competitors from 2020 to present, and identify the individuals or entities that prepared or participated in such analyses.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not is not proportional to the needs of this Action. The results of any market analysis, competitive analysis, or consumer perception surveys and the identity of those who prepared or participated in such analyses has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Plaintiff further objects to this Interrogatory to the extent it requests information from outside of the relevant time period of January 1, 2023, to present. Plaintiff also

objects to this Interrogatory as unduly burdensome to the extent it asks Plaintiff to “state and describe” various market analysis.

As agreed during the parties’ meet and confer on September 3, 2025, Plaintiff will produce documents showing the results of studies or surveys Plaintiff has conducted or commissioned related to internal market analysis, competitive analysis, or consumer perception. Plaintiff will identify the documents responsive to this Interrogatory by Bates number in Plaintiffs’ production cover letter.

Interrogatory No. 21: Identify with specificity any comments or concerns raised by any third party payor, bank or lender, or investor related to Your hospital’s reputation and/or public perception on issues in any way involving patient safety or satisfaction.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this case to the extent it seeks “comments and concerns” from third parties related generally to Plaintiff’s reputation that has nothing to do with the specific and significant reputational harm caused by TLG’s misleading grades.

Answer: Subject to the foregoing objections, Plaintiff will produce and identify documents related to the significant reputational harm caused by TLG’s deceptive and unfair Safety Grades that provide sufficient detail to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff is unaware of any documents related to this Interrogatory.

Interrogatory No. 22: Identify and describe any complaints, concerns, or comments from patients, community members, or referring physicians that relate to the hospital’s reputation or comparisons to other hospitals in the region.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this Action to the extent it seeks “comments and concerns” from patients, community members, or referring physicians that have nothing to do with the significant reputational harm caused by TLG’s misleading grades. Plaintiff also objects to this interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff’s facility because of TLG’s misleading grades.

Amended Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff’s facility because of TLG’s misleading grades. In addition, concerns have been raised by patients, doctors, staff, and community members, and Plaintiff is aware of false and misleading statements based on TLG’s false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

Our Medical Executive Committee has received direct inquiries from patients regarding their concerns as to TLG’s grades and related public reports. Patients have told physicians that they do not want to go to the Medical Center for surgeries after seeing TLG’s grade and associated press reports. Medical professionals have expressed concern about working with the Medical Center due to the grade TLG assigned it. Further, we have received reports from patients and

doctors that patients have planned to drive past the Medical Center to a farther away medical facility due to the grade assigned by TLG to the Medical Center. Community members have given negative feedback related to the rating. The harm caused by TLG's false and misleading Safety Grade is ongoing.

In addition, the following produced documents evidence such harm.

Start Page	End Page
PBHN000006771	PBHN000006773
PBHN000002082	PBHN000002085

PBHN000008914	PBHN000008914
PBHN000008915	PBHN000008915

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 23: List with specific detail each and every concern, complaint or comment made by any union, collective bargaining unit or employee association in any way related to patient safety at Your hospital.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks "each and every concern, complaint or comment " from third parties that have

nothing to do with the significant reputational harm caused by TLG's misleading grades. Plaintiff also objects to this Interrogatory to the extent it seeks health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Subject to the foregoing objections, there is no union, collective bargaining unit, or employee association at Plaintiff.

Interrogatory No. 24: Identify any and all criticism You have received since 2020 from Tenet Healthcare Corporation and/or from any individual executive of Tenet Healthcare Corporation regarding Your hospital's performance in any way.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. Any so-called "criticism" has nothing to do with the claims and defenses related to TLG's decision to use deceptive business practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: As discussed during the parties' meet and confer on September 3, 2025, TLG agreed to narrow this Interrogatory to concern only "criticism...regarding Your hospital's patient safety." After a reasonable and diligent search, Plaintiff is unaware of having received "criticism" from Tenet Health Corporation regarding patient safety. Plaintiff is always working to improve its performance, quality, and safety in a constructive way and engages with Tenet Health Corporation as needed to ensure Plaintiff provides the best patient care possible.

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**AFFIDAVIT OF HEATHER HAVERICAK IN SUPPORT OF
PLAINTIFF DELRAY MEDICAL CENTER, INC.'S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP'S FIRST SET OF
INTERROGATORIES TO DELRAY MEDICAL CENTER**

I, Heather Havericak, declare as follows:

1. I am over 21 years of age and competent to give this testimony.
2. I am the Chief Executive Officer of Delray Medical Center, Inc. ("Plaintiff"). I am the corporate representative of Plaintiff for the purpose of answering Defendant The Leapfrog Group's First Set of Interrogatories to Delray Medical Center. I have read the foregoing interrogatories and the answers to those interrogatories, which are true according to the best of my knowledge, information, and belief.
3. I declare under penalty of perjury that the foregoing is true and correct.

Executed on September 8, 2025.

Heather Havericak

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**PLAINTIFF GOOD SAMARITAN MEDICAL CENTER, INC.’S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP’S FIRST SET OF
INTERROGATORIES TO GOOD SAMARITAN MEDICAL CENTER, INC.**

Pursuant to Federal Rules of Civil Procedure 26 and 33 and the *Pretrial Scheduling Order and Order Referring Case to Mediation* (ECF No. 36) (the “Pretrial Scheduling Order”), Plaintiff Good Samaritan Medical Center, Inc. (“Plaintiff” or “Good Samaritan”), by and through its undersigned counsel, hereby submit its amended and supplemented responses and objections (“Responses”), to Defendant The Leapfrog Group’s (“TLG”) First Set of Interrogatories, dated July 11, 2025 (the “Interrogatories” and each numbered interrogatory, an “Interrogatory”) in the above-captioned action (the “Action”).

Plaintiff’s Responses to the Interrogatories are made solely for purposes of this Action and to the best of Plaintiff’s present knowledge, information, and belief regarding the matters about which inquiry have been made. Discovery is ongoing, and Plaintiff reserves the right to amend, supplement, clarify, or further explain its Responses at any time prior to the trial in

this Action. Plaintiff further reserves the right to raise any additional objections deemed necessary or appropriate in light of any further review.

OBJECTIONS TO INSTRUCTIONS AND DEFINITIONS

1. Plaintiff objects to the definition of terms “Plaintiffs” and “Plaintiff Hospitals” as overbroad, unduly burdensome, and not proportional to the needs of the case to the extent it seeks to require Plaintiffs to respond on behalf of entities or individuals other than themselves.

2. Plaintiff objects to the definition of the terms “Good Samaritan”, “GSMC” “Plaintiff,” “You,” and “Your” to the extent each term seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

3. Plaintiff objects to the definition of the terms “Tenet Healthcare” and “Tenet” to the extent it seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of Tenet, Tenet’s agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

4. Plaintiff objects to the definition of “identify, when referring to a person,” as overbroad and unduly burdensome to the extent it calls for the “address” and “present or last-known employer” of identified individuals. Such information is overbroad and beyond the scope of permissible discovery.

5. Plaintiff objects to the instruction that the relevant time period for the Interrogatories begins on January 1, 2020. Plaintiff will apply to each Interrogatory the time period

of November 1, 2023 to present (the “Relevant Time Period”). Any response to an Interrogatory that provides information that falls outside of the Relevant Time Period should not be construed as an admission that the Relevant Time Period begins prior to November 1, 2023.

SPECIFIC RESPONSES TO INTERROGATORIES

Interrogatory No. 1: State the full name, address, job title or position, and hospital or employer affiliation of all individuals that assisted with responding to these interrogatories.

Answer: The following individuals assisted with responding to these Interrogatories.

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Sheri Montgomery	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Chief Executive Officer	Good Samaritan Medical Center
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

Interrogatory No. 2: Identify every individual not identified in Your Rule 26(a) initial disclosures with knowledge of facts pertaining to the allegations in Your Complaint in this Lawsuit (and any subsequent amendments) and/or whom You believe may have discoverable knowledge, information or data regarding this matter, including those who You expect to call as a fact or opinion witness at any hearing in this proceeding or whose testimony (by affidavit, deposition or testimony) You intended to submit in connection with this proceeding, and the substance of his/her testimony or affidavit, and, with respect to each person identified, provide:

- A. full name,
- B. address,
- C. telephone number,
- D. job title or position,
- E. hospital or employer affiliation,
- F. and describe in detail the facts possessed by each such person.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of “every individual...with knowledge” or who “may have discoverable knowledge, information or data regarding this matter.” Plaintiff will not provide more than the identity of individuals most likely to have knowledge regarding this matter. Plaintiff further objects to this Interrogatory as premature because it requests disclosure of Plaintiff’s witnesses for hearings and the substance of witness testimony before such disclosure is required under applicable law or the Pretrial Scheduling Order. Plaintiff will submit its trial witness list on October 2, 2025, per the Pretrial Scheduling Order, and disclose any other witnesses and witness testimony as further ordered by the Court or otherwise required by applicable law. Plaintiff also objects to this Interrogatory’s request for the identity of “opinion witness[es]” as vague, since witnesses are either “fact” or “expert” witnesses. Plaintiff will interpret “opinion witness” to mean “expert witness.” Plaintiff submitted expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Answer: Subject to the foregoing objection, Plaintiff will amend its Rule 26(a)(1) Initial Disclosures to identify additional individuals who may have knowledge of facts pertaining to the allegations in the Complaint.

Amended Answer: In addition to those disclosed in Plaintiff’s supplemental disclosures, the following individuals may have relevant factual knowledge:

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Erin Britt	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Quality Director	Good Samaritan Medical Center

In addition to the individuals identified above, persons identified in documents produced in this dispute have knowledge of facts pertaining to the allegations in the Amended Complaint. *See* Fed. R. Civ. P. 33(d). Discovery is ongoing, and Plaintiff reserves the right to supplement, amend, correct, clarify, or modify this Response as further information becomes available.

Interrogatory No. 3: Describe in detail all factual bases for Your contention that Leapfrog’s published Safety Grade for Your hospital was false, inaccurate, misleading, deceptive, or unfair. In so answering, identify with particularity each measure, data point, or metric that You contend was inaccurately reported, calculated, or misrepresented by Leapfrog in calculating the Safety Grade for Your hospital.

Answer: Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all factual bases” for Plaintiff’s contention. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’ facts or witnesses that support an opposing party’s case” to be “unduly broad”) (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory as premature to the extent it requests that Plaintiff “[d]escribe in detail all factual bases” to support its contention. *In re Reliance Fin. & Inv. Grp., Inc.*, 2006 WL 8435541, at *4 (S.D. Fla. Feb. 14, 2006) (Contention interrogatories “are more appropriately used after a substantial amount of discovery has been conducted--typically, at the end of the discovery period.”). Plaintiff also objects to this Interrogatory to the extent it attempts to limit or mischaracterize Plaintiff’s claim as just

challenging the false, inaccurate, misleading, deceptive, or unfair nature of TLG's Safety Grade. As the Court explained in its order denying TLG's motion to dismiss, the core of the Complaint is "a challenge to Defendant's representations about its methodology, which they claim mislead consumers by failing to distinguish between absent data and damning data, and professing that grades are not influenced by a hospital's lack of survey participation." *Order on Motion to Dismiss* 6 (ECF No. 41). Plaintiff also challenges the provably false facts and deceptive scoring system underlying these grades, which TLG admits it relies on to arrive at its deceptive Safety Grades.

Subject to the foregoing objections and as more fully stated in the *Amended Complaint* (ECF No. 74) ("Complaint"), TLG has engaged in deceptive and unfair business practices and misrepresentations when issuing the Safety Grade for Plaintiff's hospital as part of TLG's annual "Hospital Survey." TLG posts these Safety Grades online at hospitalsafetygrade.org.

To arrive at these Safety Grades, TLG uses CMS data, survey responses from participating hospitals, and other supplemental data sources. For participating hospitals, TLG uses the hospitals' self-reported responses to the Hospital Survey for 12 of the 22 measures. For non-participating hospitals, TLG uses other sources for those 12 measures. For the remaining four measures—Computerized Physician Order Entry, Bar Code Medication Administration, ICU Physician Staffing, and Hand Hygiene Score (the "Deceptive Score Categories")—TLG devised and uses a so-called "imputation model." Prior to Fall 2024, TLG's imputation model assigned non-participating hospitals a score based on the average score applicable to a similarly situated hospital. Beginning in Fall 2024, TLG modified its imputation model. TLG now assigns the lowest possible score to non-participating hospitals, which has the effect of punishing non-participating hospitals and artificially deflating their Safety Grades. TLG has even admitted the changes in Fall 2024 were designed to penalize non-participating hospitals. TLG also misleads consumers about how

it grades hospitals, stating “[t]he Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the [TLG] Hospital Survey.” *Declaration of Lee Crain* (ECF No. 21) (“Crain Decl.”), Ex. 1 at 4 (“Frequently Asked Questions About the Leapfrog Hospital Safety Grade”).

As TLG explains, “not all hospitals have enough data publicly available to be eligible for a grade.” Crain Decl. Ex. 1 at 5. “As per the National Expert Panel guidance, [TLG] has requirements for the minimum amount of data [it] need[s] to issue an accurate grade.” Crain Decl. Ex. 1 at 5. According to TLG, “[h]ospitals missing more than six process measures” are “not graded.” Crain Decl. Ex. 2 at 6. Non-participating hospitals should fall easily into that “not graded” bucket, because their decision not to participate in TLG’s survey necessarily means TLG is missing seven process measures that rely on voluntary submission of hospital data.¹

TLG then deceptively conceals how it makes up grades for the four “imputation” measures and even suggests on its website that TLG *does* have data sufficient to score TLG on those four measures. By way of example, TLG acknowledges that Plaintiff “Declined to Report” information in response to questions about “Staff work[ing] together,” but then tells consumers—as if it were a fact—that Plaintiff is “Worse Than Average” on “Handwashing,” “Communication,” “medication administration,” and the like—even though TLG has no basis whatsoever to adopt those conclusions. Crain Decl. Ex. 32 at 2. TLG itself says handwashing is among the “most important” measures in its survey, Crain Decl. Ex. 15 at 4, yet it deceptively conceals that it has no data with which to grade the Plaintiff hospital on that measure. *Defendant The Leapfrog Group’s Responses to Plaintiffs’ Requests for Production* at 7 (“Leapfrog is not itself in possession

¹ Those seven include CPOE, BCMA, IPS, Safe Practice 1: Culture of Leadership Structures and Systems; Safe Practice 2: Culture Measurement, Feedback & Intervention; Total Nursing Care Hours per Patient Day; and Hand Hygiene.

of data showing Plaintiffs' performance on the 'imputed metrics' considered by the methodology.")). Of course, Plaintiff in fact has a comprehensive and thorough handwashing policy. And had Plaintiff merely filled out TLG's survey, it would have received a full letter grade higher on TLG's score. *Expert Report of Professor Sean Nicholson* (Aug. 7, 2025), Ex. 6.

Based on the foregoing, and as more fully set forth in the Complaint, TLG engages in deceptive trade practices by, among other things, deceiving consumers about its grading methods by implying that Plaintiff has failed on certain measures that, in truth, TLG has no data or other basis to evaluate; deceiving consumers by telling them the Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the Hospital Survey; deceiving consumers when it represents that it does not grade hospitals if it lacks sufficient data, when, in truth, it does grade hospitals by "imputing" or making up a grade for the Deceptive Score Categories; hiding the truth about its "imputation model" from consumers by burying it in fine print on a separate website; punishing non-participating hospitals by "imputing" scores, which artificially deflate a hospital's Safety Grade; and favoring participating hospitals. Additional factual bases for the Plaintiff's claims are presented in the Complaint.

Interrogatory No. 4: Describe the scoring or grading methodology You believe Leapfrog should have used to assess Your hospital's patient safety performance and explain why that method would yield a different result.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's provision of an alternative scoring or grading methodology has nothing to do with the claims and defenses in this case related to TLG's

decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it calls for speculation.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff responds that TLG should use a scoring system that is not unfair or deceptive. By way of example only, TLG could decline to grade hospitals that do not participate in TLG's survey, because their decision not to participate means TLG is missing seven process measures that rely on voluntary submission of hospital data. This would yield a different result, because the hospitals would not receive a grade at all. TLG's methodology certainly should not affirmatively assign an arbitrary low score to a particular metric just because a hospital does not provide data for that metric.

Interrogatory No. 5: State whether You submitted any data, corrections, or appeals to Leapfrog regarding the Safety Grade Your hospital received, and for each such submission, identify the date of the submission, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the submission, and the content of the submission.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted "any data, corrections, or appeals to Leapfrog regarding the Safety Grade" Plaintiff hospital received has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG's possession, custody and control, or equally available to TLG.

Answer: Subject to the foregoing objections, Plaintiff engaged in correspondence prior to the commencement of this case demanding that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, but at every turn TLG refused.

Amended Answer: Subject to the foregoing objections, Plaintiff did not submit any data, corrections or appeals to Leapfrog regarding the Safety Grades it has received.

Interrogatory No. 6: State whether You provided any comment or input in any form during Leapfrog's requests for public comments for planned updates to the Leapfrog Hospital Safety Grade methodology that was proposed for the calculation of Hospital Safety Grades (including but not limited to for the Fall 2024 methodology update). If yes, please identify the date of the comment, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the comment and the content of the comment. If no, please state the reason why You chose not to comment.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted "any comment or input" in response to TLG's request for public comments has nothing to do with claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG's possession, custody and control, or equally available to TLG.

Subject to the foregoing objections, Plaintiff did not provide comments in response to Leapfrog's requests for public comments for planned updates to the Leapfrog Hospital Safety Grade scoring system because Plaintiff generally does not respond to requests for public comment from private entities like TLG.

Interrogatory No. 7: Describe all actions Your hospital took in response to (or in deciding not to respond to) its Safety Grade or the Hospital Survey, including internal meetings, media statements, or public relations efforts. In so answering, state the date of the action, the individuals involved in the action and the content of the action.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all actions” Plaintiffs may have taken in response to TLG’s Safety Grades. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, No. 14-81476-CIV, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’ facts or witnesses that support an opposing party’s case” to be “unduly broad”) (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG’s deceptive and unfair Safety Grade. Plaintiff’s response included meeting internally with Plaintiff’s leadership team, medical executive committee, and governing board, corresponding with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action.

Amended Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG’s deceptive and unfair Safety Grades. Plaintiff’s response included meeting internally with Plaintiff’s leadership team, medical executive

committee, and governing board, corresponding through Plaintiff's corporate parent with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action. Plaintiff has also held many phone calls and meetings with physicians and other stakeholders about the TLG grades, explaining how the grades were deceptive and did not accurately reflect the hospital quality and patient safety at Plaintiff.

Interrogatory No. 8: Identify any and all persons, whether internal or external (e.g., patients, vendors, affiliates, parents, agents, partners, media) with whom You communicated in any way with respect to the Safety Grade or the Hospital Survey. In so answering, state the date of the communication, the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.) and the content of the communication.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of "any and all persons, whether internal or external." Plaintiff will disclose the categories of individuals with whom Plaintiff communicated about the Safety Grade or Hospital Survey during the Relevant Time Period. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that Health Insurance Portability and Accountability Act ("HIPAA"), among other statutes and regulations, bars Plaintiff from disclosing. Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff's governing board, its medical executive committee, department directors, and physicians and nurses when

asked about the Safety Grade or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grade for Plaintiff's hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG's release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and since then, has engaged in various social networking and other marketing campaigns to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of the network.

Amended Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff's governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff's hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG's release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of

the network. Plaintiff also engaged in email discussions about TLG's misleading grades, either as sender or recipient, which TLG has through Plaintiff's production of documents.

Interrogatory No. 9: Describe all instances in which a third party declined to contract with, refer patients to, or work with Your hospital, where Leapfrog's grade was cited or discussed. In so identifying list the name of the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.), the date of the communication and the content of the communication.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it requires Plaintiff to "[d]escribe all instances" in which a third party took an action in response to TLG's deceptive grade.

Answer: Subject to the foregoing objection, Plaintiff is not aware of any responsive instances.

Amended Answer: Subject to the forgoing objection, by way of example, our Chief Nursing Officer reported that a nursing candidate questioned the quality of care of the hospital in her interview for a job opening. In addition, the recently hired Director of Cardiac Cathater Lab shared with the Chief Operating Officer that he considered rescinding his acceptance of the position after learning that the hospital had received an F from TLG, but he was glad that he didn't do so because Good Samaritan is a high-quality hospital and he is happy to be part of the organization.

Interrogatory No. 10: Describe with specificity the basis for each and every category of damage You claim You incurred as a result of the Leapfrog Safety Grade. In so identifying, list each category of damages and the dollar value of each category of damage You claim.

Plaintiff objects to this Interrogatory to the extent it seeks information that is the subject of expert testimony.

Answer: Plaintiff will submit expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Amended Answer: Plaintiff has served the expert report of Thomas Chakurda, which addresses the issue of reputational harm and harm to Plaintiff's goodwill. Plaintiff further objects to this Interrogatory as overbroad and unduly burdensome to the extent it seeks "each and every" category of claimed damages.

Subject to the foregoing objections and as agreed during the parties' September 3, 2025 meet and confer, Plaintiff will limit its response to the live non-monetary claims, including injunctive and declaratory relief, to remedy harm to Plaintiff's reputation and goodwill. Plaintiff's reputation and goodwill has been damaged by TLG's false and misleading methodology and resulting Safety Grades. Plaintiff's claim for reputational harm is based on, among other things, concerns raised by patients, doctors, staff, and community members, as well as false and misleading statements based on TLG's false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

By way of example, our Medical Executive Committee has received direct inquiries from patients regarding their concerns as TLG's grades and related public reports. Our Chief Nursing Officer reported that a nursing candidate questioned the quality of care of the hospital in her interview for a job opening. Patients have asked independent physicians that use both our facilities and those of Jupiter Medical Center (a nearby hospital) to schedule their surgeries at Jupiter Medical Center and not at ours. Those patients chose not to use our hospital specifically because of the Leapfrog grades. These independent surgeons have told us that they believe TLG has misled these patients about the quality of the Medical Center. The harm caused by TLG's false and misleading Safety Grade is ongoing.

Interrogatory No. 11: Identify all adverse patient events which occurred at Your hospital, including any citations received from regulatory agencies, accrediting agencies, and third party payors such as The Joint Commission, CMS, state health departments, etc. during the period covered by each Leapfrog Safety Grade publication of which You complain (i.e., Fall 2024, Fall 2025, etc.), as well as any complaints received from patients regarding the same.

Plaintiff objects to this Interrogatory because it is overly broad, unduly burdensome, seeks discovery of information that is irrelevant to the claims and defenses in this Action, seeks information that is beyond the scope of Leapfrog's Hospital Survey, and is not reasonably calculated to lead to the discovery of admissible evidence. TLG does not include "all adverse patient events," "citations received from" agencies or payors, or "complaints received from patients" in TLG's determination of its Hospital Safety Grades or request such information in the Hospital Survey, so any such information is irrelevant to whether TLG's actions constitute unfair or deceptive trade practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that HIPAA, among other statutes and regulations, bars Plaintiff from disclosing.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Defendant has agreed to withdraw this Interrogatory.

Interrogatory No. 12: Describe in detail how Your hospital compares nationally on on [sic] any other ranking of patient safety performance, including but not limited to Vizient, Inc., Premier, Inc., HealthTrust Purchasing Group, The Joint Commission, HealthGrades, US News, Newsweek, Statista, Definitive Healthcare, or any other quality benchmarking entity including benchmarking on patient safety including on adverse events and on healthcare-acquired infections.

Plaintiff objects to this Interrogatory's request that Plaintiff "[d]escribe in detail how Your hospital compares nationally" based on undisclosed "benchmarking" as vague and confusing. To the extent this Interrogatory seeks the top-line rankings of the identified organizations, Plaintiff objects to this Interrogatory because such information is publicly and equally available to TLG.

To the extent this Interrogatory asks Plaintiff to compare itself to the named and unnamed entities, that request is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Other organizations' rankings have nothing to do with the claims and defenses in this case related to the Deceptive Score Categories or TLG's decision to use deceptive business practices.

Answer: Subject to the foregoing objections, Plaintiff has received numerous awards and accolades, including many that are directly relevant to patient care for the community we serve. As a full-service cancer hospital, it is important to Plaintiff that it is accredited by the Commission on Cancer (CoC). In order to be accredited, Plaintiff had to undergo an on-site visit on a triennial basis, in which a trained CoC reviewer visited Plaintiff and reviewed its required cancer program activity documentation to ensure compliance with the standards.

The American College of Surgeons has designated Plaintiff a National Accreditation Program for Breast Centers for 13 years in a row. The American College of Radiology designated Plaintiff a Breast Imaging Center of Excellence, which it received only after accomplishing the highest level of care in breast imaging, including being committed to patients, providers, and payers. Plaintiff has been accredited as a Comprehensive Center by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program, a joint Quality Program of the American College of Surgeons and the American Society for Metabolic and Bariatric Surgery.

Plaintiff is accredited by the Joint Commission, the nation's largest hospital accreditor that evaluates hospitals' quality performance standards through an objective evaluation process. Plaintiff has also been accredited by Joint Commission for specialization certifications for Gold

Seal of Approval for Total Hip and Knee Replacement, Shoulder Replacement and Spine Surgery—certification designed for hospitals providing the critical elements to achieve long-term success in improving critical medical outcomes—which signifies our services have delivered evidence-based proof of clinical quality sought by patients and payers alike. The entities that award and assign these accreditations and certifications visit the healthcare facility and perform regular periodic in-person reviews, audits surveys and assessments of the facility.

Plaintiff has also recently received the Florida Department of Health and Florida Agency for Health Care Administration Excellence for Maternal Care Award, which highlights hospitals that surpass Florida Department of Health’s goal of reducing the rate of C-sections among first-time mothers with low-risk pregnancies. Plaintiff was recognized by BlueCross BlueShield with a Blue Distinction Centers for Bariatric Surgery designation, as part of the Blue Distinction Specialty Care program, and for Knee and Hip Replacement. Plaintiff earned this recognition by providing a full range of bariatric surgical care services, including inpatient care, postoperative care, follow-up, and patient education that operate to standards set by BlueCross BlueShield, in partnership with physician experts and medical organizations. Aetna has also designated Plaintiff as an Aetna Institute of Quality orthopedic facility for total joint replacement and spine surgery, which it earned by consistently delivering safe and effective orthopedic care.

Healthgrades has awarded Plaintiff numerous Healthgrades accolades. To assess and evaluate hospitals, Healthgrades relies on data from Medicare medical claims records and states’ data on Medicare and commercially insured patient outcomes to determine patients’ actual clinical outcomes when visiting a given hospital. Plaintiff also received several awards from Healthgrades for various specialties, including:

a. Labor and Delivery

- i. Five-Star Recipient for C-Section Delivery for four years in a row (2022-2025)
- ii. Five-Star Recipient for Vaginal Delivery for 12 years in a row (2014-2025)

b. Outpatient Orthopedic

- i. Five-Star Recipient for Outpatient Back and Neck Surgery (except Spinal Fusion) (2025)
- ii. Recipient of the Healthgrades Outpatient Orthopedic Surgery Excellence Award (2025)

c. Spine Surgery

- i. Five-Star Recipient for Spinal Fusion
- ii. Recipient of the Healthgrades America's 100 Best Hospitals for Spine Surgery Award (2025)
- iii. Top 10% in the Nation for Spine Surgery (2025)
- iv. Recipient of the Healthgrades 2025 Spine Surgery Excellence Award

d. Gastrointestinal

- i. Five-Star Recipient for Treatment of Gastrointestinal Bleed (2024)

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Amended Answer: Subject to the foregoing objections, Plaintiff has received numerous awards and accolades. For example, Plaintiff has been accredited by the Commission on Cancer (CoC) for 31 years. The American College of Surgeons has designated Plaintiff a National

Accreditation Program for Breast Centers for 13 years in a row. The American College of Radiology designated Plaintiff a Breast Imaging Center of Excellence. Plaintiff has been accredited as a Comprehensive Center by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program, a joint Quality Program of the American College of Surgeons and the American Society for Metabolic and Bariatric Surgery. Plaintiff received the American Heart Association Stroke Gold Plus award for 2025.

Plaintiff is accredited by the Joint Commission. Plaintiff has also been accredited by Joint Commission for specialization certifications for Gold Seal of Approval for Total Hip and Knee Replacement, Shoulder Replacement and Spine Surgery.

Plaintiff has also recently received the Florida Department of Health and Florida Agency for Health Care Administration Excellence for Maternal Care Award. Plaintiff was recognized by BlueCross BlueShield with a Blue Distinction Centers for Bariatric Surgery designation, as part of the Blue Distinction Specialty Care program, and for Knee and Hip Replacement. Aetna has also designated Plaintiff as an Aetna Institute of Quality orthopedic facility for total joint replacement and spine surgery.

Healthgrades has awarded Plaintiff numerous Healthgrades accolades. Plaintiff also received several awards from Healthgrades for various specialties, including:

a. Labor and Delivery

- i. Five-Star Recipient for C-Section Delivery for four years in a row (2022-2025)
- ii. Five-Star Recipient for Vaginal Delivery for 12 years in a row (2014-2025)

b. Outpatient Orthopedic

- iii. Five-Star Recipient for Outpatient Back and Neck Surgery (except Spinal Fusion) (2025)
- iv. Recipient of the Healthgrades Outpatient Orthopedic Surgery Excellence Award (2025)

c. Spine Surgery

- i. Five-Star Recipient for Spinal Fusion
- ii. Recipient of the Healthgrades America's 100 Best Hospitals for Spine Surgery Award (2025)
- iii. Top 10% in the Nation for Spine Surgery (2025)
- iv. Recipient of the Healthgrades 2025 Spine Surgery Excellence Award

d. Gastrointestinal

- i. Five-Star Recipient for Treatment of Gastrointestinal Bleed (2024)

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Also, Plaintiff does not participate in Vizient and has not done so during the Relevant Time Period.

Interrogatory No. 13: Describe any steps taken by Your hospital to improve any and all of the patient safety measures considered by Leapfrog's Hospital Safety Grade (as set forth on Leapfrog's published scoring methodology documents; see ECF No. 21-3 at 6-10; ECF No. 21-43 at 6-9), before and after each Safety Grade publication of which You complain.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of Plaintiff's improvements to "any and all" patient safety measures considered by Leapfrog's Hospital Safety

Grade. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks information on metrics other than TLG's Deceptive Score Categories and to the extent it seeks information that is beyond the scope of Leapfrog's Hospital Survey.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff is committed to continual improvement of patient safety measures, motivated by our commitment to ensuring the best possible patient safety—not chasing the best possible Leapfrog grade. To achieve this core objective, Plaintiff devotes significant time and resources to improving its delivery of the highest possible quality of care for those in the community it serves, including efforts to improve its performance in areas related to the four metrics Plaintiff has chosen to impute in its survey.

Plaintiff monitors its BCMA rate, but the rate is already nearly 100%, so there is very little scope for improvement. Plaintiff consistently tracks CPOE and hand hygiene. For CPOE, Plaintiff trains new hires one-on-one on how to implement CPOE properly, meets with providers to address any barriers, shares compliance reports with individual providers, and clinical informatics educators visit physicians' offices to address any access issues. Plaintiff also trains new hires in proper compliance with Plaintiff's hand hygiene policy and requires annual continuing education on it. Plaintiff surveils hand hygiene compliance monthly and provides real time education on the importance of hand hygiene. Compliance with Plaintiff's hand hygiene policy is also reviewed at periodic committee meetings, and leadership shares data with staff and holds them accountable for the results.

Plaintiff already has 24/7 ICU coverage for its intensivist unit and has had that coverage for several years, so it does not need to track this metric.

Interrogatory No. 14: State whether You are aware of specific patients who have relied on the Leapfrog Safety Grade in declining to receive healthcare services at Your hospital. In so answering, identify the individual patient that declined to receive services, the date of such declination, the type of service the patient declined to receive, the medium for the communication from the patient (i.e. telephone, video conference, email, letter, etc.), the content of the communication, and the reason given for the stated decision.

Plaintiff objects to this Interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to a Qualified Protective Order entered by this Court.

Answer: Subject to the foregoing objection, Plaintiff has received reports that patients considered or decided not to use Plaintiff's facility because of TLG's misleading grades.

Amended Answer: Subject to the foregoing objection, since the release of TLG's false and misleading grades, Plaintiff has received numerous reports from doctors that patients considered or decided not to use Plaintiff's facility due to concerns related to TLG's misleading grades.

Interrogatory No. 15: Describe any effort Your hospital has made to influence public perception of Your hospital's performance on patient safety following the publication of the Leapfrog Safety Grade.

Plaintiff objects to this Interrogatory as vague and ambiguous because it does not specify which Leapfrog Safety Grade is at issue. Plaintiff will construe this Interrogatory to reference TLG's deceptive Safety Grades beginning in Fall 2024. Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks "any effort" Plaintiff "has made to influence public perception" after the release of TLG's

deceptive and unfair Safety Grades because there have been many such “efforts” and those “efforts” are ongoing given the significant harm caused by TLG’s deceptive and unfair business practices.

Answer: Subject to the foregoing objections, Plaintiff continues to influence public perception by, among other things, delivering the highest quality care to the community it serves, which, as discussed in response to Interrogatory 12, has led to numerous awards, accreditations, and accolades. In addition, several public statements disputing the misleading nature of the Safety Grade have been made on Plaintiff’s behalf.

Supplemental Answer: In addition to the above, members of hospital leadership have communicated with patients, doctors, or community members on a regular basis to dispel the misleading nature of the Leapfrog Safety Grades. For instance, Plaintiff communicated its governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff’s hospital. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG’s deceptive scores on behalf of Plaintiff and other affected members of the network. Plaintiff also engaged in email discussions about TLG’s misleading grades, either as sender or recipient, which TLG has through Plaintiff’s production of documents.

Interrogatory No. 16: Describe the due diligence Your hospital undertakes to ensure the accuracy of its own publicly reported safety data (including but not limited to data submitted to CMS, the CDC, and third party organizations).

Plaintiff objects to this Interrogatory as vague and ambiguous due to its use of the undefined term “due diligence.” Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Any “due diligence” Plaintiff performs when reporting to *third parties* has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices, especially when TLG does nothing to ensure the accuracy of information that hospitals that participate in its survey self-report.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff makes reasonable efforts to ensure the accuracy of the data it reports to third-party organizations. For instance, Plaintiff employs data abstractors, quality coordinators and a Quality Director, who are all responsible for abstracting, validating, and submitting safety data.

Interrogatory No. 17: Describe in detail how You communicate to the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System the outcome of any and all healthcare safety ratings, evaluative publications, studies, or performance analyses that Your Hospital receives.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff’s communication, if any, with the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System, all non-parties to this litigation, has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff communicates with Tenet stakeholders, including employees who work to support the Palm Beach Health Network, on a range of matters, including issues related to patient safety and outcomes and in particular related to TLG and the Safety Grades by email and oral communication. Those communications included discussions about the reasons for particular grades, the method used to calculate Safety Grades, the value of Safety Grades, and responses to the Safety Grades. In addition, identified below are documents Plaintiff produced evidencing communications between the Plaintiff Hospitals and Tenet related to TLG, the Leapfrog survey, and Safety Grades.

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 18: State whether the compensation of Your Chief Executive Officer or any other executive-level leadership officers is tied to or related in any way to Your hospital's performance on patient safety, union worker contracts or Your hospital's ratings by third party ratings organizations' ratings publications (including but not limited to the Leapfrog Hospital Safety Grade).

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's method of compensating its Chief Executive Officer and other executive-level leadership **has nothing to do with the** claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff's performance on patient safety, union worker contracts, or ratings by third party ratings organizations' ratings publications is related in some way to the compensation of Plaintiff's Chief Executive Officer or other executive-level leadership officer(s).

Interrogatory No. 19: Identify all hospitals, medical centers, or healthcare systems that you consider to be your direct competitors within the relevant geographic market during the time period covered by the Complaint and describe in detail the criteria you use to determine whether another hospital or healthcare provider is a competitor.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. The identity of Plaintiff's competitors and "the criteria" used to determine whether a hospital or provide is a competitor has nothing to do with the claims and

defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff also objects to this Interrogatory to the extent it seeks confidential, proprietary information, and commercially sensitive information related to Plaintiff's scoring system and "criteria" used to determine whether a hospital or provide is a competitor.

Answer: Subject to the foregoing objections and on condition that this response is considered "Confidential" under the forthcoming agreed confidentiality order, HCA Florida JFK Hospital, HCA Florida Palms West Hospital, Jupiter Medical Center, and Wellington Regional Medical Center are Plaintiff's competitors. Plaintiff considers these hospitals competitors because of their proximity to Plaintiff, their competing services lines, and that patients within Plaintiff's service area go to these hospitals for medical care.

Supplemental Answer: Cleveland Clinic and NYU Langone are also Plaintiff's competitors.

Interrogatory No. 20: State and describe the results of any market analysis, competitive analysis, or consumer perception surveys you have conducted or commissioned regarding your competitors from 2020 to present, and identify the individuals or entities that prepared or participated in such analyses.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not is not proportional to the needs of this Action. The results of any market analysis, competitive analysis, or consumer perception surveys and the identity of those who prepared or participated in such analyses has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Plaintiff further objects to this Interrogatory to the extent it requests information from outside of the relevant time period of January 1, 2023, to present. Plaintiff also objects to this Interrogatory as unduly burdensome to the extent it asks Plaintiff to “state and describe” various market analysis.

As agreed during the parties’ meet and confer on September 3, 2025, Plaintiff will produce documents showing the results of studies or surveys Plaintiff has conducted or commissioned related to internal market analysis, competitive analysis, or consumer perception. Plaintiff will identify the documents responsive to this Interrogatory by Bates number in Plaintiffs’ production cover letter.

Interrogatory No. 21: Identify with specificity any comments or concerns raised by any third party payor, bank or lender, or investor related to Your hospital’s reputation and/or public perception on issues in any way involving patient safety or satisfaction.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this case to the extent it seeks “comments and concerns” from third parties related generally to Plaintiff’s reputation that has nothing to do with the specific and significant reputational harm caused by TLG’s misleading grades.

Answer: Subject to the foregoing objections, Plaintiff will produce and identify documents related to the significant reputational harm caused by TLG’s deceptive and unfair Safety Grades that provide sufficient detail to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff is unaware of any documents related to this Interrogatory.

Interrogatory No. 22: Identify and describe any complaints, concerns, or comments from patients, community members, or referring physicians that relate to the hospital's reputation or comparisons to other hospitals in the region.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this Action to the extent it seeks "comments and concerns" from patients, community members, or referring physicians that have nothing to do with the significant reputational harm caused by TLG's misleading grades. Plaintiff also objects to this interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff's facility because of TLG's misleading grades.

Amended Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff's facility because of TLG's misleading grades. In addition, concerns have been raised by patients, doctors, staff, and community members, and Plaintiff is aware of false and misleading statements based on TLG's false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

Our Medical Executive Committee has received direct inquiries from patients regarding their concerns as TLG's grades and related public reports. Our Chief Nursing Officer reported that a nursing candidate questioned the quality of care of the hospital in her interview for a job opening.

Patients have asked independent physicians that use both our facilities and those of Jupiter Medical Center (a nearby hospital) to schedule their surgeries at Jupiter Medical Center and not at ours. Those patients chose not to use our hospital specifically because of the Leapfrog grades. These independent surgeons have told us that they believe TLG has misled these patients about the quality of the Medical Center. The harm caused by TLG's false and misleading Safety Grade is ongoing.

In addition, the following produced documents evidence such harm.

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 23: List with specific detail each and every concern, complaint or comment made by any union, collective bargaining unit or employee association in any way related to patient safety at Your hospital.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “each and every concern, complaint or comment ” from third parties that have nothing to do with the significant reputational harm caused by TLG’s misleading grades. Plaintiff also objects to this Interrogatory to the extent it seeks health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Answer: Subject to the foregoing objections, Plaintiff is unaware of any concern, complaint or comment regarding TLG deceptive scores made by the union at Plaintiff’s hospital.

Amended Answer: Subject to the foregoing objections, Plaintiff is unaware of any concern, complaint, or comment regarding TLG’s deceptive scores or regarding patient safety made by the union at Plaintiff’s hospital.

Interrogatory No. 24: Identify any and all criticism You have received since 2020 from Tenet Healthcare Corporation and/or from any individual executive of Tenet Healthcare Corporation regarding Your hospital’s performance in any way.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. Any so-called “criticism” has nothing to do with the claims and defenses related to TLG’s decision to use deceptive business practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: As discussed during the parties' meet and confer on September 3, 2025, TLG agreed to narrow this Interrogatory to concern only "criticism...regarding Your hospital's patient safety." After a reasonable and diligent search, Plaintiff is unaware of having received "criticism" from Tenet Health Corporation regarding patient safety. Plaintiff is always working to improve its performance, quality, and safety in a constructive way and engages with Tenet Health Corporation as needed to ensure Plaintiff provides the best patient care possible.

WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**AFFIDAVIT OF SHERI MONTGOMERY IN SUPPORT OF
PLAINTIFF GOOD SAMARITAN MEDICAL CENTER, INC.'S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP'S FIRST SET OF
INTERROGATORIES TO GOOD SAMARITAN MEDICAL CENTER, INC.**

I, Sheri Montgomery, declare as follows:

1. I am over 21 years of age and competent to give this testimony.
2. I am the Chief Executive Officer of Good Samaritan Medical Center, Inc. ("Plaintiff"). I am the corporate representative of Plaintiff for the purpose of answering Defendant The Leapfrog Group's First Set of Interrogatories to Good Samaritan Medical Center, Inc. I have read the foregoing interrogatories and the answers to those interrogatories, which are true according to the best of my knowledge, information, and belief.
3. I declare under penalty of perjury that the foregoing is true and correct.

Executed on September 8, 2025.

Sheri Montgomery

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**PLAINTIFF PALM BEACH GARDENS MEDICAL CENTER’S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP’S FIRST SET OF
INTERROGATORIES TO PALM BEACH GARDENS MEDICAL CENTER**

Pursuant to Federal Rules of Civil Procedure 26 and 33 and the *Pretrial Scheduling Order and Order Referring Case to Mediation* (ECF No. 36) (the “Pretrial Scheduling Order”), Plaintiff Palm Beach Gardens Medical Center (“Plaintiff” or “Palm Beach Gardens”), by and through its undersigned counsel, hereby submit its amended and supplemented responses and objections (“Responses”), to Defendant The Leapfrog Group’s (“TLG”) First Set of Interrogatories, dated July 11, 2025 (the “Interrogatories” and each numbered interrogatory, an “Interrogatory”) in the above-captioned action (the “Action”).

Plaintiff’s Responses to the Interrogatories are made solely for purposes of this Action and to the best of Plaintiff’s present knowledge, information, and belief regarding the matters about which inquiry have been made. Discovery is ongoing, and Plaintiff reserves the right to amend, supplement, clarify, or further explain its Responses at any time prior to the trial in

this Action. Plaintiff further reserves the right to raise any additional objections deemed necessary or appropriate in light of any further review.

OBJECTIONS TO INSTRUCTIONS AND DEFINITIONS

1. Plaintiff objects to the definition of terms “Plaintiffs” and “Plaintiff Hospitals” as overbroad, unduly burdensome, and not proportional to the needs of the case to the extent it seeks to require Plaintiffs to respond on behalf of entities or individuals other than themselves.

2. Plaintiff objects to the definition of the terms “Palm Beach Gardens,” “Palm Beach Gardens Medical Center,” “Plaintiff,” “You,” and “Your” to the extent each term seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

3. Plaintiff objects to the definition of the terms “Tenet Healthcare” and “Tenet” to the extent it seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of Tenet, Tenet’s agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

4. Plaintiff objects to the definition of “identify, when referring to a person,” as overbroad and unduly burdensome to the extent it calls for the “address” and “present or last-known employer” of identified individuals. Such information is overbroad and beyond the scope of permissible discovery.

5. Plaintiff objects to the instruction that the relevant time period for the Interrogatories begins on January 1, 2020. Plaintiff will apply to each Interrogatory the time period

of November 1, 2023 to present (the “Relevant Time Period”). Any response to an Interrogatory that provides information that falls outside of the Relevant Time Period should not be construed as an admission that the Relevant Time Period begins prior to November 1, 2023.

SPECIFIC RESPONSES TO INTERROGATORIES

Interrogatory No. 1: State the full name, address, job title or position, and hospital or employer affiliation of all individuals that assisted with responding to these interrogatories.

Answer: The following individuals assisted with responding to these Interrogatories.

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Erik Cazares	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Chief Executive Officer	Palm Beach Gardens Community Hospital
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

Interrogatory No. 2: Identify every individual not identified in Your Rule 26(a) initial disclosures with knowledge of facts pertaining to the allegations in Your Complaint in this Lawsuit (and any subsequent amendments) and/or whom You believe may have discoverable knowledge, information or data regarding this matter, including those who You expect to call as a fact or opinion witness at any hearing in this proceeding or whose testimony (by affidavit, deposition or testimony) You intended to submit in connection with this proceeding, and the substance of his/her testimony or affidavit, and, with respect to each person identified, provide:

- A. full name,
- B. address,
- C. telephone number,
- D. job title or position,
- E. hospital or employer affiliation,
- F. and describe in detail the facts possessed by each such person.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of “every individual...with knowledge” or who “may have discoverable knowledge, information or data regarding this matter.” Plaintiff will not provide more than the identity of individuals most likely to have knowledge regarding this matter. Plaintiff further objects to this Interrogatory as premature because it requests disclosure of Plaintiff’s witnesses for hearings and the substance of witness testimony before such disclosure is required under applicable law or the Pretrial Scheduling Order. Plaintiff will submit its trial witness list on October 2, 2025, per the Pretrial Scheduling Order, and disclose any other witnesses and witness testimony as further ordered by the Court or otherwise required by applicable law. Plaintiff also objects to this Interrogatory’s request for the identity of “opinion witness[es]” as vague, since witnesses are either “fact” or “expert” witnesses. Plaintiff will interpret “opinion witness” to mean “expert witness.” Plaintiff submitted expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Answer: Subject to the foregoing objection, Plaintiff will amend its Rule 26(a)(1) Initial Disclosures to identify additional individuals who may have knowledge of facts pertaining to the allegations in the Complaint.

Amended Answer: In addition to those disclosed in Plaintiff’s supplemental disclosures, the following individuals may have relevant factual knowledge:

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Kathleen McDonald	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Quality Director	Palm Beach Gardens Community Hospital

In addition to the individuals identified above, persons identified in documents produced in this dispute have knowledge of facts pertaining to the allegations in the Amended Complaint. *See* Fed. R. Civ. P. 33(d). Discovery is ongoing, and Plaintiff reserves the right to supplement, amend, correct, clarify, or modify this Response as further information becomes available.

Interrogatory No. 3: Describe in detail all factual bases for Your contention that Leapfrog’s published Safety Grade for Your hospital was false, inaccurate, misleading, deceptive, or unfair. In so answering, identify with particularity each measure, data point, or metric that You contend was inaccurately reported, calculated, or misrepresented by Leapfrog in calculating the Safety Grade for Your hospital.

Answer: Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all factual bases” for Plaintiff’s contention. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’ facts or witnesses that support an opposing party’s case” to be “unduly broad”) (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory as premature to the extent it requests that Plaintiff “[d]escribe in detail all factual bases” to support its contention. *In re Reliance Fin. & Inv. Grp., Inc.*, 2006 WL 8435541, at *4 (S.D. Fla. Feb. 14, 2006) (Contention interrogatories “are more appropriately used after a substantial amount of discovery has been conducted--typically, at the end of the discovery period.”). Plaintiff also objects to this Interrogatory to the extent it attempts to limit or mischaracterize Plaintiff’s claim as just

challenging the false, inaccurate, misleading, deceptive, or unfair nature of TLG's Safety Grade. As the Court explained in its order denying TLG's motion to dismiss, the core of the Complaint is "a challenge to Defendant's representations about its methodology, which they claim mislead consumers by failing to distinguish between absent data and damning data, and professing that grades are not influenced by a hospital's lack of survey participation." *Order on Motion to Dismiss* 6 (ECF No. 41). Plaintiff also challenges the provably false facts and deceptive scoring system underlying these grades, which TLG admits it relies on to arrive at its deceptive Safety Grades.

Subject to the foregoing objections and as more fully stated in the *Amended Complaint* (ECF No. 74) ("Complaint"), TLG has engaged in deceptive and unfair business practices and misrepresentations when issuing the Safety Grade for Plaintiff's hospital as part of TLG's annual "Hospital Survey." TLG posts these Safety Grades online at hospitalsafetygrade.org.

To arrive at these Safety Grades, TLG uses CMS data, survey responses from participating hospitals, and other supplemental data sources. For participating hospitals, TLG uses the hospitals' self-reported responses to the Hospital Survey for 12 of the 22 measures. For non-participating hospitals, TLG uses other sources for those 12 measures. For the remaining four measures—Computerized Physician Order Entry, Bar Code Medication Administration, ICU Physician Staffing, and Hand Hygiene Score (the "Deceptive Score Categories")—TLG devised and uses a so-called "imputation model." Prior to Fall 2024, TLG's imputation model assigned non-participating hospitals a score based on the average score applicable to a similarly situated hospital. Beginning in Fall 2024, TLG modified its imputation model. TLG now assigns the lowest possible score to non-participating hospitals, which has the effect of punishing non-participating hospitals and artificially deflating their Safety Grades. TLG has even admitted the changes in Fall 2024 were designed to penalize non-participating hospitals. TLG also misleads consumers about how

it grades hospitals, stating “[t]he Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the [TLG] Hospital Survey.” *Declaration of Lee Crain* (ECF No. 21) (“Crain Decl.”), Ex. 1 at 4 (“Frequently Asked Questions About the Leapfrog Hospital Safety Grade”).

As TLG explains, “not all hospitals have enough data publicly available to be eligible for a grade.” Crain Decl. Ex. 1 at 5. “As per the National Expert Panel guidance, [TLG] has requirements for the minimum amount of data [it] need[s] to issue an accurate grade.” Crain Decl. Ex. 1 at 5. According to TLG, “[h]ospitals missing more than six process measures” are “not graded.” Crain Decl. Ex. 2 at 6. Non-participating hospitals should fall easily into that “not graded” bucket, because their decision not to participate in TLG’s survey necessarily means TLG is missing seven process measures that rely on voluntary submission of hospital data.¹

TLG then deceptively conceals how it makes up grades for the four “imputation” measures and even suggests on its website that TLG *does* have data sufficient to score TLG on those four measures. By way of example, TLG acknowledges that Plaintiff “Declined to Report” information in response to questions about “Staff work[ing] together,” but then tells consumers—as if it were a fact—that Plaintiff is “Worse Than Average” on “Handwashing,” “Communication,” “medication administration,” and the like—even though TLG has no basis whatsoever to adopt those conclusions. Crain Decl. Ex. 32 at 2. TLG itself says handwashing is among the “most important” measures in its survey, Crain Decl. Ex. 15 at 4, yet it deceptively conceals that it has no data with which to grade the Plaintiff hospital on that measure. *Defendant The Leapfrog Group’s Responses to Plaintiffs’ Requests for Production* at 7 (“Leapfrog is not itself in possession

¹ Those seven include CPOE, BCMA, IPS, Safe Practice 1: Culture of Leadership Structures and Systems; Safe Practice 2: Culture Measurement, Feedback & Intervention; Total Nursing Care Hours per Patient Day; and Hand Hygiene.

of data showing Plaintiffs' performance on the 'imputed metrics' considered by the methodology."'). Of course, Plaintiff in fact has a comprehensive and thorough handwashing policy. And had Plaintiff merely filled out TLG's survey, it would have received a full two letter grades higher on TLG's score. *Expert Report of Professor Sean Nicholson* (Aug. 7, 2025), Ex. 6.

Based on the foregoing, and as more fully set forth in the Complaint, TLG engages in deceptive trade practices by, among other things, deceiving consumers about its grading methods by implying that Plaintiff has failed on certain measures that, in truth, TLG has no data or other basis to evaluate; deceiving consumers by telling them the Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the Hospital Survey; deceiving consumers when it represents that it does not grade hospitals if it lacks sufficient data, when, in truth, it does grade hospitals by "imputing" or making up a grade for the Deceptive Score Categories; hiding the truth about its "imputation model" from consumers by burying it in fine print on a separate website; punishing non-participating hospitals by "imputing" scores, which artificially deflate a hospital's Safety Grade; and favoring participating hospitals. Additional factual bases for the Plaintiff's claims are presented in the Complaint.

Interrogatory No. 4: Describe the scoring or grading methodology You believe Leapfrog should have used to assess Your hospital's patient safety performance and explain why that method would yield a different result.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's provision of an alternative scoring or grading methodology has nothing to do with the claims and defenses in this case related to TLG's

decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it calls for speculation.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff responds that TLG should use a scoring system that is not unfair or deceptive. By way of example only, TLG could decline to grade hospitals that do not participate in TLG's survey, because their decision not to participate means TLG is missing seven process measures that rely on voluntary submission of hospital data. This would yield a different result, because the hospitals would not receive a grade at all. TLG's methodology certainly should not affirmatively assign an arbitrary low score to a particular metric just because a hospital does not provide data for that metric.

Interrogatory No. 5: State whether You submitted any data, corrections, or appeals to Leapfrog regarding the Safety Grade Your hospital received, and for each such submission, identify the date of the submission, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the submission, and the content of the submission.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted "any data, corrections, or appeals to Leapfrog regarding the Safety Grade" Plaintiff hospital received has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG's possession, custody and control, or equally available to TLG.

Answer: Subject to the foregoing objections, Plaintiff engaged in correspondence prior to the commencement of this case demanding that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, but at every turn TLG refused.

Amended Answer: Subject to the foregoing objections, Plaintiff did not submit any data, corrections or appeals to Leapfrog regarding the Safety Grades it has received.

Interrogatory No. 6: State whether You provided any comment or input in any form during Leapfrog's requests for public comments for planned updates to the Leapfrog Hospital Safety Grade methodology that was proposed for the calculation of Hospital Safety Grades (including but not limited to for the Fall 2024 methodology update). If yes, please identify the date of the comment, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the comment and the content of the comment. If no, please state the reason why You chose not to comment.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted "any comment or input" in response to TLG's request for public comments has nothing to do with claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG's possession, custody and control, or equally available to TLG.

Subject to the foregoing objections, Plaintiff did not provide comments in response to Leapfrog's requests for public comments for planned updates to the Leapfrog Hospital Safety Grade scoring system because Plaintiff generally does not respond to requests for public comment from private entities like TLG.

Interrogatory No. 7: Describe all actions Your hospital took in response to (or in deciding not to respond to) its Safety Grade or the Hospital Survey, including internal meetings, media statements, or public relations efforts. In so answering, state the date of the action, the individuals involved in the action and the content of the action.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all actions” Plaintiffs may have taken in response to TLG’s Safety Grades. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, No. 14-81476-CIV, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’ facts or witnesses that support an opposing party’s case” to be “unduly broad”) (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG’s deceptive and unfair Safety Grade. Plaintiff’s response included meeting internally with Plaintiff’s leadership team, medical executive committee, and governing board, corresponding with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action.

Amended Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG’s deceptive and unfair Safety Grades. Plaintiff’s response included meeting internally with Plaintiff’s leadership team, medical executive

committee, and governing board, corresponding through Plaintiff's corporate parent with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action. Plaintiff has also held many phone calls and meetings with physicians and other stakeholders about the TLG grades, explaining how the grades were deceptive and did not accurately reflect the hospital quality and patient safety at Plaintiff.

Interrogatory No. 8: Identify any and all persons, whether internal or external (e.g., patients, vendors, affiliates, parents, agents, partners, media) with whom You communicated in any way with respect to the Safety Grade or the Hospital Survey. In so answering, state the date of the communication, the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.) and the content of the communication.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of "any and all persons, whether internal or external." Plaintiff will disclose the categories of individuals with whom Plaintiff communicated about the Safety Grade or Hospital Survey during the Relevant Time Period. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that Health Insurance Portability and Accountability Act ("HIPAA"), among other statutes and regulations, bars Plaintiff from disclosing. Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff's governing board, its medical executive committee, department directors, and physicians and nurses when

asked about the Safety Grade or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grade for Plaintiff's hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG's release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and since then, has engaged in various social networking and other marketing campaigns to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of the network.

Amended Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff's governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff's hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG's release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of

the network. Plaintiff also engaged in email discussions about TLG's misleading grades, either as sender or recipient, which TLG has through Plaintiff's production of documents.

Interrogatory No. 9: Describe all instances in which a third party declined to contract with, refer patients to, or work with Your hospital, where Leapfrog's grade was cited or discussed. In so identifying list the name of the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.), the date of the communication and the content of the communication.

Answer: Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it requires Plaintiff to "[d]escribe all instances" in which a third party took an action in response to TLG's deceptive grade.

Subject to the foregoing objection, Plaintiff is not aware of any responsive instances.

Interrogatory No. 10: Describe with specificity the basis for each and every category of damage You claim You incurred as a result of the Leapfrog Safety Grade. In so identifying, list each category of damages and the dollar value of each category of damage You claim.

Plaintiff objects to this Interrogatory to the extent it seeks information that is the subject of expert testimony.

Answer: Plaintiff will submit expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Amended Answer: Plaintiff has served the expert report of Thomas Chakurda, which addresses the issue of reputational harm and harm to Plaintiff's goodwill. Plaintiff further objects to this Interrogatory as overbroad and unduly burdensome to the extent it seeks "each and every" category of claimed damages.

Subject to the foregoing objections and as agreed during the parties' September 3, 2025 meet and confer, Plaintiff will limit its response to the live non-monetary claims, including

injunctive and declaratory relief, to remedy harm to Plaintiff's reputation and goodwill. Plaintiff's reputation and goodwill has been damaged by TLG's false and misleading methodology and resulting Safety Grades. Plaintiff's claim for reputational harm is based on, among other things, concerns raised by patients, doctors, staff, and community members, as well as false and misleading statements based on TLG's false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

By way of example, we have received reports from patients that they decided not to use our hospital due to the misleading grade TLG assigned to the hospital. Our Medical Executive Committee has received direct inquiries from patients regarding their concerns about TLG's grades and related public reports. Patients have asked independent physicians that use both our facilities and those of Jupiter Medical Center (a nearby hospital) to schedule their surgeries at Jupiter Medical Center and not at ours. These independent surgeons have told us that they believe TLG has misled these patients about the quality of the Medical Center because these surgeons believe our hospital provides higher-quality care. Doctors have had patients express that they do not want to come to the Medical Center, specifically because of the Leapfrog grade. The harm caused by TLG's false and misleading Safety Grade is ongoing.

Interrogatory No. 11: Identify all adverse patient events which occurred at Your hospital, including any citations received from regulatory agencies, accrediting agencies, and third party payors such as The Joint Commission, CMS, state health departments, etc. during the period covered by each Leapfrog Safety Grade publication of which You complain (i.e., Fall 2024, Fall 2025, etc.), as well as any complaints received from patients regarding the same.

Plaintiff objects to this Interrogatory because it is overly broad, unduly burdensome, seeks discovery of information that is irrelevant to the claims and defenses in this Action, seeks information that is beyond the scope of Leapfrog's Hospital Survey, and is not reasonably

calculated to lead to the discovery of admissible evidence. TLG does not include “all adverse patient events,” “citations received from” agencies or payors, or “complaints received from patients” in TLG’s determination of its Hospital Safety Grades or request such information in the Hospital Survey, so any such information is irrelevant to whether TLG’s actions constitute unfair or deceptive trade practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that HIPAA, among other statutes and regulations, bars Plaintiff from disclosing.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Defendant has agreed to withdraw this Interrogatory.

Interrogatory No. 12: Describe in detail how Your hospital compares nationally on on [sic] any other ranking of patient safety performance, including but not limited to Vizient, Inc., Premier, Inc., HealthTrust Purchasing Group, The Joint Commission, HealthGrades, US News, Newsweek, Statista, Definitive Healthcare, or any other quality benchmarking entity including benchmarking on patient safety including on adverse events and on healthcare-acquired infections.

Plaintiff objects to this Interrogatory’s request that Plaintiff “[d]escribe in detail how Your hospital compares nationally” based on undisclosed “benchmarking” as vague and confusing. To the extent this Interrogatory seeks the top-line rankings of the identified organizations, Plaintiff objects to this Interrogatory because such information is publicly and equally available to TLG. To the extent this Interrogatory asks Plaintiff to compare itself to the named and unnamed entities, that request is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Other organizations’ rankings have nothing to do with

the claims and defenses in this case related to the Deceptive Score Categories or TLG's decision to use deceptive business practices.

Answer: Subject to the foregoing objections, Plaintiff has received numerous awards and accolades, including many that are especially relevant to patient care for the over-65 patient community that represent over 50% of the patients we serve. Plaintiff is accredited by the Joint Commission, the nation's largest hospital accreditor that evaluates hospitals' quality performance standards through an objective evaluation process. Plaintiff has also been accredited by Joint Commission as an Advanced Primary Stroke Center—a certification designed for hospitals providing the critical elements to achieve long-term success in improving stroke outcomes—and Total Joint Hip/Knee Certification—which signifies our services have delivered evidence-based proof of clinical quality sought by patients and payers alike. Additionally, it has a lab accreditation from the College of American Pathologists—requirement to perform testing on specimens from human beings—and was selected as a certified program with the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR)—the only peer-reviewed accreditation process designed to review individual facilities for adherence to standards and guidelines developed and published by the AACVPR. These accreditations and certifications are only awarded after in-person visits to Plaintiff where our health care professionals are interviewed and patient care is reviewed first hand. We are subject to regular periodic in-person reviews, audits, surveys, and assessments of the facility.

Plaintiff has also received numerous awards that exemplify its quality such as Blue Distinction Center+ Designation for Quality and Cost-Efficiency in Knee and Hip Replacement Surgeries by BlueCross BlueShield, the Joint Commission's Gold Seal of Approval for Hip and Knee Replacement, an Aetna Institute of Quality Orthopedic Facility for Total Joint Replacement

and Spine Surgery, Get with the Guidelines Gold Plus Stroke Recognition Award from the American Heart Association for 10 years straight, and the Gold Plus Diabetes Recognition Award for the last three years, among several other awards.

In 2025, the medical ranking organization Healthgrades gave Plaintiff the award for “America’s 100 Best for Spine and Outpatient Orthopedic Excellence Award.” To assess and evaluate hospitals, Healthgrades relies on data from Medicare medical claims records and states’ data on Medicare and commercially insured patient outcomes to determine patients’ actual clinical outcomes when visiting a given hospital. Healthgrades also assigned Plaintiff five-star awards for various specialties, including:

a. Cardiac Care

- i. Five-Star Recipient for Valve Surgery (2023, 2025)
- ii. Five-Star Recipient for Treatment of Heart Failure for three years in a row (2023-2025)
- iii. Five-Star Recipient for Carotid Procedures for three years in a row (2023-2025)
- iv. Recipient of the Healthgrades 2023 Cardiac Surgery Excellence Award
- v. Top 10% in the Nation for Cardiac Surgery (2023)

b. Critical Care

- i. Five-Star Recipient for Respiratory Failure for two years in a row (2024-2025)

c. Gastrointestinal

- i. Five-Star Recipient for Colorectal Surgeries (2025)
- ii. Five-Star Recipient for Treatment of GI Bleed (2024)

d. Neurosurgery

- i. Five-Star Recipient for Treatment of Stroke (2025)

e. Pulmonary

- i. Five-Star Recipient for Treatment of Pneumonia for three years in a row (2023-2025)
- ii. Recipient of the Healthgrades Pulmonary Care Excellence Award (2024, 2025)
- iii. Top 10% in the Nation for Pulmonary Care (2024, 2025)
- iv. Five Star Recipient for Treatment of Chronic Obstructive Pulmonary Disease (2024).

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Amended Answer: Plaintiff has received numerous awards and accolades. For example, Plaintiff is accredited by the Joint Commission. Plaintiff has also been accredited by Joint Commission as an Advanced Primary Stroke Center and earned Total Joint Hip/Knee Certification. Additionally, it has a lab accreditation from the College of American Pathologists and was selected as a certified program with the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR).

Plaintiff has also received the Blue Distinction Center+ Designation for Quality and Cost-Efficiency in Knee and Hip Replacement Surgeries by BlueCross BlueShield, an Aetna Institute of Quality Award, Get with the Guidelines Gold Plus Stroke Recognition Award from the American Heart Association, and the Gold Plus Diabetes Recognition Award, among several other awards.

In 2025, the medical ranking organization Healthgrades assigned Plaintiff five-star awards for various specialties, including:

a. Cardiac Care

- i. Five-Star Recipient for Valve Surgery (2025)
- ii. Five-Star Recipient for Treatment of Heart Failure for three years in a row (2023-2025)
- iii. Five-Star Recipient for Carotid Procedures for three years in a row (2023-2025)

b. Critical Care

- i. Five-Star Recipient for Respiratory Failure (2024, 2025)

c. Gastrointestinal

- i. Five-Star Recipient for Colorectal Surgeries (2025)

d. Neurosurgery

- i. Five-Star Recipient for Treatment of Stroke (2025)

e. Pulmonary

- i. Five-Star Recipient for Treatment of Pneumonia for three years in a row (2023-2025)
- ii. Recipient of the Healthgrades Pulmonary Care Excellence Award (2024, 2025)

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Also, Plaintiff does not participate in Vizient and has not done so during the Relevant Time Period.

Interrogatory No. 13: Describe any steps taken by Your hospital to improve any and all of the patient safety measures considered by Leapfrog's Hospital Safety Grade (as set forth on Leapfrog's published scoring methodology documents; see ECF No. 21-3 at 6-10; ECF No. 21-43 at 6-9), before and after each Safety Grade publication of which You complain.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of Plaintiff's improvements to "any and all" patient safety measures considered by Leapfrog's Hospital Safety Grade. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks information on metrics other than TLG's Deceptive Score Categories and to the extent it seeks information that is beyond the scope of Leapfrog's Hospital Survey.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff is committed to continual improvement of patient safety measures, motivated by our commitment to ensuring the best possible patient safety—not chasing the best possible Leapfrog grade. To achieve this core objective, Plaintiff devotes significant time and resources to improving its delivery of the highest possible quality of care for those in the community it serves, including efforts to improve its performance in areas related to the four metrics Plaintiff has chosen to impute in its survey.

Plaintiff reviews its CPOE, BCMA, and Hand Hygiene metrics at periodic meetings to ensure patient safety and compliance and develop and review remedial plans as necessary.

Plaintiff already has 24/7 ICU coverage for its intensivist unit and has on call providers in case additional resources are needed. Plaintiff also continuously reassesses the staffing needs for the department.

Interrogatory No. 14: State whether You are aware of specific patients who have relied on the Leapfrog Safety Grade in declining to receive healthcare services at Your hospital. In so answering, identify the individual patient that declined to receive services, the date of such declination, the type of service the patient declined to receive, the medium for the communication from the patient (i.e. telephone, video conference, email, letter, etc.), the content of the communication, and the reason given for the stated decision.

Plaintiff objects to this Interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to a Qualified Protective Order entered by this Court.

Answer: Subject to the foregoing objection, Plaintiff has received reports that patients considered or decided not to use Plaintiff's facility because of TLG's misleading grades.

Amended Answer: Subject to the foregoing objection, since the release of TLG's false and misleading grades, Plaintiff has received numerous reports from doctors that patients considered or decided not to use Plaintiff's facility due to concerns related to TLG's misleading grades.

Interrogatory No. 15: Describe any effort Your hospital has made to influence public perception of Your hospital's performance on patient safety following the publication of the Leapfrog Safety Grade.

Plaintiff objects to this Interrogatory as vague and ambiguous because it does not specify which Leapfrog Safety Grade is at issue. Plaintiff will construe this Interrogatory to reference TLG's deceptive Safety Grades beginning in Fall 2024. Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks "any effort" Plaintiff "has made to influence public perception" after the release of TLG's deceptive and unfair Safety Grades because there have been many such "efforts" and those

“efforts” are ongoing given the significant harm caused by TLG’s deceptive and unfair business practices.

Answer: Subject to the foregoing objections, Plaintiff continues to influence public perception by, among other things, delivering the highest quality care to the community it serves, which, as discussed in response to Interrogatory 12, has led to numerous awards, accreditations, and accolades. In addition, several public statements disputing the misleading nature of the Safety Grade have been made on Plaintiff’s behalf.

Supplemental Answer: In addition to the above, members of hospital leadership have communicated with patients, doctors, or community members on a regular basis to dispel the misleading nature of the Leapfrog Safety Grades. For instance, Plaintiff communicated its governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff’s hospital. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG’s deceptive scores on behalf of Plaintiff and other affected members of the network. Plaintiff also engaged in email discussions about TLG’s misleading grades, either as sender or recipient, which TLG has through Plaintiff’s production of documents.

Interrogatory No. 16: Describe the due diligence Your hospital undertakes to ensure the accuracy of its own publicly reported safety data (including but not limited to data submitted to CMS, the CDC, and third party organizations).

Plaintiff objects to this Interrogatory as vague and ambiguous due to its use of the undefined term “due diligence.” Plaintiff further objects to this Interrogatory because it seeks

discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Any “due diligence” Plaintiff performs when reporting to *third parties* has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices, especially when TLG does nothing to ensure the accuracy of information that hospitals that participate in its survey self-report.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff makes reasonable efforts to ensure the accuracy of the data it reports to third-party organizations. For instance, Plaintiff employs data abstractors, quality coordinators and a Quality Director, who are all responsible for abstracting, validating, and submitting safety data.

Interrogatory No. 17: Describe in detail how You communicate to the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System the outcome of any and all healthcare safety ratings, evaluative publications, studies, or performance analyses that Your Hospital receives.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff’s communication, if any, with the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System, all non-parties to this litigation, has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff communicates with Tenet stakeholders, including employees who work to support the Palm Beach Health Network, on a range of matters, including issues related to patient safety and outcomes and in particular related to TLG and the Safety Grades by email and oral communication. Those communications included discussions about the reasons for particular grades, the method used to calculate Safety Grades, the value of Safety Grades, and responses to the Safety Grades. In addition, identified below are documents Plaintiff produced evidencing communications between the Plaintiff Hospitals and Tenet related to TLG, the Leapfrog survey, and Safety Grades.

Start Page	End Page
PBHN000006509	PBHN000006513
PBHN000004819	PBHN000004821
PBHN000006397	PBHN000006401
PBHN000002090	PBHN000002094
PBHN000002071	PBHN000002071
PBHN000004562	PBHN000004563

PBHN000004564	PBHN000004564
PBHN000004574	PBHN000004581
PBHN000004565	PBHN000004569
PBHN000004704	PBHN000004704
PBHN000004715	PBHN000004719
PBHN000006465	PBHN000006466

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 18: State whether the compensation of Your Chief Executive Officer or any other executive-level leadership officers is tied to or related in any way to Your hospital's performance on patient safety, union worker contracts or Your hospital's ratings by third party ratings organizations' ratings publications (including but not limited to the Leapfrog Hospital Safety Grade).

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's method of compensating its Chief Executive Officer and other executive-level leadership **has nothing to do with the** claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff's performance on patient safety, union worker contracts, or ratings by third party ratings organizations' ratings publications is related in some way to the compensation of Plaintiff's Chief Executive Officer or other executive-level leadership officer(s).

Interrogatory No. 19: Identify all hospitals, medical centers, or healthcare systems that you consider to be your direct competitors within the relevant geographic market during the time period covered by the Complaint and describe in detail the criteria you use to determine whether another hospital or healthcare provider is a competitor.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. The identity of Plaintiff's competitors and "the criteria" used to determine whether a hospital or provide is a competitor has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff also objects to this Interrogatory to the extent it seeks confidential, proprietary information, and commercially sensitive information related to Plaintiff's scoring system and "criteria" used to determine whether a hospital or provide is a competitor.

Answer: Subject to the foregoing objections and on condition that this response is considered “Confidential” under the forthcoming agreed confidentiality order.

Jupiter Medical Center is Plaintiff’s competitor. Plaintiff considers this hospital a competitor because of its proximity to Plaintiff, its competing services lines, and that patients within Plaintiff’s service area go to this hospital for medical care.

Interrogatory No. 20: State and describe the results of any market analysis, competitive analysis, or consumer perception surveys you have conducted or commissioned regarding your competitors from 2020 to present, and identify the individuals or entities that prepared or participated in such analyses.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not is not proportional to the needs of this Action. The results of any market analysis, competitive analysis, or consumer perception surveys and the identity of those who prepared or participated in such analyses has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Plaintiff further objects to this Interrogatory to the extent it requests information from outside of the relevant time period of January 1, 2023, to present. Plaintiff also objects to this Interrogatory as unduly burdensome to the extent it asks Plaintiff to “state and describe” various market analysis.

As agreed during the parties’ meet and confer on September 3, 2025, Plaintiff will produce documents showing the results of studies or surveys Plaintiff has conducted or commissioned related to internal market analysis, competitive analysis, or consumer perception. Plaintiff will

identify the documents responsive to this Interrogatory by Bates number in Plaintiffs' production cover letter.

Interrogatory No. 21: Identify with specificity any comments or concerns raised by any third party payor, bank or lender, or investor related to Your hospital's reputation and/or public perception on issues in any way involving patient safety or satisfaction.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this case to the extent it seeks "comments and concerns" from third parties related generally to Plaintiff's reputation that has nothing to do with the specific and significant reputational harm caused by TLG's misleading grades.

Answer: Subject to the foregoing objections, Plaintiff will produce and identify documents related to the significant reputational harm caused by TLG's deceptive and unfair Safety Grades that provide sufficient detail to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff is unaware of any documents related to this Interrogatory.

Interrogatory No. 22: Identify and describe any complaints, concerns, or comments from patients, community members, or referring physicians that relate to the hospital's reputation or comparisons to other hospitals in the region.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this Action to the extent it seeks "comments and concerns" from patients, community members, or referring physicians that have nothing to do with the significant

reputational harm caused by TLG's misleading grades. Plaintiff also objects to this interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff's facility because of TLG's misleading grades.

Amended Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff's facility because of TLG's misleading grades. In addition, concerns have been raised by patients, doctors, staff, and community members, and Plaintiff is aware of false and misleading statements based on TLG's false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

We have received reports from patients that they decided not to use our hospital due to the misleading grade TLG assigned to the hospital. Our Medical Executive Committee has received direct inquiries from patients regarding their concerns about TLG's grades and related public reports. Patients have asked independent physicians that use both our facilities and those of Jupiter Medical Center (a nearby hospital) to schedule their surgeries at Jupiter Medical Center and not at ours. These independent surgeons have told us that they believe TLG has misled these patients about the quality of the Medical Center because these surgeons believe our hospital provides higher-quality care. Doctors have had patients express that they do not want to come to the Medical Center, specifically because of the Leapfrog grade. The harm caused by TLG's false and misleading Safety Grade is ongoing.

In addition, the following produced documents evidence such harm.

Start Page	End Page
PBHN000006771	PBHN000006773
PBHN000002082	PBHN000002085
PBHN000002066	PBHN000002070
PBHN000002615	PBHN000002617
PBHN000006397	PBHN000006401
PBHN000002090	PBHN000002094
PBHN000004484	PBHN000004484

PBHN000004562	PBHN000004563
PBHN000004564	PBHN000004564
PBHN000004574	PBHN000004580
PBHN000004557	PBHN000004557
PBHN000008718	PBHN000008718
PBHN000006461	PBHN000006462
PBHN000008914	PBHN000008914
PBHN000008915	PBHN000008915

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 23: List with specific detail each and every concern, complaint or comment made by any union, collective bargaining unit or employee association in any way related to patient safety at Your hospital.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “each and every concern, complaint or comment ” from third parties that have nothing to do with the significant reputational harm caused by TLG’s misleading grades. Plaintiff also objects to this Interrogatory to the extent it seeks health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Answer: Subject to the foregoing objections, Plaintiff is unaware of any concern, complaint or comment regarding TLG deceptive scores made by the union at Plaintiff's hospital.

Amended Answer: Union personnel have in the past registered complaints or disagreements with Plaintiff's hospital's management, including alleged concerns about patient safety. Plaintiff carefully considers such allegations but finds generally that they are attempts to gain leverage in contract negotiations and are less genuine concern about patients. The union at Plaintiff's hospital made allegations in December 2023, February 2024, and March 2024. On April 5, 2024, the union publicly retracted those statements, rightly saying they were "entirely inappropriate to make," that "the Union should not have made the negative statements," and one after another, that the union did "not have any basis for believing" the accusations were true. After that, the union made only one other accusation of which Plaintiff is aware, and that was on April 10, 2024 concerning allegedly high turnover. But, the union's proposed remedies showed that the accusation was only an ordinary attempt to increase member wages: four of its five recommended "resolution[s]" were raising wages. The last "resolution" was that "hospital must staff based on the acuity of the patient," which Plaintiff already does. Plaintiff looked into the allegations anyways and found they lacked merit.

Interrogatory No. 24: Identify any and all criticism You have received since 2020 from Tenet Healthcare Corporation and/or from any individual executive of Tenet Healthcare Corporation regarding Your hospital's performance in any way.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. Any so-called "criticism" has nothing to do with the claims and defenses related to TLG's decision to use

deceptive business practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: As discussed during the parties' meet and confer on September 3, 2025, TLG agreed to narrow this Interrogatory to concern only "criticism...regarding Your hospital's patient safety." After a reasonable and diligent search, Plaintiff is unaware of having received "criticism" from Tenet Health Corporation regarding patient safety. Plaintiff is always working to improve its performance, quality, and safety in a constructive way and engages with Tenet Health Corporation as needed to ensure Plaintiff provides the best patient care possible.

Dated: September 8, 2025

Respectfully submitted,

By: /s/ Lee R. Crain

CERTIFICATE OF SERVICE

This is to certify that true and correct copies of Plaintiff's Amended and Supplemented Responses and Objections to Defendant The Leapfrog Group's First Sets of Interrogatories to Plaintiff have been served on counsel for The Leapfrog Group by electronic transmission.

/s/ Lee R. Crain
Lee R. Crain

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**AFFIDAVIT OF ERIK CAZARES IN SUPPORT OF
PLAINTIFF PALM BEACH GARDENS MEDICAL CENTER'S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP'S FIRST SET OF
INTERROGATORIES TO PALM BEACH GARDENS MEDICAL CENTER**

I, Erik Cazares, declare as follows:

1. I am over 21 years of age and competent to give this testimony.
2. I am the Chief Executive Officer of Palm Beach Gardens Community Hospital, Inc. d/b/a Palm Beach Gardens Medical Center ("Plaintiff"). I am the corporate representative of Plaintiff for the purpose of answering Defendant The Leapfrog Group's First Set of Interrogatories to Palm Beach Gardens Medical Center. I have read the foregoing interrogatories and the answers to those interrogatories, which are true according to the best of my knowledge, information, and belief.

3. I declare under penalty of perjury that the foregoing is true and correct.

Executed on September 8, 2025.

Erik Cazares

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**PLAINTIFF ST. MARY'S MEDICAL CENTER, INC.'S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP'S FIRST SET OF
INTERROGATORIES TO ST. MARY'S MEDICAL CENTER, INC.**

Pursuant to Federal Rules of Civil Procedure 26 and 33 and the *Pretrial Scheduling Order and Order Referring Case to Mediation* (ECF No. 36) (the "Pretrial Scheduling Order"), Plaintiff St. Mary's Medical Center, Inc. ("Plaintiff" or "St. Mary's"), by and through its undersigned counsel, hereby submit its amended and supplemented responses and objections ("Responses"), to Defendant The Leapfrog Group's ("TLG") First Set of Interrogatories, dated July 11, 2025 (the "Interrogatories" and each numbered interrogatory, an "Interrogatory") in the above-captioned action (the "Action").

Plaintiff's Responses to the Interrogatories are made solely for purposes of this Action and to the best of Plaintiff's present knowledge, information, and belief regarding the matters about which inquiry have been made. Discovery is ongoing, and Plaintiff reserves the right to amend, supplement, clarify, or further explain its Responses at any time prior to the trial in

this Action. Plaintiff further reserves the right to raise any additional objections deemed necessary or appropriate in light of any further review.

OBJECTIONS TO INSTRUCTIONS AND DEFINITIONS

1. Plaintiff objects to the definition of terms “Plaintiffs” and “Plaintiff Hospitals” as overbroad, unduly burdensome, and not proportional to the needs of the case to the extent it seeks to require Plaintiffs to respond on behalf of entities or individuals other than themselves.

2. Plaintiff objects to the definition of the terms “St. Mary’s” and “St. Mary’s Medical Center,” “Plaintiff,” “You,” and “Your” to the extent each term seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

3. Plaintiff objects to the definition of the terms “Tenet Healthcare” and “Tenet” to the extent it seeks to require Plaintiff to respond on behalf of entities or individuals other than itself, including on behalf of Tenet, Tenet’s agents, employees, directors, or other non-party entities that are not part of this litigation. Such information is overbroad and beyond the scope of permissible discovery. Accordingly, Plaintiff states that its Responses are on behalf of itself only.

4. Plaintiff objects to the definition of “identify, when referring to a person,” as overbroad and unduly burdensome to the extent it calls for the “address” and “present or last-known employer” of identified individuals. Such information is overbroad and beyond the scope of permissible discovery.

5. Plaintiff objects to the instruction that the relevant time period for the Interrogatories begins on January 1, 2020. Plaintiff will apply to each Interrogatory the time period

of November 1, 2023 to present (the “Relevant Time Period”). Any response to an Interrogatory that provides information that falls outside of the Relevant Time Period should not be construed as an admission that the Relevant Time Period begins prior to November 1, 2023.

SPECIFIC RESPONSES TO INTERROGATORIES

Interrogatory No. 1: State the full name, address, job title or position, and hospital or employer affiliation of all individuals that assisted with responding to these interrogatories.

Answer: The following individuals assisted with responding to these Interrogatories.

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Cynthia McCauley	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Chief Executive Officer	St. Mary’s Medical Center
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

Interrogatory No. 2: Identify every individual not identified in Your Rule 26(a) initial disclosures with knowledge of facts pertaining to the allegations in Your Complaint in this Lawsuit (and any subsequent amendments) and/or whom You believe may have discoverable knowledge, information or data regarding this matter, including those who You expect to call as a fact or opinion witness at any hearing in this proceeding or whose testimony (by affidavit, deposition or testimony) You intended to submit in connection with this proceeding, and the substance of his/her testimony or affidavit, and, with respect to each person identified, provide:

- A. full name,
- B. address,
- C. telephone number,
- D. job title or position,
- E. hospital or employer affiliation,
- F. and describe in detail the facts possessed by each such person.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of “every individual...with knowledge” or who “may have discoverable knowledge, information or data regarding this matter.” Plaintiff will not provide more than the identity of individuals most likely to have knowledge regarding this matter. Plaintiff further objects to this Interrogatory as premature because it requests disclosure of Plaintiff’s witnesses for hearings and the substance of witness testimony before such disclosure is required under applicable law or the Pretrial Scheduling Order. Plaintiff will submit its trial witness list on October 2, 2025, per the Pretrial Scheduling Order, and disclose any other witnesses and witness testimony as further ordered by the Court or otherwise required by applicable law. Plaintiff also objects to this Interrogatory’s request for the identity of “opinion witness[es]” as vague, since witnesses are either “fact” or “expert” witnesses. Plaintiff will interpret “opinion witness” to mean “expert witness.” Plaintiff submitted expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Answer: Subject to the foregoing objection, Plaintiff will amend its Rule 26(a)(1) Initial Disclosures to identify additional individuals who may have knowledge of facts pertaining to the allegations in the Complaint.

Amended Answer: In addition to those disclosed in Plaintiff’s supplemental disclosures, the following individuals may have relevant factual knowledge:

Full Name	Address	Job Title / Position	Hospital or Employer Affiliation
Regina West	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166	Market Quality Director	Palm Beach Health Network and St. Mary’s Medical Center

In addition to the individuals identified above, persons identified in documents produced in this dispute have knowledge of facts pertaining to the allegations in the Amended Complaint. *See* Fed. R. Civ. P. 33(d). Discovery is ongoing, and Plaintiff reserves the right to supplement, amend, correct, clarify, or modify this Response as further information becomes available.

Interrogatory No. 3: Describe in detail all factual bases for Your contention that Leapfrog’s published Safety Grade for Your hospital was false, inaccurate, misleading, deceptive, or unfair. In so answering, identify with particularity each measure, data point, or metric that You contend was inaccurately reported, calculated, or misrepresented by Leapfrog in calculating the Safety Grade for Your hospital.

Answer: Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all factual bases” for Plaintiff’s contention. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’ facts or witnesses that support an opposing party’s case” to be “unduly broad”) (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory as premature to the extent it requests that Plaintiff “[d]escribe in detail all factual bases” to support its contention. *In re Reliance Fin. & Inv. Grp., Inc.*, 2006 WL 8435541, at *4 (S.D. Fla. Feb. 14, 2006) (Contention interrogatories “are more appropriately used after a substantial amount of discovery has been conducted--typically, at the end of the discovery period.”). Plaintiff also objects to this Interrogatory to the extent it attempts to limit or mischaracterize Plaintiff’s claim as just challenging the false, inaccurate, misleading, deceptive, or unfair nature of TLG’s Safety Grade. As the Court explained in its order denying TLG’s motion to dismiss, the core of the Complaint is “a challenge to Defendant’s representations about its methodology, which they claim mislead consumers by failing to distinguish between absent data and damning data, and professing that grades are not influenced by a hospital’s lack of survey participation.” *Order on Motion to Dismiss*

6 (ECF No. 41). Plaintiff also challenges the provably false facts and deceptive scoring system underlying these grades, which TLG admits it relies on to arrive at its deceptive Safety Grades.

Subject to the foregoing objections and as more fully stated in the *Amended Complaint* (ECF No. 74) (“Complaint”), TLG has engaged in deceptive and unfair business practices and misrepresentations when issuing the Safety Grade for Plaintiff’s hospital as part of TLG’s annual “Hospital Survey.” TLG posts these Safety Grades online at hospitalsafetygrade.org.

To arrive at these Safety Grades, TLG uses CMS data, survey responses from participating hospitals, and other supplemental data sources. For participating hospitals, TLG uses the hospitals’ self-reported responses to the Hospital Survey for 12 of the 22 measures. For non-participating hospitals, TLG uses other sources for those 12 measures. For the remaining four measures—Computerized Physician Order Entry, Bar Code Medication Administration, ICU Physician Staffing, and Hand Hygiene Score (the “Deceptive Score Categories”)—TLG devised and uses a so-called “imputation model.” Prior to Fall 2024, TLG’s imputation model assigned non-participating hospitals a score based on the average score applicable to a similarly situated hospital. Beginning in Fall 2024, TLG modified its imputation model. TLG now assigns the lowest possible score to non-participating hospitals, which has the effect of punishing non-participating hospitals and artificially deflating their Safety Grades. TLG has even admitted the changes in Fall 2024 were designed to penalize non-participating hospitals. TLG also misleads consumers about how it grades hospitals, stating “[t]he Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the [TLG] Hospital Survey.” *Declaration of Lee Crain* (ECF No. 21) (“Crain Decl.”), Ex. 1 at 4 (“Frequently Asked Questions About the Leapfrog Hospital Safety Grade”).

As TLG explains, “not all hospitals have enough data publicly available to be eligible for a grade.” Crain Decl. Ex. 1 at 5. “As per the National Expert Panel guidance, [TLG] has requirements for the minimum amount of data [it] need[s] to issue an accurate grade.” Crain Decl. Ex. 1 at 5. According to TLG, “[h]ospitals missing more than six process measures” are “not graded.” Crain Decl. Ex. 2 at 6. Non-participating hospitals should fall easily into that “not graded” bucket, because their decision not to participate in TLG’s survey necessarily means TLG is missing seven process measures that rely on voluntary submission of hospital data.¹

TLG then deceptively conceals how it makes up grades for the four “imputation” measures and even suggests on its website that TLG *does* have data sufficient to score TLG on those four measures. By way of example, TLG acknowledges that Plaintiff “Declined to Report” information in response to questions about “Staff work[ing] together,” but then tells consumers—as if it were a fact—that Plaintiff is “Worse Than Average” on “Handwashing,” “Communication,” “medication administration,” and the like—even though TLG has no basis whatsoever to adopt those conclusions. Crain Decl. Ex. 32 at 2. TLG itself says handwashing is among the “most important” measures in its survey, Crain Decl. Ex. 15 at 4, yet it deceptively conceals that it has no data with which to grade the Plaintiff hospital on that measure. *Defendant The Leapfrog Group’s Responses to Plaintiffs’ Requests for Production* at 7 (“Leapfrog is not itself in possession of data showing Plaintiffs’ performance on the ‘imputed metrics’ considered by the methodology.”). Of course, Plaintiff in fact has a comprehensive and thorough handwashing policy. And had Plaintiff merely filled out TLG’s survey, it would have received a full letter grade higher on TLG’s score. *Expert Report of Professor Sean Nicholson* (Aug. 7, 2025), Ex. 6.

¹ Those seven include CPOE, BCMA, IPS, Safe Practice 1: Culture of Leadership Structures and Systems; Safe Practice 2: Culture Measurement, Feedback & Intervention; Total Nursing Care Hours per Patient Day; and Hand Hygiene.

Based on the foregoing, and as more fully set forth in the Complaint, TLG engages in deceptive trade practices by, among other things, deceiving consumers about its grading methods by implying that Plaintiff has failed on certain measures that, in truth, TLG has no data or other basis to evaluate; deceiving consumers by telling them the Hospital Safety Grade reflects how well a hospital does on safety, not whether they complete the Hospital Survey; deceiving consumers when it represents that it does not grade hospitals if it lacks sufficient data, when, in truth, it does grade hospitals by “imputing” or making up a grade for the Deceptive Score Categories; hiding the truth about its “imputation model” from consumers by burying it in fine print on a separate website; punishing non-participating hospitals by “imputing” scores, which artificially deflate a hospital’s Safety Grade; and favoring participating hospitals. Additional factual bases for the Plaintiff’s claims are presented in the Complaint.

Interrogatory No. 4: Describe the scoring or grading methodology You believe Leapfrog should have used to assess Your hospital’s patient safety performance and explain why that method would yield a different result.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff’s provision of an alternative scoring or grading methodology has nothing to do with the claims and defenses in this case related to TLG’s decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it calls for speculation.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff responds that TLG should use a scoring system that is not unfair or deceptive. By way of example only, TLG could decline

to grade hospitals that do not participate in TLG's survey, because their decision not to participate means TLG is missing seven process measures that rely on voluntary submission of hospital data. This would yield a different result, because the hospitals would not receive a grade at all. TLG's methodology certainly should not affirmatively assign an arbitrary low score to a particular metric just because a hospital does not provide data for that metric.

Interrogatory No. 5: State whether You submitted any data, corrections, or appeals to Leapfrog regarding the Safety Grade Your hospital received, and for each such submission, identify the date of the submission, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the submission, and the content of the submission.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted "any data, corrections, or appeals to Leapfrog regarding the Safety Grade" Plaintiff hospital received has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG's possession, custody and control, or equally available to TLG.

Answer: Subject to the foregoing objections, Plaintiff engaged in correspondence prior to the commencement of this case demanding that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, but at every turn TLG refused.

Amended Answer: Subject to the foregoing objections, Plaintiff did not submit any data, corrections or appeals to Leapfrog regarding the Safety Grades it has received.

Interrogatory No. 6: State whether You provided any comment or input in any form during Leapfrog's requests for public comments for planned updates to the Leapfrog Hospital Safety

Grade methodology that was proposed for the calculation of Hospital Safety Grades (including but not limited to for the Fall 2024 methodology update). If yes, please identify the date of the comment, the medium of the submission (i.e. telephone, video conference, email, letter, etc.), who was involved in the comment and the content of the comment. If no, please state the reason why You chose not to comment.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Whether or not Plaintiff submitted “any comment or input” in response to TLG’s request for public comments has nothing to do with claims and defenses in this case related to TLG’s decision to use deceptive business practices. Plaintiff further objects to this Interrogatory to the extent it seeks information that is already in TLG’s possession, custody and control, or equally available to TLG.

Subject to the foregoing objections, Plaintiff did not provide comments in response to Leapfrog’s requests for public comments for planned updates to the Leapfrog Hospital Safety Grade scoring system because Plaintiff generally does not respond to requests for public comment from private entities like TLG.

Interrogatory No. 7: Describe all actions Your hospital took in response to (or in deciding not to respond to) its Safety Grade or the Hospital Survey, including internal meetings, media statements, or public relations efforts. In so answering, state the date of the action, the individuals involved in the action and the content of the action.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “all actions” Plaintiffs may have taken in response to TLG’s Safety Grades. *See Megdal Assocs., LLC v. La-Z-Boy, Inc.*, No. 14-81476-CIV, 2016 WL 4503337, at *6 (S.D. Fla. Feb. 1, 2016) (finding interrogatories asking for “‘all’

facts or witnesses that support an opposing party's case" to be "unduly broad") (citing 8B Wright, Miller, & Kane, Federal Practice and Procedure: Civil 3d § 2167 (2015)). Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG's deceptive and unfair Safety Grade. Plaintiff's response included meeting internally with Plaintiff's leadership team, medical executive committee, and governing board, corresponding with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action.

Amended Answer: Subject to the foregoing objections, Plaintiff devoted substantial time and resources that could have otherwise been spent continuing to improve patient care to respond to the significant harm and disruption caused by TLG's deceptive and unfair Safety Grades. Plaintiff's response included meeting internally with Plaintiff's leadership team, medical executive committee, and governing board, corresponding through Plaintiff's corporate parent with TLG to demand that TLG reform its deceptive practices and cease and desist reporting deceptive and unfair Safety Grades, and devoting substantial time and resources to facilitate the preparation and prosecution of this Action. Plaintiff has also held many phone calls and meetings with physicians and other stakeholders about the TLG grades, explaining how the grades were deceptive and did not accurately reflect the hospital quality and patient safety at Plaintiff.

Interrogatory No. 8: Identify any and all persons, whether internal or external (e.g., patients, vendors, affiliates, parents, agents, partners, media) with whom You communicated in any way with respect to the Safety Grade or the Hospital Survey. In so answering, state the date of the communication, the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.) and the content of the communication.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of “any and all persons, whether internal or external.” Plaintiff will disclose the categories of individuals with whom Plaintiff communicated about the Safety Grade or Hospital Survey during the Relevant Time Period. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that Health Insurance Portability and Accountability Act (“HIPAA”), among other statutes and regulations, bars Plaintiff from disclosing. Plaintiff further objects to this Interrogatory to the extent it seeks information that is subject to a claim of privilege or otherwise protected from disclosure, including seeking information protected by the attorney-client privilege, work-product doctrine, or other immunity.

Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff’s governing board, its medical executive committee, department directors, and physicians and nurses when asked about the Safety Grade or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grade for Plaintiff’s hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG’s release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any

information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and since then, has engaged in various social networking and other marketing campaigns to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of the network.

Amended Answer: Subject to the foregoing objections, Plaintiff communicated with the following categories of people regarding the Safety Grade or the Hospital Survey: Plaintiff's governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff's hospital. Most of these communications occurred during regularly scheduled meetings, during which attendees were told about TLG's release of the deceptive and unfair Safety Grade, that Plaintiff does not participate in the Hospital Survey because it is unreliable and not an accurate reflection of hospital quality and safety or patient outcomes, and that the Safety Grade, which was not based on any information provided by Plaintiff, was misleading. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of the network. Plaintiff also engaged in email discussions about TLG's misleading grades, either as sender or recipient, which TLG has through Plaintiff's production of documents.

Interrogatory No. 9: Describe all instances in which a third party declined to contract with, refer patients to, or work with Your hospital, where Leapfrog's grade was cited or discussed. In so identifying list the name of the individuals involved in the communication, the medium of the communication (i.e. telephone, video conference, email, letter, etc.), the date of the communication and the content of the communication.

Answer: Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it requires Plaintiff to “[d]escribe all instances” in which a third party took an action in response to TLG’s deceptive grade.

Subject to the foregoing objection, Plaintiff is not aware of any responsive instances.

Interrogatory No. 10: Describe with specificity the basis for each and every category of damage You claim You incurred as a result of the Leapfrog Safety Grade. In so identifying, list each category of damages and the dollar value of each category of damage You claim.

Plaintiff objects to this Interrogatory to the extent it seeks information that is the subject of expert testimony.

Answer: Plaintiff will submit expert reports on August 7, 2025, per the Pretrial Scheduling Order.

Amended Answer: Plaintiff has served the expert report of Thomas Chakurda, which addresses the issue of reputational harm and harm to Plaintiff’s goodwill. Plaintiff further objects to this Interrogatory as overbroad and unduly burdensome to the extent it seeks “each and every” category of claimed damages.

Subject to the foregoing objections and as agreed during the parties’ September 3, 2025 meet and confer, Plaintiff will limit its response to the live non-monetary claims, including injunctive and declaratory relief, to remedy harm to Plaintiff’s reputation and goodwill. Plaintiff’s reputation and goodwill has been damaged by TLG’s false and misleading methodology and resulting Safety Grades. Plaintiff’s claim for reputational harm is based on, among other things, concerns raised by patients, doctors, staff, and community members, as well as false and misleading statements based on TLG’s false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

By way of example, our Board of Directors has informed me that they have been barraged by community constituents and leaders about the Medical Center's poor TLG Hospital Safety Grade. Further, our medical leadership has received direct inquiries from patients regarding their concerns about TLG's grades and related public reports. The harm caused by TLG's false and misleading Safety Grade is ongoing.

Interrogatory No. 11: Identify all adverse patient events which occurred at Your hospital, including any citations received from regulatory agencies, accrediting agencies, and third party payors such as The Joint Commission, CMS, state health departments, etc. during the period covered by each Leapfrog Safety Grade publication of which You complain (i.e., Fall 2024, Fall 2025, etc.), as well as any complaints received from patients regarding the same.

Plaintiff objects to this Interrogatory because it is overly broad, unduly burdensome, seeks discovery of information that is irrelevant to the claims and defenses in this Action, seeks information that is beyond the scope of Leapfrog's Hospital Survey, and is not reasonably calculated to lead to the discovery of admissible evidence. TLG does not include "all adverse patient events," "citations received from" agencies or payors, or "complaints received from patients" in TLG's determination of its Hospital Safety Grades or request such information in the Hospital Survey, so any such information is irrelevant to whether TLG's actions constitute unfair or deceptive trade practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff also objects to this Interrogatory to the extent it seeks protected health information that HIPAA, among other statutes and regulations, bars Plaintiff from disclosing.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Defendant has agreed to withdraw this Interrogatory.

Interrogatory No. 12: Describe in detail how Your hospital compares nationally on on [sic] any other ranking of patient safety performance, including but not limited to Vizient, Inc., Premier, Inc., HealthTrust Purchasing Group, The Joint Commission, HealthGrades, US News, Newsweek,

Statista, Definitive Healthcare, or any other quality benchmarking entity including benchmarking on patient safety including on adverse events and on healthcare-acquired infections.

Plaintiff objects to this Interrogatory's request that Plaintiff "[d]escribe in detail how Your hospital compares nationally" based on undisclosed "benchmarking" as vague and confusing. To the extent this Interrogatory seeks the top-line rankings of the identified organizations, Plaintiff objects to this Interrogatory because such information is publicly and equally available to TLG. To the extent this Interrogatory asks Plaintiff to compare itself to the named and unnamed entities, that request is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Other organizations' rankings have nothing to do with the claims and defenses in this case related to the Deceptive Score Categories or TLG's decision to use deceptive business practices.

Answer: Subject to the foregoing objections, Plaintiff has received numerous awards and accolades, including many that are directly relevant to patient care for both the low-income underserved community in which it resides and the greater central Florida east coast.

Plaintiff has several accreditations that demonstrate the high-quality of care it provides to pregnant women and children in the community. For example, it is an accredited acute care hospital that is a Level I adult and pediatric Trauma Center. A Level I Trauma Center is a healthcare facility that is central to the trauma system and capable of providing the highest level of care for every aspect of injury for both adults and children. Plaintiff is also a Level III NICU, meaning it provides lifesaving care for babies born before 32 weeks' gestation and / or weighing less than 1,500 grams (approximately 3.3 pounds) or babies with specific medical conditions that require

surgery or specialized pediatric care. Additionally, Plaintiff is one of only 11 designated hospitals by the Florida Department of Health as a Regional Perinatal Intensive Care Center (RPICC) that provides obstetrical services to women who have a high-risk pregnancy and care for newborns with special health needs, such as critical illness or low birth weight. Plaintiff is also certified by the American College of Surgeons for the Verified Pediatric Surgery Program, which recognizes hospitals that properly address the surgical care of infants and children.

Plaintiff is also a Commission on Accreditation of Rehabilitation Facilities (“CARF”) accredited facility for its stroke, brain injury and amputation specialty services. Achieving CARF accreditation means that our hospital meets CARF’s standards and has demonstrated a commitment to being among the best available to patients. We are also a Certified Comprehensive Stroke Center, which means we are dedicated to raising the bar for evaluating and evolving the care of patients at every part of the stroke care continuum. Additionally, Plaintiff has achieved a Det Norske Veritas (DNV) for Comprehensive Stroke Certification. A DNV Comprehensive Stroke Certification demonstrates that Plaintiff provides the highest quality of care and offers evidence-based treatments with cutting-edge research protocols for stroke patients. In order to be accredited, Plaintiff had to undergo an on-site visit on a triennial basis, in which a trained DNV site visit reviewer visits the facility and reviews its required stroke program activity documentation to ensure compliance with the standards. The entities that award and assign these accreditations and certifications visit the healthcare facility and perform regular periodic in-person reviews, audits, surveys and assessments of the facility.

Additionally, Plaintiff is accredited by the Joint Commission, the nation’s largest hospital accreditor that evaluates hospitals’ quality performance standards through an objective evaluation process. Plaintiff has been accredited by the Joint Commission for specialization certifications for

Spine Surgery and Total Joint Replacement for Hip and Knee—a certification designed for hospitals providing the critical elements to achieve long-term success in improving critical medical outcomes—which signifies our services have delivered evidence-based proof of clinical quality sought by patients and payers alike.

These accreditations and certifications are particularly important given Plaintiff's patient population. With its accreditation and specialties, Plaintiff provides patients care they are not able to receive at other facilities. Plaintiff sees more transfers to its facility from nearby hospitals who are unable to provide patients with the care they need than any other Palm Beach County hospital. Also, due to its location in a low-income community, Plaintiff treats a significant number of high-risk pregnancies in which infant mortality is a serious risk and heartbreaking reality.

Plaintiff has also received numerous awards that exemplify its quality. Plaintiff received multiple Get with the Guidelines awards, including Stroke Gold Plus Award 2024 (13th Consecutive Year); Stroke Elite Plus Honor Roll; Stroke Advance Therapy Honor Roll; and Type 2 Diabetes Honor Roll. The Get with the Guidelines Stroke program is designed to improve stroke care by promoting consistent adherence to the latest scientific treatment guidelines.

Additionally, Plaintiff has been recognized by BlueCross BlueShield with a Blue Distinction Centers for Knee, Hip Replacements, Spine Surgery and Maternity Care designation, as part of the Blue Distinction Specialty Care program. The Blue Distinction Specialty Care is a national designation program that recognizes health providers that demonstrate expertise in quality and affordable health care to meet consumers' specialty care needs.

Plaintiff has also received numerous awards that recognize the high-quality care it provides to pregnant women and children. For example, it recently received the Florida Department of Health and Florida Agency for Health Care Administration Excellence for Maternal Care Award,

which highlights hospitals that surpass Florida Department of Health's goal of reducing the rate of C-sections among first-time mothers with low-risk pregnancies. Similarly, the Florida Hospital Association also recently awarded Plaintiff the Excellence in Maternity Care designation, which is awarded to a hospital that demonstrates exceptional dedication to maternal health care.

Additionally, the Palm Beach Post has awarded Plaintiff with Community Choice Awards for Best Hospital, Best Orthopedic/Sports Medicine 2024 and Best Maternity and Childbirth Center 2024 & 2025. The Palm Beach County Community Choice Awards celebrate the best business and organizations in the area, with people in the community voting on these designations.

The medical rankings organization Healthgrades awarded Plaintiff numerous accolades. To assess and evaluate hospitals, Healthgrades relies on data from Medicare medical claims records and states' data on Medicare and commercially insured patient outcomes to determine patients' actual clinical outcomes when visiting a given hospital. Plaintiff has received several awards from Healthgrades for various specialties, including:

a. Labor and Delivery

- i. Five-Star Recipient for C-Section Delivery for 11 years in a row
- ii. Five-Star Recipient for Vaginal Delivery for 11 years in a row

b. Orthopedic

- i. Five-Star Recipient for Hip Fracture Treatment (2024)
- ii. Five-Star Recipient for Knee Replacement (2024)

c. Spine Surgery

- i. Five-Star Recipient for Spinal Fusion (2025)

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Amended Answer: Subject to the foregoing objections, Plaintiff has received numerous awards and accolades. For example, Plaintiff has several accreditations that demonstrate the high-quality of care it provides to pregnant women and children in the community. For example, it is an accredited acute care hospital that is a Level I adult and pediatric Trauma Center. Additionally, Plaintiff is one of only 11 designated hospitals by the Florida Department of Health as a Regional Perinatal Intensive Care Center (RPICC) that provides obstetrical services to women who have a high-risk pregnancy and care for newborns with special health needs, such as critical illness or low birth weight. Plaintiff is also certified by the American College of Surgeons for the Verified Pediatric Surgery Program, which recognizes hospitals that properly address the surgical care of infants and children.

Plaintiff is also a Commission on Accreditation of Rehabilitation Facilities (“CARF”) accredited facility for its stroke, brain injury and amputation specialty services. We are also a Certified Comprehensive Stroke Center. Additionally, Plaintiff has achieved a Det Norske Veritas (DNV) for Comprehensive Stroke Certification.

Additionally, Plaintiff is accredited by the Joint Commission. Plaintiff also has been accredited by the Joint Commission for specialization certifications for Spine Surgery and Total Joint Replacement for Hip and Knee.

Plaintiff has also received multiple Get with the Guidelines awards, including Stroke Gold Plus Award 2024 (13th Consecutive Year); Stroke Elite Plus Honor Roll; Stroke Advance Therapy Honor Roll; and Type 2 Diabetes Honor Roll.

Additionally, Plaintiff has been recognized by BlueCross BlueShield with a Blue Distinction Centers for Knee, Hip Replacements, Spine Surgery and Maternity Care designation, as part of the Blue Distinction Specialty Care program.

Plaintiff recently received the Florida Department of Health and Florida Agency for Health Care Administration Excellence for Maternal Care Award. Similarly, the Florida Hospital Association also recently awarded Plaintiff the Excellence in Maternity Care designation.

Additionally, the Palm Beach Post has awarded Plaintiff with Community Choice Awards for Best Hospital, Best Orthopedic/Sports Medicine 2024 and Best Maternity and Childbirth Center 2024 & 2025.

The medical rankings organization Healthgrades awarded Plaintiff numerous accolades, including:

a. Labor and Delivery

- i. Five-Star Recipient for C-Section Delivery for 11 years in a row
- ii. Five-Star Recipient for Vaginal Delivery for 11 years in a row

b. Orthopedic

- i. Five-Star Recipient for Hip Fracture Treatment (2024)
- ii. Five-Star Recipient for Knee Replacement (2024)

c. Spine Surgery

- i. Five-Star Recipient for Spinal Fusion (2025)

In addition, Plaintiff will produce and identify documents reflecting some of Plaintiff's rankings from other organizations.

Also, Plaintiff does not participate in Vizient and has not done so during the Relevant Time Period.

Interrogatory No. 13: Describe any steps taken by Your hospital to improve any and all of the patient safety measures considered by Leapfrog's Hospital Safety Grade (as set forth on Leapfrog's published scoring methodology documents; see ECF No. 21-3 at 6-10; ECF No. 21-43 at 6-9), before and after each Safety Grade publication of which You complain.

Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks the identity of Plaintiff's improvements to "any and all" patient safety measures considered by Leapfrog's Hospital Safety Grade. Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks information on metrics other than TLG's Deceptive Score Categories and to the extent it seeks information that is beyond the scope of Leapfrog's Hospital Survey.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff is committed to continual improvement of patient safety measures, motivated by our commitment to ensuring the best possible patient safety—not chasing the best possible Leapfrog grade. To achieve this core objective, Plaintiff devotes significant time and resources to improving its delivery of the highest possible quality of care for those in the community it serves, including efforts to improve its performance in areas related to the four metrics Plaintiff has chosen to impute in its survey.

Plaintiff tracks three of these metrics through its patient safety plan or as part of its quality improvement patient safety committee. For example, Plaintiff does random hand washing audits every month on every unit and addresses any negative trends. Plaintiff already has 24/7 ICU coverage for its intensivist unit and has had that coverage for several years, so it does not need to track this metric.

Interrogatory No. 14: State whether You are aware of specific patients who have relied on the Leapfrog Safety Grade in declining to receive healthcare services at Your hospital. In so

answering, identify the individual patient that declined to receive services, the date of such declination, the type of service the patient declined to receive, the medium for the communication from the patient (i.e. telephone, video conference, email, letter, etc.), the content of the communication, and the reason given for the stated decision.

Plaintiff objects to this Interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to a Qualified Protective Order entered by this Court.

Answer: Subject to the foregoing objection, Plaintiff has received reports that patients considered or decided not to use Plaintiff's facility because of TLG's misleading grades.

Amended Answer: Subject to the foregoing objection, since the release of TLG's false and misleading grades, Plaintiff has received numerous reports from doctors that patients considered or decided not to use Plaintiff's facility due to concerns related to TLG's misleading grades.

Interrogatory No. 15: Describe any effort Your hospital has made to influence public perception of Your hospital's performance on patient safety following the publication of the Leapfrog Safety Grade.

Plaintiff objects to this Interrogatory as vague and ambiguous because it does not specify which Leapfrog Safety Grade is at issue. Plaintiff will construe this Interrogatory to reference TLG's deceptive Safety Grades beginning in Fall 2024. Plaintiff objects to this Interrogatory as overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks "any effort" Plaintiff "has made to influence public perception" after the release of TLG's deceptive and unfair Safety Grades because there have been many such "efforts" and those "efforts" are ongoing given the significant harm caused by TLG's deceptive and unfair business practices.

Answer: Subject to the foregoing objections, Plaintiff continues to influence public perception by, among other things, delivering the highest quality care to the community it serves, which, as discussed in response to Interrogatory 12, has led to numerous awards, accreditations, and accolades. In addition, several public statements disputing the misleading nature of the Safety Grade have been made on Plaintiff's behalf.

Supplemental Answer: In addition to the above, members of hospital leadership have communicated with patients, doctors, or community members on a regular basis to dispel the misleading nature of the Leapfrog Safety Grades. For instance, Plaintiff communicated its governing board, its medical executive committee, department directors, physicians and nurses, and patients when asked about the Safety Grades or Hospital Survey. These communications occurred in and after Fall 2024, after TLG released its deceptive and unfair Safety Grades for Plaintiff's hospital. The Palm Beach Health Network also issued a press release and has engaged in marketing efforts, including through social media, to counteract TLG's deceptive scores on behalf of Plaintiff and other affected members of the network. Plaintiff also engaged in email discussions about TLG's misleading grades, either as sender or recipient, which TLG has through Plaintiff's production of documents.

Interrogatory No. 16: Describe the due diligence Your hospital undertakes to ensure the accuracy of its own publicly reported safety data (including but not limited to data submitted to CMS, the CDC, and third party organizations).

Plaintiff objects to this Interrogatory as vague and ambiguous due to its use of the undefined term "due diligence." Plaintiff further objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Any "due diligence"

Plaintiff performs when reporting to *third parties* has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices, especially when TLG does nothing to ensure the accuracy of information that hospitals that participate in its survey self-report.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff makes reasonable efforts to ensure the accuracy of the data it reports to third-party organizations. For instance, Plaintiff employs data abstractors, quality coordinators and a Quality Director, who are all responsible for abstracting, validating, and submitting safety data.

Interrogatory No. 17: Describe in detail how You communicate to the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System the outcome of any and all healthcare safety ratings, evaluative publications, studies, or performance analyses that Your Hospital receives.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's communication, if any, with the shareholders, board members, collective bargaining representatives and investors of Tenet Healthcare System, all non-parties to this litigation, has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff communicates with Tenet stakeholders, including employees who work to support the Palm Beach Health Network, on a range of matters, including issues related to patient safety and outcomes and in particular related

to TLG and the Safety Grades by email and oral communication. Those communications included discussions about the reasons for particular grades, the method used to calculate Safety Grades, the value of Safety Grades, and responses to the Safety Grades. In addition, identified below are documents Plaintiff produced evidencing communications between the Plaintiff Hospitals and Tenet related to TLG, the Leapfrog survey, and Safety Grades.

Start Page	End Page
PBHN000006509	PBHN000006513
PBHN000006548	PBHN000006550

PBHN000004704	PBHN000004704
PBHN000004715	PBHN000004719
PBHN000006465	PBHN000006466

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 18: State whether the compensation of Your Chief Executive Officer or any other executive-level leadership officers is tied to or related in any way to Your hospital's performance on patient safety, union worker contracts or Your hospital's ratings by third party ratings organizations' ratings publications (including but not limited to the Leapfrog Hospital Safety Grade).

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action. Plaintiff's method of compensating its Chief

Executive Officer and other executive-level leadership **has nothing to do with the** claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objection, Plaintiff's performance on patient safety, union worker contracts, or ratings by third party ratings organizations' ratings publications is related in some way to the compensation of Plaintiff's Chief Executive Officer or other executive-level leadership officer(s).

Interrogatory No. 19: Identify all hospitals, medical centers, or healthcare systems that you consider to be your direct competitors within the relevant geographic market during the time period covered by the Complaint and describe in detail the criteria you use to determine whether another hospital or healthcare provider is a competitor.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. The identity of Plaintiff's competitors and "the criteria" used to determine whether a hospital or provide is a competitor has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices. Plaintiff also objects to this Interrogatory to the extent it seeks confidential, proprietary information, and commercially sensitive information related to Plaintiff's scoring system and "criteria" used to determine whether a hospital or provide is a competitor.

Answer: Subject to the foregoing objections and on condition that this response is considered "Confidential" under the forthcoming agreed confidentiality order, Jupiter Medical Center is Plaintiff's competitor. Plaintiff considers this hospital a competitor because of its

proximity to Plaintiff, its competing services lines, and that patients within Plaintiff's service area go to this hospital for medical care.

Interrogatory No. 20: State and describe the results of any market analysis, competitive analysis, or consumer perception surveys you have conducted or commissioned regarding your competitors from 2020 to present, and identify the individuals or entities that prepared or participated in such analyses.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is irrelevant to the claims and defenses in this Action and is not is not proportional to the needs of this Action. The results of any market analysis, competitive analysis, or consumer perception surveys and the identity of those who prepared or participated in such analyses has nothing to do with the claims and defenses in this case related to TLG's decision to use deceptive business practices.

Answer: Plaintiff declines to respond to this Interrogatory.

Amended Answer: Plaintiff further objects to this Interrogatory to the extent it requests information from outside of the relevant time period of January 1, 2023, to present. Plaintiff also objects to this Interrogatory as unduly burdensome to the extent it asks Plaintiff to "state and describe" various market analysis.

As agreed during the parties' meet and confer on September 3, 2025, Plaintiff will produce documents showing the results of studies or surveys Plaintiff has conducted or commissioned related to internal market analysis, competitive analysis, or consumer perception. Plaintiff will identify the documents responsive to this Interrogatory by Bates number in Plaintiffs' production cover letter.

Interrogatory No. 21: Identify with specificity any comments or concerns raised by any third party payor, bank or lender, or investor related to Your hospital's reputation and/or public perception on issues in any way involving patient safety or satisfaction.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this case to the extent it seeks "comments and concerns" from third parties related generally to Plaintiff's reputation that has nothing to do with the specific and significant reputational harm caused by TLG's misleading grades.

Answer: Subject to the foregoing objections, Plaintiff will produce and identify documents related to the significant reputational harm caused by TLG's deceptive and unfair Safety Grades that provide sufficient detail to respond to this Interrogatory.

Amended Answer: Subject to the foregoing objections, Plaintiff is unaware of any documents related to this Interrogatory.

Interrogatory No. 22: Identify and describe any complaints, concerns, or comments from patients, community members, or referring physicians that relate to the hospital's reputation or comparisons to other hospitals in the region.

Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not proportional to the needs of this Action to the extent it seeks "comments and concerns" from patients, community members, or referring physicians that have nothing to do with the significant reputational harm caused by TLG's misleading grades. Plaintiff also objects to this interrogatory as seeking protected health information that is protected from disclosure by HIPAA, among other

statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff's facility because of TLG's misleading grades.

Amended Answer: Subject to the foregoing objections, Plaintiff has received reports that patients and physicians considered or decided not to use Plaintiff's facility because of TLG's misleading grades. In addition, concerns have been raised by patients, doctors, staff, and community members, and Plaintiff is aware of false and misleading statements based on TLG's false and misleading methodology and Safety Grades made in newspapers, viral social-media videos, television programs, and blogs.

Our Board of Directors has informed me that they have been barraged by community constituents and leaders about the Medical Center's poor TLG Hospital Safety Grade. Further, our medical leadership has received direct inquiries from patients regarding their concerns about TLG's grades and related public reports. The harm caused by TLG's false and misleading Safety Grade is ongoing.

In addition, the following produced documents evidence such harm.

Start Page	End Page
PBHN000002082	PBHN000002085
PBHN000002066	PBHN000002070
PBHN000002615	PBHN000002617
PBHN000006397	PBHN000006401
PBHN000002090	PBHN000002094
PBHN000004484	PBHN000004484

PBHN000004564	PBHN000004564
PBHN000004574	PBHN000004580
PBHN000004557	PBHN000004557
PBHN000008718	PBHN000008718
PBHN000006461	PBHN000006462
PBHN000008914	PBHN000008914
PBHN000008915	PBHN000008915

Discovery is ongoing, and Plaintiff reserves the right to amend, modify or supplement the response to this Interrogatory.

Interrogatory No. 23: List with specific detail each and every concern, complaint or comment made by any union, collective bargaining unit or employee association in any way related to patient safety at Your hospital.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is overly broad, unduly burdensome, and not proportional to the needs of this Action to the extent it seeks “each and every concern, complaint or comment ” from third parties that have nothing to do with the significant reputational harm caused by TLG’s misleading grades. Plaintiff also objects to this Interrogatory to the extent it seeks health information that is protected from disclosure by HIPAA, among other statutes and regulations. Plaintiff will only produce this information as needed and subject to the agreed protective order entered by this Court.

Answer: Subject to the foregoing objections, Plaintiff is unaware of any concern, complaint or comment regarding TLG deceptive scores made by the union at Plaintiff’s hospital.

Interrogatory No. 24: Identify any and all criticism You have received since 2020 from Tenet Healthcare Corporation and/or from any individual executive of Tenet Healthcare Corporation regarding Your hospital’s performance in any way.

Answer: Plaintiff objects to this Interrogatory because it seeks discovery of information that is overly broad, unduly burdensome and irrelevant to the claims and defenses in this Action and is not reasonably calculated to lead to the discovery of admissible evidence. Any so-called

“criticism” has nothing to do with the claims and defenses related to TLG’s decision to use deceptive business practices. TLG has, therefore, only propounded this Interrogatory for purposes of harassment. Plaintiff declines to respond to this Interrogatory.

Amended Answer: As discussed during the parties’ meet and confer on September 3, 2025, TLG agreed to narrow this Interrogatory to concern only “criticism...regarding Your hospital’s patient safety.” After a reasonable and diligent search, Plaintiff is unaware of having received “criticism” from Tenet Health Corporation regarding patient safety. Plaintiff is always working to improve its performance, quality, and safety in a constructive way and engages with Tenet Health Corporation as needed to ensure Plaintiff provides the best patient care possible.

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

**AFFIDAVIT OF CYNTHIA MCCAULEY IN SUPPORT OF
PLAINTIFF ST. MARY'S MEDICAL CENTER, INC.'S
AMENDED AND SUPPLEMENTED RESPONSES AND OBJECTIONS TO
DEFENDANT THE LEAPFROG GROUP'S FIRST SET OF
INTERROGATORIES TO ST. MARY'S MEDICAL CENTER**

I, Cynthia McCauley, declare as follows:

1. I am over 21 years of age and competent to give this testimony.
2. I am the Chief Executive Officer of St. Mary's Medical Center, Inc. ("Plaintiff"). I am the corporate representative of Plaintiff for the purpose of answering Defendant The Leapfrog Group's First Set of Interrogatories to St. Mary's Medical Center. I have read the foregoing interrogatories and the answers to those interrogatories, which are true according to the best of my knowledge, information, and belief.
3. I declare under penalty of perjury that the foregoing is true and correct.

Executed on September 8, 2025.

Cynthia McCauley

Hi Gina,

Leapfrog participation is not supported unless it is directly tied to a payment/contract or a local regulatory requirement.

Thanks,
Anna

Subject: Leapfrog

Anna,

If we would like to participate in the next survey, are we able? We have done this in the past, so it would not be new participation. Because we aren't participating, we default to imputed scoring. This takes SMMC from 100 points in each of the categories below to limited achievement scores. We will likely decrease an entire letter and score a "D" this time around.

STEP 2: USE IMPUTATION POINT ASSIGNMENT (APPLIES TO CPOE, BCMA, IPS AND HAND HYGIENE)

If the hospital does not have historical data from the last two rounds (i.e., spring 2024, fall 2023) of the Safety Grade, the hospital is assigned a point value that is equivalent to receiving "Limited Achievement" for this measure on the Leapfrog Hospital Survey.

Note about IPS: Only hospitals that operate an adult or pediatric medical and/or surgical ICU or neuro ICU are eligible for Step 2 imputation of the IPS measure. A hospital's ICU designation (i.e., operating a medical ICU, surgical ICU, or pediatric ICU) is determined from the number of medical, surgical and/or pediatric ICU beds reported in Worksheet S-3 Part 1 of the hospital's most recent CMS Cost Report. If your hospital does not operate an ICU, but shares a CMS Certification Number with a hospital that does, please [contact the Help Desk](#) immediately if an IPS score was imputed.

Step 2 Imputation Point Assignments

Measure	Leapfrog Hospital Survey Performance Category	Corresponding Safety Grade Measure Score
CPOE	Limited Achievement	15
BCMA	Limited Achievement	25
IPS	Limited Achievement	5
Hand Hygiene	Limited Achievement	15

Good morning, Quality Leaders,

I am doing an annual check-in on Leapfrog participation.

Please respond to this email with answers to the following questions:

Name of facility:

Is your facility participating in Leapfrog?

If yes, is participation tied to a local requirement or payer/reimbursement? Please provide some detail.

As a reminder, new participation in Leapfrog must be approved by home office clinical operations leadership.

Thank you,
Anna

Subject: RE: Fall 2024 Leapfrog Hospital Safety Grade Embargo Period
Attachments: Calculator_Fall2024_EmbargoPeriod West Boca Medical Center.xlsx; WBMC Safety Grade 11.4.2024.docx

Good Afternoon,
The Letter Grade is a D.

It is important to state that the following scores were imputed since West Boca did not complete a survey:

CPOE: Received 15 (100 is Achieved Standard)
BCMA: Received 25 (100 is Achieved Standard)
ICU Physician Staffing: Received 5 (100 is Achieved Standard)
Hand Hygiene: Received 15 (100 is Achieved Standard)

Also, since a survey was not completed, the following appear as declined to report

Safe Practice 1: Leadership: Declined to Report
Safe Practice 2: Culture: Declined to Report
Total Nursing Care Hours: Declined to Report

How to achieve a higher grade:

I utilized the Excel report as a guide and changed the imputed scores and N/A Scores to 100 as if we did the survey, the grade moves to a C with a score of 2.7065 (The score for a B is 2.991)

In order to move to a B, in addition to achieving 100 on the imputed scores and the declined to report scores, the Patient Experience Scores need to move to the 80s from the 60s or the HAIs need to be 0.00.

Thanks,
Andrea

Doctors order medications through a computer

Hospitals can use Computerized Physician Order Entry (CPOE) systems to order medications for patients in the hospital, instead of writing out prescriptions by hand. Good CPOE systems alert the doctor if they try to order a medication that could cause harm, such as prescribing an adult dosage for a child. CPOE systems help to reduce medication errors in the hospital.

Hospitals can earn up to 100 points for using a well-functioning CPOE system in most areas of the hospital. [For details on sources, click here.](#)

What safer hospitals do:

Hospitals use CPOE systems in all areas of the hospital and regularly test those systems to ensure they are alerting doctors to potential ordering errors.

Notes and Definitions

1. Declined to Report: The hospital was asked to provide this information to the public, but did not.

2. Not Available: "Not Available" means that the hospital does not have data for this measure. This could be because the measure is related to a service the hospital does not provide. For example, a hospital that does not have an ICU would not be able to report data about ICUs. It could also be because the hospital had too few patients or cases to report data for a particular condition or procedure. A "Not Available" result does not mean that the hospital withheld information from the public.

3. Straight A: The hospital has earned an 'A' Grade for five consecutive grading rounds or more, qualifying it for recognition as a "Straight A" hospital.

4. * The hospital declined to report their performance on this measure, so a score was assigned to reflect the lack of information available.

LEGAL DISCLAIMER: The Leapfrog Hospital Safety Grade scores hospitals on their overall performance in keeping patients safe from preventable harm and medical errors. Terms of Use for the Leapfrog Hospital Safety Grade

**PLEASE READ THE FOLLOWING
TERMS AND CONDITIONS
CAREFULLY.**

By using this website, you, on behalf of yourself and any person or entity on whose behalf you access or use this website (collectively, “you” or “your”), agree to be legally bound by the Terms of Use for this website (the “Agreement”), and this Agreement will constitute a contract between you and The Leapfrog Group (“Leapfrog”). Leapfrog may amend this Agreement at any time by posting the amended terms on its website, and your continued access to Leapfrog’s website constitutes your acceptance of any changes or revisions to this Agreement. Accordingly, we recommend that you consult the Terms of Use each time you use our website. If

you are accessing or using this website on behalf of a person or an entity, you represent and warrant to Leapfrog that you are authorized to accept this Agreement on such person's or entity's behalf, and that such person or entity agrees to indemnify you for violations of this Agreement.

You are being granted access to the information contained on this site in order to enable you to compare hospitals by viewing the results of the Leapfrog Hospital Safety Grade (the "Safety Grade") initiative. The Safety Grade grades hospitals on their overall performance in keeping patients safe from preventable harm and medical errors by using a grade of A, B, C, D or F. The grades are derived from expert analysis of publicly available data using evidence-based, national measures of hospital safety from the Centers for Medicare & Medicaid Services (CMS) and the Leapfrog Hospital Survey, and information from other supplemental data sources. The measures include process, structural and outcomes measures. The measures have been put into two domains – process/structural and outcomes

– with each domain receiving an equal weight of 50% to make up the overall Safety Grade. Nearly 3,000 hospitals receive a grade each time the Leapfrog Hospital Safety Grade is updated. Certain hospitals, including critical access hospitals, specialty hospitals, pediatric hospitals, hospitals in U.S. territories exempt from public reporting to CMS, as well as other hospitals for which adequate data is not available, are excluded from the Grade.

Unless otherwise agreed upon in writing between you and Leapfrog, you may use the grades only for your personal or internal, noncommercial use and must not reproduce, republish, distribute, modify, reverse engineer or otherwise exploit the Safety Grade or this website in whole or in part, in any manner not expressly permitted by this Agreement. Your access to this site is subject to the Terms of Use.

This Agreement was last updated on May 1, 2025.

1. No Recommendations or Medical Advice

The Leapfrog Hospital Safety Grade is not a referral service and does not recommend or endorse any particular hospital. Rather, the Safety Grade is only an intermediary that provides selected information about hospitals. We do not offer advice regarding the quality or suitability of any particular hospital for specific treatments or health conditions, and no information on this website should be construed as health or medical advice. You should obtain any additional information necessary to make an informed decision prior to utilizing any specific hospital.

You are solely responsible for any and all decisions or actions with respect to your medical treatment. The contents of the Safety Grade, such as text, graphics, images, information, and other material contained on the website are for informational purposes only. The content is not intended to be a substitute for professional medical advice, diagnosis, or treatment. Neither Leapfrog nor its affiliates are responsible for the quality of the medical treatment that you receive from any hospital, whether or not you obtained information about such hospital

on or through this website. Never disregard, avoid or delay in obtaining medical advice from your doctor or other healthcare professional because of something you have read on the website. By using the website, you accept all responsibility for the exercise of your informed judgment in your use of or reliance upon the website and the information contained therein. Leapfrog does not recommend or endorse any specific hospitals, physicians, tests, products, procedures, opinions or other information that may be discussed or identified on the website. Leapfrog and its licensors, suppliers and affiliates, and the directors, officers, agents, and representatives of each, assume no (and hereby disclaims all) responsibility or liability of any kind, for any advice, treatment or other services rendered by any hospital or other healthcare provider, or for any malpractice claims and other claims that may arise directly or indirectly from any such advice, treatment or other services.

2. Leapfrog Hospital Safety Grade and Conduct

a. This website provides you, among other things, with access to the results of the Leapfrog Hospital Safety Grade. You agree to use the website and its contents solely in accordance with this Agreement. You agree not to interrupt, or attempt to interrupt, the operation of the website or any part of it in any way.

b. You further agree that you will not (a) "frame" or "mirror" any part of the website or distribute any part of the website through an RSS or similar feed; (b) use the information on the website to engage in activities that would violate any fiduciary relationship, any applicable local, state, national, or international law, or any governmental regulations; (c) express or imply that any statements you make are endorsed by Leapfrog, its affiliates or its members; (d) use any robot, spider, site search/retrieval application or other manual or automatic device or process to retrieve, index, "data mine" or in any way reproduce or circumvent the navigational structure or

presentation of this website or its contents; or (e) harvest or collect information about website visitors. The website may contain links and pointers to other sites on the Internet that may be maintained by third parties. Such links do not constitute an endorsement by Leapfrog, its affiliates or its members of any third-party site or any materials contained therein. Leapfrog, its affiliates and its members are not responsible for, and do not control, the availability, accuracy or privacy policy of such third-party sites or any information, content, products or services accessible from such sites.

c. The Leapfrog Group provides employers, companies, non-profit organizations, researchers, and others the opportunity to gain access to the Leapfrog Hospital Safety Grade dataset through the execution of a Data Use Agreement. Users who wish to gain access to the dataset should contact

info@leapfrog-group.org. All

users without a DUA in place are strictly prohibited from any processes designed to retrieve, index, "data mine" or in any way reproduce or circumvent the navigational structure or presentation of this website or its contents of the website for any purposes.

d. Hospitals wishing to use the Leapfrog Hospital Safety Grade logos or branding for promotional or advertising purposes must have an active licensing agreement in place. The use of any Leapfrog Hospital Safety Grade logo, letter grade logo, or other branding related to the program is strictly prohibited for hospitals that have not obtained a license. Only the official, date-stamped versions of the Designated Leapfrog Logos corresponding to the grading cycle for which they are licensed may be used. Logos may not be altered, modified, or used in a way that removes or obscures the date stamp. Additionally, only the specific hospital facility that has purchased the rights to use the logo may display it. Multi-hospital

systems or parent organizations must not use the logo to represent any facilities that have not individually obtained a license. For more information on obtaining a Leapfrog Hospital Safety Grade license, contact licensing@leapfrog-group.org.

3. Intellectual Property Rights

a. As between you and Leapfrog, the Leapfrog Hospital Safety Grade and all Intellectual Property Rights (defined below) therein are owned by Leapfrog. You acknowledge that Leapfrog selected, compiled, arranged and adjusted data and information regarding Healthcare Providers and the Ratings are original compilations (as defined by the 1976 Copyright Act, 17 U.S.C. § 101) containing material wholly and exclusively original to Leapfrog. You must not reproduce, republish, distribute, modify, reverse engineer or otherwise exploit the Safety Grade or this

website in whole or in part, in any manner not expressly permitted by this Agreement and must not remove or modify any copyright or trademark notice, or other notice of ownership. As between you and Leapfrog, Leapfrog will retain exclusive ownership of the Leapfrog Hospital Safety Grade and the ideas embodied therein, and if you make any modification of the Safety Grade in violation of this Agreement, you will, and hereby do, assign to Leapfrog all of your rights, title, and interests in and to such modifications and all Intellectual Property Rights therein. You acknowledge that the Safety Grade constitutes the proprietary trade secrets of Leapfrog. You may not allow anyone other than yourself to access or use the Safety Grade and must not repost, retransmit or otherwise distribute the Safety Grade, in whole or in part, to any party, except as expressly permitted herein.

b. You understand and agree that, due to the nature of Leapfrog's products and

services, any unauthorized citation, reproduction or republication of the Leapfrog Hospital Safety Grade and use of any of the Safety Grade is likely to be deceptive and cause confusion in the marketplace, suggest non-existent sponsorship or endorsement by Leapfrog, misappropriate Leapfrog's reputation, goodwill, business opportunities and revenues, or otherwise misappropriate the cachet of Leapfrog's products and/or services; thus, you agree not to cite (orally, in writing or otherwise), reproduce or republish the Safety Grade without the prior written permission of Leapfrog and you hereby waive any right to assert any "nominative fair use" or "nominative use" defense in any trademark infringement action brought against you in the event that you do cite, reproduce or republish the Safety Grade without the prior written permission of Leapfrog.

c. All rights not explicitly granted to you and licensees under this Agreement will

remain with Leapfrog.
Unless explicitly stated herein, nothing in this Agreement will be construed as conferring any license to Intellectual Property Rights of Leapfrog, whether by estoppel, implication, or otherwise. Please be aware that we actively and aggressively enforce our intellectual property rights to the fullest extent of the law. Please send an email to info@leapfroggroup.com to receive additional information.

d. "Intellectual Property Rights" means all intellectual property rights of any kind or nature however denominated throughout the world, including, without limitation all copyrights, patents, patent applications, trade secrets, inventions, proprietary know-how, registered and unregistered trademarks, registered and unregistered service marks, domain names, registered and unregistered trade names, rights of privacy and publicity, moral rights, and database rights.

e. In partial consideration of Leapfrog providing this

website, you agree that all Intellectual Property Rights and all ownership of any ideas, modifications, enhancements, improvements, inventions, works of authorship, or any other suggestions you or any of your personnel provides to Leapfrog relating to this website or the Safety Grade will be, and are hereby, assigned to Leapfrog and shall be the sole and exclusive property of Leapfrog.

4. Term and Access

This Agreement takes effect on the date you first access or use the Leapfrog Hospital Safety Grade. Leapfrog reserves the right at any time in its sole discretion to terminate this Agreement and your access to, and use of, the Safety Grade, with or without notice. Upon such termination for any reason, you will cease access to, or use of, the Safety Grade and all of your rights herein will cease and at the request of Leapfrog you will return or destroy all copies of any such content, including Confidential and Proprietary Information, in your possession

and certify in writing to Leapfrog that you have done so. Rights and obligations under this Agreement which by their nature are intended to survive the termination of your authorization to use the Safety Grade will remain in full effect after such termination, including without limitation those of Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10.

5. Linking

You are granted a limited, non-exclusive right to create a text hyperlink to this website for noncommercial purposes, provided such link does not portray Leapfrog, the website, the Leapfrog Hospital Safety Grade, or any of Leapfrog's other products and services, in any misleading, derogatory, or otherwise defamatory manner and provided further that the linking site does not contain any adult or illegal material or any material that is offensive, harassing, or otherwise objectionable. Leapfrog may revoke this limited right at any time. You may not use a Leapfrog logo or other proprietary graphic of Leapfrog to link to this site without the express written permission of Leapfrog. Further, you may not frame, in-line link, or

otherwise utilize framing techniques to enclose any Leapfrog trademark, logo, or other proprietary information, including the content found at this website, without Leapfrog's express written consent. Except as noted above, you are not granted any right or license by implication, estoppel, or otherwise in or under any patent, trademark, copyright, or proprietary right of Leapfrog or any third party.

6. Indemnity and Hold Harmless

You agree to indemnify and hold each of Leapfrog and any agent appointed by Leapfrog to pursue and enforce its rights and to undertake and fulfill its obligations under this Agreement ("Agent") and their respective affiliates and all of their respective past, present and future directors, officers, employees, successors and agents and all of their respective successors and assigns, both individually and in their official capacities (collectively "Indemnitees") harmless from and against any and all liabilities, damages, demands, claims, causes of action, fines or penalties (including, without

limitation, court costs and reasonable attorneys' fees) arising out of or related to the failure of you to fulfill any of your obligations under this Agreement or your use of or access to the Leapfrog Hospital Safety Grade. You hereby expressly forever release, and discharge Leapfrog, the Agents, and the Indemnitees from, and covenant not to assert against Leapfrog, the Agents, and the Indemnitees any and all causes of action, rights or claims of any type or description, known or unknown, which may arise in the future in any way resulting from, arising out of or in connection with your use of the Safety Grade. You agree that you are waiving any right that you may have to obtain or receive any monetary damages or other relief of any kind (including but not limited to settlement proceeds) as a result of any action or proceeding brought by you or by any other person or entity on your behalf regarding your use of the Safety Grade, and to the extent permitted by law, you agree that you will not seek or accept any monetary damages or other relief of any kind in any such action or proceeding.

7. Events Beyond Our Control

You absolve and release us and our affiliates from any claim of harm resulting from any cause(s) over which we or they do not have direct control, including, but not limited to, failure of electronic or mechanical equipment or communication lines, telephone or other interconnect problems, computer viruses or other damaging code or data, unauthorized access, theft, operator errors, severe weather, earthquakes, natural disasters, strikes or other labor problems, wars, or governmental restrictions, and disclosure of your private health information that you have provided to third parties through links on our Site.

8. Disclaimer of Warranties

THIS WEBSITE AND THE LEAPFROG HOSPITAL SAFETY GRADES ARE INTENDED FOR INFORMATIONAL PURPOSES ONLY. WHILE WE ENDEAVOR TO PROVIDE THE MOST ACCURATE, UP TO DATE INFORMATION AVAILABLE, THE SAFETY GRADES MAY CONTAIN TECHNICAL OR OTHER INACCURACIES OR TYPOGRAPHICAL ERRORS, AND MAY BE CHANGED OR UPDATED WITHOUT NOTICE. NEITHER

LEAPFROG NOR ITS AGENT WILL HAVE ANY RESPONSIBILITY AND WILL BEAR NO LIABILITY WHATSOEVER WITH REGARD TO REPLACING, UPLOADING, OR CORRECTING ANY SAFETY GRADE ONCE RELEASED. YOU ACKNOWLEDGE AND AGREE THAT, SINCE THE SAFETY GRADES ARE BASED ON INFORMATION PROVIDED BY THIRD PARTIES, IT IS REASONABLE THAT THE SAFETY GRADES, AND ANY SERVICES PROVIDED UNDER THIS AGREEMENT BE, AND THEY ARE, "AS IS," "AS AVAILABLE" AND "WITH ALL FAULTS." LEAPFROG AND ITS AGENT DISCLAIM ANY AND ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF TITLE, NON-INFRINGEMENT, FITNESS FOR A PARTICULAR PURPOSE, MERCHANTABILITY, OR ARISING OUT OF ANY COURSE OF DEALING.

9. Limitation of Liability

TO THE FULL EXTENT PERMITTED BY LAW, NEITHER LEAPFROG NOR ITS AFFILIATES WILL BE LIABLE FOR ANY DAMAGES RESULTING FROM YOUR USE OF, OR RELIANCE UPON, THIS WEBSITE, ANY LEAPFROG HOSPITAL SAFETY

GRADES, OR ANY PRODUCTS OR SERVICES OBTAINED ON OR THROUGH THIS WEBSITE. IN THE EVENT OF ANY PROBLEM WITH THIS WEBSITE, ANY SAFETY GRADES, OR ANY PRODUCTS OR SERVICES OBTAINED ON OR THROUGH THIS WEBSITE, YOUR SOLE REMEDY IS TO CEASE USING SUCH ITEM(S). LEAPFROG IS NOT LIABLE FOR ANY INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES OR ANY DAMAGES FOR LOSS OF BUSINESS, REVENUE, OR PROFIT) ARISING OUT OF OR IN CONNECTION WITH YOUR USE OF THE SAFETY GRADE, EVEN IF LEAPFROG HAS PREVIOUSLY BEEN ADVISED OF, OR REASONABLY COULD HAVE FORESEEN, THE POSSIBILITY OF SUCH DAMAGES, HOWEVER THEY ARISE, WHETHER IN CONTRACT, TORT, WARRANTY OR ANY OTHER LEGAL THEORY. To the extent that any jurisdiction does not allow the exclusion or limitation of indirect, punitive, special, incidental, consequential or exemplary damages, portions of the above limitation or exclusion may not apply.

10. General Terms

a. Any express waiver or failure to exercise promptly any right under this Agreement in any particular circumstance does not constitute a waiver of its right to enforce this Agreement in any other circumstance, in any similar circumstance, or in any continuation or repetition of the circumstance in connection with which it has not previously enforced its right. If any part, term, or provision of this Agreement will be held void, illegal, unenforceable, or in conflict with any law of a federal, state, or local government having jurisdiction over this Agreement, the validity of the remaining portions or provisions will not be affected hereby.

b. This Agreement, the rights and obligations hereunder, and any claims or disputes relating thereto, will be governed by and construed in accordance with the laws of the District of Columbia without regard to the principles of conflicts of laws. Any claim, suit or action arising under or relating to this Agreement

must be brought and maintained exclusively in courts located within the District of Columbia. The parties hereby agree that such courts will have exclusive personal and subject matter jurisdiction over any such claim, suit, or action. YOU WAIVE ANY RIGHT TO A TRIAL BY JURY IN ANY ACTION TO ENFORCE OR DEFEND ANY RIGHT UNDER THIS AGREEMENT OR ANY AMENDMENT, INSTRUMENT, DOCUMENT OR AGREEMENT DELIVERED OR TO BE DELIVERED IN CONNECTION WITH THIS AGREEMENT OR ARISING FROM ANY RELATIONSHIP EXISTING IN CONNECTION WITH THIS AGREEMENT, AND AGREE THAT ANY ACTION WILL BE TRIED BEFORE A JUDGE SITTING WITHOUT A JURY.

c. This Agreement constitutes the entire agreement between you and Leapfrog relating to this subject matter, and cancels and supersedes any prior versions of this Agreement. No modification to this

Agreement will be binding against Leapfrog, unless in writing and signed by an authorized Leapfrog representative. You may not assign, sublicense, delegate or otherwise transfer this Agreement or any right granted hereunder.

You acknowledge that it will be impossible to measure the damages that would be suffered by Leapfrog if you fail to comply with this Agreement and that in the event of any such failure, Leapfrog will not have an adequate remedy at law. Leapfrog shall, therefore, be entitled in addition to any other rights and remedies to obtain specific performance of your obligations hereunder and to obtain immediate injunctive relief without having to post a bond. You shall not urge, as a defense to any proceeding for such specific performance or injunctive relief, that Leapfrog has an adequate remedy at law.

independent nonprofit organization committed to driving quality, safety, and transparency in the U.S. health system.

The Leapfrog Hospital Safety Grade

The Leapfrog Hospital Safety Grade is a public service provided by The Leapfrog Group, an

By viewing this website you are agreeing to our [TERMS OF USE](#). The information viewed on this site is not intended to be the only or primary means for evaluating hospital quality nor is it intended to be relied upon as advice or a recommendation or an endorsement about which hospitals to use or the quality of the medical treatment that you receive from a hospital or other health care provider. You are solely responsible for any and all decisions with respect to your medical treatment. Neither Leapfrog nor its affiliates are responsible for any damages or costs you might incur with respect to your use of this site. Request for Public Comments: Planned Updates to the Leapfrog Hospital Safety Grade Methodology for Fall 2024

Leapfrog requests public comments for planned updates to the Leapfrog Hospital Safety Grade methodology that will be used to calculate the fall 2024 Hospital Safety Grades. Comments on these proposed changes may be submitted through **June 7, 2024**, using the directions below. Leapfrog will publish final methodology updates and responses to public comments by June 30, 2024.

Summary of Changes

Starting in fall 2024, Leapfrog will update the Imputation Methodology for CPOE, BCMA, IPS, and Hand Hygiene measures for hospitals that do not submit a 2024 Leapfrog Hospital Survey by August 31, 2024. The changes come under the guidance of Leapfrog's national expert panel, the research team at Johns Hopkins Medicine, and in response to stakeholder feedback. Table 2 on pages 4-5 includes the summary of data sources and anticipated reporting periods for the fall 2024 Hospital Safety Grades.

More information can be found on the Hospital Safety Grade website at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>.

Instructions to Submit a Public Comment (Deadline June 7, 2024)

1. Visit <https://leapfroghelpdesk.zendesk.com/>
2. Click on "Submit a Request" on the top right-hand corner of the webpage
3. Select "Hospital Safety Grade" as the name of the ratings program
4. Select "Submit a Public Comment" from the Safety Grade issue drop-down list
5. Include your public comments in the "Question" field
6. Click "Submit" after completing all required fields

PLANNED UPDATE TO IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

BACKGROUND

The Leapfrog Group and other national organizations have ongoing concerns with the trajectory of patient safety in US hospitals. Leapfrog wants to ensure that the public has timely, transparent, and trustworthy information about a hospital's patient safety performance. Leapfrog's longstanding commitment is to use the best and most recent data publicly available to calculate Hospital Safety Grades.

To ensure the Hospital Safety Grade methodology continues to support these goals, Leapfrog's blue-ribbon Expert Panel and researchers at Johns Hopkins Medicine annually review the scoring methodology. The panel advised that Leapfrog modify the current imputation method, which is used to fill in missing data among hospitals that did not complete the most recent Leapfrog Survey.

Leapfrog is proposing the following changes to its imputation approaches effective with the fall 2024 Hospital Safety Grade.

CHANGES TO IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

Leapfrog is proposing the following changes effective with the fall 2024 Hospital Safety Grade.

1) New Step 1 Imputation (Does not apply to BCMA)

If the hospital had a score assigned by Leapfrog in the previous two rounds of grades (i.e., spring 2024, fall 2023), the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., fall 2024). This is a reduction from the previous methodology, which imputed scores from up to four previous rounds of grades. This will help ensure any historical data used in calculating the Safety Grade is reflective of hospital protocols within the past 2 years (e.g., the reporting periods for CPOE IPS, and Hand Hygiene on the 2023 Leapfrog Hospital Survey was 2023).

Note that Step 1 imputation will be temporarily paused for the BCMA measure. In 2024, Leapfrog expanded the BCMA Standard to include pre-operative and post-anesthesia care units in addition to med-surg units, critical care units, and labor and delivery units. Due to these changes, scores from the 2023 Leapfrog Hospital Survey are not an accurate representation of performance on the current measure and thus not suitable for Step 1 imputation.

2) New Step 2 Imputation

For hospitals that do not have historical data from the last two rounds of the Safety Grade (Step 2 imputation then applies), instead of imputing a score based on the cohort mean, hospitals will be assigned a point value that is equivalent to receiving "Limited Achievement" for that measure on the Leapfrog Hospital Survey (Table 1). This category assignment would reflect Leapfrog's lack of current information about a hospital's status in implementing these important patient safety structures.

Step 2 imputation for the IPS measure will only apply to hospitals that operate an adult or pediatric medical and/or surgical ICU or neuro ICU. A hospital's ICU designation will be determined using the most recently available CMS Cost Report. Hospitals that report operating one or more medical, surgical and/or pediatric ICU beds in Worksheet S-3 Part 1 will be eligible for Step 2 Imputation.

Table 1. Step 2 Imputation Point Assignments Beginning Fall 2024

	Leapfrog Hospital Survey Performance Category	Corresponding Safety Grade Measure Score
CPOE	Limited Achievement 	15
BCMA	Limited Achievement 	25
IPS	Limited Achievement 	5
Hand Hygiene	Limited Achievement 	15

Table 2. Planned Fall 2024 Leapfrog Safety Grade Measures, Data Sources, And Anticipated Reporting Periods

PROCESS/STRUCTURAL MEASURES (12)					
Measure Name	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period	
Computerized Physician Order Entry (CPOE)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied	N/A	
Bar Code Medication Administration (BCMA)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied	N/A	
ICU Physician Staffing (IPS)	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied	N/A	
Safe Practice 1: Culture of Leadership Structures and Systems	2024 Leapfrog Hospital Survey	2024	N/A	N/A	
Safe Practice 2: Culture Measurement, Feedback & Intervention	2024 Leapfrog Hospital Survey	2024	N/A	N/A	
Total Nursing Care Hours per Patient Day	2024 Leapfrog Hospital Survey	2024	N/A	N/A	
Hand Hygiene	2024 Leapfrog Hospital Survey	2024	Imputation Model Applied	N/A

H-COMP-5: Communication about Medicines	CMS	10/01/2022 - 09/30/2023	N/A	N/A	
H-COMP-6: Discharge Information	CMS	10/01/2022 - 09/30/2023	N/A	N/A	

OUTCOME MEASURES (10)

Measure Name	Primary Data Source	Reporting Period	Secondary Data Source	Reporting Period
Foreign Object Retained	CMS	07/01/2021 - 06/30/2023	N/A	N/A
Air Embolism	CMS	07/01/2021 - 06/30/2023	N/A	N/A
Falls and Trauma	CMS	07/01/2021 - 06/30/2023	N/A	N/A
CLABSI	2024 Leapfrog Hospital Survey	01/01/2023 - 12/31/2023	CMS	10/01/2022 - 09/30/2023
CAUTI	2024 Leapfrog Hospital Survey	01/01/2023 - 12/31/2023	CMS	10/01/2022 - 09/30/2023
SSI: Colon	2024 Leapfrog Hospital Survey	01/01/2023 - 12/31/2023	CMS	10/01/2022 - 09/30/2023
MRSA	2024 Leapfrog Hospital Survey	01/01/2023 - 12/31/2023	CMS	10/01/2022 - 09/30/2023
C. Diff.	2024 Leapfrog Hospital Survey	01/01/2023 - 12/31/2023	CMS	10/01/2022 - 09/30/2023
PSI 4: Death rate among surgical inpatients with serious treatable conditions	CMS	07/01/2020 - 06/30/2022	N/A	N/A
CMS Medicare PSI 90: Patient safety and adverse events composite*	CMS	07/01/2020 - 06/30/2022	N/A	N/A

*Note: CMS calculates PSI 90 using the ten (10) component PSIs listed above. While scores for each of the 10 component PSIs will NOT be used to calculate fall 2024 Hospital Safety Grades, they will be publicly reported on the Hospital Safety Grade [website](#).

EXHIBIT 41

Final Updates to the Leapfrog Hospital Safety Grade Methodology for Fall 2024

On May 21, 2024, Leapfrog published planned updates to the Hospital Safety Grade methodology and held a public comment period through June 7, 2024. We thank commenters for their insightful feedback and suggestions that helped us finalize the methodology.

This document includes responses to the comments received and summarizes the final updates that will be made to the scoring methodology. Additionally, Table 2 on pages 5-6 includes a summary of data sources and anticipated reporting periods for the fall 2024 Hospital Safety Grades.

Summary of Changes

Starting in fall 2024, Leapfrog will update the Imputation Methodology for CPOE, BCMA, IPS, and Hand Hygiene measures for hospitals that do not submit a 2024 Leapfrog Hospital Survey by August 31, 2024. The changes come under the guidance of Leapfrog's national expert panel, the research team at Johns Hopkins Medicine, and in response to stakeholder feedback.

More information can be found on the Hospital Safety Grade website at <https://www.hospitalsafetygrade.org/for-hospitals/key-dates-and-information>.

RESPONSES TO PUBLIC COMMENTS

Four commenters supported the change to the imputation methodology.

We appreciate the feedback and agree that participating hospitals committed to transparency should be acknowledged for the resources and time they devote to completing the Leapfrog Hospital Survey. Hospitals that choose not to complete the Survey should not inadvertently benefit from hospitals that continuously strive to make improvements and maintain Leapfrog standards.

Two commentors expressed concerns about Step 2 Imputation misrepresenting the current procedures or infrastructure of the hospital to the public.

We recognize that hospitals eligible for Step 2 Imputation may score higher if they complete a Leapfrog Hospital Survey. However, we cannot ensure this is the case if we do not have the data, and our analyses have shown that performance among hospitals that intermittently complete the annual Survey is lower than those hospitals that completed the most recent Survey. The expert panel recognized that hospitals with a drop in performance may be incentivized to not report via the Leapfrog Hospital Survey and scores calculated using participating hospitals would misrepresent their true performance. We encourage hospitals to complete the Leapfrog Hospital Survey so they can receive credit for implementing processes that protect patients and save lives.

We do acknowledge the commenter's point that the public may misinterpret the assigned measure scores. In response, we will add a new denotation to the Hospital Safety Grade website (<https://www.hospitalsafetygrade.org/>) for scores that have been imputed.

Two commentors requested that the proposed changes be delayed until spring 2025 to allow hospitals time to complete the Leapfrog Hospital Survey.

While we do strongly encourage hospitals to submit their Survey by the Submission Deadline of June 30, 2024, hospitals that wish to have 2024 Leapfrog Hospital Survey data used in their fall 2024 Safety Grade will have until August 31 to submit or resubmit their Survey. Hospitals that completed a 2023 Leapfrog Hospital Survey will be eligible for Step 1 Imputation. Hospitals eligible for Step 2 Imputation have opted not to complete 2 consecutive years of the Leapfrog Hospital Survey and will be scored accordingly.

Four commenters opposed penalizing hospitals that choose not to devote resources to completing a voluntary Survey each year and be allowed to opt out of the Hospital Safety Grade.

The Leapfrog Hospital Survey is designed to help hospitals benchmark their progress in quality and safety. To ensure that these standards are consistently met, hospitals must continuously measure. While our Survey, is not required or linked to federal funding, we think it is just as important. Patients, employers, and purchasers benefit from having access to current and accurate information.

Our expert panel recognized that awareness and participation in the Leapfrog Hospital Survey has grown exponentially in recent years. As such, the choice of hospitals to not complete the Leapfrog Hospital Survey is one that could not be ignored as patient safety must remain a priority. A key element of the Hospital Safety Grade is that all eligible hospitals are compared to hospitals nationwide. The choice to not participate should not excuse a hospital from being graded, nor should they be given a score that unfairly awards them points.

FINAL UPDATE TO IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

BACKGROUND

The Leapfrog Group and other national organizations have ongoing concerns with the trajectory of patient safety in US hospitals. Leapfrog wants to ensure that the public has timely, transparent, and trustworthy information about a hospital's patient safety performance. Leapfrog's longstanding commitment is to use the best and most recent data publicly available to calculate Hospital Safety Grades.

To ensure the Hospital Safety Grade methodology continues to support these goals, Leapfrog's blue-ribbon Expert Panel and researchers at Johns Hopkins Medicine annually review the scoring methodology. The panel advised that Leapfrog modify the current imputation method, which is used to fill in missing data among hospitals that did not complete the most recent Leapfrog Survey.

Leapfrog is proposing the following changes to its imputation approaches effective with the fall 2024 Hospital Safety Grade.

CHANGES TO IMPUTATION METHOD FOR CPOE, BCMA, IPS, AND HAND HYGIENE

Leapfrog is proposing the following changes effective with the fall 2024 Hospital Safety Grade.

1) New Step 1 Imputation (Does not apply to BCMA)

If the hospital had a score assigned by Leapfrog in the previous two rounds of grades (i.e., spring 2024, fall 2023), the hospital is assigned the most recent score on that measure in the current Hospital Safety Grade (i.e., fall 2024). This is a reduction from the previous methodology, which imputed scores from up to four previous rounds of grades. This will help ensure any historical data used in calculating the Safety Grade is reflective of hospital protocols within the past 2 years (e.g., the reporting periods for CPOE IPS, and Hand Hygiene on the 2023 Leapfrog Hospital Survey was 2023).

Note that Step 1 imputation will be temporarily paused for the BCMA measure. In 2024, Leapfrog expanded the BCMA Standard to include pre-operative and post-anesthesia care units in addition to med-surg units, critical care units, and labor and delivery units. Due to these changes, scores from the 2023 Leapfrog Hospital Survey are not an accurate representation of performance on the current measure and thus not suitable for Step 1 imputation.

2) New Step 2 Imputation

For hospitals that do not have historical data from the last two rounds of the Safety Grade (Step 2 imputation then applies), instead of imputing a score based on the cohort mean, hospitals will be assigned a point value that is equivalent to receiving "Limited Achievement" for that measure on the Leapfrog Hospital Survey (Table 1). This category assignment would reflect Leapfrog's lack of current information about a hospital's status in implementing these important patient safety structures.

Step 2 imputation for the IPS measure will only apply to hospitals that operate an adult or pediatric medical and/or surgical ICU or neuro ICU. A hospital's ICU designation will be determined using the most recently available CMS Cost Report. Hospitals that report operating one or more medical, surgical and/or pediatric ICU beds in Worksheet S-3 Part 1 will be eligible for Step 2 Imputation.

Table 1. Step 2 Imputation Point Assignments Beginning Fall 2024

	Leapfrog Hospital Survey Performance Category	Corresponding Safety Grade Measure Score
CPOE	Limited Achievement 	15
BCMA	Limited Achievement 	25
IPS	Limited Achievement 	5
Hand Hygiene	Limited Achievement 	15

Table 2. Planned Fall 2024 Leapfrog Safety Grade Measures, Data Sources, And Anticipated Reporting Periods

The Palm Beach Post

HEALTHCARE

Competition drives Tenet's renewed focus, community ties as health care rivals multiply

Alexandra Clough
Palm Beach Post

April 22, 2022, 5:01 a.m. ET

Five Tenet Healthcare-owned [hospitals in Palm Beach County](#) are retooling their image to emphasize ties to local physicians and communities.

The move comes as more residents pour into the region, and [rival medical providers](#) vie for new and often wealthy patients.

The Palm Beach Health Network [includes the following hospitals](#): Good Samaritan and St. Mary's medical centers in West Palm Beach; Palm Beach Gardens Medical Center in Palm Beach Gardens; Delray Medical Center in Delray Beach; and West Boca Medical Center in suburban Boca Raton.

UM arrives: [University of Miami opens medical offices in downtown West Palm Beach and Palm Beach](#)

Contending with COVID: [Health providers navigate pandemic as they continue Palm Beach County expansion](#)

West Palm site: [Nation's top orthopedic hospital opens in West Palm Beach](#)

The hospitals are owed by Tenet Health, a for-profit company based in Dallas.

Maggie Gill, chief executive of the Palm Beach Health Network, said the hospital company wants to showcase that it is a local provider, especially to new residents who may not be familiar with the Tenet brand.

"We want to share what we are doing," Gill said. "This is our home base."

Tenet spending \$150 million to upgrade facilities, services

The move comes as the company, the largest health care network in Palm Beach County, recently revealed it is spending \$150 million to upgrade cardiac, neurology, orthopedic and maternity services across its hospitals. The upgrades will be completed by the end of 2022.

Tenet hospitals account for more than 1,900 beds in the county.

Physicians also are working to expand the company's reach. Among them is Dr. Nicholas Sama, medical director of orthopedic surgery at Good Samaritan Medical Center, the waterfront hospital along North Flagler Drive in West Palm Beach, across the Flagler Memorial Bridge from Palm Beach.

Good Sam is upgrading its emergency services and facilities for robotic and orthopedic surgeries. Tenet also has an alliance with the Hospital for Special Surgery, a New York-based orthopedic specialty hospital with a West Palm Beach clinic downtown.

"We want people to know what we have to offer and reach out to the community," Sama said.

Sheri Montgomery, chief executive of Good Samaritan Medical Center, said the hospital has been ramping up its outreach to patients about screening services for cancer, as well as treatment of conditions such as congestive heart failure. Good Sam also recently partnered with fashion brand Lilly Pulitzer [to create the Lilly Pulitzer Birthing Suites](#).

There's more. West Boca Raton Medical Center recently opened the Boca Raton Center for Orthopedics and Spine Care to allow patients to transition from surgery to recovery and rehabilitation. At Palm Beach Gardens Medical Center, upgrades were made to its cardiac catheterization facilities and operating room handling cardiac and vascular surgery.

And at Delray Medical Center, there's a new cardiac catheterization lab as well as an Advanced Center for Heart Failure, among other improvements.

The Tenet hospital improvement program comes as rival health care companies [are opening clinics and hospitals](#) in Palm Beach County.

Some are zeroing in on West Palm Beach, where a number of financial firms and residents, relocated during the coronavirus pandemic. Some people moved to the area because they accelerated their retirements. Others moved here with companies that either expanded or relocated offices to the county.

"The shift to more fulltime residents has clearly provided a new focus for health care providers," said Michael Feldman, a Cushman & Wakefield brokerage director who specializes in the leasing and sales of health care, life science and professional office properties.

Last year, Tenet sold five hospitals in Miami-Dade and Broward counties. Feldman said the sale allows Tenet to focus more heavily on its outpatient surgery centers, as well as grow services in the lucrative Palm Beach County market.

Feldman said surgeries are a key profit source for hospitals.

Tenet reaches out to community leaders, organizations

In addition to spending money to boost technology and facilities, Tenet hospitals also are trying to forge closer ties with key community leaders.

Nancy Brinker, who created Susan G. Komen, the world's largest nonprofit in the fight against breast cancer, recently met with Gill and Montgomery to talk about [The Promise Fund](#), a nonprofit Brinker recently co-founded.

The Promise Fund provides grants to community-based entities that can help women in Florida needing screening or treatment of breast and cervical cancers.

These entities can't do biopsies or surgeries, so treatment has to be farmed out to other providers. The Promise Fund employs "navigators" who help patients create a treatment plan that includes finding doctors and treatment centers.

In the past, Brinker has expressed frustration with the absence of a Palm Beach County-based public or nonprofit hospital that can treat women who do not have health insurance and can't afford to pay for medical care.

Despite Palm Beach County's riches, including the millionaires and the billionaires crowding the coast, resources for poor women remain slim.

Brinker said she recently met with officials from Palm Beach Health and Good Sam to explore ways the hospital, and the doctors and other professionals who practice there, can provide low-cost services to women needing cancer treatment.

Montgomery said Good Sam also is working with pharmaceutical companies to supply medication to cancer patients identified by the Promise Fund.

Hospitals facing increased competition from locals, out-of-state care providers

In 2019, Gov. Ron DeSantis and Florida lawmakers did away with Florida's certificate of need program, which required that hospitals seek state approval before they could open a new facility. Hospitals wanting to operate in particular region needed to demonstrate there was an unmet need for their facility or for expanded services.

For years, the program allowed Tenet to grow throughout Palm Beach County without competition from rival hospitals, Feldman said. Those hospitals, in turn, used the program to beat back growth from Tenet, which failed in a 2013 bid to build an 80-bed hospital next to Scripps Florida.

But with the certificate of need program gone, the sky's the limit on health care companies seeking to establish a presence in the county.

Universal Health Services, which also owns Wellington Regional Medical Center, wants to build a 150-bed hospital and "shell" space for 150 more beds in Palm Beach Gardens.

In addition, Birmingham, Ala.-based Encompass Health wants to build a 50-bed rehabilitation hospital planned, also in Palm Beach Gardens.

Farther south, west of Delray Beach, a 24-bed specialty hospital for orthopedic medicine is under construction and set to open in 2024.

And that's not all. At least two nonprofit, university-affiliated hospital systems are looking to establish a presence in downtown West Palm Beach, real estate sources said.

Feldman said nonprofits are drawn to wealthy communities such as Palm Beach, where patients may express their gratitude by financing new projects.

Palm Beach Health officials said they are prepared for the challenges to their longtime dominant presence in the county.

"Competition raises our game," Gill said.

UHealth is latest health care provider to expand to West Palm Beach

Any new company planning to come to West Palm Beach will have to compete not only with Tenet but with other nonprofit hospital companies that already have established clinics in the city.

Cleveland Clinic was first in 2007, when it leased a small West Palm Beach office. The health care provider now operates a large clinic in the CityPlace Tower office building.

Three New York-based health systems also operate medical offices in the city: NYU Langone, Mount Sinai New York and the Hospital for Special Surgery.

The latest player is the University of Miami Health System, which last year [opened a major medical clinic](#) on the waterfront. Services available include cardiology, urology, neurology and dermatology.

The clinic's goal is to treat existing patients, attract new ones and establish a base for an expanded medical presence in the county. In addition to the West Palm Beach office, UHealth also opened a concierge family medicine practice on Palm Beach.

UHealth officials said many new Palm Beach County residents who relocated from the Northeast, Midwest and even California are used to top-notch teaching hospitals with an academic focus and a heavy emphasis on research.

"South Florida is in high demand from the residents moving from the Northeast, and these patients are very accustomed to accessing care from an academic medical center," said Rafic Warwar, UHealth's chief ambulatory officer.

Some Palm Beach residents privately say they would like to have a nonprofit academic medical center near the island, and a few have even voiced a desire to see Good Sam purchased by such an entity.

But that's not going to happen, Gill said.

"Nobody is buying Good Sam," Gill said. "It's a very important hospital. We want to make it the best it can be ... and grow with the community."

PBHNPG is Rebranding to Palm Beach Health Network Physician Group

Exciting changes are happening as Palm Beach Health Network Physician Groups (PBHNPG) is rebranding to the Palm Beach Health Network Physician Group (PBHNPG). This new name, logo design and brand aligns with our Palm Beach Health Network hospitals – Palm Beach Gardens Medical Center, St. Mary's Medical Center, Good Samaritan Medical Center, Delray Medical Center and West Boca Medical Center. Our focus remains the same – continue to deliver high quality care to the community we serve.

Since 2007, our multi-specialty physician group has provided care to communities across Palm Beach County. Our new Palm Beach Health Network Physician Group brand will facilitate development of a strong brand awareness as well as drive operational and strategic growth in Palm Beach County and beyond.

Subject: Leapfrog Spring 2024

Good afternoon,

We remain a “C” for the Spring 2024 Leapfrog update. Our largest area of opportunity remains in the patient experience category. Moving our performance to the average score in each H-COMP area would move us to an “A.”

Timely & effective care

These measures show how often or how quickly hospitals provide care that research shows gets the best results for patients with certain conditions, and how hospitals use outpatient medical imaging tests (like CT scans and MRIs). This information can help you compare which hospitals give recommended care most often as part of the overall care they provide to patients.

St Mary's Medical Center

Complications & deaths

Patients who are admitted to the hospital for treatment of medical problems sometimes get other serious injuries, complications, or conditions, and may even die. Some patients may experience problems soon after they are discharged and need to be admitted to the hospital again. These events can often be prevented if hospitals follow best practices for treating patients.

Unplanned hospital visits

Returning to the hospital for unplanned care disrupts patients' lives, increases their risk of harmful events like healthcare-associated infections, and costs more money. Hospitals that give high quality care can keep patients from returning to the hospital and reduce their stay if they have to come back.

Timely & effective care

These measures show how often or how quickly hospitals provide care that research shows gets the best results for patients with certain conditions, and how hospitals use outpatient medical imaging tests (like CT scans and MRIs). This information can help you compare which hospitals give recommended care most often as part of the overall care they provide to patients.

Unplanned hospital visits

Returning to the hospital for unplanned care disrupts patients' lives, increases their risk of harmful events like healthcare-associated infections, and costs more money. Hospitals that give high quality care can keep patients from returning to the hospital and reduce their stay if they have to come back.

Death rate for CABG surgery patients

2.9%

No different than the national rate

National result: 2.6%

Number of included patients: 97

Palm Beach Gardens Medical Center

Unplanned hospital visits

Returning to the hospital for unplanned care disrupts patients' lives, increases their risk of harmful events like healthcare-associated infections, and costs more money. Hospitals that give high quality care can keep patients from returning to the hospital and reduce their stay if they have to come back.

EXHIBIT A

DEFINITIONS AND INSTRUCTIONS

The following definitions shall apply to each and every request contained herein:

1. “Complaint” means the Complaint filed by Plaintiffs in the above-captioned matter in the United States District Court for the Southern District of Florida, West Palm Beach Division on or about April 30, 2025. *See generally*, Doc. 1.

2. “You,” “Your,” or “Plaintiff” means Plaintiff, Palm Beach Gardens Community Hospital, Inc. d/b/a Palm Beach Gardens Medical Center, and any of its current or former business and/or creative partners, associates, employees, interns, draftsmen, managers, agents, vendors, servants, representatives, corporate alter egos and all other persons acting or purporting to act with, for, or on his behalf, including but not limited to collaborators, consultants, advisors, attorneys, or any person acting in an advisory or consulting capacity, unless specifically stated otherwise.

3. “Defendant” means defendants, The Leapfrog Group, a not-for-profit corporation incorporated in the District of Columbia.

4. “Parties” means Plaintiffs and Defendant.

5. The terms “and” and “or” shall each be construed broadly and shall each mean “and” or “or” or “and” and “or” wherever such meaning broadens the meaning of the sentence of phrase.

6. “Concerning” means relating to, referring to, reflecting, describing, evidencing, interpreting, consisting of, pertaining to, regarding, or constituting, in whole or in part, directly or indirectly, the matter identified.

7. The terms “relate to,” “relates to,” “relating to,” and “related to” shall mean and include: refer, reflect, discuss, show, constitute or be in any way logically or factually connected

with the matter discussed.

8. “Document” includes all written, graphic matter, handwriting, typewriting, audio or video tape recordings, however produced or reproduced, of every kind and description, including but not limited to, the original and each copy thereof which is non-identical by reason of any mark, change, or other cause or reason whatsoever, of all correspondence, records, reports, memoranda, notes, facsimiles, messages and message books, telephone logs, memoranda of telephone conversations, publications, books, brochures, booklets, manuals, flyers, leaflets, contracts, memoranda of agreement, books of account, ledgers, journals, working papers, records or summaries of personal interviews or conversations, appointment calendars, diaries, receipts, invoices, billing statements, files, tapes, discs, drives, data cards, films, data processing files and all other computer-readable records or programs, including any and all drafts or non-identical copies thereof. Documents in electronic or digital form stored in any format, discs, drives, data, cards, data processing files and other computer-readable records or programs must be produced in reasonably usable form (e.g., by printing or “downloading” such documents onto paper). In addition, all electronic documents must be produced in native electronic format on a DVD or CD or other common, easily- readable storage device. (The word “writing” may be used synonymously herein in place of “document.”)

9. “Communication” means any and all oral or written contact between two or more persons including, without limitation, any meetings, conferences, face-to-face conversations, telephone, teleconference, video conference, voice mail, audio recording, video recording, mails, electronic transmissions, electronic mail (email), text messaging, instant messaging (IM), facsimile or any other forms of oral or written communications by any other medium.

10. When used in reference to a person, the term “identify” shall mean to state the full

name and job title of such person and, in the event such person is currently not an employee of Plaintiff, such person's last known residence address and telephone number.

11. When used in reference to a Document, the term "identify" shall mean to state the date the Document bears, if any, its author(s), location, and a brief description of its form (e.g., memorandum, e-mail, letter, etc.) and contents, as well as the identity of the person(s) known to have possession, custody, or control over the Document.

12. "Safety Grade" or "Hospital Safety Grade" refers to the "letter grade Leapfrog bi-annually assigns to general hospitals in the United States," as described on the Frequently Asked Questions page of Leapfrog's website: <https://www.hospitalsafetygrade.org/frequently-asked-questions>.

13. "Scoring Methodology" or "Methodology" refers to the measures, data, and scoring Leapfrog uses to assign Hospital Safety Grades, as described on Leapfrog's website: <https://www.hospitalsafetygrade.org/media/file/Safety-Grade-Scoring-Methodology-Fall-2024.pdf>.

14. "Hospital Survey", "Leapfrog Survey" or "Survey" refers to the biannual survey administered by The Leapfrog Group to collect information on hospital performance as described on the "Leapfrog Hospital Survey" page of Leapfrog's website: <https://www.leapfroggroup.org/data-users/leapfrog-hospital-survey>.

MATTERS FOR EXAMINATION

1. All facts that support the claims raised against Defendant in the Complaint.
2. Plaintiff's initial disclosures served in the above-styled action.
3. Plaintiff's responses to Defendant's discovery requests, including responses to interrogatories and general document collection efforts for preparing responses to Leapfrog's

requests for production.

4. Plaintiff's policies and procedures for compliance with Plaintiff's patient safety plans.

5. Plaintiff's policies and procedures for compliance with reporting mandated by the Centers for Medicare and Medicaid Services ("CMS").

6. Plaintiff's policies and procedures for practices to prevent errors, including but not limited to Computerized Physician Order Entry, Bar Code Medication Administration, ICU Physician Staffing, and Hygiene.

7. Facts related to Plaintiff's allegations that Leapfrog is a "Pay-to-Play Scheme."

8. Plaintiff's decisions regarding Your participation in the Leapfrog Survey.

9. Plaintiff's non-participation for measures included in the Methodology and Safety Grades.

10. Plaintiff's formal or informal grievance or complaint process You may have initiated in response to Leapfrog's Safety Grade.

11. Plaintiff's claim in the Complaint related to harm to Your reputation.

12. Plaintiff's claim in the Complaint related to harm to Your goodwill.

13. Facts related to reports Plaintiff received from patients that they decided not to use Palm Beach Gardens Medical Center due to Leapfrog's Safety Grade.

14. Facts related to direct inquiries Plaintiff received from patients regarding their concerns about Leapfrog Safety Grades.

15. Plaintiff's communications with Defendant regarding Leapfrog, the Hospital Survey, and Plaintiff's Safety Grades based on documents produced in response to Leapfrog's requests for production.

16. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's patient volume and referrals.

17. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's market growth.

18. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's patient referrals based on documents produced in response to Leapfrog's requests for production.

19. Facts related to Plaintiff's market share and position relative to Plaintiff's competitors based on documents produced in response to Leapfrog's requests for production.

20. Plaintiff's participation in consumer perception surveys or market research reports concerning how the public views Plaintiff and how it compares to other competing hospitals based on documents produced in response to Leapfrog's requests for production.

21. Plaintiff's involvement or partnership with organizations that evaluate healthcare performance, including but not limited to Vizient, Inc., Premier, Inc., HealthTrust Purchasing Group, HealthGrades, etc based on documents produced in response to Leapfrog's requests for production.

name and job title of such person and, in the event such person is currently not an employee of Plaintiff, such person's last known residence address and telephone number.

11. When used in reference to a Document, the term "identify" shall mean to state the date the Document bears, if any, its author(s), location, and a brief description of its form (e.g., memorandum, e-mail, letter, etc.) and contents, as well as the identity of the person(s) known to have possession, custody, or control over the Document.

12. "Safety Grade" or "Hospital Safety Grade" refers to the "letter grade Leapfrog bi-annually assigns to general hospitals in the United States," as described on the Frequently Asked Questions page of Leapfrog's website: <https://www.hospitalsafetygrade.org/frequently-asked-questions>.

13. "Scoring Methodology" or "Methodology" refers to the measures, data, and scoring Leapfrog uses to assign Hospital Safety Grades, as described on Leapfrog's website: <https://www.hospitalsafetygrade.org/media/file/Safety-Grade-Scoring-Methodology-Fall-2024.pdf>.

14. "Hospital Survey", "Leapfrog Survey" or "Survey" refers to the biannual survey administered by The Leapfrog Group to collect information on hospital performance as described on the "Leapfrog Hospital Survey" page of Leapfrog's website: <https://www.leapfroggroup.org/data-users/leapfrog-hospital-survey>.

MATTERS FOR EXAMINATION

1. All facts that support the claims raised against Defendant in the Complaint.
2. Plaintiff's initial disclosures served in the above-styled action.
3. Plaintiff's responses to Defendant's discovery requests, including responses to interrogatories and general document collection efforts for preparing responses to Leapfrog's

requests for production.

4. Plaintiff's policies and procedures for compliance with Plaintiff's patient safety plans.

5. Plaintiff's policies and procedures for compliance with reporting mandated by the Centers for Medicare and Medicaid Services ("CMS").

6. Plaintiff's policies and procedures for practices to prevent errors, including but not limited to Computerized Physician Order Entry, Bar Code Medication Administration, ICU Physician Staffing, and Hygiene.

7. Facts related to Plaintiff's allegations that Leapfrog is a "Pay-to-Play Scheme."

8. Plaintiff's decisions regarding Your participation in the Leapfrog Survey.

9. Plaintiff's non-participation for measures included in the Methodology and Safety Grades.

10. Plaintiff's formal or informal grievance or complaint process You may have initiated in response to Leapfrog's Safety Grade.

11. Plaintiff's claim in the Complaint related to harm to Your reputation.

12. Plaintiff's claim in the Complaint related to harm to Your goodwill.

13. Facts related to reports Plaintiff received from patients that they decided not to use West Boca Medical Center, Inc due to Leapfrog's Safety Grade.

14. Facts related to direct inquires Plaintiff received from patients regarding their concerns about Leapfrog Safety Grades.

15. Plaintiff's communications with Defendant regarding Leapfrog, the Hospital Survey, and Plaintiff's Safety Grades based on documents produced in response to Leapfrog's requests for production.

16. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's patient volume and referrals.

17. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's market growth.

18. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's patient referrals based on documents produced in response to Leapfrog's requests for production.

19. Facts related to Plaintiff's market share and position relative to Plaintiff's competitors based on documents produced in response to Leapfrog's requests for production.

20. Plaintiff's participation in consumer perception surveys or market research reports concerning how the public views Plaintiff and how it compares to other competing hospitals based on documents produced in response to Leapfrog's requests for production.

21. Plaintiff's involvement or partnership with organizations that evaluate healthcare performance, including but not limited to Vizient, Inc., Premier, Inc., HealthTrust Purchasing Group, HealthGrades, etc based on documents produced in response to Leapfrog's requests for production.

EXHIBIT A

DEFINITIONS AND INSTRUCTIONS

The following definitions shall apply to each and every request contained herein:

1. “Complaint” means the Complaint filed by Plaintiffs in the above-captioned matter in the United States District Court for the Southern District of Florida, West Palm Beach Division on or about April 30, 2025. *See generally*, Doc. 1.

2. “You,” “Your,” or “Plaintiff” means Plaintiff, Delray Medical Center, Inc., and any of its current or former business and/or creative partners, associates, employees, interns, draftsmen, managers, agents, vendors, servants, representatives, corporate alter egos and all other persons acting or purporting to act with, for, or on his behalf, including but not limited to collaborators, consultants, advisors, attorneys, or any person acting in an advisory or consulting capacity, unless specifically stated otherwise.

3. “Defendant” means defendants, The Leapfrog Group, a not-for-profit corporation incorporated in the District of Columbia.

4. “Parties” means Plaintiffs and Defendant.

5. The terms “and” and “or” shall each be construed broadly and shall each mean “and” or “or” or “and” and “or” wherever such meaning broadens the meaning of the sentence of phrase.

6. “Concerning” means relating to, referring to, reflecting, describing, evidencing, interpreting, consisting of, pertaining to, regarding, or constituting, in whole or in part, directly or indirectly, the matter identified.

7. The terms “relate to,” “relates to,” “relating to,” and “related to” shall mean and include: refer, reflect, discuss, show, constitute or be in any way logically or factually connected

with the matter discussed.

8. “Document” includes all written, graphic matter, handwriting, typewriting, audio or video tape recordings, however produced or reproduced, of every kind and description, including but not limited to, the original and each copy thereof which is non-identical by reason of any mark, change, or other cause or reason whatsoever, of all correspondence, records, reports, memoranda, notes, facsimiles, messages and message books, telephone logs, memoranda of telephone conversations, publications, books, brochures, booklets, manuals, flyers, leaflets, contracts, memoranda of agreement, books of account, ledgers, journals, working papers, records or summaries of personal interviews or conversations, appointment calendars, diaries, receipts, invoices, billing statements, files, tapes, discs, drives, data cards, films, data processing files and all other computer-readable records or programs, including any and all drafts or non-identical copies thereof. Documents in electronic or digital form stored in any format, discs, drives, data, cards, data processing files and other computer-readable records or programs must be produced in reasonably usable form (e.g., by printing or “downloading” such documents onto paper). In addition, all electronic documents must be produced in native electronic format on a DVD or CD or other common, easily- readable storage device. (The word “writing” may be used synonymously herein in place of “document.”)

9. “Communication” means any and all oral or written contact between two or more persons including, without limitation, any meetings, conferences, face-to-face conversations, telephone, teleconference, video conference, voice mail, audio recording, video recording, mails, electronic transmissions, electronic mail (email), text messaging, instant messaging (IM), facsimile or any other forms of oral or written communications by any other medium.

10. When used in reference to a person, the term “identify” shall mean to state the full

name and job title of such person and, in the event such person is currently not an employee of Plaintiff, such person's last known residence address and telephone number.

11. When used in reference to a Document, the term "identify" shall mean to state the date the Document bears, if any, its author(s), location, and a brief description of its form (e.g., memorandum, e-mail, letter, etc.) and contents, as well as the identity of the person(s) known to have possession, custody, or control over the Document.

12. "Safety Grade" or "Hospital Safety Grade" refers to the "letter grade Leapfrog bi-annually assigns to general hospitals in the United States," as described on the Frequently Asked Questions page of Leapfrog's website: <https://www.hospitalsafetygrade.org/frequently-asked-questions>.

13. "Scoring Methodology" or "Methodology" refers to the measures, data, and scoring Leapfrog uses to assign Hospital Safety Grades, as described on Leapfrog's website: <https://www.hospitalsafetygrade.org/media/file/Safety-Grade-Scoring-Methodology-Fall-2024.pdf>.

14. "Hospital Survey", "Leapfrog Survey" or "Survey" refers to the biannual survey administered by The Leapfrog Group to collect information on hospital performance as described on the "Leapfrog Hospital Survey" page of Leapfrog's website: <https://www.leapfroggroup.org/data-users/leapfrog-hospital-survey>.

MATTERS FOR EXAMINATION

1. All facts that support the claims raised against Defendant in the Complaint.
2. Plaintiff's initial disclosures served in the above-styled action.
3. Plaintiff's responses to Defendant's discovery requests, including responses to interrogatories and general document collection efforts for preparing responses to Leapfrog's

requests for production.

4. Plaintiff's policies and procedures for compliance with Plaintiff's patient safety plans.

5. Plaintiff's policies and procedures for compliance with reporting mandated by the Centers for Medicare and Medicaid Services ("CMS").

6. Plaintiff's policies and procedures for practices to prevent errors, including but not limited to Computerized Physician Order Entry, Bar Code Medication Administration, ICU Physician Staffing, and Hygiene.

7. Facts related to Plaintiff's allegations that Leapfrog is a "Pay-to-Play Scheme."

8. Plaintiff's decisions regarding Your participation in the Leapfrog Survey.

9. Plaintiff's non-participation for measures included in the Methodology and Safety Grades.

10. Plaintiff's formal or informal grievance or complaint process You may have initiated in response to Leapfrog's Safety Grade.

11. Plaintiff's claim in the Complaint related to harm to Your reputation.

12. Plaintiff's claim in the Complaint related to harm to Your goodwill.

13. Facts related to reports Plaintiff received from patients that they decided not to use Delray Medical Center due to Leapfrog's Safety Grade.

14. Facts related to direct inquiries Plaintiff received from patients regarding their concerns about Leapfrog Safety Grades.

15. Plaintiff's communications with Defendant regarding Leapfrog, the Hospital Survey, and Plaintiff's Safety Grades based on documents produced in response to Leapfrog's requests for production.

16. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's patient volume and referrals.

17. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's market growth.

18. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's patient referrals based on documents produced in response to Leapfrog's requests for production.

19. Facts related to Plaintiff's market share and position relative to Plaintiff's competitors based on documents produced in response to Leapfrog's requests for production.

20. Plaintiff's participation in consumer perception surveys or market research reports concerning how the public views Plaintiff and how it compares to other competing hospitals based on documents produced in response to Leapfrog's requests for production.

21. Plaintiff's involvement or partnership with organizations that evaluate healthcare performance, including but not limited to Vizient, Inc., Premier, Inc., HealthTrust Purchasing Group, HealthGrades, etc based on documents produced in response to Leapfrog's requests for production.

EXHIBIT A

DEFINITIONS AND INSTRUCTIONS

The following definitions shall apply to each and every request contained herein:

1. “Complaint” means the Complaint filed by Plaintiffs in the above-captioned matter in the United States District Court for the Southern District of Florida, West Palm Beach Division on or about April 30, 2025. *See generally*, Doc. 1.

2. “You,” “Your,” or “Plaintiff” means Plaintiff, Good Samaritan Medical Center, Inc., and any of its current or former business and/or creative partners, associates, employees, interns, draftsmen, managers, agents, vendors, servants, representatives, corporate alter egos and all other persons acting or purporting to act with, for, or on his behalf, including but not limited to collaborators, consultants, advisors, attorneys, or any person acting in an advisory or consulting capacity, unless specifically stated otherwise.

3. “Defendant” means defendants, The Leapfrog Group, a not-for-profit corporation incorporated in the District of Columbia.

4. “Parties” means Plaintiffs and Defendant.

5. The terms “and” and “or” shall each be construed broadly and shall each mean “and” or “or” or “and” and “or” wherever such meaning broadens the meaning of the sentence of phrase.

6. “Concerning” means relating to, referring to, reflecting, describing, evidencing, interpreting, consisting of, pertaining to, regarding, or constituting, in whole or in part, directly or indirectly, the matter identified.

7. The terms “relate to,” “relates to,” “relating to,” and “related to” shall mean and include: refer, reflect, discuss, show, constitute or be in any way logically or factually connected

with the matter discussed.

8. “Document” includes all written, graphic matter, handwriting, typewriting, audio or video tape recordings, however produced or reproduced, of every kind and description, including but not limited to, the original and each copy thereof which is non-identical by reason of any mark, change, or other cause or reason whatsoever, of all correspondence, records, reports, memoranda, notes, facsimiles, messages and message books, telephone logs, memoranda of telephone conversations, publications, books, brochures, booklets, manuals, flyers, leaflets, contracts, memoranda of agreement, books of account, ledgers, journals, working papers, records or summaries of personal interviews or conversations, appointment calendars, diaries, receipts, invoices, billing statements, files, tapes, discs, drives, data cards, films, data processing files and all other computer-readable records or programs, including any and all drafts or non-identical copies thereof. Documents in electronic or digital form stored in any format, discs, drives, data, cards, data processing files and other computer-readable records or programs must be produced in reasonably usable form (e.g., by printing or “downloading” such documents onto paper). In addition, all electronic documents must be produced in native electronic format on a DVD or CD or other common, easily- readable storage device. (The word “writing” may be used synonymously herein in place of “document.”)

9. “Communication” means any and all oral or written contact between two or more persons including, without limitation, any meetings, conferences, face-to-face conversations, telephone, teleconference, video conference, voice mail, audio recording, video recording, mails, electronic transmissions, electronic mail (email), text messaging, instant messaging (IM), facsimile or any other forms of oral or written communications by any other medium.

10. When used in reference to a person, the term “identify” shall mean to state the full

name and job title of such person and, in the event such person is currently not an employee of Plaintiff, such person's last known residence address and telephone number.

11. When used in reference to a Document, the term "identify" shall mean to state the date the Document bears, if any, its author(s), location, and a brief description of its form (e.g., memorandum, e-mail, letter, etc.) and contents, as well as the identity of the person(s) known to have possession, custody, or control over the Document.

12. "Safety Grade" or "Hospital Safety Grade" refers to the "letter grade Leapfrog bi-annually assigns to general hospitals in the United States," as described on the Frequently Asked Questions page of Leapfrog's website: <https://www.hospitalsafetygrade.org/frequently-asked-questions>.

13. "Scoring Methodology" or "Methodology" refers to the measures, data, and scoring Leapfrog uses to assign Hospital Safety Grades, as described on Leapfrog's website: <https://www.hospitalsafetygrade.org/media/file/Safety-Grade-Scoring-Methodology-Fall-2024.pdf>.

14. "Hospital Survey", "Leapfrog Survey" or "Survey" refers to the biannual survey administered by The Leapfrog Group to collect information on hospital performance as described on the "Leapfrog Hospital Survey" page of Leapfrog's website: <https://www.leapfroggroup.org/data-users/leapfrog-hospital-survey>.

MATTERS FOR EXAMINATION

1. All facts that support the claims raised against Defendant in the Complaint.
2. Plaintiff's initial disclosures served in the above-styled action.
3. Plaintiff's responses to Defendant's discovery requests, including responses to interrogatories and general document collection efforts for preparing responses to Leapfrog's

requests for production.

4. Plaintiff's policies and procedures for compliance with Plaintiff's patient safety plans.

5. Plaintiff's policies and procedures for compliance with reporting mandated by the Centers for Medicare and Medicaid Services ("CMS").

6. Plaintiff's policies and procedures for practices to prevent errors, including but not limited to Computerized Physician Order Entry, Bar Code Medication Administration, ICU Physician Staffing, and Hygiene.

7. Facts related to Plaintiff's allegations that Leapfrog is a "Pay-to-Play Scheme."

8. Plaintiff's decisions regarding Your participation in the Leapfrog Survey.

9. Plaintiff's non-participation for measures included in the Methodology and Safety Grades.

10. Plaintiff's non-participation in completing the Leapfrog survey which is used to generate Safety Grades for Plaintiff's Hospital.

11. Plaintiff's formal or informal grievance or complaint process You may have initiated in response to Leapfrog's Safety Grade.

12. Plaintiff's claim for damages in the Complaint related to harm to Your reputation.

13. Plaintiff's claim for damages in the Complaint related to harm to Your goodwill.

14. Facts related to reports Plaintiff received from patients that they decided not to use Palm Beach Gardens Medical Center due to Leapfrog's Safety Grade.

15. Facts related to direct inquiries Plaintiff received from patients regarding their concerns about Leapfrog Safety Grades.

16. Plaintiff's communications with Defendant regarding Leapfrog, the Hospital

Survey, and Plaintiff's Safety Grades based on documents produced in response to Leapfrog's requests for production.

17. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's patient volume and referrals.

18. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's market growth.

19. Facts related to the effects of the Safety Grades and Leapfrog Scoring Methodology on Plaintiff's patient referrals based on documents produced in response to Leapfrog's requests for production.

20. Facts related to Plaintiff's market share and position relative to Plaintiff's competitors based on documents produced in response to Leapfrog's requests for production.

21. Plaintiff's participation in consumer perception surveys or market research reports concerning how the public views Plaintiff and how it compares to other competing hospitals based on documents produced in response to Leapfrog's requests for production.

22. Plaintiff's involvement or partnership with organizations that evaluate healthcare performance, including but not limited to Vizient, Inc., Premier, Inc., HealthTrust Purchasing Group, HealthGrades, etc based on documents produced in response to Leapfrog's requests for production.

EXHIBIT 47

**IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF FLORIDA
WEST PALM BEACH DIVISION**

CASE NO. 9:25-CV-80526-DMM

GOOD SAMARITAN MEDICAL
CENTER, INC., et al.,

Plaintiffs,

v.

THE LEAPFROG GROUP,

Defendant.

PLAINTIFFS' WITNESS LIST

Pursuant to FRCP 26(a)(2) and Paragraph 10 of the Court's scheduling order (Dkt 36), Plaintiffs Good Samaritan Medical Center, Inc., Delray Medical Center, Inc., Palm Beach Gardens Community Hospital, Inc. d/b/a Palm Beach Gardens Medical Center, St. Mary's Medical Center, Inc., and West Boca Medical Center, Inc. (collectively, "Plaintiffs"), by and through their undersigned counsel, hereby provides the names and addresses of all witnesses that Plaintiffs currently intend to call at trial.

The list below is provided based on the information currently available to Plaintiffs, and Plaintiffs are not certifying that each of the below witnesses will actually be called to testify live at trial. Rather, the list below includes all witnesses whom Plaintiffs may or will call at trial, and Plaintiffs may present their respective testimony either live or by deposition. Plaintiffs reserve their right to supplement, amend, or modify this witness in connection with outstanding or forthcoming discovery, in response to disclosures made by Defendant The Leapfrog Group ("Defendant"), and/or rulings by the Court.

Plaintiffs reserve their right to call as witnesses Defendant and its authorized representatives. Plaintiffs further reserve the right to call as witnesses any person identified in Defendant's witness list. Plaintiffs further reserve the right to call witnesses for purposes of rebuttal or impeachment. Subject to and without waiving the foregoing rights and objections, Plaintiffs provide the following witness list:

	Witness	Address
1.	Dr. Matt Austin	c/o Zuckerman Spaeder LLP. 100 East Pratt Street, Ste. 2440 Baltimore, MD 21202-1031
2.	Lauren Bailey	c/o Wilson Elser Moskowitz Edelman & Dicker LLP 161 N. Clark, Ste. 4500 Chicago, IL 60601
3.	Kush Banerjee	c/o Wilson Elser Moskowitz Edelman & Dicker LLP 161 N. Clark, Ste. 4500 Chicago, IL 60601
4.	Dr. Jonah Berger	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166
5.	Leah Binder	c/o Wilson Elser Moskowitz Edelman & Dicker LLP 161 N. Clark, Ste. 4500 Chicago, IL 60601
6.	Alexandra Campione	c/o Wilson Elser Moskowitz Edelman & Dicker LLP 161 N. Clark, Ste. 4500 Chicago, IL 60601
7.	Erik Cazares	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166
8.	Thomas Chakurda	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166
9.	Lisa Cook	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166
10.	Missy Danforth	c/o Wilson Elser Moskowitz Edelman & Dicker LLP 161 N. Clark, Ste. 4500 Chicago, IL 60601

	Witness	Address
11.	Jerad Hanlon	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166
12.	Heather Havericak	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166
13.	Karen Jupiter	c/o Wilson Elser Moskowitz Edelman & Dicker LLP 161 N. Clark, Ste. 4500 Chicago, IL 60601
14.	Cynthia McCauley	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166
15.	Sheri Montgomery	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166
16.	Dr. Sean Nicholson	c/o Gibson, Dunn & Crutcher LLP 200 Park Avenue New York, NY 10166
17.	Dr. Patrick Romano	c/o Wilson Elser Moskowitz Edelman & Dicker LLP 161 N. Clark, Ste. 4500 Chicago, IL 60601
18.	Dr. Karen van Caulil	c/o Wilson Elser Moskowitz Edelman & Dicker LLP 161 N. Clark, Ste. 4500 Chicago, IL 60601

Plaintiffs will provide an updated witness list in due course prior to trial, as required by Local Rule 16.1(e)(10).

West Boca Medical Center Recognized Among Top 10% of Hospitals in Nation for GI Care from Healthgrades

Nov 12, 2024

West Boca Medical Center Recognized with 10 Clinical Achievements from Healthgrades

West Boca Medical Center announced today that it has achieved numerous accolades for clinical excellence from [Healthgrades](#), one of the top sites Americans use when searching for a doctor or hospital. Among West Boca's distinctions are two Excellence Awards, one for gastrointestinal care and the other for gastrointestinal surgery and placing in the top 10% of hospitals in the nation for overall GI services and gastrointestinal surgery. West Boca Medical Center was also rated five stars for six services, including colorectal surgery for the 3rd year in a row, treatment of bowel obstruction, treatment of sepsis for the fourth year in a row, treatment of respiratory failure for the 3rd year in a row, and for the ninth year in a row for both vaginal and C-section delivery.

"Healthgrades' recognition of our hospital reflects the hard work and dedication of our staff," said Jerad Hanlon, West Boca Medical Center's CEO. "We're grateful for the opportunity to make a difference in our patients' lives and strive for excellence in every aspect of care."

West Boca Medical Center's achievements are based solely on what matters most: patient outcomes. As part of its 2025 hospital assessment, Healthgrades evaluated risk-adjusted mortality and complication rates for over 30 of the most common conditions and procedures at approximately 4,500 hospitals nationwide to determine the top performers in specialty care. By offering easy access to objective performance measures, Healthgrades helps consumers find and select a hospital that excels in providing the care they need.

As variation in performance among hospitals continues to grow, it is increasingly important for consumers to seek care at top-rated programs. Healthgrades' 2025 analysis revealed that if all hospitals as a group performed similarly to five-star hospitals during the 2021-2023 study period, on average, **224,958 lives could potentially have been saved** and **141,692 complications could potentially have been avoided**.*

"Healthgrades commends West Boca Medical Center for their clear commitment to delivering consistently superior patient outcomes in critical service areas, including gastrointestinal, critical care and OBGYN," said Brad Bowman, MD, chief medical officer and head of data science at Healthgrades. "West Boca Medical Center's leadership, expertise, and unwavering dedication to clinical excellence set a high mark for specialty care in Florida and nationwide."

Consumers can visit [healthgrades.com](#) to learn more about how Healthgrades measures hospital quality and access a patient-friendly overview of how we rate and why hospital quality matters [here](#).

**Statistics are based on Healthgrades analysis of MedPAR data for years 2021 through 2023 and represent three-year estimates for Medicare patients only. [Click here](#) to view the complete 2025 Specialty Awards and Ratings Methodology.*

Palm Beach Gardens Medical Center Achieves 2023 Healthgrades Cardiac Surgery Excellence Award™

Nov 10, 2022

Palm Beach Gardens Medical Center today announced that it has been recognized as a 2023 Cardiac Surgery Excellence Award™ recipient by [Healthgrades](#), a leading marketplace connecting doctors and patients. Healthgrades Specialty Excellence Awards recognize the top 10% of hospitals across the country in 17 specialty care areas. This achievement reflects Palm Beach Gardens Medical Center's outstanding clinical outcomes for Cardiac Surgery and distinguishes Palm Beach Gardens Medical Center as one of the nation's leading hospitals for Cardiac Surgery.

"We have a proven track record of excellence in cardiac care, and this designation is a commitment of our entire team to make us a top hospital for cardiac care," said Palm Beach Gardens Medical Center CEO, Teresa Urquhart. "From being the first hospital in Palm Beach County to perform open heart surgery, to this latest recognition, we are proud to continue our tradition of taking exceptional care of our patients' hearts."

Healthgrades evaluated patient mortality and complication rates for 31 of the most common conditions and procedures at nearly 4,500 hospitals across the country to identify the top-performing hospitals for specialty care. This year's analysis revealed significant variation in patient outcomes between hospitals with a 2023 Healthgrades Specialty Excellence Award and hospitals that did not receive the award. From 2019-2021, patients treated at hospitals receiving the Cardiac Surgery Excellence Award™ have, on average, a 54.9% lower risk of dying than if they were treated in hospitals that did not receive the award.*

"We commend Palm Beach Gardens Medical Center for their ongoing commitment to providing high-quality care to patients undergoing Cardiac Surgery," said Brad Bowman, MD, Chief Medical Officer and Head of Data Science at Healthgrades. "Consumers can feel confident that recipients of the 2023 Cardiac Surgery Excellence Award have demonstrated their ability to deliver consistently exceptional outcomes."

Consumers can visit [Healthgrades.com](#) to learn more about how Healthgrades measures hospital quality and access a patient-friendly overview of the complete methodology [here](#).

**Statistics are based on Healthgrades analysis of MedPAR data for years 2019 through 2021 and represent three-year estimates for Medicare patients only. For appendectomy and bariatric surgery, Healthgrades used inpatient data from 16 states that provide all-payer data for years 2019 through 2021. Palm Beach Gardens Medical Center Nationally Recognized by Healthgrades for Specialty Care

Nov 9, 2023

Palm Beach Gardens Medical Center Recognized with Six Five-Star Achievements from Healthgrades

Palm Beach Gardens Medical Center announced today it has achieved numerous five-star ratings for specialty care, according to new research released by [Healthgrades](#), a leading resource consumers use to find a hospital or doctor. Palm Beach Gardens Medical Center's Five-Star ratings include Heart Failure, Treatment of Chronic Obstructive Pulmonary Disease, Treatment of Pneumonia, Carotid Procedures, Treatment of GI Bleed, and Treatment of Respiratory Failure. In addition, Palm Beach Gardens Medical Center has been recognized in the Top 10% in the Nation for Overall Pulmonary Services, including the only hospital in northern Palm Beach County to earn this recognition. These achievements reflect Palm Beach Gardens Medical Center's commitment to consistently delivering the best care possible and places the organization in the upper echelon of hospitals for specialty care nationwide.

"The recognition from Healthgrades with multiple awards in 2024 is a testament to our unwavering dedication to providing exceptional healthcare at Palm Beach Gardens Medical Center," said Libby Flippo, Palm Beach Gardens Medical Center's interim CEO. "We are incredibly proud of our passionate and skilled team who consistently go the extra mile for our patients. These achievements inspire us to continue raising the bar for high-quality care."

Healthgrades evaluates hospitals solely on clinical outcomes: risk-adjusted mortality and complications. By focusing on what matters most—patient outcomes—Healthgrades ratings provide critical feedback for both patients and hospitals. By offering easy access to objective performance measures, Healthgrades gives consumers the information they need to find a hospital that excels in providing the care they need. And, by shining a light on strengths and weaknesses, Healthgrades ratings help direct hospitals to opportunities for clinical improvement. The 2024 hospital assessment evaluated patient mortality and complication rates for 35 common conditions and procedures at approximately 4,500 hospitals nationwide to identify the top performers.

The 2024 Healthgrades analysis revealed that the variation in performance between five-star and one-star hospitals continues to widen, making it increasingly important to seek care at top-rated programs. From 2020 through 2022, if all hospitals as a group performed similarly to five-star hospitals, on average, 215,667 lives could potentially have been saved, and 149,521 patients could have avoided potential complications.*

"Healthgrades congratulates Palm Beach Gardens Medical Center for being a national leader and demonstrating a deep commitment to providing high quality care to all patients," said Brad Bowman, MD, Chief Medical Officer and Head of Data Science at Healthgrades. "As health systems nationwide endeavor to elevate their quality of care, these elite facilities provide a roadmap for success. We commend [Hospital Name] for their dedication to excellence in patient care."

Consumers can visit [Healthgrades.com](#) to learn more about how Healthgrades measures hospital quality and access a patient-friendly overview of how we rate and why hospital quality matters [here](#).

**Statistics are based on Healthgrades analysis of MedPAR data for 2020 through 2022 and represent three-year estimates for Medicare patients only. [Click here](#) to view the complete 2024 Specialty Excellence Awards and Ratings Methodology.*

West Boca Medical Center Nationally Recognized by Healthgrades for Specialty Care

Nov 13, 2023

West Boca Medical Center Recognized with six Five-Star Achievements from Healthgrades

West Boca Medical Center announced today it has achieved numerous five-star ratings for specialty care, according to new research released by [Healthgrades](#), a leading resource consumers use to find a hospital or doctor. West Boca Medical Center's Five-Star ratings include Vaginal Delivery, C-Section Delivery, Colorectal Surgeries, Treatment of GI Bleed, Treatment of Sepsis, and Treatment of Respiratory Failure. These five-star ratings reflect West Boca Medical Center's commitment to consistently delivering the best care possible and places the organization in the upper echelon of hospitals for specialty care nationwide.

"This remarkable achievement is a testament to our unwavering commitment to providing exceptional patient care and ensuring the highest standards of quality," Jerad Hanlon, West Boca Medical Center CEO, said. "We are dedicated to serving our community with excellence, and these awards validate our relentless pursuit of healthcare excellence."

Healthgrades evaluates hospitals solely on clinical outcomes: risk-adjusted mortality and complications. By focusing on what matters most—patient outcomes—Healthgrades ratings provide critical feedback for both patients and hospitals. By offering easy access to objective performance measures, Healthgrades gives consumers the information they need to find a hospital that excels in providing the care they need. Delray Medical Center Receives an ‘A’ for Patient Safety for the Spring 2019 Leapfrog Hospital Safety Grade

May 17, 2019

Delray Medical Center was awarded an ‘A’ from [The Leapfrog Group](#)’s spring 2019 Leapfrog [Hospital Safety Grade](#). The designation recognizes Delray Medical Center’s efforts in protecting patients from harm and providing safer health care. The Leapfrog Group is a national nonprofit organization committed to improving health care quality and safety for consumers and purchasers. The Safety Grade assigns an ‘A,’ ‘B,’ ‘C,’ ‘D’ or ‘F’ grade to hospitals across the country based on their performance in preventing medical errors, injuries, accidents, infections and other harms to patients in their care.

“With our high standard of safety and commitment to quality care at Delray Medical Center, we are so proud to achieve this distinguished award,” said Delray Medical Center Chief Executive Officer, Maggie Gill. “This designation is a testament to our patients that we are providing them with the highest level of safety and care every day when they come into our hospital.”

“To be recognized nationally as an ‘A’ hospital is an accomplishment the whole community should take pride in,” said Leah Binder, president and CEO of The Leapfrog Group. “Hospitals that earn an ‘A’ grade are making it a priority to protect patients from preventable medical harm and error. We congratulate hospital leaders, board members, staff, volunteers and clinicians who work so hard to earn this A.”

Developed under the guidance of a [national expert panel](#), the Leapfrog Hospital Safety Grade uses 28 measures of publicly available hospital safety data to assign grades to more than 2,600 U.S. acute-care hospitals twice per year. The Hospital Safety Grade’s methodology is peer-reviewed and fully transparent, and the results are free to the public.

Delray Medical Center was awarded an ‘A’ grade today, when Leapfrog announced grades for the spring 2019 update. To see Delray Medical Center’s full grade details, and to access patient tips for staying safe in the hospital, visit [hospitalsafetygrade.org](#) and follow The Leapfrog Group on [Twitter](#) and [Facebook](#).

Healthgrades Names Delray Medical Center as One of America's Best 250 Hospitals

Jan 3, 2025

DELRAY BEACH, FL – Jan. 3rd, 2025 – Delray Medical Center announced today that it is one of the best 250 hospitals in the country, according to [Healthgrades](#), one of the top sites Americans use when searching for a doctor or hospital.

The hospital earned 25 accolades from Healthgrades recently, including being named one of America's 100 Best Hospitals for Pulmonary Care Excellence Awards, placing the hospital among the nation's top 5% for overall pulmonary services. The hospital also earned Healthgrades 2025 Critical Care Excellence Award, placing in the top 5% in the nation for critical care.

"It is an incredible honor to be among the best 250 hospitals in the country. This recognition is not earned by one person or one department, it is earned collectively as a team," said the hospital's CEO Heather Havericak. "We strive every day to put our patients first, focusing on quality care to give our patients the best chance at a positive outcome. This award is a reflection of our incredible team."

Here is the full list of all the awards earned:

Cardiac Care

- **Five-Star Recipient for Valve Surgery** (2024-2025, 2 Years in a Row)
- **Five-Star Recipient for Treatment of Heart Attack** (2024-2025, 2 Years in a Row)
- **Five-Star Recipient for Treatment of Heart Failure** (2003-2025, 23 Years in a Row)
- **Five-Star Recipient for Defibrillator Procedures** (2024-2025, 2 Years in a Row)
- **Five-Star Recipient for Treatment of Stroke** (2008-2025, 18 Years in a Row)

Pulmonary Care

- **One of Healthgrades America's 100 Best Hospitals for Pulmonary Care in 2025**
- **Recipient of the Healthgrades 2025 Pulmonary Care Excellence Award**
- **Top 5% in the Nation for Overall Pulmonary Services** (2025)
- **Top 10% in the Nation for Overall Pulmonary Services** (2025)
- **Five-Star Recipient for Treatment of Pneumonia** (2024-2025, 2 Years in a Row)

Critical Care

- **Recipient of the Healthgrades 2025 Critical Care Excellence Award**
- **Top 5% in the Nation for Critical Care** (2025)
- **Top 10% in the Nation for Critical Care** (2025)
- **Five-Star Recipient for Treatment of Sepsis** (2004-2025, 22 Years in a Row)
- **Five-Star Recipient for Treatment of Respiratory Failure** (2023-2025, 3 Years in a Row)

Delray Medical Center's achievements are based solely on what matters most: patient outcomes. As part of its 2025 hospital assessment, Healthgrades evaluated risk-adjusted mortality and complication rates for over 30 of the most common conditions and procedures at approximately 4,500 hospitals nationwide to determine the top performers in specialty care. By offering easy access to objective performance measures, Healthgrades helps consumers find and select a hospital that excels in providing the care they need.

As variation in performance among hospitals continues to grow, it is increasingly important for consumers to seek care at top-rated programs. Healthgrades' 2025 analysis revealed that if all hospitals as a group performed similarly to five-star hospitals during the 2021-2023 study period, on average, **224,958 lives could potentially have been saved** and **141,692 complications could potentially have been avoided**.*

"Healthgrades commends Delray Medical Center for their clear commitment to delivering consistently superior patient outcomes in critical service areas, including pulmonary, critical care, and cardiovascular," said Brad Bowman, MD, chief medical officer and head of data science at Healthgrades. "Delray Medical Center's leadership, expertise, and unwavering dedication to clinical excellence set a high mark for specialty care in Florida and nationwide."

Consumers can visit [healthgrades.com](#) to learn more about how Healthgrades measures hospital quality and access a patient-friendly overview of how we rate and why hospital quality matters [here](#).

**Statistics are based on Healthgrades analysis of MedPAR data for years 2021 through 2023 and represent three-year estimates for Medicare patients only. [Click here](#) to view the complete 2025 Specialty Awards and Ratings Methodology.*

West Boca Medical Center Achieves 2023 Healthgrades Gastrointestinal Care Excellence Award™

Nov 4, 2022

West Boca Medical Center today announced that it has been recognized as a 2023 Gastrointestinal Care Excellence Award™ recipient by [Healthgrades](#), a leading marketplace connecting doctors and patients. Healthgrades Specialty Excellence Awards recognize the top 10% of hospitals across the country in 17 specialty care areas. This achievement reflects West Boca Medical Center's outstanding clinical outcomes for gastrointestinal care and distinguishes West Boca Medical Center as one of the nation's leading hospitals for gastrointestinal care.

"At West Boca Medical Center, we are so proud to be recognized for our gastrointestinal care. It is a testament to the high-quality care we provide," said West Boca Medical Center CEO, George Rizzuto. "We understand that patients have a choice, and we are proud to be recognized for our exceptional clinical outcomes."

Healthgrades evaluated patient mortality and complication rates for 31 of the most common conditions and procedures at nearly 4,500 hospitals across the country to identify the top-performing hospitals for specialty care. This year's analysis revealed significant variation in patient outcomes between hospitals with a 2023 Healthgrades Specialty Excellence Award and hospitals that did not receive the award.

From 2019-2021, patients treated at hospitals receiving the Joint Replacement Excellence Award™ have, on average, 28.4% lower risk of experiencing a complication or dying while in the hospital than if they were treated in hospitals that did not receive the award.*

"We commend West Boca Medical Center for their ongoing commitment to providing high-quality care to patients being treated for Gastrointestinal Care," said Brad Bowman, MD, Chief Medical Officer and Head of Data Science at Healthgrades. "Consumers can feel confident that recipients of the 2023 Gastrointestinal Care Excellence Award have demonstrated their ability to deliver consistently exceptional outcomes."

In addition to being recognized Among the top 10% in the Nation for Overall GI Services for 2 Years in a Row (2022-2023), West Boca Medical Center has also been recognized as a Five-Star Recipient for Treatment of Sepsis for 2 Years in a Row (2022-2023) and a Five-Star Recipient for Treatment of Respiratory Failure in 2023.

Consumers can visit [Healthgrades.com](#) to learn more about how Healthgrades measures hospital quality and access a patient-friendly overview of the complete methodology [here](#).

**Statistics are based on Healthgrades analysis of MedPAR data for years 2019 through 2021 and represent three-year estimates for Medicare patients only. For appendectomy and bariatric surgery, Healthgrades used inpatient data from 16 states that provide all-payer data for years 2019 through 2021.
